THE greatest book on poultry ever published, contains sixty-five pages of reading matter, size 9x12 inches, also contains illustrations of 198 different fowls in their natural colors, painted from life. Regular price \$1.00. It has taken years to complete the drawings for this book. It is something never before attempted by any publication, not even the Standard of Perfection contains pictures of fowls in colors.

This book is being sold for \$1.00 every day, but we want every poultryman to have one, as it is the grandest piece of work ever accomplished in poultry literature and is a living ad for its publishers—American Poultry Journal Publishing Co. To accomplish our object and get a copy of this book into the hands of every poultry fancier, we will give one copy FREE for the first six subscriptions to American Poultry Journal you send us at one-half our regular subscription price.

Send us six subscriptions to American Poultry Journal together with \$1.50 and we will send you, postpaid, a copy of the Origin and History of All Breeds of Poultry.

BUT THIS IS NOT ALL

You can take subscriptions at any price from 25 to 50 cents and keep everything above 25 cents as your commission. For the first six subscriptions you send us you will receive a copy of the Origin and History of All Breeds of Poultry as per offer above and these subscriptions will count on the grand prizes listed below as well as any other subscriptions you send us.

Do not fail to read this list carefully as the prizes are well worth your time and trouble and will many times repay your efforts to secure the subscriptions for us.

LIST OF GRAND PRIZES

First Prize

\$600
WING PIANO

The best piano manufactured by the well-known piano manufacturers, Wing & Son, New York City, N. Y., will be given the agent sending us the largest number of subscriptions before June 10, 1910. : : : : :

Second Prize

\$100
CASH

Will be given the agent sending us the second largest number of subscriptions before June 10, 1910. : : : : :

\$200.00 will be distributed among the eight next highest agents as follows:

3d Prize, \$50	Pen of Fowls, your choice, or Incubator or Brooder, any make you desire
4th Prize, \$35	" " " "
5th Prize, \$30	" " " "
6th Prize, \$20	Trio of Fowls, your choice, or Incubator or Brooder, any make you desire
7th Prize, \$20	" " " "
8th Prize, \$15	" " " "
9th Prize, \$15	" " " "
10th Prize, \$15	" " " "

In making your selection of Fowls, Incubators or Brooders, they must be selected from Advertisers in American Poultry Journal

Special Instructions to Agents

1. Renewals count the same as new subscriptions. 2. Cash must accompany all subscriptions; this will avoid any misunderstanding. 3. Keep a duplicate list of all subscribers sent us in case any question arises when the contest closes. 4. In case of a tie the value of the prize will be divided. 5. The subscription contest closes June 10th, 1910. All letters postmarked that day will be counted, thus giving those at a distance an equal chance with those near. 6. A list of the winners will be given in the July issue, 1910. 7. All agents may work where they please; this is fair to all. Send for more coupons or any supplies you need. 8. The coupons are made with receipts at the side to be torn off and given to subscribers. This assures the subscriber that you are our authorized agent. 9. No subscription can be sold for less than 25 cents. 10. You must send at least two subscriptions to entitle you to agents' commission or prizes. 11. All subscriptions must be taken on the merits of the publication. 12. Notice—Sell our book, "Origin and History of All Breeds of Poultry," at \$1.00 and keep 25 cents as your commission, this will count as four subscriptions on the contest. Also, take three years' subscriptions to American Poultry Journal at \$1.00 and keep 25 cents as your commission, this also will count as four subscriptions on the contest. : : : : :

TODAY IS THE TIME TO START if you wish to secure one of our new books FREE. Remember, too, that if you get an early start you have the advantage of always being in the lead, and this is better than to be always trying to catch up with the other fellow.

We will furnish you with a sheet of special bargain coupons which you can use if you desire. These coupons have been successfully used on former contests and whereas you only receive 10 cents as your commission when using same, you will find that you can get many more subscribers. In fact, we have agents who give all of their commission to the subscriber and in this manner get many more subscriptions. Send for as many sample copies as you can use to advantage and they will be sent you free of charge.

American Poultry Journal Pub. Co., 358 Dearborn St., Chicago

NOTICE: SEE OTHER PAGE FOR SPECIAL OFFER THIS MONTH

Special Offer for Month of March, 1910

WE WILL give the following prizes to the agents sending us the largest number of subscriptions during the month of March, 1910. If you want a first-class incubator, brooder or a choice trio of fowls without cost, this is your opportunity. **START TODAY!**

1st Prize---A \$20 incubator or brooder, any make you desire, or a \$20 pen of fowls, any variety, advertised in American Poultry Journal, will be given the agent who sends us the largest number of subscriptions to American Poultry Journal during the month of March, 1910.

2d Prize---A \$15 trio of fowls, any variety, or a \$15 incubator or brooder, any make you desire, advertised in American Poultry Journal, will be given the agent who sends us the second largest number of subscriptions to American Poultry Journal during the month of March, 1910.

3d Prize---A \$10 incubator or brooder, any make you desire, or a \$10 pair of fowls, any variety, advertised in American Poultry Journal, will be given the agent who sends us the third largest number of subscriptions to American Poultry Journal during the month of March, 1910.

These prizes are given in addition to the grand prizes on opposite page, and all subscriptions sent us during this month will count on both the special March prizes and the grand prizes; therefore you can win an incubator, brooder or fowls, besides a grand prize if you start to work right now.

Do not delay to take advantage of this opportunity to kill two birds with one stone. Remember, you send 25c to us for each subscription and keep the balance of the money as your commission. You receive our grand book, "Origin and History of All Breeds of Poultry," for the first six subscriptions you send us besides your commission and the chance to win one of the March special and grand prizes; also you receive four counts for every 3-year subscription and every "Origin and History of All Breeds of Poultry" which you sell.

Send for samples and coupons today; they will be sent you at once free of charge. Start today, as you are getting in on the ground floor. Send all subscriptions to

PEARL GRIT

We Know You Want Profit

WE can show you the way to extra revenue from your poultry yards. PEARL GRIT is one of the things that you will buy again. You try it once, and you will want to continue its use. We know that, because we have thousands of PEARL GRIT customers who never allow their supply to be exhausted. Ask a PEARL GRIT customer why. He knows, and a trial will convince a new customer—one of the kind that buys repeatedly because the money he invests comes back to him repeatedly. We have a lot of evidence to prove this. It is sent along to inquirers with our FREE Pearl Grit Booklet. There may be someone in your neighborhood using PEARL GRIT. We would like to tell you who it is so you

could learn for yourself why it pays us to spend money for advertising — our business is not made up of one-time trial orders, but continuous business from satisfied customers. We can show you the way to make money from poultry. Will you write us to-day?

Made in a few minutes; very simple and reliable. Complete plans only 25 cents. Poultry supply catalogue free.

Geo. Sturdivant, Box 9, Sheboygan Falls, Wis.

EGGS

From Ferris' S. C. White Leghorns

Will produce winners and layers. They have been bred in line for years for size, vigor and eggs as well as for standard requirements. Their winnings at the leading shows, including Toledo, Chicago, Louisville, St. Louis, Detroit, Grand Rapids and the Michigan and Indiana State Fairs, and in our customers' hands at practically every show of importance in the country, is proof of their quality.

We have ten exhibition matings this season, prices ranging from \$3 to \$15 per setting. Every pen contains winners mated to produce chicks that will win in strong competition. If you want to raise exhibition stock of the very finest quality, send for our mating list. It describes the matings fully and tells just why you should breed Ferris Leghorns.

Our choice utility eggs at \$1.50 per setting, \$7.50 per 100, are worth much more. We guarantee 90 per cent fertility and replace infertile eggs free of charge, the same as from our exhibition matings. The birds in these utility matings will score from 90 to 94 and they are large, vigorous and the best of layers.

Send for free catalogue and mating list containing prices, winnings and full particulars regarding this strain of winners bred to pay.

is where Rhode Island Red Breeders actually harvest; eggs from descendants of my Madison Square Garden winners. \$1 per setting; \$3.50 for 50.

Tel. 314-4 West Medford, Massachusetts

Wing's S. C. Black Minorcas

Are prize winners and great layers. At the recent Grand Rapids show we won first cock, first and second pullet and first hen. Chief Big Comb heads our breeding pens. He weighs 9½ pounds. Has been exhibited five times in New York State and Michigan in 1909-10, and won five blue ribbons. He is a strong, vigorous bird and as a sire has proven especially fine for pullets. Our layers are kept in flocks of 6 hens each. They are in the very pink of condition. We give to a flock of 200 nearly all our time and attention. They have layed well November, December and January. They are bred to strong, healthy cockerels, entirely unrelated. We are offering on account of room a few May hatched pullets now laying at \$4 each. No culls. Will book orders for two months old pullets from best pens at \$1 each, delivered June 1st or thereafter. This is a proposition worth considering. Eggs for hatching, \$1.50 to \$3 per 15. Order early. Send for catalogue.

F. C. Wing : : Box 152, Wayland, Michigan

SINGLE COMB BUFF AND WHITE ORPINGTONS

Of the highest type and quality. None better. A grand lot of young birds for exhibition and breeding purposes at reasonable prices.

EGGS FOR HATCHING

from six grand pens, \$3 and \$5 per 15. Illustrated mating list free. My stock and prices are right. Write me your wants. Satisfaction guaranteed.

Edgemere : : C. A. Keefer, Prop. : : Muskegon, Michigan

CHAS. F. HOMPSON & Co. LYNNFIELD CENTER, MASS.

RHODE ISLAND REDS : BARRED ROCKS : WHITE WYANDOTTES

Now booking orders for day-old chicks. 200 egg strain. Eggs, \$1, \$2, \$5 per sitting; \$6, \$10, \$20 per 100. Catalogue free. Stamp for Red Standard.

Morgantown, W. Va., Jan. 4, 1910.
Dear Sir:—Last spring I got some eggs of you and am very proud of the results, as I have one cockerel that is a true Edward B. Jr. At our recent show this cockerel won 1st, also specials for best Plymouth Rock male, best bird on exhibition, best cockerel of any variety, best specimen of any class, best bird in American class, best male bird in the show, making six specials in a class of 500 birds. Blood lines will tell. Yours respectfully,
S. B. Allen.

Reynolds, Ill., Dec. 27, 1909.
Dear Sir:—I have just learned that at the show I won silver cup for the 10 highest scoring birds in the show, and I am pleased to say there were 78 White Rocks in the show, of which nearly all the good ones were Fishel Strain. I am more than pleased with results obtained from the eggs. I beg to remain
Yours very respectfully, P. N. Crabs.
Barnesville, Ga., Dec. 19, 1909.
Dear Sir:—The \$15 pen of White Plymouth Rocks bought of you have given the finest re-

sults and have paid for themselves in eggs alone, besides I have a nice flock of 40 young birds reared from them. Yours truly,
C. H. Humphrey.
Philadelphia, Pa., Sept. 27, 1909.
Dear Sir:—Birds arrived safely. Accept my warmest thanks for the selection. They are the most beautiful I have ever had. After being inspected by one who knows he remarked that "no where could they be duplicated at the price." Again thanking you, I beg to remain
Yours truly, C. G. Mueller.

What Others Say

about the treatment they have received at my hands will surely interest you and convince you that

U. R. Fishel's White Ply. Rocks

are all and more than we have ever claimed for them. Remember, our whole life has been devoted to the production of the very best possible in poultry. No wonder then our White Plymouth Rocks stand so far ahead of every other strain and are conceded everywhere to be

"The Best in the World"

Send two dimes for 56-page catalog, and remember we have several thousand birds yet to sell and are in position to give you better value and better blood lines than any other breeder of this variety. We have about fifteen hundred cockerels, the new Standard type, that we are selling at \$3, \$5, \$8 and \$10 each. Strong, farm-raised vigorous fellows—just the kind to give you results.

U. R. Fishel, Box A, Hope, Ind.

R. F. D. No. 2 : ATKINS, MICHIGAN

World Famous

INCUBATORS, BROODERS AND SELF-TURNING TRAYS

SECOND to none, because the correct method of turning the eggs is used. It is impossible to turn the egg around the embryo. The old method of turning by hand will bring bad results, sometimes the loss of a whole "hatch," and this will happen sometimes with a hen. We move step by step. That we used to wear boots is no reason that we shall wear them now. My machine has awakened the world to realize the fact that it never knew what a REAL incubator is. Until my machine was placed before the public they have been groveling in darkness as regards the hatching of chickens.

"World Famous" ranks

first, which place it will continue to hold, because: It never turns the egg on end; never turns the egg around the embryo; never breaks the spider in the egg; turns all the eggs as easily as one; it is impossible to overheat it, yet it is the easiest machine on earth to heat. It never cooks the egg, or the chick in the egg.

Remember, I guarantee this machine to hatch every fertile or hatchable egg, and that it will hatch more livable chickens, eggs being equal, (test three hatches) than any other machine.

Now, you want the best machine on earth, don't you? Then send for my catalog. It's free. It gives full information regarding my machine; it gives valuable information on diseases and cures for poultry; **FREE**.

My Brooder is so arranged that there is the least possible danger of its getting too hot and roasting the chicks, and I guarantee it not to do so. This often happens with the common brooder.

Remember, my heating system is superior in that it saves half your fuel, maintaining at all times **EVEN TEMPERATURE**.

"Useless to lock the barn after the horse is stolen" applies in selecting an incubator. Why use the old method which causes half the chickens to die in the egg and the other half to be weaklings that are difficult to raise? "Lock the barn door" in good time! Start right and the end will be satisfactory. Send for my catalog; it's free.

W. M. Lininger, Box 153, Hinton, Okla.

MICA-CRYSTAL THE BEST GRIT ON THE MARKET

Contains Mica, Iron, Magnesium and Quartz, each in its purest and best form. It is of such peculiar formation that it will not take a polish as is the case with grit made from white quartz or marble and unlike limestone grit, or grit of like soluble substances, is not dissolved by the fluids in the crop, consequently it never loses its sharpness. It sharpens itself by contact, the only grit that does, and therefore excels all others as a grinder.

Without grit the feathered tribe cannot be healthy or productive. This is a well demonstrated fact in nature. Grit is to the fowl what teeth are to other members of animal creation.

Let us prove the truth of what we say by filling a sample order for you. Manufactured only by **MICA-CRYSTAL CO. - - - CONCORD, N. H.**

BUFF, BLACK, WHITE AND DIAMOND JUBILEE

ORPINGTONS

NONE BETTER BRED. At the great Boston Show, Jan. 12-16, 1909, we won the following in strong competition: 1st pullet, 3d hen, 5th cock, 5th ckl. and 2d pen in Buffs; 2d cock, 3d hen and 1st pen in Blacks; 1st pen in Whites; 1st ckl., 1st and 2d pullet, 3d and 4th hen in Diamond Jubilees. Send for 1910 mating list containing these grand matings.

H. B. PRESCOTT - Box 38 - Derry Village, N. H.

Your Opportunity

To get eggs from matings of Barred and White Rocks, White Wyandottes and Golden Sebright Bantams equal to any in the United States. \$3.00 per 15, \$5.00 per 30, \$15.00 per 100. Size, shape, color, vigor and each free exclusive farm range.

Our New **Poultry Book**

ORIGIN AND HISTORY OF ALL BREEDS OF POULTRY

This Book Gives a Complete History and the Origin of all the Recognized Varieties of Chickens, Ducks, Geese and Turkeys, and is

Illustrated With 198 Colored Pictures of Fowls Painted From Life

SOMETHING NEVER BEFORE ATTEMPTED BY ANY PUBLISHER

This is, without question, the greatest book ever published on poultry. The artist's work alone on this book took almost one year's time to complete, but it shows the fowls in their natural colors and correct shape, and these colored pictures, together with the history of each variety, gives the fancier all the information to produce fowls for either exhibition or breeding.

How to Mate

This book also tells how to properly mate the different varieties of fowls to produce birds that will conform to Standard requirements. This is something that even the Standard of Perfection does not do. It tells you at a glance what it will take years of practical experience to learn. It is a book that no breeder or fancier can afford to be without, as it is just as suitable for the needs of the experienced fancier as for the amateur.

Price Only \$1.00

American Poultry Journal Pub. Co.

358 DEARBORN STREET

CHICAGO, ILLINOIS

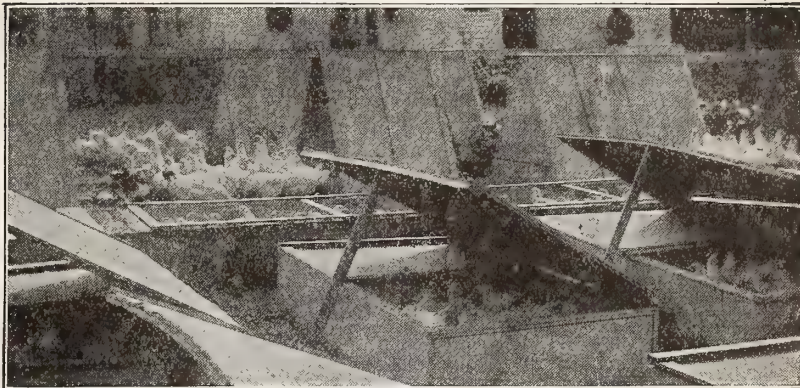

A LIVING FROM POULTRY

\$1,500.00 from Sixty Hens in Ten Months on a City Lot 40 Feet Square

TO the average poultryman that would seem impossible and when we tell you that we have actually done a \$1,500 poultry business with sixty hens on a corner in the city garden forty feet wide by forty feet long, we are simply stating facts. It would not be possible to get such results by any one of the systems of poultry keeping recommended and practiced by the American people, still it is an easy matter when the new

Philo System

is adopted.

The Philo System is Unlike All Other Ways of Keeping Poultry

and in many respects just the reverse, accomplishing things in poultry work that have always been considered impossible, and getting unheard-of results that are hard to believe without seeing.

The New System Covers All Branches of the Work Necessary for Success

from selecting the breeders to marketing the product. It tells how to get eggs that will hatch, how to hatch nearly every egg and how to raise nearly all the chicks hatched. It gives complete plans in detail how to make everything necessary to run the business and at less than half the cost required to handle the poultry business in any other manner.

Two Pound Broilers in Eight Weeks

are raised in a space of less than a square foot to the broiler without any loss, and the broilers are of the very best quality, bringing here three cents per pound above the highest market price.

Our Six-Months-Old Pullets Are Laying at the Rate of 24 Eggs Each Per Month

in a space of two square feet for each bird. No green cut bone of any description is fed, and the food used is inexpensive as compared with food others are using.

Our new book, the **Philo System of Poultry Keeping**, gives full particulars regarding these wonderful discoveries, with simple, easy-to-understand directions that are right to the point, and fifteen pages of illustrations showing all branches of the work from start to finish.

Don't Let the Chicks Die in the Shell

One of our secrets of success is to save all chickens that are fully developed at hatching time, whether they can crack

the shell or not. It is a simple trick and believed to be the secret of the ancient Egyptians and Chinese which enabled them to sell the chicks at ten cents a dozen.

Chicken Feed at 15 Cents a Bushel

Our book tells how to make the best green food with but little trouble and have a good supply, any day in the year, winter or summer. It is just as impossible to get a large egg yield without green food and is to keep a cow without hay or fodder.

Our New Brooder Saves Two Cents on Each Chicken

No lamp required. No danger of chilling, over-heating or burning up the chickens as with brooders using lamps or any kind of fire. They also keep all the lice off the chickens automatically or kill any that may be on them when placed in the brooder. Our book gives full plans and the right to take and use them. One can easily be made in an hour at a cost of 25 to 50 cents.

Testimonials

Bellefontaine, Ohio, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I just want to tell you of the success I have had with the Philo System. In January, 1909, I purchased one of your Philo System books and I commenced to hatch chickens. On the third day of February, 1909, I succeeded in hatching ten chicks. I put them in one of your fireless brooders and we had zero weather. We succeeded in bringing through nine, one got killed by accident. On June 1, one of the pullets laid her first egg, and the most remarkable thing is she has laid every day since up to the present time. Yours truly,

R. S. LaRue.

Valley Falls, N. Y., September 10, 1909.

My Dear Mr. Philo:—I want to tell you how pleased I am with my use of the Philo System during the past year. The fowls laid exceptionally well in the New Economy Coop. much better in proportion than those in my old style house. The fireless brooder has solved the problem for me of raising extra early chicks. I am going into your methods more extensively this coming year. Wishing you success, I am, Sincerely yours,

(Rev.) E. B. Templer.

Osakis, Minnesota, June 7, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—You certainly have the greatest system the world has ever known. I have had experience with poultry, but I know you have the system that brings the real profits.

Yours, Jesse Underwood.

Brockport, N. Y., Sept. 12, 1908.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I have had perfect success brooding chickens your way. I think your method will raise stronger, healthier chicks than the old way of using lamps and besides it saves so much work and risk.

Yours respectfully,
M. S. Gooding.

South Britain, Conn., April 10, 1909.

Mr. E. R. Philo, Elmira, N. Y.

Dear Sir:—I have followed your system as close as I could; the result is a complete success. If there can be any improvement on nature, your brooder is it. The first experience I had with your System was last December. I hatched seventeen chicks under two hens, put them as soon as hatched in one of your brooders out of doors and at the age of three months I sold them at 35 cents a pound. They then averaged two and a half pounds each, and the man I sold them to said they were the finest he ever saw, and he wants all I can spare this season. Yours truly,

A. E. Nelson.

Send \$1.00 direct to the publisher and a copy of the latest revised edition of the book will be sent you by return mail.

E. R. Philo, Publisher, 14 Third Street, Elmira, New York

The Poultry Review A monthly magazine devoted to progressive methods of poultry keeping. \$1.00 a year. Edited by E. R. Philo, author of the Philo System book. Results of experiments on his poultry plant are given each month. Rev. W. W. Cox, associate editor, is handling a six-hen plant by the Philo System and will give full particulars each month of every step taken to secure the largest returns from six hens. Also a review of the best poultry articles from other publications. The price of the Review is \$1.00 a year for twelve copies by mail, postpaid. Or with the Philo System book for \$1.50.

Three Pound Roasters Ten Weeks Old

Buff Wyandottes

At the great Mo. State Show in one of the best classes ever shown, with twelve exhibitors, won first and third hen, third cockerel, second and fifth pullet and first pen, winning three times as much as any other exhibitor. This, with our winnings at Chicago, St. Louis, Evansville and Illinois State Fair, clearly proves our strain the BEST IN THE WEST. Prices reasonable. Satisfaction guaranteed.

Do you want to prevent stomach and bowel troubles in your yards? Then use

The Norwich Automatic Exerciser and Feeder

Feed delivered is always fresh and clean. Necessitates slow feeding and makes the flock work for its living. You will never see your hens roosting on dust boxes or roost all drawn up, if you use the Norwich Automatic Exerciser and Feeder; they will all be on their feet hustling and the exercise makes them lay. Every one gets its share of feed, the weaker as well as the stronger, and the use of the machine will positively bring up the vitality of the flock.

Guaranteed absolutely rat and bird proof, and to save 20 per cent on feed bills, or money and expenses refunded. It will cost you nothing to prove our claims. Write us—it will pay you.

Norwich Automatic Feeder Company
20 Water Street Norwich, Conn.

Our Wonderful Book Offer

Successful Poultry Culture, Only 50 Cents

American Poultry Journal has just closed a contract with the publishers of "**Successful Poultry Culture**," which enables us to offer this book for one-half its regular selling price, \$1.00. This is such a really good offer and such a bargain that we want every reader to read this ad carefully and take advantage of this great bargain offer. This book has always sold heretofore for \$1.00, and thousands of copies and two editions have been sold at that price, and not one kick has ever been received.

Mr. Clarence Ward

the author of "**Successful Poultry Culture**," is a son of C. J. Ward, the founder and for eighteen years the publisher of American Poultry Journal. He was brought up in a hen coop, and is one of the best experts on poultry culture in the country.

Successful Poultry Culture

contains 128 pages and 30 handsome illustrations of fowls and practical plans for building poultry houses. It is a thorough and scientific treatise on raising poultry for profit; and is especially designed for the beginner. If the instructions in this book are followed success will surely crown your efforts. The publishers have sold thousands of copies of this book to satisfied buyers all over the country, and they can show testimonials by the hundreds from people who would not take fifty times the price of the book if they could not get another one. The chapter on "Scientific Feeding" is alone worth many times the price of the whole book as it actually tells how to

Save Three-Fourths Your Feed Bill

This system of feeding is the greatest and most valuable discovery made in the twentieth century to the poultry man. It will actually double and triple your profits from the start, and has been tried in many large and small poultry plants with the greatest success, and in every case it has placed these poultry plants on a large dividend-paying basis.

The largest item of expense in raising chickens is the feed bill, and if you can reduce this bill three-fourths, it stands to reason that the matter of big profits is solved.

The revised edition of this book,

Successful Poultry Culture

contains a chapter on Scientific Feeding that fully explains this method of feeding. It is based on a fundamental law of nature and is a correct and scientific principle of feeding chickens and ducks that will **save three-fourths the feed bill**, and at the same time will make your young chickens grow faster, lessen the mortality, make young pullets lay at four and five months old; also mature young cockerels for market and show room at the same age. It will make your hens lay in midwinter every day, when market eggs are bringing the highest prices; will keep your laying stock in perfect health in close confinement, and your hens will lay fertile eggs that will hatch strong, vigorous chicks that will live. In fact, with this method of feeding you can

Double and Triple Your Profits in the Poultry Business

This is not a patented or prepared food sold by some manufacturer at a high price. If you know how, all you have to do is to buy one bushel of common grain at the market price, take it home and make **four bushels**, which four bushels will contain more and better food value than the original bushel of grain.

No expense in preparing it; no machinery of any kind needed; no fire or cooking, and it takes less time than to cook a mash and is as easy to feed as common grain. The 128-page new and revised edition of

Successful Poultry Culture

contains this valuable information, and is worth a hundred times its price to every poultryman and stock raiser. It makes no difference whether you keep only a few chickens and one cow or a thousand of each, you cannot afford to be without it. Remember, we guarantee it will tell how to **save three-fourths your feed bill**.

Buy the Book, Price Reduced to 50 Cents

Do it today, for you will need it when you want to sell eggs at high winter prices and at the same time **save three-fourths your feed bill**. If you keep only twenty hens this book will save you twice its price in a few weeks' time after getting it. If you keep more it will **double and triple your profits every day in the year**. Send all orders to

MORE PROFITS ON HOGS

My friend:—Have you hogs? Will you accept \$100 extra for feeding them?

Jones fed his hogs the same amount of corn that Smith did. Jones made his gain from 160 to 260 pounds. At 7½ cents a pound this made \$2.25 difference per hog that Smith got out of his feeding over what Jones did, just because Jones did not know how. He was not progressive and Smith was.

Jones' 50 hogs brought him \$975, while Smith's 50 hogs brought \$1,087.50. Smith's knowledge therefore was worth to him \$112.50. It shows that knowing how makes success not only for the farmer as well as the lawyer and banker; it enables them all to make money. This tip ought to be worth something to you; some will make it worth \$100 this fall.

It isn't what the hog eats; it is what he digests that makes the money. Experience is our best teacher. We are all in a school, learning. We could preach you a great sermon on this; but you have no time for words or arguments. You want quick money. It costs the man who first proves an undiscovered fact (which, of course, always existed), but the man doing so is a benefactor as well as an educator of his fellow-farmer.

The principal cost of producing pork is the feed. Prof. Dietrich says "90 per cent of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to progress; the others will continue to lose the hundred dollars a year.

"For \$1 we will send you the American Swineherd, the aggressive and progressive acknowledged leader, devoted to the swine industry, for 4 years, and will give you as a premium the Progressive, Scientific Feeding Formula for increasing the gain while feeding, fattening hogs, a half pound a day per hog over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs.

It is simple, sensible and just as easy feeding as the old way. Yet it is progressive and scientific. It is of such real value that no sensible man can ignore it. It has been proved so conclusively and repeatedly that we have an abiding faith in it and agree to make good or give money back, making you absolutely safe.

This fair offer is good for 10 days.

We also give additional premium, copy of the Pig Feeder's Manual, itself worth double to any hog raiser what you pay us. The paper stops at the time paid to.

Address, with \$1,

American Swineherd Publishing Co.
542 Como Building, Chicago, Illinois

ROSE COMB WHITE LEGHORNS

World's best strain. Winnings at Buffalo International Show, 1910, first pullet, first hen, second cockerel on three entries. Silver cup for best display of all Leghorns competing at Detroit, Jan., 1910. Stock for sale. Eggs in season.

ALLEE'S WHITE LANGSHANS

First prize winners at Chicago, 1908-1909. Choice matings for 1910. Grand breeders and show birds for sale. Please mention A. P. J.

THADDEUS E. ALLEE : 1325 EAST 55th ST. : CHICAGO, ILL.

**Silver Laced Wyandottes, Houdans and Indian Runner Ducks**

Of the rarest quality. At the great Chicago Show, December, 1909, on seven entries we won 5 firsts, 1 second, 1 third and 3 specials. Also winners at Illinois State Fair and Libertyville. Greatest layers in America. Line bred over thirty years. In 1900 we furnished the late T. E. Orr with his entire flock of Silvers, including the majority of his sensational winners for his Beaver Hill Farm. Have nine grand matings to supply our egg trade for 1910. The picture here is not the kind of birds we breed. If you are interested in any of our varieties, we will mail you circular on request containing life-like reproductions of unretouched photos of live birds in our own yards today. Write today.

Blue Bell Farm, W. J. Patton, Proprietor, Vice-President The Houdan Club, Glenview, Illinois

R. C. Rhode Island Reds

WE WON UNDER LESTER TOMPKINS

At the great Youngstown Show, January 10 to 17, 1910, in competition with New York and Chicago winners. Second hen, third pen, fourth cock, fourth cockerel and fourth pullet. A few bargains in breeding cockerels left at \$5 each. Send for our illustrated egg circular containing cuts of some of our famous winners from life. It also contains information every Red breeder ought to know. It is free for the asking. Send today.

Simmons & Crittenden - - - Geneva, Ohio

**Golden Wyandottes**

The Simmons Goldens of Quality won this season at N. Y., Boston, Chi., Detroit, St. Louis and Springfield. Our eggs will produce winners for the big shows and the little ones, too, so get some and you'll be prepared to show anywhere. Mating list free.

SIMMONS BROS., BOX 880, STOCKTON, ILLINOIS

BUFF WYANDOTTES

The quality of our birds has arrived, they are not on the way or has been winning all first prizes in 2 successive years at Boston, making them : : : : :

PRE-EMINENTLY "THE" BUFFS OF AMERICA

Boston, 1909: Cocks, 1, 2, 3, 5; hens, 1, 3, 4; cockerels, 1, 2; pullets, 1, 2, 3, 4; pens, 1, 2. Boston, 1910: Cocks, 1, 2, 6; hens, 1, 2, 4, 6; cockerels, 1, 4, 6; pullets, 1, 2, 3, 4; pens, 1, 2, 3. Our breeding pens are the "last word" in quality headed by champion of champions. Champions seven Boston first and four second prize winners, as follows: First prize cock, first prize cockerel, second prize cockerel, first and second prize pen cockerels, all at Boston, 1909. First prize cock, first prize cockerel, fourth prize cockerel, first, second prize cock, second and third prize pen cockerels, first prize pen fowl cock, all at Boston, 1910. We will sell eggs from all our pens. Send for mating list

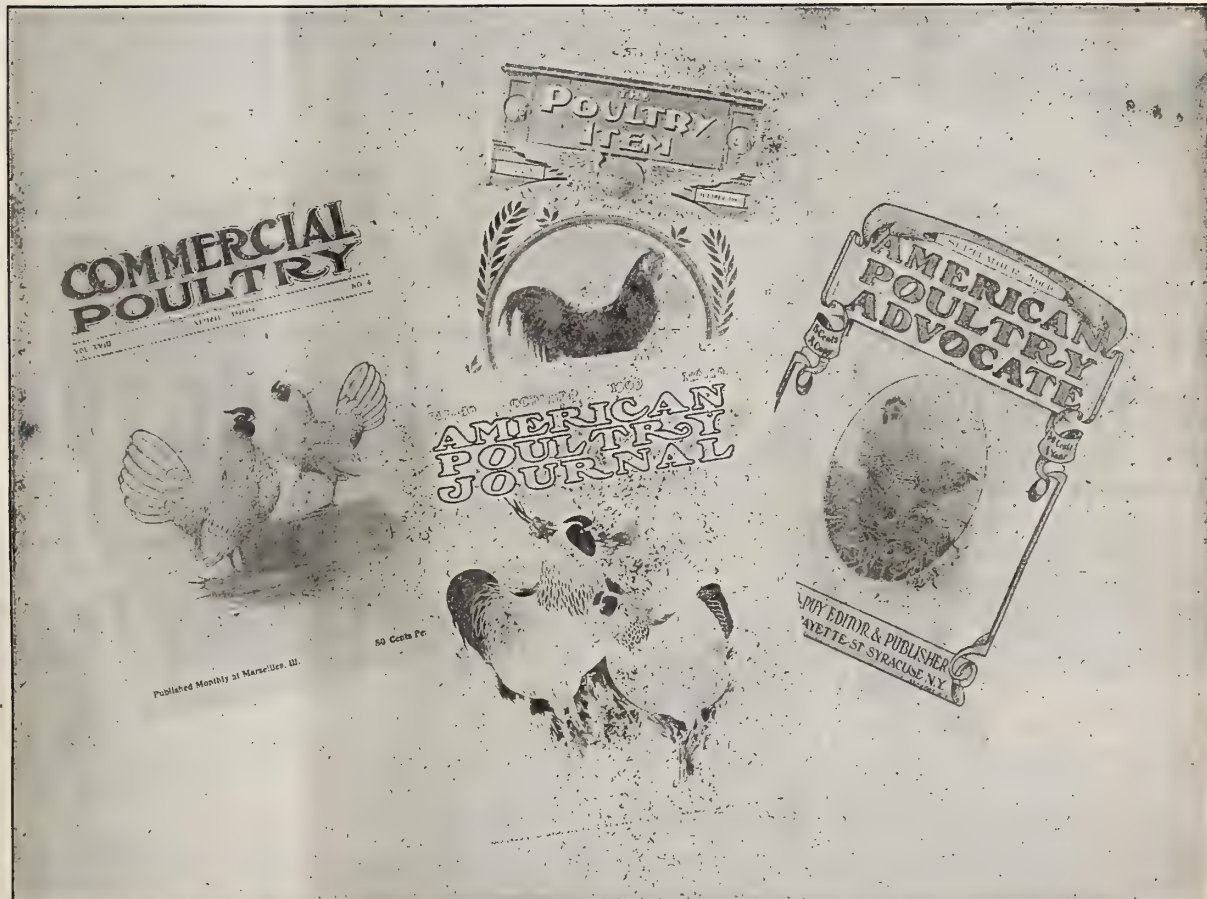

MATTISON & TOEL

FOUR FOR \$1.00

Four First-Class Poultry Publications, Published in Different Parts of the U. S., at One-Half Price

American Poultry Journal - - - - } \$1.00
American Poultry Advocate - - - - } Regular Price \$2
Poultry Item and Commercial Poultry

AMERICAN POULTRY JOURNAL needs no introduction, as it is the oldest, largest and best poultry paper in the world. Is the leader of the poultry press, and is now in its 40th volume. No poultryman can afford to be without it, as it has no equal.

AMERICAN POULTRY ADVOCATE, the great New York state paper published at Syracuse, and full of good reading matter, is always welcomed by the subscriber. Now in its 18th volume. It is conceded to be one of the best poultry papers published in the east.

POULTRY ITEM, published at Sellersville, Pa. Now in its 12th volume, and although a young publication compared to the others embraced in this offer, it is safe to state that Poultry Item is rapidly pushing toward the front. Full of valuable information and complete show winnings.

COMMERCIAL POULTRY, published at Marseilles, Ill., is now in its 18th volume. True to its name, it instructs the reader on poultry as a business. Its volumes contain articles by excellent writers who contribute regularly and make it interesting for the reader.

When reading this do not lose sight of the fact that American Poultry Journal contains from 60 to 166 pages of interesting reading matter; that it has a strong corps of field men who report on conditions in their territory each month so that it contains the "newsiest" news of the poultry world. A single copy is worth more than we ask for one year's subscription to all four.

\$2.00 VALUE FOR ONLY \$1.00

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address

S. C. Brown Leghorns

First prize winners at all the leading shows, including the great Mid-West poultry show at Chicago, Ill., Erie, Pittsburgh, Butler, Sharon, McKeesport, Pa., Cleveland, Toledo, Ohio; Buffalo, N. Y., and Detroit, Mich. My prices are reasonable and satisfaction guaranteed.

Frank Schellang, R. D. No. 2, Erie, Pennsylvania

CHAMPION BROODERS

Our 1910 model is the best and finest brooding device ever put on the market. Outdoor, indoor and lampless brooder, weaning coop and small colony house, all combined in one machine for less money than you pay for just "brooder" in other makes. The Champion is the standard Brooder of the world. We have customers using as many as 50 on their farms. No other brooder like it.

Champion Patents

Many manufacturers are using some of our patented features in their brooders. Beware of these infringements as we intend to prosecute all such manufacturers and users of infringing brooders. Our patents cover all two compartment brooders, others are infringements, and if you buy them you are liable to heavy damages.

How They Work

"I have used two other kinds, but yours beats them all."—Jos. McCloskey, Watseka, Ill. "My Champion raised 145 chicks for me without the loss of one."—E. U. Harris, Hagerstown, Md. "Never had a chick sick with weak legs or bowel trouble in the Champion."—Nick Morris, Goshen, Ind. "I raised 600 chicks in two Champions last year and lost only three chicks."—R. Robetts, Boston, Mass. "My Champion chicks grow like weeds. Keep the brooders outdoors all winter."—Jas. Shiner, Augusta, Me. We have hundreds of others on file.

The Champion is the only brooder which will work outdoors in winter without shelter. The powerful heater does it. Uses one-half the oil others use. Don't buy until you get our catalog; it's free.

J. A. Bennett & Sons Company

929 Main Street : Gouverneur, N. Y.

Orr's Silver Laced Wyandottes

Don't buy feathers only, or run wild on fads. Buy the best that have the record to prove it. The best all pointed bird. "The Old Original Silver Laced Wyandotte." You can't dispute the great Australian contests for best layer. Two first and greatest, several intermediate, and now the last. What more or stronger evidence is needed? Only the pure bred, unmixed, all American bred bird. The original Whitaker—T. E. Orr strain can make such record. With them it is victory from start to finish. Impossible with mixed strains. Try them. Improve your blood lines. Birds and eggs for sale. Eggs, \$5 per setting of 15; two settings, \$9; three settings, \$10.

John S. Orr

Augusta, Kentucky

Quality Sil. Laced Wyandottes

The Most Beautiful Profitable Variety. Unexcelled layers and winners. Winning at Madison Square Garden, first cockerel and third hen with three entries. More first prizes than all competitors combined at the Buffalo International Show, Rochester, Canandaigua and Batavia. First Batavia pullet won special for best female in the show. Four years in succession my Silvers have been champion winners at the great New York State Fair. Also winners at several other shows. Fine cockerels, \$3 to \$10 each. Eggs from as fine pens as were ever mated. You lose if you buy before getting my mating list. It's free.

Mrs. U. R. Fishel :: Box A :: Hope, Indiana

A Little Poultry and a Living

Is the title of a little booklet we will mail free. It was written by the author of the PHILO SYSTEM BOOK, who makes every one of his hens pay him a profit of \$50 to \$100 each.

Metal Mothers

Our New Discoveries Make Poultry Keeping Easy and Profits Sure

Our machines were used exclusively in the original Philo System plant, where over \$1,500 FROM 60 HENS IN TEN MONTHS has been cleared from the sale of eggs, baby chicks and fowls raised on a city lot 40 feet square. One of the largest hatching plants in America saved over \$700 this year by using our system of brooding. We sell the best brooder ever made for only \$2.50.

One party hatched and raised \$500 worth of poultry last year with four Metal Mothers, and hundreds of others are delighted with our machines and our new way of raising poultry. Our combined machine hatches and broods perfectly at the same time with only one lamp and one-fifth the oil used in other machines. Once filling the lamp completes the hatch. It runs as steady as a clock in any room from cellar to garret, and our Long Burning Safety Lamp runs on for weeks without attention. It is the only machine that airs the eggs in the natural way and applies the heat to the chickens like the mother hen.

Valley Falls, N. Y., Nov. 18, '09.

The Cycle Hatcher Co., Elmira, N. Y.

Sirs:—I have used your incubators, both the Cycle Hatcher and Brooder Hatcher, during two seasons, and found them very satisfactory, as they were easily managed and gave excellent results every time. The Brooder Hatcher makes a convenient place for brooding the little chicks when first hatched, before putting them into the fireless brooders. Very truly yours,

(Rev.) E. B. Templer.

The Cycle Hatcher Co., Elmira, N. Y.

Gentlemen:—No doubt you will be interested to learn of our success with the Cycle Hatchers. We have cleared over \$960 running our hatchery plant consisting of 56 Cycle Hatchers. We are pleased with the results, and expect to do better the coming year. With best wishes, we are, very truly yours,

(Mrs.) C. P. Goodrich,
Elmira, N. Y.

Our 1910 Pattern Metal Mothers

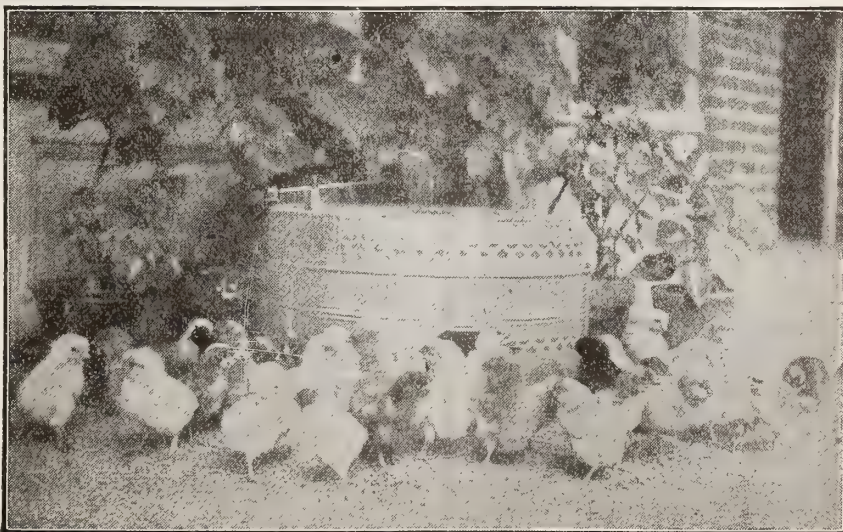

are the perfect results of the latest discoveries in artificial incubation. They will hatch hens, ducks, turkey and goose eggs equally well and at the same time. Regulation of moisture and heat entirely automatic.

Large stock of machines at Oakland, Cal., our western shipping point. Write the Cycle Hatcher at the above address for Pacific coast prices.

One Metal Mother complete, \$7.50; two, \$14; four, \$24. One Cycle Hatcher complete, \$5; two, \$9; four, \$17; six, \$24.

The booklet "A LITTLE POULTRY AND A LIVING," fully illustrated and describing these machines, and a complete line of the most approved poultry appliances, mailed free.

Money in Poultry, \$3,600.00

NET PROFIT FROM 30 HENS IN ONE SEASON ON
A LOT 24x40. IT IS NOT AN EXPERIMENT, IT HAS
BEEN DONE ON THE **Kellerstrass Farm**

My New Poultry Book

Covers all branches necessary for Success with Poultry. It tells you what I have done. It was written from actual experience.

IT TELLS YOU HOW—

HOW I made \$3,600.00 in one season from thirty hens on a lot 24x40 by feeding them the scraps from my table three times a day. The test was made to show what can be done on a city lot as well as on a farm. I also furnish you the names of the parties who paid me over \$2,000.00 for the eggs alone from these thirty hens, for reference, which is evidence undisputable. Remember this book is written by a man who has had the actual experience.

HOW I make my chickens weigh two and one-half pounds when they are eight weeks old.

HOW I prepared my chickens for the show room so that I won over 90 per cent of all the blue ribbons that were offered during 1907 and 1908, the last season that I showed. A "secret" that has never been published before.

HOW I built my indoor and outdoor brooders for 85 cents each, to be used either as fireless or with heat in them and plans for the same.

HOW I raise ninety-eight chickens out of a hundred that I hatch.

IF YOU RAISE CHICKENS OF ANY KIND YOU NEED THIS BOOK

Try My Way and You Can Raise Them by the Thousands

READ WHAT OTHERS SAY

Ernest Kellerstrass, Kansas City, Mo.

Dear Sir:—I herewith enclose you affidavit; also trap nest record of the Kellerstrass Strain Crystal White Orpington hen, register No. 503, that laid two hundred and sixty-three (263) eggs in 272 days.

August 8, 1909.

(Signed) P. J. HARLEE,
Chattahoochee, Ga.

Ernest Kellerstrass, Kansas City, Mo.

Dear Sir:—Congratulations on the splendid showing you have made by selling \$68.00 worth of eggs per hen from thirty hens in one season.

G. M. CURTIS, Editor Reliable Poultry Journal,
Quincy, Ill.

My Dear Mr. Kellerstrass:

I have sixteen of your hens that average two hundred and thirty-one (231) eggs per bird in 12 months.

LAWRENCE JACKSON,
Pittsburg, Pa.

July 19, 1909.

The simplest sort of a thing—common black dirt—has solved the problem of eradicating a chicken disease which cost thirty million chicks' lives annually, a disease which scientists of the National and State Experimental Stations have been studying without success for ten years. Ernest Kellerstrass, the Kansas City poultry fancier, found the secret.—St. Louis Republic.

May 23, 1909.

The remarkable hen "Peggy" is owned by Mr. Ernest Kellerstrass, of Kansas City, Mo. She had traveled all over the globe capturing prizes. Mr. Kellerstrass has forty-eight hundred chickens

HOW I took a flock of chickens and made them lay \$68 worth of eggs per hen in ten months!

HOW I keep my male birds from fighting without injuring them.

HOW I raised the five chickens I sold to Madame Paderewski for \$7,500.00.

HOW I feed my chickens for egg production.

HOW I keep my chickens healthy and free from sickness.

HOW I select a good laying hen from the poor layer.

HOW I break up my broody hens without injuring them.

HOW I pack my eggs so they will stay fresh.

HOW I mate up my chickens for breeding and fertility.

HOW I run my incubators and supply moisture.

HOW I raised my famous \$10,000.00 hen "Peggy."

HOW I build my hen houses and plans for the same.

HOW I bred my big egg-laying strain.

It also tells about broiler plants, egg plants, and remember, there is also an article in this book called "Two Years on the Kellerstrass Poultry Farm," which explains hundreds of things—just what we do in two years on the farm, or in other words, a two years' course on the "World's Greatest Poultry Plant." This is the greatest article ever written by a real practical poultryman.

Remember, this book was written by a man who has sold the highest priced chickens in the world, who also sold \$68.00 worth of eggs per hen from a flock of hens in one season, in fact, if you breed a chicken of any kind you know my reputation as a breeder. This is the first time I have ever offered to sell any of my "methods or secrets" to the breeder or to the public.

of this family and Peggy is the most perfect. He controls the output of perfect Orpingtons.—Sunday Chicago American, March 19, 1909.

Mr. Kellerstrass is now easily one of the leading and most successful breeders in America, and perhaps during the past two or three years raised more good prize-winning birds on his farm, devoted exclusively to White Orpingtons, than any other breeder on this continent.—Poultry Success, Springfield, Ohio, February, 1909.

The White Orpingtons began their real history in the American fancy when Mr. Ernest Kellerstrass took them up. Mr. Kellerstrass has done for this variety and for the breed of Orpingtons in general what no other man has ever accomplished for any other breed.—American Poultry Journal, Chicago, Ill.

It was a rare treat to spend a day in September at the Kellerstrass Farm, where were originated the Crystal White Orpingtons, now famous the world over. Mr. Kellerstrass himself does the work of a half dozen expert poultrymen and does it right. Mr. Kellerstrass exhibited upwards of \$25,000 worth of birds at the Chicago Show.—Western Poultry Journal, Cedar Rapids, Ia.

Mr. Kellerstrass has taken the chicken business out of the kindergarten class, and has done more to encourage the poultry business than any ten breeders in the United States combined. The Kellerstrass Farm won over 90 per cent of all premiums offered. We doubt if any breeder in the world ever sold stock or eggs that produced as many winnings in one season as the Kellerstrass Farm did in 1908. The Inland Poultry Journal takes its hat off to men of this kind.—Judge Theo. Hughes, Editor Inland Poultry Journal, Indianapolis, Ind.

Mr. Ernest Kellerstrass, of Kansas City, Mo., is the owner of the most perfect fowl in the world, according to the National Poultry Association of America.—New York Herald, March 15, 1908.

"Peggy," the \$10,000 hen owned by the Kellerstrass Farm, was viewed by over half a million people around the southern circuit of State Fairs, which included Nashville, Memphis and Atlanta.—Southern Poultry Magazine, Nashville, Tenn., December, 1908.

Winners For 17 Years Layers

Nixon's White Wyandottes

Have made good, not only for myself, but in hands of my customers. If you want deep round breasts, broad saddles and tails, pure white plumage, together with extra layers, write me. My yards for 1910 are mated with birds that conform very closely to new standard requirements and they are sure to produce winners if winners are produced anywhere. My yards contain Madison Square, Boston, Jamestown, etc., winners, or direct descendants. Eggs ready for shipment after January 15, 1910. Write to day for my literature.

Chas. Nixon, A. P. A. Judge and Member, Box 202, Washington, New Jersey

When You Buy Eggs from Blaker's Barred Rocks

You get them from females that are clean, snappy, narrow barred throughout, good in size and superb shape; have low even combs, rich bay eyes and nice yellow legs. Mated with them are elegant males like the one illustrated in this ad. Many are direct descendants of Madison Square Garden winners; others our great Kansas City and Parsons winners. At the big Kansas City show we were the only exhibitor winning in all classes, cock, cockerel, hen, pullet and pen.

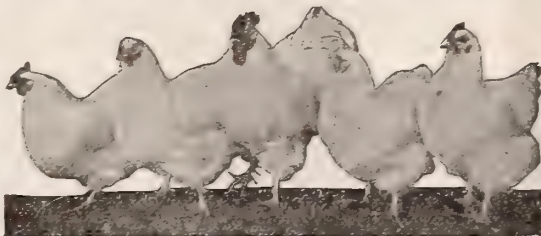

14 Superb Matings for 1910

I was head poultryman and foreman for E. B. Thompson for two seasons and have mated my yards with the same care that I did the Great Ringlets, under Mr. Thompson's directions. All say my yards are the most skillfully mated of any ever seen in the west.

Eggs from our Finest Exhibition Matings, same as we set from ourselves at \$3 per 15, \$5 per 30, \$8 per 50 and \$15 per 100. From Special Selected Pens, \$5 and \$10 per 15. Incubator Eggs, \$2 per 30, \$6 per 100.

A. E. BLAKER, Box A, Route 2, Parsons, Kansas

ORPINGTONS

WHITES

BUFFS

Don't look any longer. We can send you just what you want and at "LET LIVE" prices. Everything sold on approval and every customer pleased. HUNDREDS of early hatched birds to select from and quality for any competition.

W. E. Stanfield, Brookdale Farm, Hillsdale, Michigan

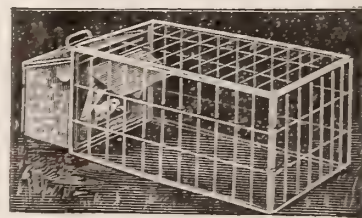

The Model Portable Henery

The Model Portable Henery admitted by all to be the most complete and practical hen house they had ever seen, just the thing for the city and for fancy breeding pens.

Economy Trap Nest

Model Setting Coop

Model Setting Coop, metal, just what you want when the hatching season begins. It is a combination coop, first use it to set the hen in, afterwards use it as a brood coop.

Model Brood Coop, metal, a larger size coop for brooding, will accommodate hen with twenty-five chicks, secure from vermin and the elements, an easy cleaning coop simply by drawing two hooks, bottom drops out.

Economy Trap Nests, both in wood and metal, the most simple on the market, cost but little more than an ordinary nest, yet work to perfection, never get out of order and never fail to work.

Write for descriptive catalogue today. It's free when mentioning American Poultry Journal.

Our Big "3" Combination

**American Poultry Journal } ALL THREE FOR
Western Poultry Journal } 75 CENTS
Farm-Poultry } Regular Price, \$1.50**

American Poultry Journal is the oldest, largest and handsomest poultry paper in the world, and is conceded to be the leader in all things pertaining to poultry. Is copied by both old and new poultry publications. In fact, it has no equal. Now in its 40th volume.

Farm-Poultry, published at Boston, Mass., is one of the oldest and best poultry magazines published in the East, and is now in its 20th volume. This magazine is always full of valuable information pertaining to thoroughbred poultry, and covers the Eastern field in a most thorough manner.

Western Poultry Journal, published at Cedar Rapids, Iowa, is in its 21st volume, and is one of the most up-to-date poultry magazines published in the West. The two, together with the old reliable American Poultry Journal, thoroughly cover the entire field of poultry literature, and make a poultry library in themselves.

The Greatest Combination Ever Offered

and especially so when you take into consideration the fact that American Poultry Journal contains from 60 to 150 pages of interesting matter, any number of which is worth more than we are asking for one year's subscription to all three magazines.

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address all orders to

White Holland Turkeys. New York winners, 1910, 3d tom, 1st young tom, 1st and 2d hens. **Indian Runner Ducks.** Jamestown winners, 3d pen, headed by 1st drake, N. Y. Also won special for best I. R. in the show. **S. C. Buff Leghorns.** N. Y. silver cup winning strain. N. Y., 1910, won 3d pen, 5th cock, 5th pullet. **White and Pearl Guinea Hens.** Circular. Write for what you want. Stock and eggs.

ROYAL FARMS - DEPT. X - LITTLE SILVER, NEW JERSEY

Arnold's Columbian Wyandottes

In the hands of our customers are doing wonders in stock and eggs we sold them last season, and we are sure they will do even better next season. Now a word as to eggs for hatching. From eggs we sent to England was raised the 2d prize chl. at the Crystal Palace show. Eggs sold to Canada produced the 1st and 2d prize pullets in some of Canada's largest shows. Also 1st pullet at Chicago a few years ago, and 1st Madison Square Garden, 1909, cockerel were from eggs we sold. A cockerel and pullet that won in the 1910 Madison Square Garden Show came from one setting of eggs we sold. Proof we give our customers the best. Mr. Theodore Wittman, one of America's leading judges and breeders, who saw our birds Feb. 1, said: "Arnold, you have the best average lot of Columbians I ever saw." Some have a few good birds, we have many. There is a difference to those who buy eggs, and especially to those who buy in 100 lots. We have no mating list, but the best matings we ever owned, by far. Best eggs, \$5 per 15, \$9 per 30, \$12 per 50, \$20 per 100. Other fine yards, \$2 per 15, \$12 per 100. **Aug. D. Arnold, Box 777, Dillsburg, Pennsylvania**

43 Varieties

Poultry, Squab Breeders, Fancy Pigeons, Ducks, Geese, Guineas and Eggs. Ornamental Birds, Wild Game, Pheasants, Pea Fowl and Dogs.* Old Trusty Incubators, freight paid. Feed and Supplies. Handsome Catalogue, containing 150 illustrations, 2c.

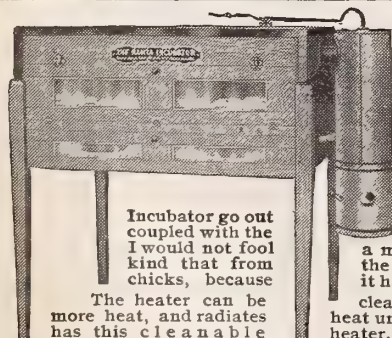

Missouri Squab Co., Dept. R, St. Louis, Mo.

Poley's World's Best Buff Rocks

again make a great sweep at Madison Square Garden, N. Y., 1909-10, winning 1 cock, 1, 2 hens, 2, 5 pullets, 1, 3 pens, also winning the National Championship cup for best cock, hen, chl. and pullet; also 4 of the specials for shape and color, and best display by a very large margin, winning more points than my four next highest competitors all together. I have won nine 1sts at the last shows at Madison Square Garden, and at Indianapolis, Ind., Nat'l Club meeting, '08, I won five 1sts, championship cup and best display by a large margin. At Greenville, S. C., I also won 1st display by a large margin. This is the 3d year in succession that I have won 1st pen at Madison Square; my 1st pen was pronounced by Judge W. C. Denny to be without exception the best pen ever shown in America. My string was the sensation of the show. Write for catalogue.

John W. Poley - Box A - Royersford, Pennsylvania

BANTA

Incubator go out coupled with the I would not fool kind that from chicks, because

The heater can be more heat, and radiates has this cleanable

The cloth diaphragms work of the most lasting kind. They retain heat even better than a fireless cooker.

No change in egg trays is necessary for duck, goose or turkey eggs. The regulator is simple and sure in operation. We guarantee it.

The large nursery under the egg trays is provided with doors and a drawer so that chicks may be removed from the Incubator without in any way interfering with the hatching of other eggs.

We could go on telling you many other points about Banta Incubators. Send for my catalogue and you will understand better why I am proud of my Incubator and why I can guarantee it to hatch so well, last so long, and give such delight. It is a book worth your time to read. Send for it to-day. Address as below. I will get it because I give my entire personal attention to all Incubator and Brooder business.

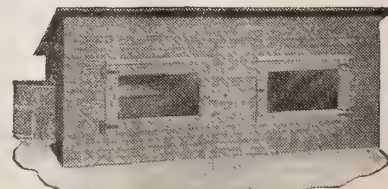

That is my name, and I am proud of it. It is also the name I have given my Incubators and Brooders, and I am proud of them, too. There are many generations of Banta's with reputations for honest, square dealing, and there is now a 17 years' enviable record back of my Incubators and Brooders.

I honestly believe there are more Banta Incubators that have been in successful use five-six-seven-and more years than any other machine, regardless of price. Some cheap machines are useless before the end of the first season—or even the first hatch. These are expensively "cheap." I never let a Banta Incubator go out of my factory that I know will not last even longer than the brash claims made by some manufacturers—never let a Banta that is not as nearly perfect as Knowledge, Experience and Material can make it, when desire to make an Incubator that will hatch each fertile egg into a strong, healthy chick.

a minute with an Incubator that hatched eggs and that was all—the chicks must be the very start can be developed into prize winners. The Banta Incubator will hatch strong. it has points of exclusive prominence:

cleaned if you should turn up your lamp high enough to smoke. A heater filled with soot requires heat unevenly—increasing cost to operate and possibly killing your hatch. No other Incubator heater.

are removable for cleaning. The frames for these cloths are mortised and tenoned—strictly cabinet The top has thirteen thicknesses of packing and lumber; the double walls five (5), with enclosed air space. The doors always shut air-tight against a jamb.

THE BANTA-BENDER CO., Dept. C, Ligonier, Indiana.

PARADISE BROODER

THE name of this brooder describes the kind of a home it furnishes for little chicks. On the basis of our many years experience in the manufacture and sale of brooding devices we believe this to be the best indoor brooder invented thus far as a nursery for chickens. The Paradise Sectional Brooder embodies the correct principles of brooding chicks and ducklings by artificial means—heat, light, ventilation, room for exercise, fresh water, etc., combined with economy of fuel, labor, feed, money, space and time.

HEAT—You can successfully brood four hundred chickens at one time, fifty chicks in each lot in a Four-section, Upright, Indoor Paradise Brooder (each lot having a space 3 x 3½ ft.) with the use of one lamp, a blue-flame standard burner, with automatic oil feed. *The ages of the chicks may vary from one day to eight weeks old* and the chicks can be separated as to sizes, yet all will have just such conditions as are essential for their rapid development.

VENTILATION—Each section has two individual hovers, with separate runways, each hover having a fresh-air inlet directly connected with the outside of building, this air being moderately warmed before it enters hovers.

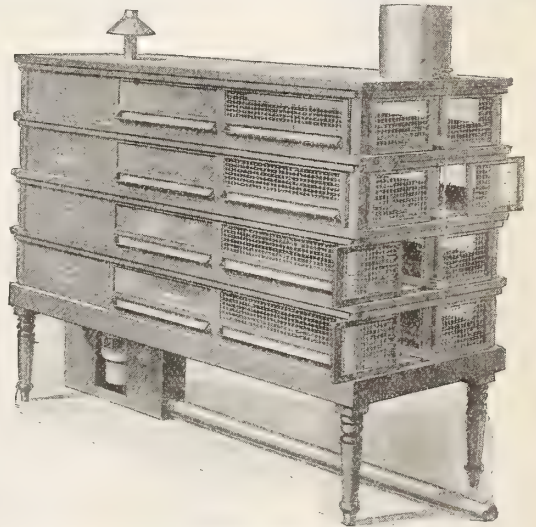

LIGHT—There are no felt curtains, no places to harbor lice, mites, etc., *but there is plenty of light.* The entire four hundred chicks of all ages can be seen at one time almost at a glance.

WATER—Each section, each runway, has a constant supply of fresh, cool running water which feeds automatically from a drip tank located on the top section.

PLACES TO USE—Should be operated in a dwelling house, store room, stable, poultry building or other structure where the temperature does not go much below freezing. Will give excellent satisfaction in any of these locations. *No better or more convenient place can be found than a room in an ordinary dwelling.* Two brooders complete, four sections each, having a combined capacity of eight hundred (800) chicks, can be operated in a room 12x12 ft. with every convenience. Size of each brooder (floor space) is 3x7 ft., and an eighteen or twenty-four inch aisle is needed at ends and sides for operator.

IDEAL NURSERY—One of these brooders complete can be located to advantage in each runway of an ordinary brooding house that is heated by hot-water pipes or equipped with individual floor brooders and will serve as a first-class nursery for newly hatched chicks, thus greatly increasing the capacity of the house and giving the owner a place in which to brood his youngest chicks where they will be under perfect control every hour of the day or night.

DAY-OLD CHICKS—The Paradise Brooder is just the thing for poultrymen dealing in day-old chicks who need comfortable and safe quarters in which to keep newly hatched chicks a few hours or a few days until they are shipped away on orders. *It is equally valuable for all persons who buy day-old chicks.*

PARADISE SECTIONAL BROODER
(Showing Four Sections)

The operator can use one or several sections at a time—one lamp and water tank does for all. This brooder is the result of years of study and test by practical poultrymen. It has been in general public use three years. Sold in one, two, three or four sections.

SAMPLE TESTIMONIALS

Cyphers Incubator Co.—

Angola, N. Y., April 8, 1908

We are using the Paradise Brooders in connection with our 170-foot brooding house. By doing so we have a capacity of 5,000 chicks at one time. Our chicks are taken from the incubators to the Paradise Brooders and kept there for three weeks, then transferred to the hot-water pipe system. This plan is giving perfect satisfaction. One thing we especially like about the Paradise Brooder, you can see nearly all the chicks any time at a glance. The glass and wire keep every chick in sight—different from the old-style dark hovers. Very truly yours,

WM. J. CONNORS POULTRY FARM,
Robt. Herman, Superintendent.

Cyphers Incubator Co.—

San Antonio, Texas, August 11, 1908

The fifteen sections have been in continuous use since I installed them, with fifty chicks to the hover, and even with the intense heat of a Texas summer we have averaged less than one-half of one per cent. death loss, and saved at least three-quarters the labor, while the growth of the chicks has been astonishing—my comparison of results is by the practical test of brooding as the outdoor brooder loss was seven to ten per cent. with same feed, care and attention, so hereafter the Paradise Sectional Brooder for me as the nursery home until the danger period is past. With best wishes I am, Yours very truly,

WALTER B. FRANKLIN, Manager.

Cyphers Incubator Co.— Pine Ridge, Buffalo, N. Y., December 20, 1909

My poultryman has used one of the Paradise, Four-section Upright, Indoor Brooders since last February and has raised in it eight different lots of chicks with practically no loss. Yesterday we took 114 chickens out of this brooder that were raised in it until nine weeks old, Leghorns, Houdans, etc., and they weighed a pound to a pound and a quarter each, just right for squab broilers. The fore part of October, 116 chicks—all we hatched at that time—were put in this brooder and we lost only two, both by accident. I believe the Paradise Brooder is the best indoor brooding device ever invented for raising chicks to broiler size. It is cheaper to buy, easier to use and far more economical than the ordinary floor brooders.

Yours truly, GEO. URBAN, Jr.

Cyphers Incubator Co.—

Athol Springs, N. Y., January 15, 1910

I installed a four-section Paradise Brooder in my stable last March on the Lake Shore and raised chickens in it all spring and summer with fine success. There was no auxiliary heat in the stable and the double doors were opened a number of times each day. I now have it in operation in an unheated room of my new poultry house. At first my men—gardeners by trade—looked askance at this type of brooder, but it was not long before they discarded the floor brooders for this one and now they are not willing to use anything else. I shall order more of them this season.

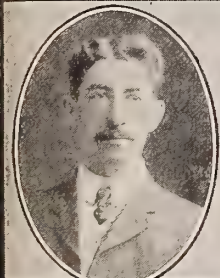

Very truly yours,
H. A. FORMAN.

CYPHERS INCUBATORS AND THE MEN WHO MAKE THEM

YOU MAY BE A FANCIER—AN EXHIBITOR;
YOU MAY BE AN EGG-FARMER;
YOU MAY BE A MARKET-POULTRYMAN;
YOU MAY BE A DUCK-GROWER;

YOU MAY BE ALL OF THESE, but one thing sure: If you are successful you don't choose an Incubator just because it is low-priced.

GET A MACHINE THAT IS GUARANTEED BY EXPERTS

Do You Want Low-Priced Incubators Or Incubators Built To Hatch?—Which?

YOU KNOW that to make money in the poultry business, you have to assure yourself of the following important requirements:

- (1) That your Incubator shall hatch strong, healthy vigorous chicks.
- (2) That your Incubator shall hatch a large percentage of the eggs put into it.
- (3) That your Incubator shall do this every hatch; not only "once upon a time."

EGGS SPOILED, LOST, are a dead loss. TIME WASTED, LOST, you can never recover. There is more money lost by spoiled eggs in poor incubators than would pay for good machines, not to mention the lost opportunity of getting your chickens matured for early shows, or getting them to market, or to laying when prices are high. You know that if your Incubator hatches weaklings, you must look out for trouble. Again, if your Incubator is not built to withstand all weathers and climates you might as well have none, and wait for the hens to sit. A cheaply built Incubator that will hatch only in warm weather is bound to be a loss to you. If you want to hatch early you must have an Incubator built to withstand the changes in temperature of winter and early spring.

GET A MACHINE THAT IS GUARANTEED BY EXPERTS

AN INCUBATOR BUILT TO HATCH WILL ALWAYS HATCH

It may cost you more than a tin box, or wooden box and a foot warmer; BUT, Reader, You are in the Poultry Business; not Experimenting. Let the manufacturer do the Experimenting: YOU DO THE HATCHING. Nothing but the Best will put you in a position to do a money-making business, whether you hatch Show-Birds, Layers, Broilers, Roasters, or Ducks. Therefore, buy the Best machine; one that costs more to Buy because it costs more to Build.

AN INCUBATOR THAT WAS BUILT TO HATCH

Cyphers Incubator Company, Buffalo, N. Y.

Hillsdale, Ill., March 29, 1909.

I will write you concerning a 120 Egg CYPHERS INCUBATOR I HAVE HAD FOR ABOUT TEN YEARS. I used this Incubator for about five seasons. The past five years it has not been used; standing in a shed; no floor in the shed. Having a number of eggs on hand this winter, and no broody hens, I dug up the Incubator in February; cleaned it up, and started the lamp going. It took most three days to get it dried out before I got it regulated. I did not expect a big hatch, but imagine my surprise when I got 98 per cent. of a hatch of strong, healthy chicks. I am using the same lamp and burner I got with the Incubator. I HAVE NEVER PAID OUT ONE CENT FOR REPAIRS. If any one can beat this record I would like to hear from them.

C. H. NUNDLE.

There are hundreds of letters like the above in our Big Free Catalog. Read about this Big Free Book on the opposite page; then write for it, addressing the office nearest to you.

GET A MACHINE THAT IS GUARANTEED BY EXPERTS

Why Hatch Strong Healthy Chicks Then Kill Them In Poor Brooders?

YOU KNOW that to raise chicks quickly, healthfully, profitably and numerously, you must have:

- (1) **A Brooder that will heat up to 90 or 100 when the chicks are put in.**
- (2) **A Brooder built to hold the temperature at the desired height.**
- (3) **A Brooder that is self-ventilating, free from fumes, and built to economize labor.**

CHICKS WEAKENED, STUNTED at the start never recover their growth. Lack of heat causes over-crowding, stunts their growth, and gives them diarrhoea, pneumonia and tuberculosis. Yet with some of the so-called cheap brooders you have to crowd the chicks to keep them warm. Lack of ventilation and fresh air causes anemia and loss of vitality, and **YOU KNOW** that the man or woman who tries to make shift with a worthless brooder is inviting all these troubles and losses.

Don't lose a whole season's time and profits by playing at poultry keeping. Don't be fooled by the so-called cheap brooders that are placed on the market these days—some made of paper; some of soap box material; some with no heat, and no means of heating; some that would not hold heat even if it were applied. Be earnest: Avoid the use of useless Knick-Knacks. They are very expensive even if they don't cost much.

GET A MACHINE THAT IS GUARANTEED BY EXPERTS

A BROODER BUILT TO BROOD WILL ALWAYS BROOD

It will brood in winter and in spring. No need to wait for summer to get heat enough for the natural requirement of the chicks—and every poultryman and poultrywoman knows that **THE FIRST REQUIREMENT OF CHICKS IS HEAT.** Even temperature and continuous heat is of far more importance to the chicks than food during the first few days. And you cannot provide regular heat unless your brooder is built well enough to maintain it. Don't be misled.

A BOOK THAT STARTS YOU RIGHT AND KEEPS YOU GOING

If you want to know how to Hatch; how to Brood; how to save, and how to make money in the poultry business you need our Big Free Catalog of 160 pages; fully illustrated. Here are some of the contents: Five long chapters on Hatching with Incubators; How it is done on Cyphers Company's Poultry Farm; Brooding on our Big Farm; Feeding Chicks on Cyphers Company's Big Farm; and all about Laying Records. Over 30 illustrations of Experiment Station's Poultry, Poultry Houses, and photos of their instructors. 100 photographs of America's biggest poultry and duck plants; some raising over 40,000 ducklings a year. Over fifty photos of leading poultry men and poultry women (many of whom you have read about) and their birds and yards; and full descriptions and illustrations of how our Incubators and Brooders are made; with interior and exterior views, and so much other information that must be useful to you no matter what machines you use. This Big Book is Free; simply send us your name and address and you will get it Post paid Free of charge.

CYPHERS 1910
UNEQUALLED OUT-DOOR BROODER
SELF-VENTILATING SELF REGULATING

HATCHED IN CYPHERS INCUBATORS

Columbian Wyandottes

Line-bred for ten years. I originated and bred the "Challenge Strain" Light Brahmas twenty years ago and now give my customers in my CHALLENGE STRAIN COLUMBIAN WYANDOTTES, the benefit of my long experience in breeding and producing the markings demanded for Columbian Wyandottes by the latest Standard of Perfection. Their record at

New York and Boston For Two Years

in the keenest of competition at these two leading shows prove that Keating's Challenge Strain leads all others. NEW YORK, 1909-10—2d and 4th cocks; 2d hen; 2d and 3d cockerels, and silver cup for best display. BOSTON, 1910—First cockerel; first and fourth cock; third, fourth and sixth hens and sixth pullet; also silver cup for best cockerel; special for best display, special for best cock and fourth hen, special for best cockerel and fourth pullet, special for best shape male, and special for best colored male.

EGGS! EGGS!! From pens headed by first prize cockerel at Boston, 1909, and first prize cockerel Boston, 1910, \$10 per 15, the run of the two pens. Selected from one pen, \$15 per 15. I am breeding three other yards equally as good headed by males that were winners at New York or Boston, and every female has won or direct from New York or Boston winners, at \$5 per 15; \$10 per 45. Some grand exhibition and breeding birds for sale at reasonable prices, quality considered.

All stock and eggs guaranteed as represented. Mention American Poultry Journal when writing.

J. P. Keating, :: Westboro, Mass.

Burhans' "Quality" Exhibition Barred Rock Matings Will Breed Still More Champions IN 1910

There is not room in this advertisement to tell you all about my matings for 1910, but I have prepared a catalog of sixteen pages, profusely illustrated with half-tones made from actual photos of my birds right here in my yards, which I will send you if you are really interested in better Barred Plymouth Rocks. It will tell you how to know the sire and dam of every chick you raise, how I breed the winning kind of exhibition cockerels, how I produce those snappy colored males that breed on in future generations, how I mate my birds, how to mark your chicks, how to select your best cockerel bred females, how to choose your best pullet bred cockerels, how to select breeding cockerels that will stamp their likeness on their chicks and produce said males, how I pedigree my chicks, how to get the most out of a setting of eggs, how to breed heavy layers and work for fertility and vigor, as well as giving a lot of information on how I have attained such wonderful success with "Quality" Barred Plymouth Rocks.

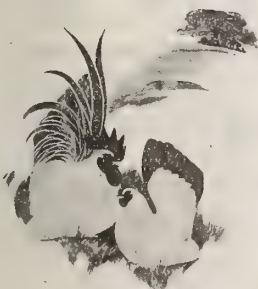

EGGS this season, \$4, \$5, \$7, \$10, \$15, \$25 and \$45 per setting. Write early for the catalog, for I have but a limited number. Stamp is appreciated.

Foy's Big Book---Money in Poultry and Squabs

Describes and illustrates all the leading varieties of pure bred fowls and Homer Pigeons for squab raising. Tells you all about how to raise poultry for profit, how to feed and mate, all about diseases and remedies and a great mass of useful information. Gives plans for building poultry houses, describes and illustrates the best incubators and brooders and the famous Crescent Poultry Farm, which is the largest poultry farm in this country devoted exclusively to the rearing of pure bred poultry and pigeons. IMPORTANT ADVICE—Tells you how to start the business in a small way and grow big. My specialties are thoroughbred fowls of a high quality, and Homer Pigeons for raising squabs. I can supply eggs for hatching from all leading varieties by the single setting or in large lots for incubators. My prices are low. The quality is high. All who want to keep posted in the poultry business, or contemplate purchasing anything in the above line, should send for this book. Mailed to any address for 4c in stamps. Write your wants; mention A. P. J.

Single and Rose Comb Buff Leghorns

MADE THE WORLD'S GREATEST SHOW RECORD

Unequalled and unapproached by any Buff Leghorn breeder—was that made at Chicago, December 7 to 12th, 1909, by the Tecktonius Single and Rose Comb Buff Leghorns. At this great exhibition of the biggest and most superior class of these magnificent birds ever shown under one roof, in the history of the United States, the Tecktonius Single and Rose Comb Buffs took high honors in sixteen out of eighteen entries as follows:

Single Comb—1st pen, 1st and 2d hen, 1st and 5th pullet, 2d and 4th cockerel, 4th cock

Rose Comb—1st pen, 1st and 2d cock, 1st and 2d hen, 2d and 4th pullet, 3d cockerel

Also the Tecktonius Buffs won the silver cup and silver set—and the special for best shape and best colored female offered by the American Buff Leghorn Club. Truly, "honor enough"—for the world's best strain of the "best general purpose fowl on earth" to satisfy even the ambition of the breeder of these distinctive birds.

Tecktonius Buffs--The "Quality" Leghorn

—have proven by test to be the best general purpose fowl on earth, because they are light eaters, healthy, hardy and large Winter egg producers, choice eating, handsome, attractive birds—every inch of them.

My Success Buff Leghorn Book

My beautiful, illustrated 8x11, 32-page catalogue with art colored cover design, contains color plate insert of a pair of Buff Leghorns (suitable for framing) showing true color and shape to breed to. This book covers every feature of the poultry business, especially the feeding, breeding, mating, conditioning and care of Buff Leghorns—also covers the diagnosing of diseases common to poultry and a specific cure for same. This magnificent catalogue will be mailed to any part of the United States or Canada, upon receipt of twenty-five cents, coin or stamps. Your money back, if not pleased.

A VISIT TO THE ROCKANDOTTE FARM

Harry M. Lamon, Special Representative of American Poultry Journal, visits
This Farm and Tells Our Readers His Impressions of the Place Where
the Champion White Rocks and White Wyandottes are Produced

WHILE at the Boston show I had a very cordial invitation to visit the Rockandotte Farm of W. R. Graves, Southboro, Mass., and as I have often wanted to see the place where so many of the best White Rocks and White Wyandottes came from I did not wait for a second one, but stopped on my way back from Boston. Arriving at the station Mr. Graves was there to welcome me, and I was soon at the farm, which is but a short distance from the depot. The writer has managed several poultry plants and been on many others, but is willing to go on record as saying that Rockandotte Farm is the best situated for the production of high-class poultry that he has ever seen. The land is a clay loam, which slopes toward the south, with a fine piece of wood running the entire length of the north side of the farm, forming a splendid wind break for the cold winds of winter and producing an abundance of shade for the birds to roam in in the summer. In all there are thirty-five acres in the farm and every inch of it is utilized or will be for the production of their specialties. In the beautiful large orchard directly back of the residence are scattered the colony breeding houses, all of which have ample runs on nice green sod. Mr. Graves erected this last fall a large open-front house, 100 by 18, the runs extending back into the woods. All buildings at Rockandotte Farm are set on concrete foundations, which is ample testimony that this establishment is to be a poultry plant of no mean proportions for years to come. A large part of the orchard is given over to the young chicks in the spring and summer months. Here conditions are most ideal, situated so near the house that Mrs. Graves can give them every attention. No wonder that year after year a cockerel or pullet of a little better quality than those of the year before comes from Rockandotte Farm to win the blue at New York or Boston. And the fund of knowledge that Mr. Graves has gathered during his twenty-three years as a breeder of White Wyandottes is a wealth of experience that only few possess, and it can be readily seen by anyone who may visit this farm that he uses it to the best of advantage. No detail is left unnoticed or uncared for here. Cleanliness and regular hours for feeding are the watchword. The best of grains are used and plenty of them. No undersized hens were to be seen. Mr. Graves is a believer that plenty of feed makes bone and muscle and it was very evident that he practices it. It is generally considered that a person who produces a blue ribbon winner at New York or Boston in one season has gotten about all the honor and glory that fall to most of us, and most of us think he is a lucky man. It was very evident to me that there was but very little luck attached to Mr. Graves' feeding operations, as I certainly had my eyes opened by seeing and handling a White Rock cockerel that unquestionably is a fitter bird than his first prize Boston winner, and he was considered a wonder in many respects by the best critics. There were others right up close to him in quality and many more grand specimens in both Rocks and Dottes being put in shape for customers for the later shows. It certainly was a revelation to me to see so much quality in one breeder's yards. Not a sign of brassiness was to be seen on a single specimen. That the Graves birds are in demand, it may be

of interest to the reader to know that I heard of a sale of one bird, a White Rock, at \$300; and also saw a photographic copy of a letter and check for \$550 for seven White Wyandottes. It is a self-evident fact that a person who is not a breeder could not sell birds of such quality year after year and still each season produce specimens of a little better quality than those of the year before. Mr. Graves raises his winners and takes a lot of pride and satisfaction in doing it, and well he may. In the breeding pens, of which Mr. Graves informed me there would be five of each variety, were to be seen in White Rocks the first cock at the Tri-State fair; first and third cockerel, Boston, 1910; first Tri-State fair pullet, which was also awarded the grand special prize for best pullet in the show; first hen, Tri-State fair, and the pullets in the first prize pen; the second hen at New York, 1907, the mother of the first and third Boston cockerels, 1910; the mother of the first New York cockerel, 1909; second New York pullet, 1908-09, and several sons and daughters of the first Madison Square garden cockerel of 1908-09. In White Wyandottes the second Tri-State cock, first hen, first cockerel and first and second pullet, the fourth and fifth New York cock, fifth hen and fifth cockerel, 1910, the four females in the fourth pen at New York, 1908-09, and many others that I felt that Mr. Graves could duplicate the above wins with that had never been shown. I have often heard that many of the winners at our best shows in White Rocks and White Wyandottes come from Rockandotte farm each season, and I do not wonder, as a tabulated pedigree is kept of each bird and has been for generations back. Mr. Graves was rather backward about mentioning sales of birds that had made big wins in his customers hands, as he stated he did not care to mention them unless given that privilege by his customers, but did show me the testimonial from his customer who won first cockerel, first and fourth pullet at the Nebraska state show, 1909, the cockerel winning the gold medal for best male in the American in class (White Rocks). Many other testimonials were looked over from satisfied customers acknowledging the splendid treatment accorded them. Among some of the many valuable cups I had the pleasure of seeing were the Pan-American cup for the best White Wyandotte hens and the cup for the best White Wyandotte hen at New York, 1903 Mr. Graves took especial pride in showing me the gold medal and diploma presented to him for judging at the St. Louis World's Fair and in speaking of the splendid treatment shown him by the exhibitors. Then there was the Como Mills cup won on best pen of Wyandottes, the Purina Mills cup on best pen of White Rocks and the grand silver punch bowl, all won at the last Tri-State Fair held at Memphis, Tenn. Mr. Graves informed me that he personally attends to the selection and shipping of all stock and stands back of every sale made with the guarantee that every transaction must be just as represented or the customer gets his money back. The evening spent at Rockandotte Farm was a most enjoyable one and I left the next morning carrying with me the very highest regards for both Mr. and Mrs. Graves.

The number of females to be used with one male to insure great fertility depends on conditions, that is, house and yard room, or if they have free farm range one male can take care of twelve to fifteen hens, while under the former condition eight or ten females is sufficient for one male bird. And again it depends on the variety of fowls you breed, the larger the breed the less females, while on the other hand, such as Leghorns, etc., one male is sufficient for fifteen to twenty-five females.

THE CLEVELAND SHOW

THE Cleveland Fanciers' Club held their fifth annual show in the Central Armory, Cleveland, Ohio, January 24-29, 1910. To say the Cleveland show was a success is putting it mildly, for it brought out an entry of over 3,000 birds, pigeons and pet stock, and the Armory was taxed to its utmost to accommodate these fowls, and the dogs, which show was held in connection with the poultry show. The poultry had to be all double-decked on the lower floor, and the gallery was taxed to its utmost as well. The show this year was larger and better than ever before, having over 600 exhibitors in all, and some 425 dogs in the dog show. The attendance was very good indeed, and we are informed that over 15,000 people saw the show. Much credit is due the officers, who by their arduous labors made possible this grand show, no less among which is Mr. E. G. Conkey, the secretary, who was ably assisted by the other officers and members of the association. Messrs. Frank and Eugene Sites ably superintended the show, which was no small job.

The booths were handsomely decorated, and incubator and poultry people were well represented, as were also all the poultry publications. The attraction of the show and the one to which the other poultry shows must take off their hats to the Cleveland show is the gorgeous manner in which the booths of the Tannenbaum Farm and Ridge View Farm, both of Willoughby, Ohio, were decorated.

The Ridge View Farm's Booth.

The Ridge View Farm, breeders of practical Reds and White Orpingtons, put up at this show what is without question an entirely new innovation in an exhibit of this kind. They had some 200 square feet of space which was enclosed in yellow bunting, and in this space were some sixty Empire coops, containing White Orpingtons and Rhode Island Reds, every specimen in the exhibit being fit to put in competition, although, of course, all these birds were for exhibition only.

The booth was beautifully decorated with southern smilax and Japanese wistaria. All coops were decorated with southern smilax and in each coop was an individual electric light bulb—red lights being used in the Rhode Island Red coops and blue lights in the White Orpington coops. In the ceiling, peeping out from the beautiful decoration of smilax and wistaria, were numberless little colored electric lights.

The exhibit was tastefully railed off with brass railing, hung with heavy red draperies. Over the front of the booth was a large electric sign reading, "Ridge View Farm, Practical Reds and Orpingtons." In the center of the booth was a table on which was displayed the advertising matter of Ridge View Farm and on this table was a handsome crystal glass lamp with a beautiful hand-made hammered brass shade.

The whole effect was that of Fairyland and without question this booth was the sensation of the show. Mr. Alfred G. Clark, proprietor of Ridge View Farm, who is a prominent country real estate broker, was in attendance all during the week, in addition to his three assistants who looked after the wants of the visitors. Mr. Clark brought out a very tasty booklet, something particularly unique and appropriate regarding his practical Reds.

The writer personally looked over Mr. Clark's birds and feels that without question he can state that Mr. Clark has made great advances in producing a practical, uniform type of Rhode Island Reds and that his stock will be heard from in the future even more favorably than it has been in the past.

Ridge View Farm's winnings of the past five years have been exceptionally good, Mr. Clark having practically swept the Cleveland show for three years, the other two years he having shown his birds only for exhibition and not in competition.

At the Ohio State Fairs Mr. Clark has won a good number of prizes the two years he has shown. Also has taken the large end of the firsts at such shows as held at East Liverpool, Sharon, Youngstown, Salem and other Ohio towns. Mr. Clark's winnings with his Reds at Kansas City last year, where he took first pen, first and second hen, first and second pullet, third and fourth cockerel and third cock, as well as shape and color specials, is deserving of mention, as there are some wonderfully good Reds shown at Kansas City each year, being practically in the heart of what might be called the Western Red Territory.

Mr. Clark has bred and developed his own strain of Reds and has had without question as good females as there are in the country and males the equal to the best.

The Tannenbaum Farm's Booth.

The Tannenbaum Farm is the property of Mr. Charles A. Otis, with Mr. A. H. Tryon general manager and Mr. Freshley in charge of the poultry department. Mr. Freshley is a thoroughly practical poultryman, being known as a Barred Rock expert, and who also breeds some crackerjack Columbian Wyandottes, which is proven by the fact that they exhibited the pullet which won first prize at Madison Square Garden this year. The booth of the Tannenbaum Farm at the Cleveland show was indeed profusely and elegantly decorated. The side walls and ceiling were covered with green material and decorated all over with smilax and festoons of pink roses among which were artistically concealed numerous incandescent electric lights, which lit up the booth and showed to advantage the high-class Barred Rocks and Columbian Wyandottes, which were in Empire coops around three

The above picture shows the decorative idea as carried out by William Cook & Sons on their entire exhibit at the late New York show, and which attracted the attention of visitors to their exhibits in all parts of the Garden.

FIRST PRIZE PEN, CHICAGO, 1909
BRED AND OWNED BY
F. A. TECKTONIUS,
RACINE, WISCONSIN

When it comes to producing Buff Leghorns of quality, as well as quantity, Mr. Tecktonius unquestionably occupies the foremost position as a breeder in this country. Not only are his birds noted for their remarkably even color and size, but he has paid special attention to greater egg production in his flock. His new catalogue, which he sends for 25c, is the handsomest ever published by a Leghorn breeder and a veritable mine of information for the poultry breeder. Addressing him Route 7, Racine, Wis., will bring it.

sides of the booth. While the beautiful decorations called forth many exclamations of pleased wonder and surprise from the public, the quality of the birds shown in the coops was not less attractive to the breeder who could appreciate the quality to be found in those specimens exhibited here. Mr. and Mrs. Otis were present at the show the greater part of the week, and were ever ready to talk chicken with any-

S. C. WHITE LEGHORN.

Young Jim, score 95½, by Tucker. Owned by C. C. Foster, Quincy, Mich., and heading his first pen this season.

one. Their first prize Barred Rock hen was the sensation of the Barred Rock alley. She was one of the very best all-around Barred Rock hens we have ever handled, having the much-desired black tipping and the quality of the bar and color were both very good, and she was awarded the color special. Her shape was much better than that usually found in the Barred Rocks of today. The fifth prize hen, also

R. C. R. I. RED.

Winner of first and shape and color special at Lynn. Bred by Chas. F. Thompson & Co., Lynnfield Centre, Mass.

shown by the Tannenbaum Farm, was a sensational bird, being in many ways a duplicate of the quality of first prize and only had to take fifth place because of the lack of tail feathers. We are informed these hens are full sisters and that they are both daughters of "Fluffy Ruffles." On Friday, Mr. Freshley brought down a pullet who is a daughter

of the fifth hen, which created a sensation among the Barred Rock cranks. She is somewhat young yet, and most too small for exhibition, but she shows the quality of color and bar of her mother, and the judge said had she been entered in the open class she would have won in a walk. A number of prominent judges handled her and all were loud in their praise of her wonderful perfections in both color and type. The second and fifth prize pens also fell to the lot of the Tannenbaum Farm and both of these pens showed the quality of Rocks to be found in their breeding pens.

In the Columbian Wyandotte class the Tannenbaum Farms also won a liberal share of the premiums, winning second and fourth hen, fifth pullet and second and fourth pens. Their Columbians show good size and fine Wyandotte type, with good comb and other head points as well as strong wing, hackle and tail marks. Their many prizes won in hot competition in this variety place the quality of their flock of Columbians among the leaders. Much credit is due Mr. Otis for the attractive booth which he put up at the Cleveland show and other breeders will do well to plan on making similar displays at our prominent shows during the coming year. In this way we trust to raise the

standard of poultry exhibitions even above their exceeding high standard of today.

Another important winner in the Barred Rock class was Mr. George W. Bachman, North Baltimore, Ohio, who exhibited some classy birds, and won second and third cock, second hen, first cockerel and third pullet. Mr. Bachman has been making a specialty of breeding exhibition Barred Rocks for many years and knows how to produce birds that will catch the judge's eye. Another exhibitor, whose birds attract considerable attention in this class was Mr. L. E. Simmons, Chicago Junction, Ohio, who succeeded in winning fourth cock, fifth pullet and third hen. The most sensational birds in the White Rock class were exhibited by Dr. S. R. Harrison, Shelby, Ohio, who won first hen, second pullet, third and fifth cockerel. The doctor breeds Rocks that are white and have the correct Rock type, therefore it is to be expected that he should win.

The important winner in the Buff Rock alley was Mr. E. H. Lichtenwalter, Girard, Pa., who not only had type, but that soft buff color so pleasing to the eye and who succeeded in capturing first hen, second and fourth cockerels and second pullet. Another winner in this class was Miss Nora Kiger, Marion, Ohio, who won second and fourth hen and first pen. Fred H. Poertner, Berea, Ohio, on two entries in Buff Rocks, won third and fifth pullets on two very fine birds.

In Silver Wyandottes, Ira C. Keller, Prospect, Ohio, won almost everything. Mr. Keller was also an important winner

OWEN FARMS BIG FOUR

Wm. BARRY OWEN Prop.

M. F. DELANO Supr.

WINNERS AT THE LEADING SHOWS.
OWEN FARMS VINEYARD HAVEN MASS..

in the Golden Wyandotte class. The White Wyandotte class brought out 200 entries and the competition was keen indeed. Mr. Charles McClave, New London, Ohio, succeeded in winning the Zipp cup, which will now remain his property. He also won the silver cup on the best White Wyandotte female, silver cup for best White Wyandotte pen and silver cup for best display of White Wyandottes. His winnings in detail in this class were second and third cocks, third hen, second cockerel, first, second, third and fifth pullet, and first

WHITE WYANDOTTE.

Second prize pullet at Boston and first at Brockton, also shape and color special. Bred and owned by C. W. Pratt, North Abington, Mass.

and second pens. Mr. McClave's other winnings were silver cup for best Bronze Turkey gobbler, silver cup for best Holland Turkey gobbler, special for best display of water fowl, special for best general display of poultry. He exhibited seventy-five head of turkeys and water fowl and every bird was placed. Other winners in the White Wyandotte class were Mr. Herbert H. Knapp, Tyro, Ohio, who won fourth cockerel, a very fine bird. Mr. William J. Battles, Akron, Ohio, won first on his White Wyandotte cock, and

S. C. WHITE LEGHORN.

Winner of first at Springfield, 1910, and Galesburg, Ill., 1910. Bred, owned and exhibited by Robert D. Parmenter, Knoxville, Ill.

Mr. B. M. Billings, Oberlin, Ohio, won first White Wyandotte hen, both being very classy specimens. We were surprised to see the large class of Buff Wyandottes brought out at this show, and the judge remarked it was the largest class of high-quality birds that he had seen in a number of years past. Mr. Gerald Williams, Wellington, Ohio, succeeded in capturing first hen, second cockerel, first pullet and fourth

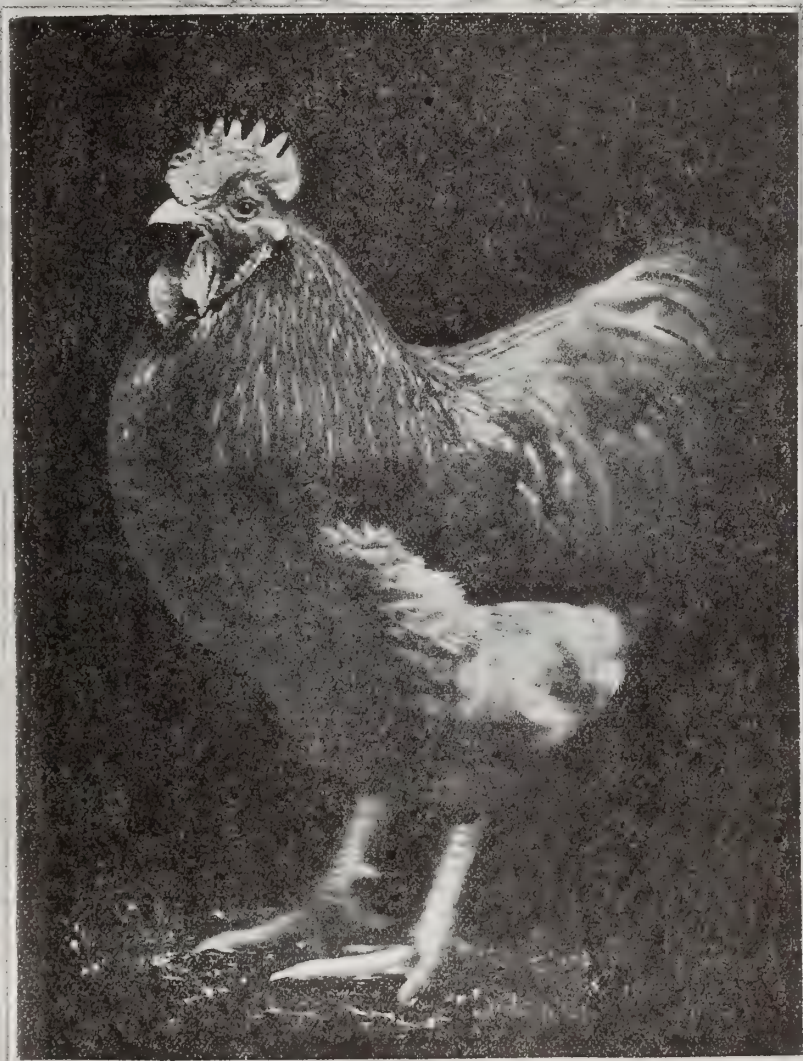

hen. Mr. Williams' birds show high class throughout, and we consider the winners were well placed. Mr. T. K. Martin, Chicago Junction, Ohio, exhibited a very fine pen of Buff Wyandottes and succeeded in winning second place. Mr. Fred A. Poertner, Berea, Ohio, also exhibited in this class, winning fifth on pen. The reason for the large entry on Buff Wyandottes, and the high quality of birds which it brought out, was the meeting of the National Buff Wyandotte Club, which was held during the show. The Columbian Wyandotte class was a very hot one indeed, and many birds of exceptional quality were left out of the money. We have previously mentioned the winnings made by the Tannenbaum Farm in this class. Another important exhibitor, whose birds deserve special mention is the firm of Canfields & King, Painesville, Ohio, who won on five entries, fourth cock, third and fifth cockerel, third hen and third pen. At the late Willoughby, Ohio, show they won second and fourth cock, first, second and fourth cockerel, third hen, fourth and fifth pullet, first pen, silver cup and other specials. Another exhibitor in the Columbian Wyandotte class was Ira Phillips, Oberlin, Ohio, who won second cockerel, first pullet, first pen

SPAUGH'S RESULT NO. 1.

This is the male that is responsible for the grand record made in the show room by C. E. Spaugh, Rugby, Ind.

on three entries in this class. Mr. Phillips certainly produces some good Columbians. We must say the Columbian Wyandottes seen in the shows today are approaching very closely the ideal Wyandotte type and the markings of the Light Brahma. Therefore, it is no wonder so much interest is taken in this variety. The Rhode Island Reds were out in goodly number in both rose and single comb, and here was a battle royal for the honor of winning in this class. In the single comb class Mr. George L. Buell, Lorain, Ohio, was one of the important winners. Mr. Buell succeeded in capturing third cock, first hen, fourth cockerel, fifth pullet and second pen. Mr. Buell's Reds have been prominent winners at Cleveland and other shows for several years past and are high-class specimens of this popular variety. Mr. W. Etzansperger, Willoughby, Ohio, was the other important winner in this class, and he won first and fifth cock, third hen, first cockerel, fourth pullet, first pen. Mr. Etzansperger also breeds Rose Comb Rhode Island Reds, in which class he won fifth cock, first and third hen, third cockerel, first and third pullets and first hen. He won special shape and color on males in single comb and special on shape in males and color in females in the rose comb class. These numerous winnings made by Mr. Etzansperger in both the single and rose comb class speak highly for the quality of Reds bred by him, and you know it took good ones to get a look-in at Cleveland.

1st. Buff Orpington Cockerel
CHICAGO DEC. 1909 OWNED AND BRED BY
A.E.MARTZ, ARCADIA, IND.

Mr. B. M. Billings, Oberlin, Ohio, also had a few entries in Reds and won second on cockerel and second hen in single combs and in rose combs he won fourth on cock bird. Another one of the important winners of the Rose Comb Red class was Mr. H. F. Chase, Cardington, Ohio, who won first cock, second hen, second and fifth cockerel, fifth pullet and second pen. Mr. Chase's exhibition contained birds of high quality throughout and he has been breeding this quality for a number of years past, and winning at many of the important shows in the hottest kind of competition. W. S. Knox, Youngstown, Ohio, on five entries on Black Langshans, succeeded in capturing fifth cock, first hen, fourth cockerel, first pullet and first pen. As this class was well represented with specimens of high quality, these winnings speak well for Mr. Knox.

The Single Comb Brown Leghorn class, while small in numbers, was good in quality. Mr. George F. Buck, Port Clinton, Ohio, won on five entries in this class; second hen, first and second cockerel, third and fourth pullets. Mr. Frank Schellang, Erie, Pa., won on eight entries in this class, first and second cock, first and third hen, third and fifth cockerel,

First prize White Langshan cockerel at Chicago, December, 1909. Bred and owned by Thaddeus E. Allee, 1325 East 55th St., Chicago, Ill.

fifth pullet and first pen. Mr. Sylvester Shirley, Port Clinton, Ohio, exhibited a Rose Comb Brown Leghorn pullet on which he won first place. Mr. Shirley made an exhibit of Silver Duckwing Leghorns and won in this class first cock, first and second pullet on very nice specimens of Silver Duckwings. The Single Comb White Leghorn class was very large and good throughout, important winners in this class were H. C. & C. W. Sixt, West Park, Ohio, who showed a classy lot of birds and won first and fifth cock, second and fourth hen, fourth and fifth cockerel, fifth pullet, second and third pens. They also won silver cup for best display, having won this cup for the past three years. The first prize pen of Single Comb White Leghorn, owned by H. T. & C. H. Whitney, Rocky River, Ohio, was much admired by breeders of this variety, and their birds have been winners at Cleveland during the past. They advertise under the name of White Feather Poultry Farm. The Buff Leghorn class was well represented, Peter S. Hurt, of Thorntown, Ind., showed some fine specimens of this variety, and won second cock, fourth and fifth hen and second pen. Mr. Hurt's Buff Leghorns have been winners in the keenest kind of competition

in the largest shows throughout the country for many years past.

There were some classy birds shown in the Single Comb Black Minorca class, in which Mr. J. H. Shann, Painesville, Ohio, won third cock, first and third hen, first and third cockerel and second pen. In the White-Face Black Spanish class the Portage Poultry Yards, Elmore, O., won first cock, first cockerel, second and fourth pullets.

The Orpingtons at Cleveland were out in goodly numbers, there being some 260 birds shown in the several varieties, which was one of the largest, if not the largest, number of entries in any one breed in the show. The classes were about equally divided between buffs, blacks and whites, and that the competition was keen and of very superior quality is easily recognized when we say that such exhibitors as Cook & Sons, Craig & Mapes, and the Roseland Poultry Farm were showing. In the Buff Orpington class the Roseland Poultry Farm, Charles W. Switzer, proprietor, South Euclid, Ohio, won the cream of the prizes, taking first and third cock, first, second, fourth and fifth hens, first cockerel, second, third and fourth pens, silver cup for best Single Comb Buff Orpington male and silver cup for best display. In this class Messrs. William Cook & Sons, of Scotch Plains, N. J., won second cock on a very fine specimen, third cockerel and fifth pullet. Another exhibitor in this class was the Cairngorn Farm, Nottingham, Ohio, owned by Mr. W. C. Boyle, with Mr. Fred Hope, manager, who exhibited a very fine pen of Buffs, winning fifth place. In the Black Orpington class, Craig & Mapes, Mount Lebanon, Pa., won first and fifth cockerel, third and fifth hen, first and third pullet and fourth pen on a very fine string of Black Orpingtons. William Cook & Sons won fourth cock, first and fourth cockerel and second pen. Mr. Cook had just returned from Atlanta, Ga., where he showed a large string of Orpingtons, capturing about every premium in sight. In the White Orpington class we find Lawrence Jackson, Hayesville, Pa., succeeded in capturing first on cock, first and third hen, second cockerel, first and fifth pullet and first pen. The Ridge View Farm, Willoughby, Ohio, won on this class fourth hen, fourth cockerel and fourth pen. Mr. W. Etzansperger, Willoughby, Ohio, exhibited in this class and won first cockerel and third pen. William Cook & Sons, Scotch Plains, N. J., exhibited some fine specimens in this class and won fifth cock, fifth cockerel, third pullet and fifth pen. The Portage Poultry Farm, Elmore, Ohio, exhibited a pen in this class and won second place.

Ancona class was one of the big surprises of the show. It was the annual meeting of the International Ancona Club. Ancona alley enjoyed unusual attention. These beautiful fowls were admired by the vast throngs who stood before a long line of cages containing these mottled beauties. Four years ago there were only six Anconas on exhibition at this show. This year nearly 100 grand specimens made their appearance, demonstrating the remarkable popularity these birds are meeting with.

Sheppard's Famous Anconas were the most conspicuous among the prize winners. This great strain was originated by H. C. Sheppard, Berea, Ohio, who won seven first prizes, six second prizes and eight silver cups and twenty-four special club ribbons. The first cockerel was an unusually fine specimen, having excellent comb, dark wings and tail, yellow legs and grand shape, with perfect tail carriage. On the whole the class of Anconas was very strong and the winners had to travel fast to get a place. Among the other prominent exhibitors were H. E. Beebe, of Waterford, Conn.; the Minnehaha Poultry Farms, Bannock, Ohio; Frank C. Stier, Cleveland, Ohio; H. M. Bedford, of Strongsville, Ohio, and others.

The line of cups offered by the International Ancona Club reflected great credit to the organization and would be a credit to one of the older clubs.

In this class we also desire to mention the first pullet, which was the property of H. E. Beebe, Waterford, Conn. We are informed that Mr. Beebe has been dangerously ill for several weeks and that his wife, unknown to him, made this one entry in this class and the bird, after being shipped 500 miles, won first place and also silver cup for the best pullet in the class.

All of the ornamental varieties of poultry were well represented at the Cleveland show, also a large display of pigeons and pet stock including quite a number of Shetland ponies, and the exhibit of dogs contained many very valuable specimens and brought out the public in goodly numbers to see the dog show. The Cleveland show is certainly one of the big shows; it takes good quality to win a place here. We would suggest that you plan on exhibiting at the Cleveland show next year.

WHO'S WHO IN HENDOM

This month I am constrained to play the part of a villain, sneaking in on a man here and there and accomplishing his ruin, leaving when I depart and taking his good reputation with me. I have throttled many a breeder this month, looking into his in'ards for the stuff of which Who's Who is made. Few men measure up to the standard we have set for those who break into this department. Let me put it another way: Those whom I write of must be of sufficient caliber to please the powers or else they throw down my space stuff and call me in upon the carpet. It is simply a matter of bread and some smear to spread over it, with me. I make no bones of this. I am a poor man. Time was when I could go ahead showing and make an honest living by faking a little here and there, but now I have to hack out the daily dope and content myself with the irony of Fate—I suppose you thought I was going to say of the steel trust.

But let be, let be! Our souls are not our own. The Weaver plied his loom and we are warp and woof. Whether it is best to take what they hand you or retire into another room with a bird you have not had the time to fake at home and try it there amid the chances of almost certain detection, that is the question. The gods favor those who fake. They ought to. The fakers take the chances! They should be favored. Who dares say me nay?

But let's be off:

"You see," says Tom Quisenberry, resorting to his favorite line of argument, "you see, that is all there is to it. If you are in an automobile and the dum thing takes a notion to smash things up, there you are. But if you are in an airship and she turns turtle, pardon the nautical phrase, please, where are you? When you cut capers in your airship, the chances are that something is going to drop. When you prime yourself to perpetrate didoes in your auto you hit a big oak tree out to one side of the road and it stands perfectly solid while your head oozes against it like an egg that has been mislaid for some time when it hits the middle of a nigger's physiognomy. That is the proposition just as I see it, and stated plainly and in all fairness. What are you going to do about it?"

Now, whether Tom subscribes to all this piffle that is said and told of him, we cannot say. But whether he stands under or out from under the above make no difference with what we started to tell: That big story of how he is working to educate the poultry keepers down there in Missouri, that chicken state where the hens roost on the fence-pickets all over town and the eggs they lay are shipped to all corners of this Mud Ball. Just how Tom chose Missouri as being the state of his life endeavors is more than we can tell and something about which you do not care a tinker's —, anyway. He is there, the time is now and he knows it. He is holding institutes up and down the state all winter long and would turn them into Poultry Chautauquas in the summer if he thought people would still think him sane.

Just the same as Coburn is out there in Kansas to advertise its agricultural resources, so is Tom in Missouri to advertise its poultry. When that story came out some time ago about the crowned heads of Europe ordering milk-fed chickens for their imperial tables and that said chickens were being sent over the Big Wet from Kansas, then Tom he takes a big look around and digs out a fact or two for himself. He discovered that some of those chickens, feathers and all, pure-bred and scrub, were raised right there in Missouri, and then he goes and tells it. You see, he hoped to turn that business to the state of Missouri. Great head, that one of Tom's.

This spring they are going to have a special agricultural train shot through a certain part of the country and Tom is going along to represent the chicken end of things. When the big guns of the horticultural board, the agricultural

L 5

board and the dairy board all get too much steam up and are liable to explode with their own self-importance, then Tom will take the platform and cool things down, showing the audience how the helpful hen is the devourer of insects that would ruin the fruit crop, how she fertilizes the spacious agricultural lands and turns the waste grain into profit, how she converts skim milk into table fowls for the nobility, in short, how the state would go to the demnition bow-wows indeed if it were not for her.

And then to show the boys in the fancy that he has not gone entirely daft on things practical, he gets up a state show every winter that makes the big ones of the past look like fly-specks on

the Sands of Time. Take that any way you like to. And it is not merely a state event. They come to the show in ox-carts, autos, flying machines, dirigibles, box cars and Pullmans. What we need are a lot more Toms like this Tom. May his shadow increase in diameter (but he works too hard for that) and his health be the health of a Trojan!

Illinois is no bum state when it comes to her chickens. Just take a look through the American if you are in doubt about the veracity of this assertion. Down there at Crete is located the farm that is causing so much talk in Black Langshan circles. It is named the Hewes Farm. Time was, and not long since, when the Langshans were the talked-of fowls all over the country, but they sort of lost their grip and now are somewhat getting into their own again. Black Langshans are good fowls. They are mighty hardy and full of vigor and a pen of good pullets was never known to go through the winter without shelling out eggs to beat the band. The popularity of a black fowl is in the ascendant here in America at the present time. We see more good Black Wyandottes than ever, more Black Orpingtons, better Langshans and Minorcas. In the old country there is a fancier, one might say, on every crossroads who is trying to originate a new colored fowl, and it seems to us that this is a great deal in the life of a fancy. Not many seasons ago we used to see the advertising of a man out there in Kansas who bred Buff Langshans and parties who saw them told us they were good. I do not know what more handsome buff fowls could be imagined than handsome Buff Langshans. They have their blue-colored Langshans in England, too, and these would be a pretty addition to the American fancy. But the idea is that more and better Langshans would be a great addition to the fancy in this country.

Those Blacks that Hewes Farm showed at the last Chicago show were simply great. This farm has certainly built up a great reputation on males of the breed. Such successes take much work and they are not accomplished in a day. For instance, think of the time that those Illinois breeders of Golden Wyandottes have put into their superb flocks. No better Golden Goldens grow than those the sun shines on in Illinois.

Now one would naturally think that Pekin, Ill., was the home of the Pekin duck—but it isn't. Let's take a peek in and find what the chief industry is down there: First, I glance over the recent Chicago show record and note that Pekin supplied a great commotion in the White Leghorn aisles. Yes, that's it. They breed White Leghorns down there fit to lay eggs for the uncrowned kings of America. That is the chief work of Pekinites. Of course, the main guy is a fellow by the name of Easling, who sends out more good birds than the other fellow imagines he could. He breeds them in great numbers. Though he advertises that White Leghorns lay while others sleep, it is a cinch that he works while the other fellow sleeps. After all, that is what it takes to make a go of anything. Keeping on the jump day and night draws the business. All the world loves a worker. Get your toe-hold and then the procession wants to give you a boost.

Then take a look at the trade that man Bickerdike has

worked up! He is one of the men who believe in pedigree, and while the rank and file has not as yet taken it up they will come to it sooner or later. There is a lot of breeding truth in pedigree. Good birds are not accidents. They may be sometimes in a good many yards, but where good birds are bred year after year there is something in the pedigree.

MO. QUEEN.

First S. C. Brown Leghorn pullet, Missouri State, December, 1908. Bred and owned by Tom H. Wood, Fayette, Mo., R. 4.

Cattle men know it, sheep men know it and horse men understand it. Do you think a horseman would buy a brood mare without her pedigree? Well, I guess not. If the man he was buying from could not produce the pedigree and have it straight, nuttings didding. When more fanciers like Bickerdike get into the game we will be that much better off. He knows what he is doing and every move in his breeding operations has a reason for its being done. Some class to that. Some sense, too. Nothing in the line of guesswork suits him. If he is in doubt he cuts the head off the bird. Let any other

S. C. BLACK MINORCA.

First cockerel Cambridge, N. Y., September, 1908; first cock at Troy, N. Y., 1909; Cambridge, September, 1909; Schenectady, December, 1909, and Grand Rapids, Mich., January, 1910. Owned by F. C. Wing, Wayland, Mich.

man go into the breeding of good fowls and do as Bickerdike is doing and he will succeed just the same as Bickerdike is succeeding. Have we made the point plain? There are breeders all over the country in need of new blood for their flocks and they are going to the breeders who are giving some brains to their work of mating and breeding. We have been

watching this idea and know that it is growing. Bickerdike your flock and get to the top. It is just as important to know where the poor ones come from as the good ones.

The other morning we received a query from down in the jungles somewhere which has caused a lot of amusement in the office. In fact a good many of the boys who drop in on us have thought it the best thing they ever heard. Our inquiring friend wants to know who in thunder is Tom McGrew?

Now, what do you know about that?

Who is Tom?

Let me tell you:

Firstly, Tom is some eggs. He is right now finishing up a series of educational lessons along poultry lines which will soon be issued by the International Correspondence Schools. Tom is the American Poultry Association official orator. He has held the record for having more words of his wisdom on hen things caught by the stenographer than any other live man in captivity. If there is a contender for the honors, other than Tom, I do not know what section of the

timber to scare him out of. Can you tell me of a man who can beat this:

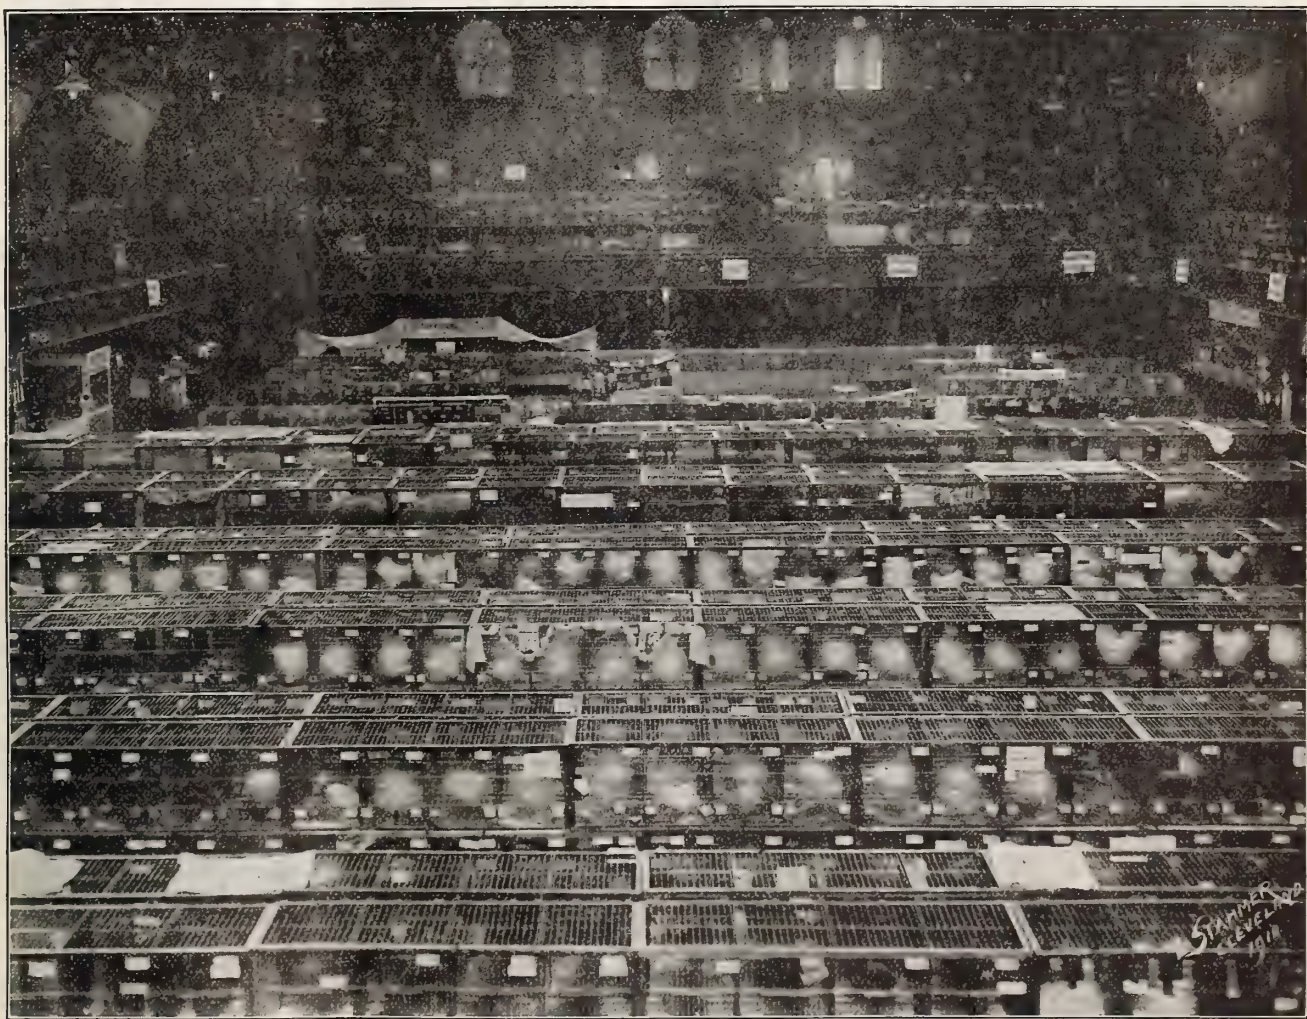

"In my short time as a poultryman I have never found anything I loved more than I despised something else. The things which are despicable I abhor. (Audience holds its breath.) We all used to like something better than what we once esteemed, but here this evening, while the drawn curtain of night shuts out that golden orb of day, we are gathered to show how we assemble when we meet. (Much applause. A good heat.) Time changes a number of things wonderfully. I have never experienced so much of a change in anything as I have in my appetite since I sat myself at these bounteous boards. I cannot say, with Socrates, that repugnance of anything is far greater now than detestation of something not liked hitherto if one abjures things previously disdained or abominated subsequently. My subject is one of inexplicable inexplicableness. I shall not go on intricately, and show you how it bewilders and confuses, embarrasses and entangles. You understand that for yourself, so I will yield the floor to some speaker greater gifted with the eloquence of soft and flowing language, a man, perhaps, who can unravel the mysteries that enshroud the subject which seems to have made itself scarce in these regions." (Great and greater applause.)

Who's Tom McGrew? That's Tom!

For any westerner to go down east and act the way W. S. Templeton did in the Cornish Indian alley at the last New York show is a capital offense. Just when all the breeders down in the stony country will get together and decide on the day of decapitation for Templeton remains to be heard of. And the best part of his victory at the Garden is that it is not one of the mushroom sort. He has been winning at the biggest shows all over this country, and then to go down there the way he did last month or so is simply clinching the awards which he has been gaining all over the land. Templeton is a quiet sort of man, young, enthusiastic, the latter sticking right out of his eyes. He wrote us some time ago that he would like to find a country where the springs were ideal of weather and early, where the falls were long and dry and where the winters made one feel their oats, yet were not so severe that one had to carry his roosters to the cellar every other night. Well, who don't want to find that chicken country. We would all move down

pedestal, alone in a field of glory. Whenever a man of MEANS comes down the aisle where he shows his birds said man of MEANS leaves some of the dirty lucre in the wallet-oski of said Templeton, telling him to forward, as the case may be, some fowls or eggs "out to my country place." There's some class to actions like those of Templeton's as he folds away those big, fat numerals on the one side and the Romans on the other, both being on clean little greenbacks that are not so little after all. Dirty lucre and nice, clean greenbacks—catch that paradox? Well, it's true and we are glad to note that Templeton is making the most of it. It makes no difference whether it is dirty or clean to Templeton—he can use it to find that ideal land for chicken maneuvers and showing more birds down at the Garden.

One chicken man whose name we cannot now recall breaks into this department this month solely because he is such a patient fellow. I'll bet a 2-cent stamp against a bob-tailed

PARTIAL VIEW OF THE 1910 CLEVELAND SHOW

there if we had to walk and cart the fowls on a wheel-bar-row; eh? I would.

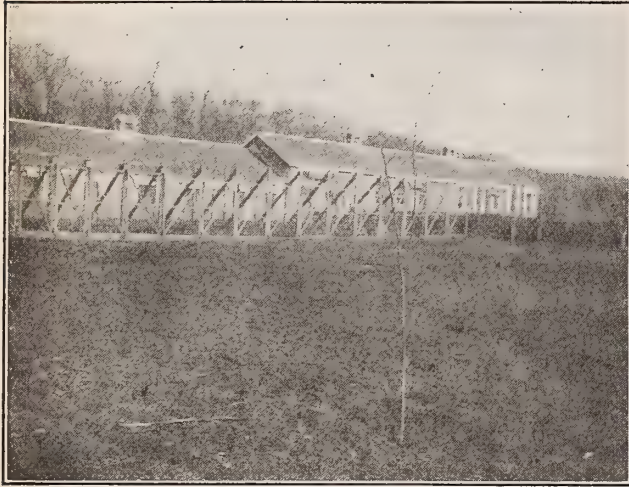

Say, stop frittering away your time one moment, and imagine such a country. As the Source of Life comes rolling out of its bed a-mornings all the hen men would be on their knees worshipping it. Sun worshipers, they call 'em out in Kipling's India. The laws would all be made by chicken men. There would be all the faking one might care to go to the trouble of doing with his mutts, the laws would hang chicken thieves, to say nothing of what the hen men would do to them with Mausers and Haenel-Mannlichers, Remingtons and all the other means of destruction, the governor would be elected by open ballot and thus Fred Kimmey would not be the only fellow who knew who voted for who, cabbages would grow on fence-pickets and champagne would run from the foot of the hill out. Don't stop me; it is all so ideal.

But to get back to Templeton's records at New York, we might say that he would be the last man, it would seem, to need the assistance of such a country. There he sits on his

heifer that his wife stands on the back stoop all day telling her neighbors what a beautiful husband he is and how patient with her when anything goes wrong about the house. This fellow wins his way before you solely because he gives us a great bit of advice. He sprouts oats for his chickens, but when he cannot get oats he sprouts barley instead. Now any kind of sprouting is good. I well remember the sprouted things mother used to give me when I was the meanest boy who played in our alley. In sprouting barley this man says that one must stir it till it sprouts or it will ferment.

To the Lean One this is information. He never sprouted anything, not even his setter pup for sucking eggs. But think how patient that man must be who sits himself down and stirs the barley till it sprouts. As a further matter of information I might say that barley sprouts in about ten days. Now what would you do, reader, while stirring the barley these ten days? Read Heck's essays on how to fake or dig down into J. H. R.'s editorials on how to punish those who corrupt our morals? Or would you take a hammer

and saw into the sprouting department of your little hen farm and make fireless brooders the while? This is a serious question and one you should decide before going further along the poultry way. Imagine, if your imagining apparatus is going good, what would become of you if you were suddenly plunged into the sprouting work with nothing to do but sit there and stir the barley to keep it from ferment-

Brooder House on Waterview Poultry Yards, H. J. Dietz, Prop., Hempstead, L. I., N. Y.

ing. It's something awful! You could not leave that little three quarts of barley for fear that it would ferment. If you went across the street to Dick's place to play a game of pool the gases from the fermentation might become so great that the sprouting box would explode and then where, O, where would little Willie's chicken plant be?

SECOND PRIZE COCKEREL
AT MADISON SQUARE 1910
J. H. JACKSON, HUDSON, MASS.

Let me suggest something to while the time away between stirrings:

Get a last copy of the proceedings of the A. P. A. Send down to Mac's and have him rush up a couple of ponies. Take the bed from your regular sleeping room and move it to the sprouting department, too. Get an alarm clock. It is essential to wake up every fifteen minutes and stir the barley. Take your Standard with you, for if the thing should explode you'll need some sort of a guide in the Other

Regions. Tie it to your neck with a locket chain. If you get to the place where the fakers never return from, you'll need it bad. Now you are ready to sprout barley. Blessings on your curly head, my child, and peace be with you.

Now, what do you think of that Sam Noftzger?

There's a man with an idea who is working it out and doing well with it. Who other than he would have the nerve to get out by himself with a breed that is not yet accepted into the fellowship of the erstwhile Standard and blow their horn and swing the thing all alone? It takes some sand to do that. It recalls the time we had before the Partridge Wyandottes were admitted. One or two stood out in the open and fought the fight alone. This Indian—I mean Indianian—yet he is one of the best Indians, loves birds of the beautiful partridge color. He fondles them and dreams over them, loves them with all the ardor that any fancier every put into his work. This is why one catches the esprit de partridge when he gets a few of his well chosen words into their ears.

"CHAMPION INTRUDER'S SON."

"Champion Intruder's Son" heads one of Mr. Bright's cockerel breeding yards. This bird is one of the best exponents of the clean, sharp barring for which the "Intruders" have become famous. In the last four years two "Intruders" have won the male color special at the Madison Square Garden, New York, shows. When we consider color qualifications at New York, it requires to win a bird of clean, even barring and color, surface and under, perfect colored legs, beak and eyes. Meet this and you have a bird most worthy of every honor.—H. P. Schwab.

Noftzger is not one of the average chicken men. If he was we would not be writing about him in this department. We are after unusual material and get it from time to time as the money holds out for our travels. Were this fancier and his birds of the average type they would not be so catching. It seems popular right now to breed Partridge Plymouth Rocks. It is good business. Here is a man who is creating a demand for something which he is not at all able to supply in the quantity that he would like to. He believes in quality birds and as many of them as he can breed. His matings are selected with the greatest care, as he knows that a new breed must be one that will breed true and sound in order for it to make friends.

Take that last exhibit that Mr. Noftzger made at Chicago, for example, and analyze what it means to the future of this meritorious breed, or subdivision of a breed. This breeder has been working for hardihood, for size and laying

qualities as well as that superb color which his fowls displayed at their big showings this season. This labor was not done in a day, or a month or even a year, long as a year may seem. Time flies to the man who works. Patience is a great trait when the intermediate time is filled in with loving labor. Mr. Noftzger has been busy. Breeders are taking up the Partridge Rocks, for they see a brilliant future in store for them as well as for the other handsome Rocks and Wyandottes which have been created by skilled hands and minds of late.

In the language of the street, Partridges are a good buy. Get good ones. This is to say, get preferred stock, the kind the other fellow wants and yet has not become skilled enough to breed, Noftzger Partridges. They are right. They will make solid foundations. Bank on this I am telling you: In the near years, they will be "doing," will be the Partridges and you ought to be "in" on them. We are going to breed them ourselves and we know of dozens of other fanciers who will take them up, for they see which way the wind shifts. Half of the great breeding successes have been made by men

"CHAMPION INTRUDER."

First prize cock, shape special winner and champion Barred Plymouth Rock male at New York, 1909. He is one of the best of an illustrious line of New York winners. His great-grand sire was the fourth prize cockerel at Chicago. His grandsire was at the head of first prize pen at New York. This bird sired the first prize cock at New York, 1907. The same bird was second at New York the year following when three years old. One of "Champion Intruder's" brothers was the fourth prize and color special cockerel at New York, 1907. Another was fourth prize cockerel at New York, 1908. The fourth prize cockerel at New York, 1909, was also this line, as was the first prize pen male at New York, December, 1907. The "Intruders" are particularly noteworthy for their very narrow, sharp bars, strong under-barring and clean, bright surface color.—H. P. Schwab.

who were wise enough to note the temperature of the fancy at the right time. There are psychological moments in poultry culture as well as in other lines of man's labor, and the time to get into a good variety and one that will be a fancy in itself before long, is NOW. Never will there be a more brilliant Rock offered to the fancy than the Partridge Rock. It is beautiful in its staidness, reminding one of the Scotch plaids his forefathers wore as they watched their flocks; it is as resplendent as the most gorgeous painting which shimmers under the favoring lights, and though it will be a task to produce the superb specimens which must come to the top in the annual weeding at the largest shows, what true fancier will retreat from the task?

MATING BUFF PLYMOUTH ROCKS

More Attention Should be Given to Shape in the Selection of Specimens for the Breeding Pens—General Rules to Follow in Mating for Buff Color

Written for American Poultry Journal by J. J. Bleakley, Abilene, Kansas

DURING the past few years I have made a great many local and national shows. At these shows I meet fancier after fancier who is always looking for more light, for information on mating his Buff Plymouth Rocks. I have been breeding this most beautiful and profit-

S. C. BROWN LEGHORNS.

Highest scoring pair of birds at the Erie, Pa., show. Cockerel scored 95, pullet 95½, by McClave. Bred and owned by Frank Schellang, R. F. D. 2, Erie, Pa.

able variety of fowls for a long term of years. In fact, I believe today I stand as one of the oldest breeders in America. We all have a great many things to learn, and yet, after years of careful record keeping, experimenting, etc., I have found during the past four or five years that a clear,

WHITE ORPINGTON.

First pullet Toledo, 1909; first at Elmore, 1910, and part of second pen at Cleveland, 1910. Bred by Portage Poultry Yards, Elmore, Ohio.

golden buff on the hackle, back, saddle and wing bows with a solid tail and wing and with good fresh color, free from shaffing, is, after all, a possibility. Although many of us are able to produce a good many such specimens each year,

yet we still get many with the wing bows of a shade darker than hackle or back and with a brownish tint to the tail plumage and oft times a little pepper can be found in the main tail if it is handled. In these two color sections we still have much work in order that we can produce a larger percentage of solid color birds.

There has been so much real good advice given in most

Brooder House and Laying Sheds on Waterview Poultry Yards, Hempstead, L. I., N. Y.

every journal on "buff color" mating that I do not deem it as necessary that I say much along this line other than to urge that careful selection and restriction be used in mating your birds as to color. As the even, solid-colored bird is a possibility and the nearer we all get to it the more beautiful and profitable will be the grand old Buff Rock. It is the shape of your birds to which I wish to draw your attention. Too many breeders have gone color crazy and have ignored the shape on their birds till today they have lost that long, slanting back on both the male and female, and especially have they lost that low-carried, well-spread, fan-like tail.

Another weak feature on most Buff Rocks of today is the funnel-shaped underline. This is due to too short a body to start with and the improper depth and development of the breast and body of fluff.

In selecting the females for my pens, I look up the females of a certain line of breeding that are, according to their

First prize Buff Rock hen at St. Louis, December 6-11, 1909. Bred and owned by W. J. H. Goetz, 1150 Cadillac avenue, Detroit, Mich.

breeding or blood lines, fit specimens to mate to a certain male bird which I have already selected. These females I go over and cull down till I only have left vigorous, well-matured birds, that are in the very best of condition. These females must all be long-bodied, extra broad across the shoulders, and must carry to a certain extent that same

breadth to the base of the tail. The general back line must be almost flat, rising just slightly from the junction of the neck and shoulders to the tail. The general slant of the tail should rise just a trifle faster than the general back line which will give the tail the low carriage effect. By all means try and select the specimens that carry their tail well-spread so that the stern view is a V shaped upside down. Select only the females with the oblong effect on the underline. By underline I mean the lower outline mark of the specimen from the keel of the breast through between the thighs to the junction where the body and fluff take a turn upward. Each and every bird should stand well upon a clean pair of sturdy legs. These legs should be supported by medium large, firm feet and toes. Another important matter is the head, wattles, ear lobes and comb. Never use a bird that is too long through the head, too long and narrow a beak or that is too coarse looking about the wattles and throat. Small, neat and thin wattles are much more desirable. The comb of the female should be heavy and thick enough at the base to give it strength and firmness. It should be low and very evenly serrated. Each serration should have enough thickness and strength to give it a lasting and firm appearance. The rear of the comb should be perfectly formed and should not extend beyond the rear of the skull to any great degree.

In selecting these specimens I always pay careful attention to the color of the eye. This is a section that is easily maintained once gotten, and if one is careful to not breed

S. C. WHITE LEGHORN.

First prize cockerel, Illinois State Show, Springfield, 1910, and first at Galesburg, Ill., 1910. Bred and owned by Robert D. Parmenter, Knoxville, Ill.

from a specimen with a light or fish-colored eye. Once this eye color is lost, it is hard to get back. After I have selected out all the females with the above requirements I again let the hatchet fall and reserve from these only the females that show evenness in color from the rear of the comb to the tip of the tail. Their plumage color must be as nearly as possible absolutely free from shafting. Never use a female whose surface color on neck and hackle is the slightest shade darker than the color of the back and wing bows. A very good general rule to follow in mating buff color is to select the surface color of the female to match the breast color of the male. It is to be understood to start with that the male, which is really one-half the pen, or even more, is as near a perfect specimen as possible. He must be a good general bird with no serious defects in any one section. As even in color as possible with a soft under color that is a trifle lighter than the surface. Beware of light in the neck under color of the male. If we breeders as a whole would pay more attention to shape in selecting our breeders, we would soon have the average Buff Plymouth Rocks of today the superior in shape of the other varieties of the Plymouth Rock family. If we accomplish this we will be increasing the utility value of the Buff Plymouth Rock fully one-half. We will have more hardy birds, greater fertility, will have less mortality in little chicks, while the market value and the egg-laying qualities of the birds will be even more wonderful than they are today.

PRIZE ARTICLE DEPARTMENT

We would like to have all of our readers compete for the prizes offered each month in this department. Send as many articles each month as you desire. For the best article we will pay \$3.00 and for the second best \$2.00. Make your communications about a column in length, which is about 600 words. They should be timely and appropriate to the season. Articles describing appliances and houses and accompanied by rough drawings are especially desirable. All the communications must be accompanied by a letter stating that they have been sent in for competition in the Prize Article Department. All articles must be written on one side of the paper only. Articles received after the 15th of the month will be too late for competition in the month following, but will be entered the next month. No manuscript will be returned, but all who send meritorious articles will be given a year's subscription to AMERICAN POULTRY JOURNAL, whether the article is published or not.

The first prize in the contest this month has been awarded to Plummer McCullough, Mercer, Pa., and the second prize to Mrs. J. Bridges, Idlewood, N. J.

MAKING A START.

MANY a beginner will make his initial bow to the poultry business this spring. It is really hard for anyone to give the beginner any good advice, as conditions and locations vary so. A great many writers are telling would-be poultrymen to start now. They are saying, "There is no better time or no better place for you to start than right where you are." I don't quite agree with this well-meaning class of writers, for I feel that in some cases they may be quite wrong. It is true that if you are situated so you can do so at all it is best to make a start as soon as you possibly can, as you can be learning a great deal by experience that you would not know if you wait for another year. But there are several other things for the beginner to consider before making a start. Are you so situated that you have the necessary time to care for your fowls that you should have. Remember that fowls must have care, and the more attention and care that you give them the better results you may expect. So, dear reader, if you can't take time to properly care for your fowls you had better not attempt to keep any, for I always thought that if it was worth while to keep poultry at all it was worth while to keep them right.

Then if you have no place to keep your fowls comfortable you had better not try to keep any at all. You may be on a rented property where there are no buildings suitable for poultry and the owner of the property does not care to put you up a building for your poultry. We have known of such cases and unless you can make some arrangements so as to have your poultry carefully kept and properly cared for I can't say that now is the time for you to start. But on the other hand, if you are at home in the evenings and mornings from your regular work, or can have your good wife care for your small flock when you are absent and want to start in a small way you can find no better time than right now, providing you have the necessary buildings; and right here I want to say that it will not be necessary for you to have an expensive poultry house, but that it is important for you to have the house warm, well ventilated and free from draughts. This is important. If you cannot give your little flock free range you should be able to provide a nice run for them, so when warm weather comes they will have abundance of green food. Now just which is the best way to start I am not able to say. You can start with eggs or stock, whichever suits your pocketbook. It is cheaper, as a rule, to start with eggs, but it takes longer to get under headway. Whichever way you start, buy the best you can possibly afford. The best is none too good. If you start with eggs I would advise you to pay \$5 for one setting rather than pay \$5 for 100, as I believe you would be far ahead in the end. If you buy stock don't buy the cheapest you can. I would advise you to pay \$25 for a pen of five birds rather than buy twenty-five birds at \$1 each. Whatever you do, don't buy a lot of sickly inbred birds, for if you do you will simply have to start all over again. Buy stock of good constitutional vigor—strong and healthy, with full breasts, legs set wide apart. The kind

that are always ready to hustle for a living. Your male bird does not want to be a lazy, droopy fellow, but a real lively chap that is up and doing and ready for a scrap any time. (Though the latter should never be allowed.) You should be sure the stock you buy is strong in constitutional vigor, then be sure they are correctly bred. Correct breeding means much to the beginner. If your stock is correctly bred they will reproduce themselves or even do better, but if they are bred in a haphazard way you will always be in the old rut and not know how to get out. Be sure that the birds you buy are correctly bred and that their ancestors were strong and vigorous. Then look for good individual quality. These three things are essential for a good start and not one of these points should be overlooked. It is never wise to closely inbreed. I say don't do it unless you want to ruin the vitality of your flock. Inbreeding is dangerous. If you want meat and eggs you should get away from close inbreeding, such as mating brothers and sisters, etc. Inbreeding decreases size, and if carried on many years will knock the constitutional vigor out of your flock. Inbreeding may be all right for the show man to establish certain points, but even then I don't believe that too close inbreeding is a good thing. If it is, why don't breeders of draft horses, beef cattle and sheep inbreed? They know inbreeding is poison, and I am sure it has ruined many a flock of fowls.

Good market poultrymen don't inbreed, and if you care for meat and eggs in poultry like I do you won't inbreed, either. Another thing I want to say to the beginner is to go slow. Don't try to reach the top the first year. A good pen of fowls is enough for you to start with. We know of a young man that is going into the poultry business and he thinks he sees a "get-rich-quick" job. He is leaving a \$2-a-day job in an office with only seven and eight hours' work and is going to plunge into the poultry business without any knowledge of it whatever. I am confident that this fellow will make a failure of poultry. What he should do is to keep that \$2-a-day job and buy a pen or two of good birds to care for during his spare time. He can learn a great deal from these few fowls in a year and then if he wants to branch out in the business he will be better prepared to do so.

THE FEED QUESTION.

THIS seems one of the most important questions today in Hendom. Grain has gone up to such a high price that not a few of my neighbors are going out of the chicken business.

Well, I don't blame them if they were feeding as I did the first time I tried my hand at the business. My hens got the best I could buy on the market and they had it in abundance. One day they got dry mash, the next day they got it damp. Grain night and morning.

They were White Wyandottes—a beautiful white, too, for I kept them very clean. They were lovely to look at. But lazy? Well, I should say! They never scratched for a grain. In fact they were too high-toned to work for a living, and, of course, at that time, I knew no better. I got a few eggs and I was satisfied so far, because I thought, Well, they are young yet and all in good time.

You see, friends, I was far from wideawake. Alas for my beautiful, lazy, overfed birds. The cold, cold winter set in with its rain and snow, and worse still, the dreadful high winds which visit us here so frequently. There stood my lazy birds on one leg trying to keep warm instead of exercising as they should have done. The consequence was they all got colds. One morning I entered their pen to find the curtain I had put up soaking wet. (By the way, my husband had built the poultry house with an open front. I thought my poor birds would die in such a house, so put the curtain up.) My pet hen lay dead under the roost and half the hens were sneezing and tears running out of their eyes. Picture my dismay. I had heard the neighbors talk of roup, but had never seen it. I made up my mind they had it.

It did not take me very long to pull down that curtain and

lift up my poor dead pet. How heavy she was! I brought her out, got a knife, opened her and found her so fat I wondered how she ever walked. I buried her under an old oak tree. With a sad heart I went into the house. What was I to do? My eyes rested on a pile of books on the table, among which were a few numbers of American Poultry

S. C. Rhode Island cockerel, winner of third prize, Madison Square Garden, 1909-10. Sired by third cockerel Utica, 1908. Owned and bred by Dr. M. Lee Smith, Watertown, N. Y.

Journal. Well, friends, those few copies opened my eyes. I read and read, and this is one of the things I found out: That here I was spoiling a nice pen of birds from overfeeding, making them lazy and good for nothing. First thing I did was to order a bale of cut straw. When it arrived I spread it all over the floor of the house to about three inches deep, put a little grain in it, took away the mash for a day or two until I got the birds to work for their living. I gave them plenty of water with a little potassium permanganate in it, grit and oyster shell. I did not let them out any more that winter, except for one or two hours in the middle of the day if it was fine. Sometimes I would pile the straw in the middle of the pen, just to see them pull it down. How they enjoy it! You should hear them chattering like a lot of Magpies. After that I did not work so hard stuffing them. I let them do the work. Lay? I should say, and I sold the eggs and as far as I knew they were much happier, and for that matter so was I. That is three years ago. Since then I sold off all my white birds. Now I keep Barred Plymouth Rocks, also Rhode Island Reds. They can stand the cold winters better. My husband has built all the poultry houses with open fronts. No curtains went up this winter. Up to the present not a bird has a frosted comb and not a sick bird did we have this winter. Last year we used both incubators and hens. We got the best results from the incubators. The chicks were raised in small boxes somewhat after the Philo system. We put from thirty to fifty in a box and as they grew bigger we gave them more room, moving them to fresh ground once every week. They were given a mash made up of bran, middlings, cornmeal, alfalfa, meat meal and fine oyster shell. All the grain was raked into the ground so they had to scratch to get it, and plenty of clean water. Once in a while I would give them some lettuce. They loved that. About once a week I would give them no mash for a day and found it a good plan. They grew like weeds. I had very little loss and I sold all the cockerels at a good price, and at present have a nice lot of pullets.

I hear the neighbors complain about their Plymouth Rocks getting too fat and "Oh, so lazy!" A few are selling off and buying lighter stock. But so far I am satisfied. I may be slow, in that I have not near so many hens, but I notice

I have on an average more eggs from my little flock. When I remark sometimes to a neighbor that I think it is a good thing to read up some of the papers that are published nowadays I am sorry to say I find there are a good many like Mr. Cantsuit who is mentioned in one of your papers. Let me say for my part I would not be without them. They taught me many a lesson in the past year.

To sum up: I find I get best results from my laying stock by keeping them in open houses with plenty of clean cut straw for litter. (At first I used leaves, but found them very dusty.) I feed all grain in this litter. Wheat and oats, principally—very little cracked corn. This is fed in the morning and evening; about four quarts a day to fifty hens. They have a dry mash before them all the time in feeders. It is a mixture of two parts middlings, two parts crushed oats, one part wheat bran, a small portion of beef scrap, about a pint to a peck of above mixture, three parts alfalfa and one part fine oyster shell. They get plenty of fresh water. The dropping boards are cleaned off every day and a little fresh sand put on.

If the day is warm and the ground is pretty dry, with the sun shining, they get out for a couple of hours. I throw a bucket of wood ashes once in a while in the yards. They like to scratch in it. I cull my stock very close, as I find drones don't pay. The Potter system has been a good help to me in this part of the work.

I find after my chicks are six weeks old I can give them all they can eat up to maturity without doing them any harm, once in a while letting them go without feed for a day. I also give a wet mash now and then. We find we can get splendid hatches from our machines. We bought the best. We thought for our money we used common sense. The eggs were fresh, from strong birds and we were careful to feed what we thought would insure fertility. We try to make our birds happy. We do not allow them to be frightened if we can help it. In cold weather their drinking water is made blood warm and they get plenty of cut straw to play in. That's the secret, my friends; in getting plenty of eggs don't

run into the pens and throw the feed down and run out again. Stop long enough to say good morning and talk a bit—they like you to be friendly. Hens are every bit as fussy as we women, and every bit as fond of being made a fuss over. Please bear this in mind. Perhaps some day, if you will let me call again, I will tell you some funny hen stories. Idlewood, N. J. (Mrs.) J. Bridges.

SELECTING AND MATING BREEDING STOCK

Select Females Along the Lines Described in the Standard—The Selection of the Male of Great Importance—Poor Fertility Caused by Improper Ventilation

Written by Harry M. Lamon, Special Representative A. P. J., Adams Center, N. Y.

THE success or failure of your breeding operations for the coming season, and, I might add, for several seasons to come, if you are to line breed, depends upon the constitutional vigor of the breeding stock. Your birds have got to have a good, strong constitution as a foundation to start with in selecting the specimens to go into the breeding pen. Assuming the health of your flock is of the best, select the females along the lines described in the Standard of Perfection, and if you don't happen to own one, get one at once, as you can't breed high-class poultry without it. See that they match in shape, that they are about of the same height, same length of leg and back, eyes all match in color and combs of the same size and shape. See if they stand well apart on their legs. The weak-constitutional sort are the ones that stand as though their legs came out of the same hole in their body. Any of the females that you have selected to breed from that have had bad cases of colds, throw out; they will only breed disappointment. Now see about the color. How does it match? Are the different birds of the same shade? If not, start over again until you can get the number you desire, so they match perfectly in all sections. Don't be afraid that the number of females in your different breeding pens will be too small. Better have three or four, or even one, that are exactly right than a lot of different types and colors.

I think I am absolutely safe in saying that a large percentage of the winners at New York, Boston and Chicago are bred from pens composed of not more than six females. Be slow in making your decision or passing final judgment on a bird as to whether she shall enter the pen or remain a member. Put the ones you have picked by themselves for a few days and watch them. See if they all carry their tails at the same angle. See if they are alike in temperament, never forgetting the fact that it takes good mothers to produce good sons. Never hesitate to take a good hen out of a pen that is quarrelsome. Better mate her by herself if you breed her at all.

The male is one-half the pen, and in choosing him be sure that he is strong in the sections where the females are defi-

First prize White P. Rock cock at Detroit, January, 1910. Bred and owned by W. J. H. Goetz, 1150 Cadillac avenue, Detroit, Mich.

cient, and if you haven't such a male send to some good breeder and get one. There is plenty of time to breed winners yet. Many of the finest are produced in June. In selecting females that are alike in all sections it is very evident to anyone that the selection of a male is made much

easier and your results are far surer than if the females were of different types and colors. For instance, if you breed a single male and female of a certain type and color your chances of reproducing them are as good as it is possible for us to have in breeding fowls. Add four or five more females of the same kind and you have increased your

Second Buff Wyandotte pullet at the late Chicago show. Bred and owned by Simon Beuth, German Valley, Ill.

chances just four or five times as much. If the females have no resemblance to one another the result will be a very uneven flock of youngsters in all sections. What every breeder must do before he can receive any great recognition as a poultryman is to establish a strain, and my advice is to write down a detailed description of the members of your different breeding pens so as to know beyond a doubt in a few years to come which sections were weak and which were good. By following this plan, in a short time, you can mate the breeding pens with a certain degree of certainty as to what the young stock will be. The cock bird should be a bundle of vigor and energy. If a cockerel he must be fully matured. Don't waste your time breeding immature stock. A good guide to go by in judging something of the vigor of a male is his crow. It should be loud and strong.

After putting the pen together and by themselves you must not think your work is over, for it has just begun. It resolves itself to one of condition now. Be sure that they are not crowded for floor space; keep their quarters dry, and above all, keep them busy if you want eggs strong in fertility. Fowls that are kept busy seldom get overfat, and overfat birds never produce eggs with good healthy germs. Use the best of grains and give a feed of something green once a day—at noon is a good time.

Such a male as I have mentioned will bear close watching, as he is apt to be so gallant that he does not eat enough to keep up his strength and vitality. It will pay to look after him carefully for a few nights at first to see if his crop is full. If not, you will have to feed him by himself. A little raw meat to such a male is a great benefit. In fact, it is good for all the members of the pen. Plenty of fresh air and sunshine is another requisite to the successful production of a good crop of thrifty youngsters. If your poultry house is of the closed front, warm kind, better take the windows out and tack some cotton cloth on the frames and try the open-front, cold-air kind. Take my word for it, you won't be disappointed in the results. A large per cent of poor fertility can be charged up to bad air caused by too close and too warm houses.

If after looking your flock over and selecting the best you are not satisfied, don't waste a whole season's work on them, but send and get a setting or two of eggs from some well-known breeder and start right.

The Season Just Past

The show season of 1909-10 is over. It has gone, leaving behind it foot prints or, rather, lessons that it will be well for us to briefly note at this time.

This season has been an unusually successful one from every view point; more shows were held than ever before, the entries were far more numerous, and in every case that we have heard of the attendance has been doubled.

At this time we do not know the exact number of shows held, but that they are in excess of those of all former years you will agree. Each state and nearly every county has had its exhibit. They have come to be an event eagerly looked for. Proper organization has placed the poultry associations on a sound basis, managed by sound men, that make them a feature in most localities. We find them today not only run on high business principles, but by business men and women.

The great increase noted in entries clearly demonstrates several facts, some of which we wish to call special attention to in this: That the old guard is still in line, for once a fancier always one; that each year, and this one in particular, brings out hundreds and thousands of new exhibitors—those that are either new to the business or those that have bred chickens and have discarded the mongrel for the standard bred and taken place in line. In this respect the one feature that impresses us most is the great number of young exhibitors seen this year. More school boys and girls, whose parents have wisely made poultry keeping possible for them and have interested themselves enough in poultry and the welfare of their youngsters to see in this the possible teachings, with increased love for nature, which is positive to impress its lessons upon the young and insure better men and women.

The hold the poultry business has on the general public is well shown by the remarkable attendance seen at the

AMERICAN POULTRY JOURNAL is the oldest poultry paper in America. It has a national and world-wide circulation. The best writers on poultry matters contribute to its columns. It receives the patronage and endorsement of the foremost representative breeders of standard poultry and manufacturers of poultry appliances in the country.

Advertising rates are sent upon request.

shows this season. At New York the great garden was filled all the week as never before and made possible the most successful exhibit ever held. Philadelphia, with the exhibit in the largest hall ever had there, was blocked to the doors several times and extra doors were opened for exit only. Buffalo, up to Thursday, had passed all former records in attendance and still had two of the best days left. The same stories come from Cleveland, St. Louis, Chicago and, I believe, from every show held.

For the poultryman the future holds the brightest prospects. Exhibition and breeding birds were never before in such demand as now. When general poultry and its products have brought the highest prices year round and with the demand not over two-thirds supplied, then it is very evident that there is room for all in this line with profit assured. The story we write today can be repeated a year hence. The same conditions that now confront the poultryman will also confront him a year from now, the ever increasing demand is far greater than the increased supply, and try as we will we simply can't cheapen the value of poultry products.

H. P. SCHWAB.

Are We Far Wrong?

We picked up an advertisement the other day that declared that the world loves a winner. Well, there is something in it. We like to see the fellow who has put all his eggs in one basket and then watches that basket. It takes a lot of nerve to make a winner. One has to stay with the game a long time to win. And it is our knowledge that it takes time and money to make a winner which makes us appreciate one. The poultry business is not one in which a few of us get rich quick and all get rich in time, but is one in which our money is turned over more quickly than in any other line if we give the business the attention that it deserves.

Yes, we do like to associate with the winners, with the men who have kept at the front of the firing line so long that we look at them with reverence. We may think they are unscarred. But they are not. They have been hit by many a bullet and have always made each wound a lesson by which they gauged their subsequent actions. When they have lost at one method of procedure, they have changed tactics at once and tried to turn defeat into victory. Success, said one man whom we cannot recall, is pretending you do not know when you are beaten. There is a lot in it. Front is everything. Yet there must be something behind the front. There must be intensity of purpose that makes those with whom we do business know that we are doing our very best and trying to increase our value to those who see fit to place business with us.

Never was there a business man who made a success of getting so high and mighty that he might not be touched with a pole, as the fable hath it. We cannot be aloof from the men we do business with. They know what attitude we assume, though they are not watched by us. We must help our customers by giving them of the knowledge we have gained at first hand. There is a lot of good business turning away from the men who could use it to advantage because they have not come down on the ground to secure it. There are a lot of orders going every year to the men who can write the most convincing letters and which letters have a lot of information in them. Get in line, Mr. Man.

Going Them One Better

There's the man behind the counter, the man behind the gun; the man behind the buzz saw and the man behind the son; the man behind the times and the man behind his rents; the man behind the plowshare and the man behind the fence; the man behind the whistle

and the man behind the cars; the man behind the kodak and the man behind the bars; the man behind his whisks and the man behind his fists; nearly everything behind has been entered in the list. But they've skipped another fellow of whom nothing has been said—the fellow who is even or, perchance, a bit ahead. Who always pays for what he gets, whose bills are always signed—he's a blamed sight more important than the man who is behind! In this business game of hen-men, a business of many parts, much detail and sometimes buffets, let us not forget the art of paying for all we get and saving a little more, for that journey in the wagon to the balmy Other Shore. To be behind the hen, for some folks, is quite enough, but the man who is ahead of them's the man who has the stuff.

How an Idea Grows

Certain poultry centers have become poultry centers because of the original poultry influence in that community. We know of three different towns in the middle West where there is a great deal of pure bred poultry rearing going on all the time. Ten years ago a man began to make incubators out there in Nebraska. He hauled one machine all over the landscape in a wagon for the simple reason that he wanted to prove to folks that a machine would hatch eggs and do it well, even if it was moved about while it was in operation. His incubator establishment grew from a tiny factory to one of the largest commercial enterprises in the state and now that town is pointed to with pride, as the paragrapher hath it, by all the state's residents.

Clay Center, Nebraska, is a poultry town. The making of incubators out there has brought attention to pure bred poultry. Once we took a trip

through that county and saw ninety per cent of the farmers' wives raising pure bred fowls. Farm after farm was passed where there was nothing on the place but pure bred Leghorns, Rocks and Reds, Wyandottes, Brahmas and Cochins. Mr. Johnson began preaching pure bred fowls as soon as he began making incubators and the result is what one sees on a trip that would pay one to make.

Around Freeport, Illinois, there are likewise thousands of flocks of pure blooded fowls. It has been said in our hearing time and again that there were more pure bred fowls to the square inch about Freeport than any other chicken town on the map. We shall not attempt to prove or disprove it. The fact is that one can find about any variety under the sun down there around Freeport. Years ago there was started a big poultry farm at this point and it has been the father of the better poultry idea in those parts.

The chicken business, as the farm writers call it, is growing. It is getting so big that all the farm journals in the land are giving good departments over to it from issue to issue. It has ceased to be small potatoes and few in a hill. The era of business methods has struck it and now we are going to see more advancement than ever.

English Notes

As we have before stated in these columns there are two classes for Black Langshans in the old country. One class is termed the modern or club Langshan and the other the Croad. The Croad birds are those bred as near like the first importations from China as possible, while the modern or club Langshan is bred for its height and scantiness of feather and some of them would make good black exhibition games, if

you will pardon a hyperbolical phrase. The facts are that the modern English Langshans are so tall that they have to be cooped in turkey coops to prevent their combs from becoming spoiled against the tops of the cages. The modern birds are bred in white, black and blue colors. The Croad birds are bred in black only. One man who commented on the recent Crystal Palace show said that the modern Langshans looked a deal like well groomed and well fed storks.

Blue Orpingtons were quite a feature of the exhibit this season. There were about forty of these fine birds set down in the pens, and they were a grand lot for type and color, so the leading authorities over there say. The judge did not know what to do when he came to the task of placing these Blue Orpingtons, so he told the originator of them, so he gave all the best awards to the largest fowls. Some class to that, eh? How would that do at Madison Square or St. Louis or Chicago? It seems that Blue Orpingtons are not to be bred with black top color as are Andalusians and Leghorns and Wyandottes, the breeders all working for a color that they describe thus: "Solid, rich, even, pigeon-blue from head to tail, free from lacing." We made mention formerly of the fine Cuckoo Wyandottes that were shown at the Palace this season. They have even been brought over to this country and are offered in eggs at some point down east that we have forgotten, though we only saw the announcement recently.

In ornamental fowls the English are leading the world. They still love their dear old game breeds and make great showings of them on every occasion. Polish and Cornish and breeds that we scarcely ever hear of are all shown in full bloom at these big shows of England. One thing we noted in the re-

YOUNG'S STRAIN S. C. WHITE LEGHORNS

I HAVE NO OTHER BREEDS

Another great victory at Madison Square Garden, New York

Again winning for the eleventh time more prizes than all of my competitors combined

After having 119 of my best young birds stolen, my winnings were as follows: Cocks—1st, 2nd, 4th, 5th. Hens—1st, 5th. Cockerels—1st, 2nd, 3rd, 4th, 6th. Pullets—4th. Pen—2nd. Special for best display, special for best male, special for best color male, special for best shaped male, special for best female, special for best head female, special for best shaped female. Spratt's Gold Special for best Leghorn cockerel, any variety, hatched 1909. State Cup for best display. Elm Trophy for best male. Silver Medal for best male. Bronze Medal for best female.

You cannot win without my strain. It is the greatest laying strain on earth. Why fool away your money purchasing eggs and stock, when you can buy from a strain that has been established for 35 years, for the same money or less?

The following are the male birds that are heading my thirty yards this year:

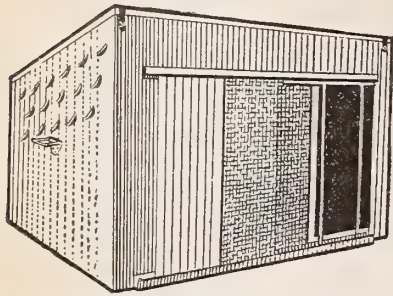

1st Cockerel, New York and Boston, 1906	2nd Cockerel.....New York, 1910
1st Cockerel.....New York, 1907	3rd Cockerel.....New York, 1909
1st Cock.....New York, 1906	Cock heading 2nd Pen, New York, 1907
1st Cockerel.....New York, 1909	Cock heading 2nd Pen, Boston, 1907
1st Cock.....New York, 1909	3rd Cock.....New York, 1909
1st Cock.....Jamestown, 1907	3rd Cockerel.....New York, 1910
Cockerel heading 1st Pen, New York, 1909	4th Cockerel.....New York, 1910
1st Cock.....New York, 1910	4th Cock.....New York, 1910
1st Cockerel.....New York, 1910	5th Cock.....New York, 1910
2nd Cock.....New York, 1907	Cock heading 2nd Pen, New York, 1910

SAVES CHICKS

views of the Palace show this season was the statement that the Pekin ducks were being largely supplanted by the Indian Runners, as the former were prized mostly for their laying and not, as in this country, for their table qualities. We have ever thought of the Pekin as being the leader of all table waterfowls, but it seems that the Rouen and the Aylsbury have the call over there and nothing will shake it loose. Now the question puts itself, if the Pekin is a poorer table duck than the Aylsbury, why is it that duck plants in this country do not give more time to the Aylsburies? Have they ever been tried and what was the result? Perhaps it is the Pekin's great ability to lay an egg daily in the hatching season, coupled with its hardihood, that makes it supreme in this land.

The American bronze turkey has certainly captured England. The English breeders are known the world over as the greatest feeders of stock and they have succeeded in growing turkeys of this breed that really have the edge on the home of the Bronze. Since the advent of American turkeys in England such breeds as the White Austrian and the Black Norfolk and the Cambridge Bronze have not had the usual numbers of supporters. Orpington ducks in Buffs and Blues have been gaining ground in England but their introduction to America did not take well.

Writers and Writing

Some time ago a poultryman told us that the reason he never wrote anything for the poultry journals was that he wrote himself out in a few months after he caught the chicken fever. Did you ever notice how true this is? And how it comes about that the mushroom writers for the journals always depended on practical articles for meat for their pens? Fresh water daily, grit and good, clean grain and all of that? We suppose there is some need for such admonitions. The crop of entirely new subscribers is greater and greater from year to year and they must be fed, so to speak, with the essentials in the management and care of poultry.

Another thing: Did you ever notice the woeful lack of articles for beginners on the breeding of fowls of the various varieties? Why is this? Is it because the budding writers offer only a lot of matter which they see elsewhere, or is it because the breeders who would know what they are writing about do not have the time to take their pens in hands? Why, again, is it that so many articles on poultry houses all seem to come from the same source and editors will publish them? This might be answered by saying that there is a dearth of good articles on housing and sheltering which makes editors use what is contributed, possibly hoping to have some one who knows better refute the articles.

We have known many breeders to read something very erroneous but still they would not say a word against the false teachings. They had not the time, was generally the plea. We have been watching the rise and fall of many a poultry journal contributor in our time and very few of those who come are stayers. One large manufacturer told us the other day that he wrote more articles on the fancy and poultry possibilities during the first three months after he first owned a pure-bred chicken

than he had in fifteen years afterward. Very few poultry editors are in the country. Most poultry journals run themselves. The matter that goes into them is either junk pure and simple or reading notices.

We Will Have Them

We guess the American fancier has nothing more to say over the multiplicity of varieties in England. A few years ago it was often noticeable to those reading American journals that some fancier this side of the big wet made a little fun of the many varieties of a breed as they were originated in England. But today we stand about as far ahead in this one respect as the rest of the world. Look over the Wyandotte list: Whites, Blacks, Buffs, Silvers, Goldens, Silver Penciled, Partridge, Columbian, Buff Laced—these all made here at home—with the Red Wyandottes, Blue Wyandottes and one or two other varieties, including the Violets, all imported. Not bad for a start of the Wyandottes. A cross of the Whites and the Partridges would yield the Red Pyles, so we might as well say that we have these any time we want to make them.

Then to get over among the Rocks: Barreds, Buffs, Whites, Partridges, Columbians, Silver Penciled and Golden Barred. Quite a list, is it not, for such a staid and responsible breed as the Rocks, eh? And the wonder of it is that these varieties are all going forward. Breeders of them are coming to the front all over the planet. There is something about the new colors and combinations of colors that make them very interesting. Every man who is interested in them gets a couple more fellows going, and so the fancy spreads.

The Asiatics are not doing so well in the race. American fanciers are all centered on the general purpose varieties. They have even given the sprightly Leghorn the mitten in this race for pretty colors. The Minorcas are now being bred in Buffs, Whites and Blacks and the Pyle Leghorns are coming forward a bit but we are not so busy making new ones as we have been with the Rocks and Dottes. There is a text in this short note for a Babcock article or one by his friend Gorline. Is the craze for general purpose fowls one that can be termed a form of dementia poultrycana?

More Good Laying

The English, Utility Poultry Club's laying contests are means of information which we can all watch with interest. The managers are using trap-nests in all the pens of different breeds and the tales these tell are worth the reading many times. One would naturally suppose that the egg breeds, so called, would carry off the greater share of the honors. But such is not the case, it looking as if the ability to assimilate the food given was responsible for the winning pens or those anywhere near the top.

General purpose varieties were leading all the rest. For the first three months of the present six months' contest the leading variety is Buff Orpington. These four hens or pullets have laid for the three months they have been penned 66 eggs each. This is a pretty good record. The best indi-

PITTSFIELD

BARRED PLYMOUTH ROCKS

still further clinch their claim to be the Leading Exhibition-Utility Strain of this country by winning at Boston, 1910, 1st cock, 2nd hen, 5th cockerel, 3rd pen fowl, and 1st exhibition pen chicks; also special for best cock and four hens and five other specials including A. P. R. specials for best cock and best pen.

Our strain has won its way to the front strictly on its merits. **THE NAME PITTSFIELD STANDS FOR QUALITY.**

Our stock is strictly up-to-date and is rich in strong, vigorous breeding qualities, especially suitable for foundation stock and new blood. The results our customers have had with our stock warrant your confidence in placing your orders with us. Your satisfaction is the key to our success.

Do not confuse our strain with other leading strains. We breed practical, profitable bred-to-lay Utility Stock, as well as show stock, and make a specialty of supplying utility breeders with new blood. Our utility stock is bred for color and barring as well as for eggs, and in this respect excels all other strains in this country.

Our facilities for handling orders for Hatching Eggs and Day Old Chicks are unequaled by any other Barred Rock plant in the world and enable us to ship all eggs, carefully packed in excelsior, so they are sure to reach you in a strictly fresh and hatchable condition. We expect to make good any unreasonably poor hatches. Our wide experience in handling the day-old chick business and our facilities for hatching insure you a delivery of healthy, vigorous chicks, and our record long distance shipment of 2,600 miles testifies to the vitality of the stock. The successful shipping of chicks is a matter of experience, and we offer you our experience and the best quality of chicks at a reasonable cost. Every bird in our breeding pens this season is a carefully selected breeding bird which is a guarantee to you of good results.

OUR EXHIBITION MATINGS this season will include all of our Boston winners and eggs will be sold from the same at the same price as previous seasons, although our winnings this year warrant higher prices. As the matings are small, the number of eggs available will be limited and it will be necessary for orders to be booked ahead. We shall issue, about February 1, a detailed list of special matings which will be mailed on request.

PRICES OF EGGS—Utility, \$1.50 per 13; \$4.50 per 50; \$7.00 per 100; Exhibition, \$4 per 13; \$12 per 50; \$24.00 per 100

PRICES OF CHICKS—30 cents each; \$6.00 per 25; \$10.00 per 50; \$15.00 per 100

BREEDING BIRDS SHIPPED ON APPROVAL

We have for sale a few choice cockerel bred males, including some of our winning cockerels and cocks, excellent breeders, an exceptionally nice lot of pullet bred males, and a limited number of cockerel bred and exhibition females, all at prices low for the quality. We have a very choice lot of utility cockerels this year, price \$5 each. They are worth the money and the only kind profitable to buy. We guarantee them satisfactory. We appreciate our customers' orders and endeavor to handle them in a live, up-to-date business manner. Remember, all of our time, effort and intelligence is devoted to this one breed, both utility and exhibition. This means something to you. Write for free illustrated catalog. Address

TOO BAD

Too bad any woman must wash a complicated cream separator. Too bad anyone is misled into thinking complicated bowls are necessary. Look at the upper picture.

Those 52 disks were all used in one common disk machine that was discarded for a Sharples Dairy Tubular.

Look at the lower picture. It shows the only piece used inside the wonderfully light, simple, sanitary, easy to clean, wear-a-life-time Sharples Dairy Tubular Cream Separator bowl. Any wonder Tubulars probably replace more common separators every year than any one maker

of such machines sells? Tubulars skim faster and cleaner than any other separator.

Tubular sales exceed most, if not all, others combined. World's biggest separator works. Branch factories in Canada and Germany. The only modern separator—The World's Best.

J. G. HERMANN & CO., Indianapolis, Ind.

vidual laying for one month has been that of a Buff Orpington female credited with 27 eggs. Not at all bad. Close on the heels of the winners are White Wyandottes, Buff Rocks, Anconas, White Wyandottes again and then three pens of Buff Orpingtons, with another pen of Buff Rocks and another of Buff Orpingtons, making up the ten highest in the order named.

The poorest laying of the first ten pens has been 56 eggs each for the Buff Orpington pullets in three months, within a fraction of twenty eggs each hen per month. It is about time that we had something of the kind started here in America, and there is no doubt but it would create a great lot of interest. There is room at Ames for this kind of work, at Nebraska station, at Columbia, and other stations throughout the country. The time is now.

Going Ahead in the South

The South has long been recognized as being strong on early hatched chicks and competing at the early shows. In most every southern poultry journal there is a lot of matter telling about the advantages of the South as a poultry growing section. What is wanted are more good breeders in the South and the good shows that are being held there in the best cities are making more and more of the right class of recruits. The southern climate is something great when it comes to raising finished chickens, as the poultry show of the Jamestown exposition showed. We heard numerous breeders who visited the show as well as judges say that some of the best birds they ever saw came from the South.

Nothing will do more for the poultry business in any section than the careful building up of good shows. They are the life of the fancy and do as much as all other forces to bring about sales and draw beginners to the ranks. Let any small community drop its show for a season or two and the result is that the pure-bred chicken talk falls off in its volume and the interest flags out. Every breeder in the South who has the best wishes of the poultry fancy truly at heart should support the shows, even if he knows he has not the best stock, he should show. Associations cannot live without encouragement. They must have entries. The birds must be on hand for the visitors to see and the show must be supported. It is but a little for every man to turn out with a few birds, but look what this spirit did for the St. Louis show this winter.

More Room

Now when so many writers are pointing the way to success we might not be out of place in suggesting something ourselves. There is room for another farm or two to breed all kinds of bantams and ornamental fowls. Somewhere in the East there was a farm started a few years ago to breed fancy waterfowl for sale to parks and estates where water was at hand for these beauties to disport themselves in. It has never been able to grow enough birds to supply the demand and with one or two exceptions it has not had to advertise to unload the surplus.

Do not laugh in your sleeve when we say there is money in bantams. There is, and lots of it. They do not eat

much and sell for better than the average prices for larger fowls. They do not require much room to be reared in and they are salable at all seasons. If we were quartered in a small corner of a city we would have our bantams if there was no room for the larger fowls. They will always pay their way and more, laying eggs and raising a little brood where the limited quarters would discourage another hen of larger size.

There are two or three good sized farms throughout the country which are giving all their time to the bantam game. They are making ends meet and lap over a little financially. It is not the size of the output that makes a chicken farm noted—it is the quality of the product. There is quality in little fowls as well as there is in larger ones.

In Passing

It looks as if the fanciers on this side of the fence want to see the new Standard out, so that they may have it this fall. If there is a bungle in the way it is printed there will be some howling, too. The country is looking for about the best thing they ever had a chance to gaze upon in this line and from all the talk that the work has occasioned we are expecting much. The price that is paid for the illustrations makes the fanciers of the country look for something finer than anything we have heretofore been accustomed to.

For once we would like to see an edition of the work that would not have to be corrected with another edition in a few months. The man who buys a copy of the first edition does not want to find the usual blunders either of the editors of the Standard or printers.

GET EGGS NOW

Planet Jr.

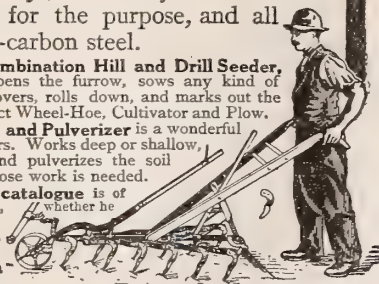

Planet Jr Farm and Garden Implements do more and better work, and last longer than any other farm implements made. They are fully guaranteed. Over 35 years' actual farming and manufacturing experience is put into every Planet Jr tool. They are all made of the most durable materials for the purpose, and all cultivating parts are of high-carbon steel.

No. 6. The newest Planet Jr Combination Hill and Drill Seeder, Wheel Hoe, Cultivator and Plow, opens the furrow, sows any kind of garden seed accurately in drills or hills, covers, rolls down, and marks out the next row—all at one operation. Also a perfect Wheel-Hoe, Cultivator and Plow.

Planet Jr 12-tooth Harrow, Cultivator and Pulverizer is a wonderful tool for berry-growers and market-gardeners. Works deep or shallow, without throwing earth on the plants, and pulverizes the soil thoroughly. Invaluable wherever fine close work is needed.

The 1910 illustrated Planet Jr catalogue is of great value to every tiller of the soil, whether he needs implements or not.

It is free. Write today. S L Allen & Co
Box 1107T Philada Pa

coop towards the wind, and at night have some kind of covering in front.

Down south now, where it is very hot, be sure to keep the drinking water for the chicks out of the sun, as if this is not done many chicks are liable to be lost with diarrhoea. From May on in the northern section the water should be kept in the shade.

Regarding brooders, many chicks are killed or their constitutions ruined every year by keeping the brooders too hot. Am trying out the fireless brooder this year, and if it works out it will be the best way I know of except the hen. Eighty to 85 degrees for the first week, then down to 75 will raise stronger and more hardy chickens than when more heat is used. Do not feed little chicks before forty-eight hours old. It is then probable that you will not be troubled with white diarrhoea. Be sure and give young chicks as soon as they start eating fine grit; this is very essential. If any oyster shells are given they should be broken very small, as the inlet to the gizzard is very much larger than the outlet and should a large piece get caught in the outlet it would set up inflammation.

Collect eggs two or three times in the morning during cold weather.

One should be careful to watch the rooster at feeding time, as some birds will starve themselves, letting the hens eat up everything. When this is the case the male bird should be fed out of one's hand or from a ledge high enough so that the hens could not reach the food on it. It is very rarely that this has to be done, but it is well to get hold of the male bird occasionally to see if he is keeping up his weight.

Be sure to dust all male birds and hens with a good insect powder, putting plenty around the vent, as all vermin go there once in every twenty-four hours at least for moisture, and will die if they do not get this. I have never had any trouble with vermin on chickens as long as they are dusted twice a year. It is best to do this by hand, having the insect powder in a tin with holes in the top. Be sure to dust a hen good before she sets on eggs, and again on the fourteenth day. A hen that sets on eggs and has lice will usually break eggs while she is setting, as naturally she is restless. Who wouldn't be.

Remember that black fowls when hatched are black and white or yellowish, and have white tips to their wing feathers up to over four months old. White birds will often hatch out a yellowish color, and buff birds sometimes very light, getting darker, and sometimes hatch dark with several black strips down the center of back and head. These will disappear in time.

Next month I will write on the best way to break up setting hens so that they will be through their broodiness in three days and be laying within five days, and various other subjects.

Early hatched chickens lay at a younger age than late hatched ones.

A male bird that has had a frosted comb is just as good for a breeder as one that has not had this trouble.

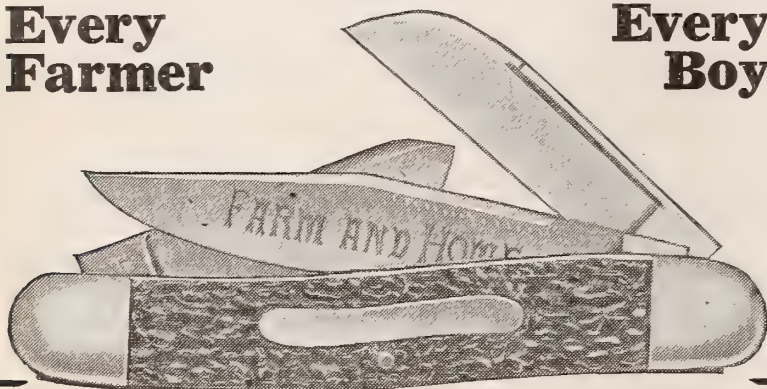

Silver Spangled Hamburgs & Barred Plymouth Rocks

My Hamburgs won at the great Cleveland show, first cock, first and fifth hen, second and fifth cockerel and first pullet on seven entries. No pens entered. Send for price list on eggs and stock.

Will Want This Big Knife

You must see it and use it to appreciate the exceptional qualities of this knife

The Blades three in number, are of the very best steel, accurately ground, evenly tempered, highly polished and finished in the best possible manner. They are large, strong and each so shaped as to be particularly useful to the farmer for budding, pruning, etc. (See illustration.) They will meet the demand of each and every occasion.

The Handle is four inches long, of selected stag; brass lined throughout; brass riveted and trimmed with German Silver name plate and bolsters. It is equipped with hard, finely tempered springs for holding the blades securely when open or shut, and so well adjusted that little or no wear comes on the blades when in motion.

Quality, combined with strength and service, are the features that make it possible for us to Guarantee that every knife will give Absolute Satisfaction.

You Can Get It Free

I want you to sell for me Four Beautiful Colored Pictures to your friends. It will take only a few minutes of your time, as my offer is so liberal everybody will want one. After you have tried it you'll be enthusiastic and want to earn some of the other fine rewards I am giving away.

Just Write Me A postal card will do— **Don't Send Money**

say you want Four pictures to sell. I'll send them by return mail—I trust you until you sell them—then send me the money collected and I'll send you this fine Three-Bladed Knife as a reward for your trouble, and a complete list of other valuable articles of merchandise you may earn in the same way. Don't wait—send me a postal today. Address,

THE KNIFE MAN, 13 Broadway, Springfield, Mass.

The first feed given the chicks should be given so that the hen can peck at it, as this will encourage the youngsters. The best thing for the floor of brooders and coops where young chicks are is peat moss, as this is a deodorizer, it is naturally cleaner than anything else, it should be broken up fine, it will retain heat, and when the chicks come in off the cold ground it will warm their feet. If this cannot be obtained hay cut up in small pieces is good. In a cold climate sand and earth are not so good, as it is cold for the chicks. Always have plenty of soft material on floor of coop or brooder.

GLEANINGS FROM THE JOURNALS.

By A. B.

Head us off, please, for we have at last got at the foundation of one thing! Mrs. Basley, who does most of the editorial work on Poultry Craft out there in California, tells us in the last number that Los Angeles consumes about \$6,000,000 worth of fowls and eggs every year. Is there money in hens? Well, it looks to the Lean One as though somebody was putting in a lot of it out there in little old California. Mrs. Basley also tells us that the cost per year of keeping a hen out there is from \$1.20 to \$1.50. This is the cost where grains have to be bought and nothing can be raised. We might mention in passing that poultry and eggs out there bring more money than they do in the central

west for the reason probably that all other commodities are necessarily high and the egg farmer does not have every farmer's wife to compete with in mar-

keting his product. This from Mrs. Basley:

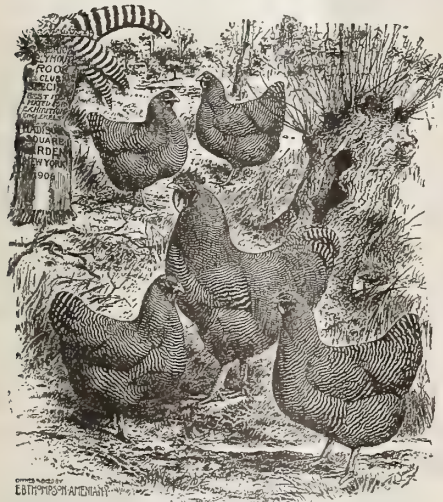

"The poultry business is not a 'get-rich quick' game, it is an honest, legitimate business and there are hundreds of prosperous men and women here that are making a good living at it.

"According to the statistics on poultry raising in the east the hen there is credited with earning \$1 a year for her owner. In most ranches in California the average is \$2 a year clear gain. This has been the gain for the last fifteen years of a man that I know who is breeding only commercial poultry for eggs. Others by carefully studying the business are hatching from eggs laid by hens that have proved themselves especially fine winter layers, are hatching out the pullets at the right time so as to have them lay eggs galore in the months of October, November and December, when the price of eggs soars highest. These men, and women too, know how to handle the fowls, how to feed to the best advantage, how to keep the fowls vigorous, in other words, how to make the business pay, and these are getting over four dollars a year per hen for commercial eggs. I know one lady who made clear \$8 per hen, but she was selling some eggs at a little more than market price for hatching.

"The owner of one beautiful ranch that I visited found that his hens did not pay their feed bill one year in October and November. Just when eggs were at the highest price his hens were not doing their best to fill the egg basket, the next year by 'knowing how' the same number of hens cleared him \$155. All the difference between the 'knowing how' and not understanding.

"This is a sample of what is being

Fashion's Proudest Birds are "Ringlets"

Winners of Special Prize for Best Pen mated to produce Exhibition Cockerels, at Madison Square Garden, New York.

E. B. Thompson's Barred Rocks

are identical to success in Barred Rock breeding; they combine all the great qualities of size, style, shape, heads, barring and color which have made the "Ringlets" America's leading strain.

Their conquest of Madison Square Garden, New York, for more than 20 years is familiar to every Barred Rock fancier throughout the civilized world. The record stands alone and puts all others in eclipse—it is the most remarkable in the annals of poultry shows.

My producing the beautiful "Ringlet" feathers on Barred Rocks is recognized as having passed far beyond the realm of experimental theory. I never had so many superior exhibition and breeding birds—both male and female—with which to supply my customers all over the world as now, and all fanciers who visit my farm declare the stock is a revelation in the science of Barred Rock breeding. I can furnish you any birds you may want at reasonable prices and will assure exceptional value. Will mate to produce winners if desired.

The "Ringlets" are known in every land and play their part in the commerce of the world

"Ringlet" Eggs Are The Best That Money Can Buy; They Produce Prize Winners

Mr. E. B. Thompson

Dover, Ark., October 18, 1909.

Dear Sir:—Thinking it would be of some pleasure to you to know of my winnings on your "Ringlets" at our show, I will state that I won first prize on cock, hen, cockerel and pullet, and special for best cock, any variety, and special prize for best hen, any variety, in the show. The "Ringlets" win wherever shown. This was my first exhibit and my birds were the sensation of the show. Yours truly, W. J. Brown, M. D.

My matings for eggs are the world's finest, and prices are as usual: One setting, \$6; two settings, \$11; three settings, \$15; four settings, \$18; 100 eggs, \$30. New 58-page catalogue, full of pictures of New York winners from life, will be mailed upon application.

SEE MY OTHER ADS IN THIS PAPER

Address E. B. Thompson, Lock Box 510, Amenia, N. Y.

done in the suburbs and smaller cities around Los Angeles as well as all over California and neighboring states and it confirms the assertion so often made in these columns that you can do better in the poultry business in California than in any other state in the Union if you know how. But you must learn the climate and other conditions of this state and know how to adapt them to the needs of your fowls."

We understand that the Boston show has for years had two classes for the showing of exhibition pens. This is certainly as it should be and is a move that other shows should follow. There is no justice in letting young and old compete together. Here is the timely bit of matter that the Poultry Culture has to give us:

"Cockerels and cock birds do not compete nor do hens and pullets, so what is the sense in allowing pullets to compete against hens or cockerels against cocks in pen competition? Common sense would dictate there be young pens and old pens especially at the early shows. There is room here for a few of our progressive shows to make a little history and demand separate competition by offering separate money on young pens and old pens."

Farm Poultry says that either Mr. Sewell should resign from the committee in charge of the publication of the new Standard or that he should refuse to do any of the work. It doubts the validity of allowing Mr. Sewell to do any of the work and still be a member of the committee in charge of seeing that the work is done:

"Commenting on the appointment of artist F. L. Sewell on the committee of the American Poultry Association in charge of the publication of the new Standard at the time that committee was named, we said that if Mr. Sewell was to furnish illustrations for the book the objections some were making to his appointment were well founded. Mr. Sewell at that time was seriously ill. If we are not in error the statement was made on the floor—we know it was made in the hall—that Mr. Sewell's health would probably not permit him to take up the work it was at first proposed to give him, but that he would be able to give his critical services as a member of this committee.

"That his services in either capacity would be valuable everyone will admit. That he should serve the association in both capacities many will consider, as we do, improper. The impropriety will

be much greater if the committee of which Mr. Sewell is a member in dealing with the artists of whom Mr. Sewell is everywhere recognized as best, make a distinction and give him a higher price than the others. His work may merit the higher price, but that is not the question at issue. The question is as to whether a committee of which he is a member should put itself and him in this position.

"And besides this question of propriety, there is the question as to the validity of any contract the committee as constituted may make with Mr. Sewell. Such a contract is probably not valid. As far as our knowledge and information on such points go, it is not valid. Even though the A. P. A. has no provision in its constitution providing against such transactions, they are illegal, and a few members of the association if so disposed could easily make it impossible for the artist ever to collect one cent for work done under such agreement.

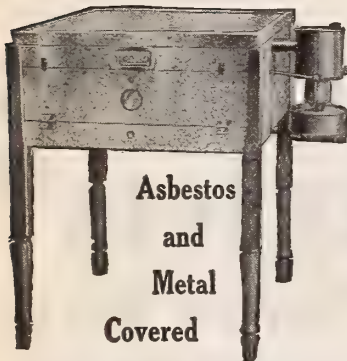

"If the American Poultry Association wants all new illustrations for the new edition of the Standard Mr. Sewell's services as an artist are worth more to it than his services as a member of the publication committee. There is little doubt if it were left to the breeders of the different varieties to say who should furnish the illustrations, practically all of the work would be assigned to Mr. Sewell. There is no doubt that whether on the publication committee or not, Mr. Sewell's criticisms and advice would be given other artists—as they were when the illustrations for the present edition of the Standard were in preparation.

"The situation and the facts being as they are, Mr. Sewell ought either to withdraw from the committee or decline to do any of the work. There are scores of men in the association who are equally capable of serving on the publication committee. There is none so well qualified to make illustrations for the book.

"It rests with Mr. Sewell to decide whether he will remain in a position likely to prove embarrassing to all parties interested or take an attitude that will relieve him of responsibilities for complications."

Just how the fancy takes to the idea of having Mr. Sewell on the committee as well as doing the artistic work assigned to him is more than we can foretell, but it looks to the Lean One as though it was up to him to resign. We all know he is the best artist in the field and every fancier would like to have his work on their variety. It

A THING OF BEAUTY AND JOY FOREVER NOFTZGER'S PARTRIDGE ROCKS

Can you imagine this most beautiful bird with its feathers most beautifully and delicately penciled with dark brown on a mahogany brown, making a rich chestnut coloring effect with a beautiful sheen that shines like satin? If you can imagine this, then you know how beautiful they are, and then you will want to go to the originator of this breed to secure further information. He breeds the best there is, as is proven by the fact that he

Won Again at the Big Chicago Shows

all first and second prizes, also 3 thirds and 3 fourths. He not only has a few good birds but hundreds of them, and he has less culls and more show specimens than are found in the average flock of thoroughbreds. To this fact many can testify. Judge Zimmer and others have remarked about this fact in visiting his yards. Remember this, also the fact that they are great layers, docile, easily confined and embody all the good qualities of any other variety of the Rock family, and we think you will decide you want **PARTRIDGE ROCKS**. Naturally you will want stock from the originator. He is just issuing a handsome illustrated book telling all about these fine birds, giving history, etc., which will be sent for only 10 cents. Hundreds of birds for sale. Mated trios and pens. Write for prices.

S. A. Noftzger, North Manchester, Ind.

RED, RED REDS

—ROSE COMB REDS—

I breed Reds that are red to the skin, with the correct long-bodied type that is called for in the Standard. Hence they please the Judges and win in the strongest competition in the country. I not only raise a few good birds, but lots of them; to prove this I put out two strings of birds at the same time and my birds were

Winners at the Great Missouri and Oklahoma State Shows

At Enid, Oklahoma, State Show, a show of 3,200 birds in a hot class of Reds I won 2nd cockerel, 3d cock, 1st, 2nd, 3rd pullet, 1st pen, special for best shaped male, special for best colored male, special for best shaped female, special for best colored female, special handsome silver cup for best pen and special handsome silver cup for best pen in the show. This, the most coveted prize in the show, was awarded me by three Judges consulting together. These winnings clearly stamp my birds the best R. C. Reds in the Southwest. Read what Judge C. W. Zimmer says, "To Whom It May Concern—I awarded the above prizes to Mr. Robert Bretz, and I consider his birds exceptionally fine specimens and eggs from these birds are well worth the price asked—\$10.00 per 15. Respectfully, C. W. ZIMMER, Judge."

Eggs from Prize-Winning Pens

Have mated up some grand pens, each one headed by a prize-winner, from which I will sell eggs for \$10.00 per 15. Eggs from farm range stock, \$2 per 15; \$10 per 100. Don't delay. Order today. Send for mating list and mention American Poultry Journal.

Robert Bretz R. R. 3 El Reno, Oklahoma

looks as if Farm Poultry had touched a live issue.

American fanciers and journals have been at different times wasting space and time to the discussion of why we do not have summer shows. We give the last effusion from the pen of Hicks of Kansas below. Just what Poultry Culture means by "something interesting" that it is going to give is more than we can tell, but we shall have to wait and see. The fact is that we should have some spring and summer shows. The sorts of shows that would be over in three days at the most and be held in various nice parks and pavilions to be found in the centers of importance. Take a shot at this:

"During the past few months the editorial force of poultry journals have been devoting practically all their time to attending poultry shows. While around the show room times innumerable we have heard fanciers complaining that they could not attend near all the shows they would like to as the show season is crowded into practically two months' time.

"More time is needed to give the exhibitors a chance to make showings in different sections of the country. This would make the competition much hotter as the shows would not be so much local in character.

"Why not have some summer shows as our English and Australian friends do? It is true that climatic conditions are not quite the same, yet there is not such a wide difference as anyone would

think. Our fanciers could soon learn to prepare birds for exhibition, possibly not as well but reasonably well for June or July. After July the moulting season sets up and more difficulties are to be overcome than in June even. It looks like there is a field for some educational work along this line.

"Poultry Culture is taking the matter up with a number of fanciers and we hope to give something interesting along this line soon. Give us your ideas about it."

Feathered Life, that interesting journal that comes to our table every week from England, has the following note about Blue Langshans. This Langshan breed is worthy of more note than it has come to receive in America, and we are oftentimes struck with the splendid service it has given those who have put dependence in it. We need more Langshan fanciers all over the country. This lordly bird should not be lost sight of.

"Since its first introduction into this country, about fifteen years ago, the blue variety of the Langshan has been mainly in the hands of a few enthusiasts, who have never wavered in their fidelity to this handsome and useful fowl, esteeming it not only for its great economical value as one of the best all-round birds we have, but also for the great interest it provides for the breeder, animated by the desire to produce each season specimens that excel those of the previous year. For the benefit of those readers unacquainted with blue Langshans, I may say that in color

(only) they resemble the blue Andalusian. The ground color should be a clear lavender-blue, each feather distinctly laced with a dark slate, which also forms the predominant coloring of the upper part of the plumage of the cock."

It was only a few months ago that we saw an article by one of the more practical poultry raisers of the country who declared it was not right to turn off the good laying flock of pullets after the first season. He had facts and records to back up his article and there must have been some truth in it, for he was so situated that he could not hatch a crop of pullets annually and had discovered that hens were good layers from the fact that he was forced to use them. He said that while they did not lay as many eggs as pullets they still made a great showing and one in favor of carrying over good hens because the cost of rearing pullets for each winter's laying pens had not been anything. This saved a lot of time and trouble and work. Now what has been your experience on this subject? What is your opinion on this matter? But this is what the writer of the Poultry Advocate has to say:

"The great trouble with the poultry raisers is they become 'chicken-hearted.' By that I mean they become so attached to their flocks they can't or won't sell or kill the non-profit producing birds, consequently their flocks just about pay for themselves and no more; where if they would make up their minds to

BEST WHITE ROCKS IN OHIO

1st Pen Cock, A. P. A. Show, Cincinnati, O., 1909

Rich in the Blood Lines of

Madison Square Garden Winners

Look at a few of their late winnings: 16 firsts, 6 seconds, 6 thirds, 2 fourths and 1 fifth at A. P. A., Cincinnati, Ohio, Mt. Vernon, Newark and Ohio State Show at Washington C. H., Ohio. Have possibly won more first prizes at a given number of poultry shows than any White Rock breeder in the West. My patrons have won at Indianapolis, Detroit, Cleveland, Pittsburg, Cincinnati, Janesville, McKeesport and many other lesser shows.

Look at this 1910 Standard male that heads one of my breeding pens for this season and is but a fair sample of my birds. Every other male in pens this season is as good or better, and if you are

Going to Buy Eggs

don't overlook the man who has them at live and let live prices, and from as good White Rocks as any breeder in the world.

One customer won sixteen regular prizes in one season with young stock hatched from eggs from my yards, and again one of the largest winnings in the East last season was made by a customer who purchased the eggs from me. My attractive '10 mating list is now ready for you; it tells the balance. Eggs from my best and prize-winners, \$3 per 15, \$5 per 30, \$15 per 100.

S. M. Dickinson, Box C, Granville, O.

S. C. BUFF ORPINGTONS Cleveland Winners

We won again at the great Cleveland Show, 1, 3 cocks; 1, 2, 3, 4, 5 hens; 1 chl.; 2, 3, 4 pens and 2 silver cups. Our Buffs have won at Cleveland for years, and this last victory, in competition with the best in the country, should convince you we have the highest quality in Buff Orpingtons and know how to reproduce them.

Eggs: From our extra choice pens, \$10 per setting; from other grand matings at \$3 and \$5 per setting. Mating list free. Write today, mention American Poultry Journal.

Roseland Poultry Farm

South Euclid, Ohio

Carcasses? Show Birds? Breeding Stock? or EGGS?

Where are the biggest profits? Are
YOU clearing \$6.41 per hen, or over

\$12,000 PER YEAR

as the Cornings did from their commercial egg farm?

THE ordinary poultryman will say it can't be done—that \$2 to \$3 per hen is the very utmost that even an expert can make, clear. He will say that even if a few experienced men could make \$6.41 per hen, it is impossible for two mere beginners to do it.

And yet that is exactly what the Cornings, father and son, DID DO LAST YEAR. Starting four years ago with only 30 hens, with no experience, with Prof. Gowell's bulletins as their foundation, with many experiments and much hard work, this was the result last year—over \$12,000 clear profit from 1953 laying pullets. Read the whole story in our

Corning Egg-Book

(entitled "\$6.41 per Hen per Year"). Not what the Cornings might do, or could do, or want to do, but what they DID DO. No impossibilities, no wild promises of fortunes from a few hens in a dry-goods box. Simply a cool, careful, comprehensive account of how scientific egg-raising makes money (\$12,000 per year) for two hard-headed business men.

Can other Lines of Poultry Culture Show Equal Results?

The Corning Egg-Book tells everything—where the Cornings find their market, why they raise only white-shelled, sterile eggs, how they keep hens laying regularly in winter, when they hatch chicks that are to do their best work in December and January, how to mix the feed that produces the most eggs, how to prevent losses, how they found the best breed for egg-producing, and how their whole system works to that one end—eggs, EGGS, EGGS. Many photographs of the Cornings' Sunny Slope Farm, with complete working plans of their buildings, showing brooder and laying houses, colony houses, breeding pens, door and floor construction, etc., etc. From these plans any builder can reproduce the plant, in whole or in part. (This winter the Cornings have 4000 hens, and in January were getting 75 cents per dozen for eggs.)

The FARM JOURNAL, always a poultryman's paper, takes special pleasure in being the medium of publishing the Cornings' methods and achievements to the world. Our offer is, we believe, unequalled in the history of poultry journalism; here it is:—

FARM JOURNAL two full years

Copy CORNING EGG-BOOK, postpaid }

ONLY 50 CENTS

Book and paper may go to different addresses if necessary. Our "POULTRY SECRETS" book may be substituted for the CORNING EGG-BOOK if desired. Both books with FARM JOURNAL 4 full years, only \$1.00.

FARM JOURNAL has for thirty-three years conducted a poultry department known the country over for the ability of its editors and the value of its contents. Besides this strong section, which of itself makes the paper valuable to every chicken owner, its other departments are ably conducted and widely quoted. It is the standard monthly farm and home paper of the country, with already more than 700,000 subscribers. It is clean, clever, cheerful, intensely practical; boiled down; cream, not skim milk. Its editors and contributors know what they are talking about and can quit when they have said it. It is for the poultryman, gardener, fruit man, stockman, trucker, farmer, villager, suburbanite, the women folks, the boys and girls. **Regardless of what you may think NOW, you will find Farm Journal is for YOU too.** It is illustrated and well printed on good paper. It has not a medical or trashy advertisement in it.

ESSO RE-CARBONIZED CHICKEN CHARCOAL

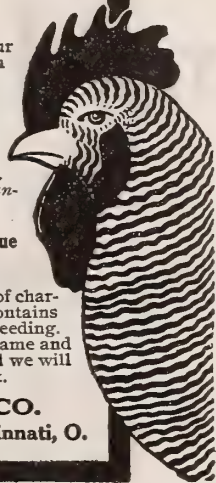

Healthy Chickens mean Healthy Profits

There is no profit in a sick chicken. Your chickens need charcoal to keep them in good condition. But do you know there are two kinds of chicken charcoal? One is once-burnt; the other is re-carbonized—twice-burnt. Esso Chicken Charcoal is the best and purest you can buy—because it is the only chicken charcoal that is re-carbonized—twice-burnt. The only charcoal in which no gritty un-charred pieces are to be found.

Write for our Free Booklet "The Value of Charcoal in Poultry Raising."

This book tells the facts about both kinds of charcoal. It is well worth your reading and contains some excellent suggestions for proper feeding. Send us your name and address with the name and address of your poultry supply dealer and we will mail you a copy of this booklet free of cost.

The S. OBERMAYER CO.
641 Evans Street. Cincinnati, O.

get rid of the birds that do not pay a profit, their flocks would be profitable, and, instead of becoming a chronic kicker and a member of the 'hammer club' they would be charter members of a boosting association. It is surprising, the dense ignorance shown by some people in the business. We all know that an egg farm is in existence to make money, and in order to do so it must get as many eggs as possible, as quick as possible, as cheaply as possible. Yet there are people who will keep a hen or a dozen or hundred of them after their pullet year just because they can't see them killed or sold.

The motto of a successful egg plant is, or should be—'sell all pullets after first year.' Of course there might be exceptions to this rule where you want to raise your pullets from your own stock next year. But now that day-old chicks have become so important a branch of the poultry business, I do not think it pays to 'fuss' with a machine. I am buying thousands of chicks every year. Would rather let the other fellow do the worrying and am willing to pay him for it. On my plant I am able to house 2,500 chicks every three weeks, and from this number I get my laying stock for that season, selling off the pullets the fall following as yearlings at a figure that will have paid for their keep."

As we chronicled in these columns some time ago, there is a movement on foot to get a state appropriation from the Ohio law makers for the furtherance of the industry in the state. The Poultry Record gives vent to the following which we take from an editorial. We have seen many states bet their appropriations and many lose them. The way to get a state appropriation and keep it is like they have done it out there in Nebraska and Missouri. In those states the fanciers and breeders and others who were interested in getting the bill through kept after the representatives in their sections as if they were the personal representatives of a plague. The result was that they got their appropriation and it is going to stay with them. Read this, you Ohioans, then get busy with that line of state senators and representatives from your various districts:

"A movement is on foot backed by the Ohio State Poultry Association and the Ohio branch of the American Poultry Association to secure a sufficient appropriation from the state legislature to establish a course of instruction and investigation in poultry culture at the state university. Professor Plumb, of the university, is deeply interested in the movement, and wants the assistance of local poultrymen and poultry associations. Ohio can secure such an appropriation and can have as good a course in poultry instruction as any state if the poultrymen of the state ask for it. Seventeen other states have appropriations that in some way are of benefit to the poultry industry—most of them appropriations strictly for that purpose, and Ohio ranks second of the states in production of poultry products."

Mrs. Mellette, who was once a figure of some prominence in the western poultry world but who now appears in an article the first time in many moons, has been down there in southern California where they do things in the poultry line on the thousand scale, and she

VALUE \$10,000.00

First Prize Winner at Jamestown Exposition, Madison Sq. Garden, New York, and everywhere she has been shown

The reason we value the above hen at Ten Thousand Dollars is because we refused \$2,500.00 for her after we sold five of her chicks for \$7,500.00; and we will give \$10,000.00 for a "Crystal" White Orpington Hen that will equal her in every way. Send for catalogue.

Kellerstrass Farm, R. F. D. 1, Box 98, Kansas City, Missouri

has discovered that they brood chicks in batches of twelve hundred each, making a great success of it. This will be something of a poser for the people who have been teaching us that but fifty are enough in one flock! We hope that Mrs. Mellette will go on and investigate more farms where these ideas are practiced and tell us about them in the Northwest Poultry Journal:

"They build their houses tight, mostly with cement floors. They have two rooms with a door between for the operator to use, which is kept shut for the chickens. There is cut on either side of the door an opening on the floor. This is about six inches high and eighteen inches long. It is amusing to see the chicks troop back and forth through these openings. One will whisper to another, 'Let's take a run,' the word is passed along and off they go in a chummy, happy-go-lucky-I-don't-care-if-I-do-have-to-die-some-day way that is very interesting to watch them.

"In front of the brooder houses are

well ventilated from above, being on the side hill it was arranged so that the alley-way was lower than the main house and when the chicks came into the brooders on a level with their floor it was very easy to manage them because the brooders were just about as high as the average table, from the alley. But most of the heating is done by the distillate oil burner in the center of the room, which burner has a pipe to the outside, and about three feet above the floor there is an umbrella-like deflector around the pipe which diffuses the heat over the chicks.

"Said one man, who is using one of these, to the writer: 'I slept in the brooder house the first three nights with my eleven hundred. They all get up and move around at 12 o'clock. I was afraid they would not be warm enough, but it worked like a charm.' This same man has since built two more houses of two rooms each and put in two more eleven hundred lots.

"But it is not wise for the novice to

This old and popular variety at their best are a beauty breed and hold their favor in every section. Their practical qualities have kept them in the front ranks for forty years or more. This season Mr. Seigfried won at the Buffalo International show first and fifth cock, first and second hen, first cockerel, second and third pullet and first pen, the gold special for best display and the A. P. A. medal for best cockerel.

At Rochester, N. Y., first and third cock, first and third hen, first, second and third cockerel, second, third and fourth pullet and first pen. For three years in succession he has won gold special for best display at this show.

At the late Madison Square garden, New York, show on three entries he won first prize cockerel and third hen; also special on male.

At Canandaigua, N. Y., every first prize and several others with specials offered.

At Batavia, N. Y., with but six entries he won four first prizes and two

First pen White Plymouth Rocks at the great Missouri State Show, at St. Louis, December, 1909. Bred, owned and exhibited by J. A. Bickerdike, Box A, Millersville, Ill.

windows enough to make it light. Outside the ground is planted to wheat and the same sort of openings let them outside in all kinds of weather and they grow lusty and strong and the green feed makes their frames grow long and big.

"The heat is supplied by a little furnace that burns distillate oil; it sits right on the floor with the cement rounded up a little around it and some right on the dirt. One 'twelve hundred' place the writer visited had an alleyway and a system of two hundred chick brooders in the alley heated by water pipes running both ways from a little distillate oil burner in the center. Each brooder was for two hundred chicks. At night they were watched and each one was closed when it was full enough.

"The main house had a stove in it which was lighted a while in the morning and on cold days. The house was

begin with a twelve-in-one-bunch brooder. The story is told of how one man recently bought thirty thousand at once and lost five thousand of them. Sometimes the little fellows begin to pick toes, then a few pieces of boiled liver are suspended just within their reach by wires from overhead, their attention is diverted and they behave well. Chicks and old hens, too, are just like people; if they are not kept busy they get into mischief."

**LEROY W. SEIGFRIED, WATERLOO,
N. Y.**

**Breeder of Silver Laced Wyandottes—
His Season's Winnings.**

It is seldom that we have to chronicle a list of any breeder's winnings that compare to that made by Mr. LeRoy W. Seigfried this year with his well known strain of Silver Laced Wyandottes.

second prizes. Also special for best female at the show with first pullet.

This for one season looks pretty good to us. Mr. Seigfried has been breeding for many years and has shown or sold winners for our best shows. For four years at the New York state fair he has won more prizes than any competitor.

We have handled this line at several shows and have written them up before. His first Buffalo cock is without question one of the best we have ever handled, and he in every quality is followed by his first prize cockerel. His winning cock and, in fact, all his birds also came under our notice, and are in every way all that is claimed for them. We gladly refer you to Mr. Seigfried for all further information.

The 1910 PRAIRIE STATE Line of Incubators and Brooders Have No Equal

That's a strong statement to make, and we would not dare to make it if we could not back it up with the machines and their records in the hands of thousands of users. Our statement isn't the old stereotype "**claim**"—the reasons and the **proof** are briefly given below. They are **facts**. No one can question. Our 1910 catalog gives hundreds more.

Superior Construction

In the first place, the Prairie State machines are superior in construction. The material used and the workmanship are fundamental reasons why they are so much better—WHY they do better work—WHY they last better and prove more economical in the end.

If we cared to we could build cheaper, lower-priced machines than any one in the business because of our extensive factory equipment and longer years of experience, but we could not have built up the permanent, successful business we have and the second-to-none reputation such as our machines enjoy, on the impractical lines on which machines are built to sell at the ridiculously low prices offered today. And yet

Our Machines are Cheaper

than the lowest-priced machines on the market, simply because they are better—thoroughly practical—honestly built and give lasting service and greatest returns. The successful, leading experts would not install them in preference to any other if they were not the best on the market.

It is folly to risk eggs, time, money and opportunity on cheap, unreliable machines. The right start in the poultry business depends on getting the right equipment.

Mr. Leon L. Hough, a big poultry man

of Canisteo, N. Y., wrote us December 30:

"In the spring I will erect another incubator house that will accommodate 100 of your 240 egg incubators. There's none equal to the Prairie State in my judgment."

Here's a man of wide experience. He wants the best. You need the best more than he does. It is just as important in buying one or one hundred machines that you get the best.

Mr. S. T. Campbell, Secretary American Poultry Association, wrote us January 10:

"I have been using your Universal Hovers for several years. I have never been able to get as good results from hens or any other brooders as from yours."

Mr. Sam. McEwen, of the Sysonby Poultry Gardens, Petersburg, Va., writes:

"The 20 Prairie State Incubators we are using are the best we ever operated."

Mr. Edward Corning, the man who, with his son, made \$12,000.00 last year, at Bound Brook, N. J., writes:

"After trying your Universal Hovers we discarded all others and will use them exclusively, as they give such excellent results."

When such prominent poultry men endorse Prairie State machines as shown above, what better proof could you ask?

Don't you think we are justified in making the statement at the head of this advertisement? The

Secret of Prairie State Success

lies in the fact that being built of good material, by skilled workmen and on practical and successful hatching and rearing principles, they are superior to any other. They are not experimental, cheap, unreliable machines made merely to sell, but machines built on 27 years of experience. That's why they give such remarkable satisfaction.

The Sand Tray Prairie State Incubator is a wide step ahead of all other—different in hatching principles and nearer to nature's way than any other. That's why it hatches bigger, stronger chicks and more of them than any other.

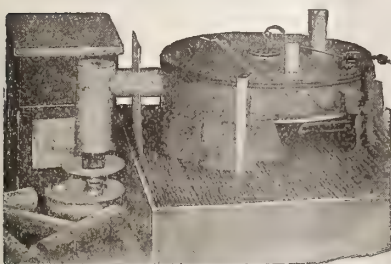

The Prairie State Universal Hover almost speaks for itself. It furnishes ideal brooding conditions and lends itself to a wide range of use. Can be fitted into a piano box, broodhouse or used in Prairie State Colony houses as shown in illustration herewith.

Before You Buy

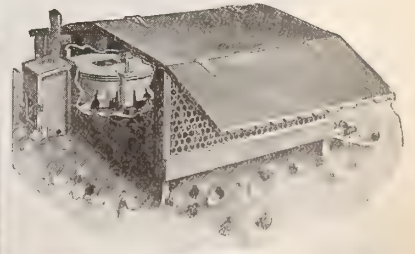

send for our 1910 Catalogue—it not only fully describes Prairie State machines but contains nearly 50 pages of valuable poultry information. It will help you to make the wisest choice.

THE PHILADELPHIA SHOW

A YEAR ago in writing up the Philadelphia show we made this statement: Philadelphia has won its way to the front ranks, and today stands shoulder-to-shoulder with the best shows held in the land. We are now pleased to repeat this same statement after attending their fourth exhibit, and wish to add that time only can improve their past effort. Here is an accomplishment of but four years' time, in this short time they have drawn exhibits from a great many states, and of a quality that makes the going of the best and places the value of their awards far above par. This year with close to 2,700 birds shown, displays both fancy and practical by several of the great poultry plants, with all the poultry journals represented as well as all the leading incubator and poultry appliances shown exhibited, the show was indeed complete and drew the greatest attendance we have seen. They came from near and far, and in such numbers that the great hall was filled to its capacity several times and the doors had to be closed against throngs seeking admission.

The sales made at this show were another feature, the exhibitors met with tempting offers from all sides, and as one expressed himself to us: "I think I had best go home, or I will never get away from there with any birds." The representative of one of the large egg farms told us their sales would run well

over \$5,000 for the week. A well-known Barred Rock breeder displayed two large pens of cockerels and every one was sold at prices from \$10 up, with the demand far from satisfied.

To the officers and members of the Philadelphia association great credit is due. They were right on the job at all times. To Mr. Henry D. Riley, the double role of president and acting secretary fell. He has seen service before and from all sides we only heard the warmest praise for his work. He is above all a fancier, as well as a most capable man. In Mr. William H. Moore, the vice-president, he had a capable assistant; this is a pair hard to beat, and they enjoy the unlimited confidence of all who know them. Superintendent Ed S. Hickman has had many years' experience and again acquitted himself in his usual and most satisfactory manner. The show was cooped by Spratts, with Mr. Bailey in charge, and every bird was in place for the judges on time.

The Front and Side Lights.

The great Philadelphia show had several features. Foremost of all was the Kellerstrass display of White Orpingtons. Here was seen in all her glory the famous hen "Peggy." This beauty, valued at \$10,000, was shown amid roses and carnations in a splendid coop, and was the center of attraction; in fact, it required the constant efforts of two policemen at all times to keep the great

crowds moving, and to protect her and her display. Close by in an open-front house with a good-sized runway were the thirty females that paid Mr. Kellerstrass a profit of \$3,600 last year. These thirty "Crystal" White Orpingtons, shown the same as if in the breeding yard at home, made a grand appearance; they were alike as could be, and of the very highest quality from every viewpoint.

The Lakewood Farms, Lakewood, N. J., also had a feature display. Lakewood baby chicks are now ready for delivery. The almost unlimited capacity of these great farms has been tested for some years, and we were informed that the season of 1910 would surely break all former records. With again greatly increased capacity they confidently await the call.

Mr. Henry D. Riley as president did not exhibit, but sent down two display pens of his choice Barred Plymouth Rocks. Other displays of particular note were made by Mr. Leslie Jeffries of Black Orpingtons, Messrs. Moore & Hanby of Barred Rocks and Reds, the Newton Producing Company of S. C. White Leghorns, the International Poultry Sales Co., of S. C. White Leghorns, etc.

Mr. H. V. Crawford, secretary and superintendent of the New York show, spent two days at the show meeting friends and resting up. He reported that the late New York show was from every point of view the most successful ever held. Contrary to reports, the Garden has to date not been sold and the prospects are that at least one other New York show will be seen there.

While the class of Buff Rocks was

\$7.55 Buys the Best 140-Egg Incubator Ever Made

\$4.50 Buys the Best Brooder Both Incubator and Brooder, Ordered Together —Cost You Only \$11.50—Freight Prepaid

WHY PAY MORE? Investigate—send your name and address today, the easiest way, by postal or letter. I tell you the prices right here—and how my machines are made. You can have 30 or 60 days' trial on both incubator and brooder—and I'll send all money back if you return the machines to us as unsatisfactory. Be sure to send for my illustrated, free booklet, "Hatching Facts." But, if in a hurry, you are perfectly safe in ordering right now from this ad. Thousands do this way every year. I guarantee to ship all orders sent from this ad on day received—(from warehouse nearest you, freight prepaid.) No disappointments.

Order a Complete 140-Chick Belle City Hatching Outfit. Send only \$11.50

BELLE CITY Incubators and Brooders

I've always given my customers more for their money than any other incubator manufacturer in the world—that's why we do so much business.

Belle City Incubators will hatch more chickens—under the same conditions—than any other incubator made, or your money will be refunded. **This I guarantee.** Double walls—dead air space all over—copper tank and boiler—hot-water heater—best regulator—deep, roomy nursery—strong egg tray—high legs—double door—and everything that's any good on an incubator—all in the Belle City. High-grade thermometer—egg tester—burner and safety lamp included. The Belle City Brooder is the only one having double walls and dead air spaces. I guarantee it to raise more healthy chicks than any other Brooder made. Hot-water top heat—large, roomy, wire runway yard, with platform—metal safety lamp and burner.

Complete Hatching Outfit Only \$11.50

Over 50,000 machines in use—all doing perfect work. The Belle City should be your choice. Send your order now or send postal for "Hatching Facts" booklet and full particulars. **Don't pay more than my price.** No machines, at any price, are better hatchers or brooders.

S. B. & E. B. TWINING
AFTON FARM, YARDLEY, PENNSYLVANIA

very small there were many interested breeders in line as visitors. Among these was seen Mr. John W. Poley. He has shown here for years and his winnings are modern history. This year with his great win at New York he was willing to leave the Philadelphia honors for others to gather. This will not happen again, for Mr. Poley is not the kind of man to step aside and see his favorites suffer.

In Orpingtons William Cook & Sons made a full display and winning grandly in all classes; among their specials we find the following: Championship cup for best Orpington in the show, cup for best buff male, cup for best black female, cup for best white male, gold medal each on best black hen, cockerel and pullet, and special championship ribbon for best American-bred Orpington, won with their white cockerel. This is a great record in any class, and in particular in the Orpingtons.

Mr. Fred Harries, Elmsford, N. Y., was another happy exhibitor in the Orpington classes. Besides winning first White Orpington pullet he was awarded championship cup for best white female, cup for best Orpington any variety and two special ribbons. He also won second white cockerel on a very fine bird of extra shape and well shown.

Mrs. J. W. Holton, Catasauqua, Pa., won first on both cock and hen White Orpingtons with two classy birds. Here dandy form with nearly perfect condition prevailed. We failed to get Mrs.

Holton's list of specials and feel assured that other honors were hers.

Mr. G. H. Crossley, Magnolia, N. J., was awarded second cockerel and second and third pullet S. C. Rhode Island Reds. The second cockerel was a bird of rare color and good form. The pullets were both close up and of extra type, well shown and also of rich color. Mr. Crossley's display of eggs did well.

The Orchard Poultry Pens, Lumberton, N. J., also made a good record on Reds, winning in a good class first, second and third cocks, first hen, fourth cockerel, fourth pullet and first prize pen. All on excellent birds. The three winning cocks made a show in themselves, with the first pen a feature.

The International Poultry Sales Co., Brown's Mills, N. J., displayed their heavy-laying strain of S. C. White Leghorns. This display was a show feature, and they deservedly did a land-office business with sales of both stock and eggs. They have excellent type and size in all their birds.

Elmhurst Poultry Yards, Riverdale-on-Hudson, N. Y., entered but six of their S. C. White Leghorns and won fourth cockerel in a class of nineteen and first and fourth pullets in a class of fourteen birds. When we consider this competition it is surely a splendid record.

Mr. F. E. Gilbert, Lansdowne, Pa., breeder of Black and White Orpingtons, entered both varieties and won on Black Orpingtons first cock, second and third hen, second and third cockerel, second and fourth pullet and third and

fifth pens. On their White Orpingtons Mr. Gilbert won second hen and third pen. These birds were of grand type and very well shown in these great classes.

Mr. Annesley M. Anderson, Morton, Pa., entered a very few of his Rose Comb Rhode Island Reds, and in the best class of Reds shown won first prize pullet with an exceptionally fine specimen. Here type and color were of the best and splendidly shown. He was also well placed on pens, but our records are not complete on pens at this time.

In the White Wyandottes there were so many good birds shown by well known exhibitors that it was difficult to keep tab on all of them. Here we also found Mr. Harry W. Britton, Moorestown, N. J., and on his birds we found the third prize ribbons on both his cock and pen birds. Type prevailed here and we thought the pen very close up to the best.

The Birds and Classes As Seen—Light Brahmas.

Here fifty-seven birds were shown, making an ideal class with several extra quality specimens in both males and females. The first cock and cockerel were both birds of extra merit in shape and markings, while the cockerel in the first prize pen was as good as we have ever seen. In females the same high grade was shown, it was pure and simple—a beautiful display of quality seldom brought together at any show.

Barred Plymouth Rocks.

The largest class at the show with

Pen XII is headed by "Alexis," as a cockerel heading the first young pen at Syracuse, 1907. This bird has been a grand breeder, and I can always count on good chicks from this pen. He is mated to the hens in the third pen at the same show and six other snow white hens.

Pen XIII is headed by "Blocky," first pen cock at Syracuse, 1908. In commenting on this bird just about as near the standard in type as it is possible to get. He is a son of Regal III, and much like him in appearance. He is mated to nine fine Regal females including the first, third and fourth Canadian National pullets, 1906.

Pen XIV is headed by "Invincible," first pen cockerel, Syracuse, 1908, a very white and good shaped bird. He is mated to ten large blocky pullets, including the second Syracuse pullet, 1909, and four of her sisters.

Pen XV is headed by Victor II, second Ontario cock, 1908. He is one of my best breeders, and last season sired some of my best pullets. He is mated to the pullets in third Syracuse pen, 1908, and the third, fourth and fifth pullets in the open class, also first and third Canadian National hens, 1906.

Prices of eggs (as they run) from these fifteen prize matings are \$5 per 15, \$9 per 30, \$12 per 45, \$24 per 100. In filling orders for settings at these prices I try to give eggs from as many pens as possible, and, of course, some of the eggs will be selected from pens V to X.

Pens V, VI, VII, VIII, IX and X are special matings. If eggs are desired from these pens, only, the price is \$10 per 15, \$18 per 30, \$25 per 45, \$50 per 100. In ordering eggs from special matings I leave the selection as nearly as possible to yourself, but I will ask you not to choose too many from any one pen.

Guarantee.

From Pens I to XV I guarantee nine chicks to a setting. If less than this number hatch, I will furnish another setting at half price.

Duty.

In importing eggs or fowls into the United States there is a duty of 5 cents per dozen on eggs and 3 cents per pound on fowls. This is only a nominal charge and is paid with the express charges. Shipments go right through without any delay whatever.

Orders Filled in Rotation.

While I make every effort to fill orders promptly, it is often impossible to do so, and would suggest that you have your orders booked as early as possible. The payment of \$1 per setting on \$5 per setting eggs, or \$2 per setting on \$10 eggs, will secure your place and you can send the balance when you are ready for the eggs.

Free: Send for 12-page mating list.

MARTIN'S REGALS

Mating List for 1910

Pen I is headed by "Triumph II," first New York State Fair cock, 1909. He is very blocky and white and carries a very neat head. He is mated to ten large early pullets, including the pullets in the first and fifth New York State Fair pens 1909. This is a very strong mating.

Pen II is headed by "Victor," second New York State Fair cock, 1909. This is a grand bird, and many liked him better than the first prize cock, Triumph II. He had elegant lines and is absolutely white. He is mated to the pullets in the second and fourth pens at the same show. They were hatched very early and are now fully as large as hens.

Pen III is headed by Crusader IV, first pen cockerel, Syracuse, 1909. He is a worthy son of Crusader III, and gives excellent promise. He is mated to ten fine large hens of good shape and color. Four of them were winning pullets at Syracuse, 1907, and four of them were in the third Syracuse pen, 1909. All have that fine, blocky Regal type.

Pen IV is headed by "Best Son," second pen cockerel, Syracuse, 1909. At the time of the show there was some sap in his plumage, but since then he has matured into a grand bird, white as snow, round as a ball and at least a pound over weight. He is mated to the hens in the first and second pens, New York State Fair, 1908. Chicks from this mating are sure to show quality.

Pen V is headed by Regal VI, first cockerel at New York State Fair, 1908, and three months later he scored an easy victory in a class of fifty-five of the best cockerels ever brought together at any Canadian show. Judge Tucker said he was the best cockerel he ever handled. This past season he headed the first pen at Syracuse, and was third at Boston (shown in poor feather). He is a son of Regal IV, and in type and color would be hard to improve. He is mated to the four hens in the pen with him at Syracuse, 1909, the first and second Ontario pullets, 1907 (sixty-three in class), and the second, third and fourth Boston pullets, 1910. This is one of my very best matings.

Pen VI is headed by Regal IV, first Boston cock and world's champion 1907, winning special for best bird in the show (5,000 birds on exhibition). He is mated to seven of his last season's mates. These hens have all been winners at the Canadian National Exhibition and have proved their worth as breeders. Hundreds of exhibition birds have been produced from this pen in the past two years.

Pen VII is headed by the phenomenal cockerel, Regal VII, first prize winner at New York State Fair, 1909. He is an almost ideal bird, splendid shape, with full breast and broad

back, so much admired in a Wyandotte. He is white as snow, almost perfect head points, and the finest shanks I ever saw on a Wyandotte, being very stout, just the right length, and magnificent color. He is mated to the hens in the first Syracuse pen 1907; also six others, very similar in type. This pen should produce some of next season's winners.

Pen VIII is headed by Crusader III, first Syracuse cockerel, 1907. He is one of the best Wyandottes I have ever seen, being all curves, extra large, pearly white and almost perfect in head points. In fact, he might well be taken as a standard model. He is mated to ten choice females, including first and second Ontario hens, 1907; first, third and fifth Syracuse hens, 1907, and three of the hens in the first Syracuse pen, 1908. This pen last season produced a large number of cockerels that sold for \$25 to \$75 each. Crusader III also sired my first, second and third Ontario pullets (sixty-six pullets competing), which proves that exhibition cockerels and pullets can be produced from the same mating.

Pen IX is headed by Regal V, first Ontario cockerel, 1907 (class of sixty-one cockerels), and first New York State Fair, 1908. He is large, short in back, low set, spread tail, and with all the curves; in fact, a Wyandotte all over. He is mated to the first, second, third, fourth and fifth Syracuse hens, 1908; second Boston pullet, 1907, and the first, second and third Ontario pullets, 1908. This is one of my very best pens.

Pen X is headed by Young Champion, first prize cockerel at Madison Square Garden, 1910, in what was conceded to be the strongest class of cockerels ever shown there. This cockerel is absolutely silvery white in plumage, deep breasted, with very broad back and saddle. He has almost perfect head points and splendid leg color. In addition, he is a large bird, and I look for him to give grand results in the breeding pen. He is mated to the pullets (now hens) in the first and second pens at New York State Fair, 1908, and the first and second Syracuse pullets, 1908.

Pen XI is headed by Triumph, first Syracuse cock, 1907; weight, 10 pounds. He is one of those blocky, full breasted birds that everyone admires. Although he is large, he has a very small, neat comb and his color is fine. He is mated to eight fine breeding hens, most of them Ontario winners. They are all large, with wonderful depth of body.

SNOW FLUFF STRAIN—In originating and improving our strain only birds of highest standard type and greatest laying qualities as shown by accurate individual trap-nest records were used. As a result today we have not only one of the greatest prize winning strains in the world, but are unequalled in egg producing qualities. We won 1st pen Cleveland '08 and again in '10. Eggs for hatching (containing 1st prize pen 1910), \$5 15. Other grand pens of highest excellence, \$2 per 15; \$12 per 100. Incubator, \$8 per 100. Satisfaction guaranteed.

White Feather Poultry Farm :: Rocky River, Ohio

R. C. R. I. REDS

Winners at Rockford, Illinois, show, beautiful silver trophy cup for best display of Reds, either comb, decided by points. I had best Red female for shape and color in show room. Baby chicks and eggs of a fine bred strain of Reds. Prices and mating list ready. Drop a postal for it today.

G. J. Boehland, P. 33, Rockford, Illinois

Divinia's Exhibition Barred Rocks

I am offering the cream of the season's crop of grandly bred chicks, all rich in the blood of Boston, Madison Square, New York, and Missouri State winners. Both cockerel and pullet bred birds, large and full of quality. My new annual catalog free for the asking, illustrated with tone to life photos.

S. T. Divinia Route 2A St. Joseph, Missouri

CHARCOAL PRICES GREATLY REDUCED

PHILADELPHIA

BARRED P. ROCKS

THE RECORD BREAKERS

At Chicago in the strongest competition west of New York City, on one entry I won third pen, one of the three most coveted prizes.

At Milwaukee, 1910. On pullets, 1, 2, 4, 6, 7, 9, 10; hens, 2, 3, 4; cockerels, 3, 4, 7; pens, 1, 3; special for best display Barred Rocks; special for best cockerel and pullet; special for best pen; in fact, all specials but one.

At Kenosha, Wisconsin. One of Southern Wisconsin's best shows, I won 1, 2, 3 and 4 pullet, 1, 3 and 4 cockerel and 1 pen.

At Waukesha, Wisconsin. Entered six birds and won 1 cockerel; 1, 2, 4 pullet; 3 hen, 1 pen.

Still have a few of those choice pullet-bred cockerels that I will close out at less than half their value. Satisfaction or money back.

EGGS

\$5 per setting; two settings, \$9; three settings, \$12. From special mating, \$8 per setting. If you want something extra good, write me and mention American Poultry Journal.

Geo. H. Bie, Racine, Wisconsin

174 birds shown. Here were seen several old-time favorites with some new ones that bid fair to equal the best. The nineteen pens shown were as a rule well mated and were a show in themselves, here as well as in the single classes close picking was found and the winners we considered extraordinary birds.

Cocks. First, a beauty in color and barring and with ideal head points. Second, of grand form and sound color, failed just a mite in finish of tail. Third, a strong cock of good form. Fourth, a grand quality bird, not quite at his best here. Fifth, good in form and grand color.

Hens. First, a grand hen of ideal form, proper color and extra clean cut barring. Second, in shade of color and barring one of the very best, well shown and a most valuable hen. Third, an old winner of note, has been placed here for three years, shown here in partly short feather. Fourth, another with a record, was first pullet last year. Fifth, a very good and clean cut hen.

Cockerels. First, snappy barred, good form and very clean and sharp under, this with proper shade makes him one of the desirable kind. Second, very clean barred and up in every quality, tail short and we thought him past his best show shape in condition. He also wins the shape special. Third, a great cockerel of good strong color, and well finished. It was a close question between these three winners. Fourth, another extra one in type, not quite as closely barred. Fifth, a little young, still one of the best in both form and color.

Pullets. First and second, of the same type and beautiful color and barring. Third, another good one up to all demands. Fourth, great in barring; shown not fully matured. Fifth, also a hot one with every promise.

Pens. First, headed by a grand male. Type good, color and barring extra, the four females of grand quality and well mated. Second, male a little past his best, the females all of rare quality. Third, close up and well shown. Fourth, male very choice, females well mated and of fine quality, but not shown at their best here. Fifth, male good, nice head, females even and well shown.

White Plymouth Rocks.

Were a rather small class for this popular variety, last year it was one of the best at this show. The quality was good, however, and the winners well placed.

Buff Rocks were a real disappointment as far as entries went, and the question was, has Poley scared them all out. We look for larger classes in both White and Buffs next year. With the grand line of specials that the Philadelphia Association offers on all classes, there is no excuse for light entries in any class.

Columbian. Partridge and Silver P. Plymouth Rocks were all good classes, shown well. In each several grand specimens were shown and they attracted much favorable attention. The winners in each class were extra quality birds, and each class had others close up.

White Wyandottes.

Were one of the best, as well as one of the largest classes shown. Here quality was superb, with many noted former winners in line. The general condition of this class received favorable comment, which was second only to the quality found here. Mr. A. J. Fell, not

fully satisfied with his grand record made at the late New York show, entered a full string and again bore off the honors; he had the goods and his win was well won.

Cock. First, ideal type, grand head points and extra condition, form of back. Breast and tail extra. Second, of same type, with every quality strongly shown. Third, fourth and fifth, all three very good and ran well.

Hens. First, one of the best ever seen, type excellent, with beautiful back and breast, grandly shown. Second, good type, fine back and color. Third, close up, with extra head and condition. Fourth and fifth, both well shown and of very good quality.

Cockerels. First, excellent type, with extra back and tail, perfectly shown. Second, looked extra good to us. Third, close up, with grand finish. Fourth and fifth, both clean cut, of grand type, with excellent condition.

Pullet. First and second, ran a close race for honors, both to our mind worthy of any and all favors. Third, very handsome back and tail. Fourth and fifth, well shown and very good ones.

Pens. Were a grand lot all through. First, of exceptional merit, grandly mated and shown. Second, also well mated and shown; this was the general rule with all. Combs and eyes were strong, with general good type.

Buff Wyandottes.

The Buffs were a rare class; here beautiful type prevailed, closely followed by color of the proper shade. The Buffs so had with clean wings and sound tails, and with the correct Wyandotte type, form a bird of rare beauty

as well as quality. One we hope will ever receive popular favor.

Columbian Wyandottes.

A splendid class of this variety was seen here; good quality with improved

Winner of fourth and shape special at St. Louis, December, 1909. Bred and owned by W. D. Lipe, Litchfield, Ill.

type was the rule. Next to type, the neck markings looked well, closely followed by quality in both wings and tails. The winners were very choice birds and well placed.

Single C. R. I. Reds.

Not as large a class as we had hoped for with the long list of specials offered. The birds shown were of a good grade. The winners excellent in shape and color.

Rose C. R. I. Reds.

A large class and of splendid quality. It is seldom that we see so many good birds of this variety at any one show. The judge here had plenty of work, and in particular in the cockerel classes, where thirteen were shown and all with merit. It is our opinion that the winners were very well placed. Type and color were closely followed by head points in all this class.

Silver Gray Dorkings.

It is always a pleasure to see these old favorites at the shows. They were well shown here, also at New York and Boston. We believe they are gaining in popularity, which they grandly deserve, and that the future shows will all give us larger classes of this quality breed.

Single C. Buff Orpingtons.

All the Orpingtons were good classes of upward of fifty birds each. In Buffs sound color with excellent type prevailed. The weaknesses usually found in wings, tail and neck are nearly a thing of the past as concerns the birds met with at the large shows; progress is the word here.

The first cock a wonder; he pleased us greatly, as did also the second and third, all shown at their best. First hen, grand type and head. All five winning cockerels close up, as were also

WILLIAM COOK & SONS

—ESTABLISHED 1873—

Originators of All the Orpingtons

Box A, Scotch Plains, New Jersey

First Prize S. C. Black Orpington Cockerel, Madison Square, 1910, owned and bred by Wm. Cook & Sons, Scotch Plains, N. J., Originators of all the Orpingtons.

AS USUAL---We won many times more firsts than any Orpington breeder at Madison Square, 1910---thirteen first prizes. In six showings at Madison Square, we have won 103 first and 70 second prizes, more than seven times as many firsts as any other Orpington breeder. These are convincing facts that we have the best in the world and is why we are recognized headquarters for the best Orpingtons, all varieties. Many other winners were sold by us or hatched from our eggs. Over 12,000 first prizes won by us.

Sooner or later you will buy from us. Why not now and avoid disappointment and waste of money?

Send 6c for Our Illustrated Catalogue

containing history and origination of all the Orpingtons, valuable hints on poultry keeping and mating list.

EGGS---From our winners and the finest Orpingtons in the world, \$20.00, \$10.00 and \$5.00 a setting.

We guarantee safe delivery and satisfaction on everything we ship and this is backed by a reputation of thirty-seven years' standing, this means something to you. Advice free. Inspection cordially invited. Trains met. Several thousand stock birds always for sale.

BREEDERS; \$10 TRIOS, \$6

S. C. Buff Leghorns and R. I. Reds. To make room for Spring matings, I will sell about 50 trios of S. C. Buff and Reds at \$6.00 per trio, which are actually worth \$10.00. Cockerels, \$2.00 to \$3.00 each. Show birds a matter of correspondence. Eggs, \$1.50 per 15; \$2.50 per 30, from eight select pens. 328 ribbons and specials in five years.

Woodlawn Poultry Farm : Kirkwood, Missouri

SHANN'S S. C. BLACK MINORCAS

Won at the Youngstown show, January 10-15, 1910, in strong competition, 1st cock, 1st and 2d hen, 1st and 2d cockerel, 2d and 3d pullet and 1st pen and two cups for best display. Bred for beauty, size and egg production. Prize winners for 1910-11. Eggs, \$3 and \$5 per 13. Satisfaction guaranteed.

H. J. SHANN - - - PAINESVILLE, OHIO

Parmenter's S. C. W. Leghorns

First prize winners Chicago and Springfield, Ill., 1908-9. At the recent great Mo. State Show, St. Louis, in a very large and hot class we won second and fourth cockerel, second pen and third cock. If in need of high class exhibition or utility stock, send me your order. I can do you good and will treat you right

Robt. D. Parmenter - - Knoxville, Illinois

Golden Wyandottes

Prize winners. Have some choice exhibition birds now ready to ship. Eggs from choice mating. Write for prices.

Phil Farren - Columbia City, Indiana

White Rocks

My birds were winners at Baltimore, 1910, in a hot class of White Rocks. My first prize pen was conceded the best ever shown here. These winners and others equally fine will be in my breeding pens. I sell you the same eggs from which I hatch my winners. Some fine specimens for sale. Write for prices.

A. R. EARLY : : ROSLYN, MARYLAND

THOMAS' WHITE ROCKS

Win at Akron Show, 1910. Second cockerel, first and second pullet, second and 3d cockerel and first pen. My first pen was pronounced by judge to be best pen in show. Also won special for best display. Write for prices on eggs from select matings of line bred, trap nested stock.

James R. Thomas : East Akron, Ohio

Buff Rocks

At the big Missouri State Show held in St. Louis, December 11 to 16, won cash special for best display, State Club cup given for best cock, cockerel, hen and pullet, 2d and 5th cock, 3d, 4th and 5th hens, 2d pullet, 4th pen. Winners in our largest shows for the past fifteen years. Show birds and breeders for sale. Send for booklet.

E. L. Delventhal Buff Rock Specialist **Box A, Warrenton, Mo.**

the winning pullets. The first pullet a rare beauty.

Single Comb Black Orpingtons.

The largest of the Orpington classes seen here. In these competition was fierce. A hotly contested class of great merit all through. The winning males were excellent in type. The fourth prize cock will surely do better when at his best, his type is right. In first hen was seen a superb specimen at her very best, sound in color and beautiful form. First cockerel has every promise of future success, his type and color are exquisite and carriage perfect. Other males very nice and close up, as were also the winning pullets; nothing was lacking in them.

The six pens shown were grandly mated for size, shape and color, and formed a grand class from every point of view.

Single Comb White Orpingtons.

With the Kellerstrass White Orpingtons as the feature display of the show (for exhibit only), it can well be imagined that the regular classes of this variety received much attention from the public. They were also well shown and completed a beautiful display of this, the most popular of the English varieties.

First cock, a grand, large bird of shape and color. Second, close up and very desirable. All the winning hens were up in quality, while we thought the cockerels were about as good a class as we have seen. The first pullet came in for many honors, and she was worthy of all.

Single Comb White Leghorns.

In Leghorns grand classes were shown in all varieties. While the S. C. and R. C. Brown classes were not as complete as we would like to have them, they contained quality nevertheless that was good to see. The head points of the males were noted here in particular.

The S. C. Whites formed a large and strong class, as is usually the case with this popular variety. The first and second cocks and the first cockerel were beauty males of type, size and color. First hen and first pullet were also of the best and grandly shown. The other place winners were all of high grade and well placed. The pens were finely mated; here in the three winners extra fine males were seen.

In R. C. White and S. C. Buffs the classes were only of fair size.

S. C. Black Minorcas.

This was another large class. The Minorcas shown this year at all the large shows clearly prove their popularity. Splendid quality and shown in good numbers has been the rule, and when we consider their worth, along with their beauty of form and color, we can only express the hope that they will always receive the favor due them. Here the winners in all classes were exceptional birds, with size and type prominent. Color also came out strong, with head points closely following.

R. C. Black Minorcas were rather shy in numbers, excepting in cock birds, of these four classy birds were seen. The other winners were good.

Blue Andalusians.

Just thirty-seven birds of this variety were in line, making a most desirable class, with size and color the ruling features. The winners in both males and females were fine specimens.

The Polish and Hamburg classes were

small for this show. This was a surprise for us, and in particular when we consider the long list of specials offered on these classes.

Houdans.

This was one of the real classy exhibits, with forty-seven birds shown. The judge here was the Rev. C. E. Peterson, Bridgeton, Me. One of our oldest and best known breeders and judge of this variety. He did a splendid job and received many congratulations. We are free to say that he knows the Houdans from A to Z and is the author of a popular book on this variety that every breeder should have.

First cock was a hummer and shown at his best. First cockerel has every promise of a successful life and a great winner. The other winnings were good and in many cases close up in all quality. The females also formed a grand collection, good to see.

Bantams.

These were shown in a complete variety and as a rule in good classes, making a very pretty display. The Golden Seabrights in particular showing in strong classes and fine birds.

Turkeys, Etc.

Turkeys and ducks were shown in all the popular varieties. The Bronze and White turks proving the favorites. Pekin ducks led in the water-fowl classes, with the first young drake one of the best we have seen.

Pigeons.

You can always see a grand pigeon display at Philadelphia. This year 1,325 birds were shown in complete classes. The varieties of carriers was a beauty to see. In Dragons 252 birds were seen at their best. One hundred and one Tiplers made another good class, while 191 birds completed the hen pigeon entry.

Philadelphia awards carry with them a guarantee of merit that for advertising ranks with our best. Meet us at Philadelphia's next. H. P. Schwab.

ROUP AND REMEDY.

Symptoms.—At first a hoarse, croupy voice, red and watering eyes, obstruction in throat and head, red comb and gills, wet or dripping nose and mouth and usually great swelling of the eyes soon sets in, and sore mouth and throat may follow in a few days, even when the early symptoms are light. Two or three of these symptoms will determine it a case of roup.

As soon as the disease appears, lose no time, but separate the sick from the well to warm, dry quarters. Remove the mucous from the nostrils and corners of the eyes with a good wash of peroxide of hydrogen. After the head is clean, rub with fresh lard and a few drops of turpentine. For the throat use a feather as a swab and use the same mixture in a melted form. After the sick are treated look after the well and remove the cause. The disease is more easily prevented than cured. Spray the roosts with a mixture of crude carbolic acid and water, scatter air-slacked lime in all crevices and about the floor.

Scald the drinking fountains and give fresh water twice a day. Fowls do not drink much water, but they drink often, and they should not be compelled to drink from stagnant pools or filthy fountains, where disease germs exist.

Barred Rocks, Toulouse Geese, Bronze Turkeys and Pekin Ducks

My yards now contain first Barred Rock cock; second and fourth adult Ganders; first, 2d and third adult Geese; first and second young Ganders; first and second young Geese; also fifth Pekin Drake. Stock and eggs in season.

At Cleveland, 1909, won four regulars and color special on female on five entries. Choice breeding cockerels, pairs, trios and pens, also pullets that will breed prize winners at popular prices. Satisfaction guaranteed.

COVERT'S BARRED ROCK FARM
WILLOUGHBY : OHIO

THE BUFFALO SHOW

THE great Buffalo International show is now a matter of history, and in poultry show history will occupy several of its brightest pages. We could write pages and then feel as if but half was told, and our duty but half done. There was so much to see and so much doing that it required private secretaries and note books to keep tab on all engagements.

The members of the Buffalo Association, from the president down, each and every one, did their utmost to attend the wants of all. No set of fanciers ever worked harder, nor more successfully. This association has built well, far better than even they know, and they have given the whole world an example of what can be done in both holding a show and entertaining.

The entries in poultry numbered 2,315 birds, 1,196 pigeons, 210 songbirds and eighty-three entries of pet stock. This, with the display pens of rare birds and the duck pond with a collection of fancy waterfowl, brought the grand total well over the 4,000 mark.

President Soverhill, ably assisted by Vice President J. Thomas Harp, and Directors Mesner, McNeil, Dr. Merkley, Landel, Roth, Young and others, were in evidence all the time, looking to the wants and care of the exhibitors. But to Secretary C. J. Standart and to Superintendent George H. Burgott we take off our hats with pleasure and pride. Here were the two officials upon whom the general success greatly depended; each had his many trials, and each fully met every condition in a manner to his credit.

The one particular feature of the show was its international scope. Of 382 exhibitors sixty-three came from Canada, and this explains much of the competition seen here. Here was seen Wm. McNeil, of London, also Dick Oak, the Star of the North; Dr. McRae; I. K. Millard; Wm. Ferguson; G. A. Robertson; Hugh A. Rose; Wm. Barber; J. L. Brown; C. J. Whitney and others of note that personally and by reputation are well known here. Here were also entered birds from seventeen

states, which fully tells the drawing power of the International, with promises for the future.

Ten national and state club and association meetings were held here and all well attended. At the annual meeting of the American Plymouth Rock Club Mr. C. H. Welles, Stratford, Conn., was re-elected president, and Mr. A. C. Smith, Waltham, Mass., was re-elected secretary and treasurer, also receiving a special vote of thanks for his work during the past year.

The banquet on Thursday evening was attended by 200 poultrymen who, with a full band, marched from the show to the Statler hotel. Here we found an elegant program arranged, and besides the good things to eat there was music, song and speeches. For this occasion Dr. Merkley wrote a special song that was rendered by a quartet and proved the hit of the season. With Mr. J. Thomas Harp as toastmaster, and in his best form, nothing was left undone. Addresses were made by Messrs. Harrington, Urban, Alexander, Rice, McNeil and others. When Mr. McNeil stated that Buffalo and Canada can beat the world in putting up a chicken show he hit the mark and received long and hearty cheers. Also when Mr. Urban said that a dozen fresh eggs sent to a sick friend were better than American Beauty roses he was also accorded the plaudits of all present.

Mr. Geo. Urban, Jr., was very much in evidence with a pleasant word for all and all the time something new. His greatest care was to have everybody happy. As an entertainer Mr.

Reynolds' S. C. White Leghorns

At the Mid-West Branch American Poultry Association meeting held at Cedar Rapids, January, 1910, won 1st and 2d pen; 1st ten; 1, 2, 3, 5 pullet; 2, 3, 5 hen; 2, 4, 5 ckl.; 2, 4 cock; silver medal best ckl. belonging to member A. P. A.; special for best cock, cockerel, hen and pullet; silver cup for best display. Eggs, setting of 15: 1st pen, \$10; 2d and 3d pens, \$5; 4, 5, 6, 7 pens, \$3; special mating for color, \$10.

E. M. Reynolds, 119 1st St., Cedar Rapids, Iowa

Lamon's Northern Raised White Rocks

"THE HARDY KIND"

Raised in this northern Adirondack country have the constitutional vigor which has produced the most beautiful plumage on any strain of White Plymouth Rocks in the world today. Hence the name, "The Hardy Kind."

My Fourth Prize Pen Cockerel at Boston, 1910

will be mated to four females extra large in size, chalk-white in color, bright red eyes, rich yellow legs, low, even serrated five-point combs, full deep breasts and long, broad backs with low-carried, well-spread tails.

EGGS from this superb mating \$10 per 13 straight; other extra quality matings, \$5 per 13; \$9 per 26.

I am the Originator of the Rose and Single Comb Buff Bantam and will spare a limited number of eggs from these little beauties at \$10 per 13. Send for my circular and list of testimonials of satisfied customers.

Harry M. Lamon : Box H : Adams Center, New York

Urban is a royal host, and on Friday entertained about fifty visitors at his home. At this banquet the members of the Buffalo Association presented to Mr. Urban a silver loving cup. Mr. Eugene Harrington made the presentation and Mr. Urban replied with words of feeling.

Mr. Theo. Hughes came all the way from Cleveland to have a day at this show. His recent success in pulling off at Chicago the best of years and again of placing the association on sound financial basis had preceded him and his visit was one grand reception all the time.

Seen and Heard Around the Show.

It remained for Mr. Henry D. Riley, Stafford, Pa., to make the show record on Barred Rocks. As usual, this variety led in quality and numbers. Here were birds from several states, also Canada's best, competing for international honors. In this class Mr. Riley won first cock, first, third and fifth hen, second cockerel, second pullet and first pen, also the National Club cup for best cock, hen, cockerel and pullet. The gold special for best display and several others of note. Mr. Riley's birds were shown in grand condition, his second pullet only showing signs of having passed her best form and was laying. His winning hen was the equal of any seen this year and when we consider the fierce competition found here we can well say his record here is a remarkable one.

Mr. I. K. Millard, Dundas, Ont., the man that makes them step some at the "Ontario" each year, ventured over, and took back home not only the blue on first cockerel, but two silver cups and other specials. We would like to say d—— it, but won't, as his winnings were richly deserved. They are third cock, second hen, first cockerel, third and fifth pullet and second pen, cup for champion male, cup for best cockerel, club special for color male, gold special for second display, etc. Mr. Millard has been one of Canada's best Barred Rock breeders for many years. His winnings at the great "Ontario" would fill pages, while the cups he has won that we have seen at his home have long ago passed the capacity of his cabinet.

Mr. John Hayner, Livingston, N. Y., entered but two birds and won first pullet and third cockerel. His first pullet was a gem, grandly shown and a great winner. She also won both female color and shape specials; her shade of color, with style of bar is all we could desire, in form ideal, her full breast, round and full, handsomely barred, was good to see. Third cockerel has about every quality and is a grand bird. Mr. Hayner stayed the week, making friends on all sides and reported several fine sales in both stock and eggs. He has exhibited for years at Madison Square Garden, N. Y., with good mention each year. Both he, and his birds are well known to the fancy, with excellent reputations.

Another exhibitor we were pleased to meet here was Mr. Coverts, of the Coverts Barred Rock Farm, R. R. 2, Willoughby, Ohio. His winnings in this great class were fourth cock, fourth hen, fifth cockerel and third pen. He was also awarded the gold special for best shaped male and some others. While this line clearly shows the best of quality and breeding, it should be

"HILLSON'S BAR-LETS"

Hold the World's Record at Buffalo, 1909. Four (4) first prizes: 1st cockerel, 1st, 2d hens, 1st, 4th pullets, 1st exhibition yard. My 1st cockerel champion of Buffalo was the center of attraction, being admired by thousands of visitors, and claimed by all Barred Rock men to be the finest specimen produced to date. Only high class birds and eggs for sale. No cheap stock. Matings for 1910 are unsurpassed. A limited number of eggs at \$5.00 per setting straight. Grand circular.

FIRST PRIZE CK'RL MISSOURI STATE SHOW DEC. 1909
BRED AND OWNED BY RUSSELL CAVE POULTRY YARDS
LOUIS LEE HAGGIN Prop., LEXINGTON, KY.

mentioned in justice to Mr. Coverts that he has made other shows this season and some of his birds were just past their best show form. At the late Chicago show in a class of 239 he won second hen, third cockerel, third pullet and second pen, the male shape special, etc. We have met this line before and know Mr. Coverts to be a careful breeder. He has made a great record this year at two of our best shows and we look with confidence for his future success.

In White Rocks was found the king of the show in first prize cock, owned by Mr. Geo. Urban, Jr., of Buffalo. He was awarded the gold medal for best bird at the exhibit, with seven judges present. Mr. Urban also won second and third hen, second cockerel, and third on pullet and pen. In Anconas he won three firsts and three other places and five ribbons in Black Langshans.

Mr. C. J. Whitney, Galt, Ont., also made a most credible showing in White Rocks, winning second cock, fourth hen, second pullet and first pen from this

A. P. A. meeting, at which this variety was admitted to the Standard. This will surely become one of the popular varieties, for in them we believe merit is combined with their unusual beauty that will win for them a place among our best practical birds.

Dick Oak, of London, was there with a complete line of his invincible Hamburgs, also Jap. R. C. Black, Polish and Seabright Bantams. Over at Guelph they call him Dick's Oak's, probably because he is strong and good natured. While here he won our money and the good will of all and we can well say come again, we want more like you.

In Buff, White and Partridge Cochins Mr. Hugh A. Rose, Welland, Ont., made a killing, winning first in every class. He also did well in Cochins and Polish Bantams, showing splendid birds in several classes.

Mr. Harlo J. Fisk, Sterlington, N. Y., made nearly a cleanup with his S. C. White Leghorns. His display was a beauty, with size and form a feature, closely followed by condition and head points. This was one of the large

second cocks, third and fourth hen, first and second cockerel and first and second pullet. Mr. Faulds has been a prominent winner both here and in Canada for years. His strain is well established and has a record hard to approach.

Mr. Wm. Ferguson, Brantford, Ont., S. C. White Leghorn breeder and one of the leading winners for some years at Guelph, entered a few of his birds and won second and fourth cock, second and fourth hen and third pullet. Some of these birds had been shown before and could not again be brought up to their best show shape. There is much to admire in this line and we want to see this man and his birds here again.

The Columbian Plymouth Rocks shown by Mr. Geo. H. Sweet, Aurora, N. Y., were birds of exceptional quality. From his very fine collection we would select the winning cock, cockerel and hen for mention. The first cock is without question the best Columbian male we have seen to date. He was also awarded the shape special, being ideal in our opinion; markings of wing, neck and tail were all that could be desired, comb and head very good.

In one of the best classes of S. L. Wyandottes seen this year Mr. LeRoy Seigfried, Waterloo, N. Y., won first and fifth cock, first and second hen, first cockerel, second and third pullet and first pen, with several specials included. All these winners were exceptional birds. The first cock, in shape a wonder, with as grand a breast as ever seen. He was silvery all over and the choicest of marking in wing, neck, etc.; comb and head points of the best. First cockerel, close up in color and of equal type. The winning pen grandly mated and of the same high grade in color and shape.

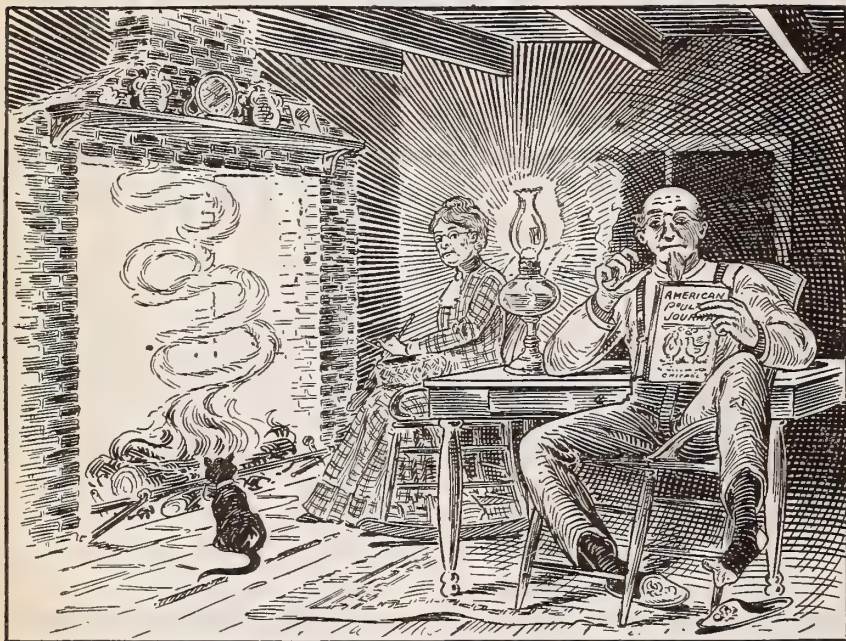

The Birds and Classes.

Barred Plymouth Rocks formed the banner class of the show. Here several prominent breeders met, making not only hot competition but also completing one of the best classes seen this year. The pens were a whole show in themselves, condition the prevailing feature.

Cock. First, a large, strong bird of sound, even color and very extra shape, shown well finished and with grand head. Second, a good cock, well up and of grand shape and color. Third, very narrow barred and of clean, bright barring, a mite past his best show shape. Fourth, an extra good quality bird, good head. Fifth, close up, with merit in every line.

Hens. First, both in type and color a gem and one of the best we have seen; her even surface, with superb under color and grand wing, place her a rich winner in a great class. Second, very beautiful in color and barring; she was still in part short feather; easy one of the best. Third, also superb in color and barring. Fourth, a grand, large hen with both type and good barring. Fifth, similar to third, but fails some in tail.

Cockerels. First, a beauty in shape, color and narrow barring, grand head, eyes, etc.; a most desirable cockerel and also winner of the gold special and cup for champion male. Second, of good form, grandly barred and fine head; a close runner. Third, great in color and barring, fine head, a mite low on legs; should make a grand breeder. Fourth, a nice clean cut male with bright color. Fifth, extra fine type and of choice

Martha! I been reading in this har American Poultry Journal what I subscribed fer from Mr. W. R. Graves, of Rockendott Farm, and it says as how one well-bred hen will lay as many as 200 eggs a year, and some even more. You know your'n wouldn't average fifty eggs per year, and here is a feller, Mr. Potter, what can larn us to tell the hen that don't lay; costs only \$1. Guess I send fer this book so we can larn how tew. Yes, it do beat all how these here scientists dew larn things.

great class, and with a very choice string of birds. He is another old-time "Ontario" winner that has the goods. His first pen was a beauty, grandly mated and shown. His cock was only beaten by the champion, and was one fit to win at ninety-nine shows out of every hundred.

Mr. J. L. Brown, Seaforth, Ont., won third cock, first hen, third cockerel and first pullet on four birds shown. His females were the pride of the classes. He is another of the breeders that has made the going at the "Ontario" for years with grand success.

J. Thomas Harp & Son, Buffalo, N. Y., made a strong entry of White Laced Red Cornish and won the leading prizes. We hope in an early issue to show out of their first prize cock, Chief-Rain-in-the-Face, who was one of the show features. Here were also seen the two pullets shown by Mr. Harp at the last

classes of the show and his record of winning every first prize is indeed a great credit to him.

Dr. J. W. MacRae, Galt, Ont., breeder of R. C. Black Minorcas and of Black Cochins Bantams, was in the winning here as follows: On Minorcas, first hen, first cockerel, third pullet and first prize pen, in a splendid class of birds. His birds have size, with form and color, and exceptional head points. In Black Cochins Bants his winnings were first cock, first hen, second cockerel and third pullet and first pen. This was a grand class, full of quality, and it took the very best grade to win. The winning pen in particular was a beauty and attracted much attention.

In S. C. Black Minorcas, another A. P. J. friend, Mr. T. A. Faulds, London, Ont., sent over a few to try them out. When the smoke cleared away we found these ribbons on his pens: First and

Other Cream Separators

Merely Discarded or Abandoned

De Laval Inventions

It is interesting and instructive to know that nearly, if not quite, every cream separator that has ever been made, and certainly all that are being made at this time, are merely copies or imitations of some type of construction originally invented or developed by the De Laval Company, and either not used by it because of something more practical or else discarded and abandoned in the course of De Laval progress and utilization of later improvements.

As earlier patents have expired some of their features have one after another been taken up by different imitators, so that at all times, as is the case today, every separator made in the United States or elsewhere in the world, utilizes some type of construction originally owned and developed by the De Laval Company, though some of them have never been commercially used by the De Laval Company because of their inferiority to other types of construction used by it.

The De Laval Company has always been forging ahead, with its many years of experience and the best of experts and mechanics the whole world affords in its employ, so that before any expiring patent might permit the use of any feature of construction by imitators the De Laval Company had already gone so much beyond that type of construction that it was then old and out of date in the modern De Laval machines.

All cream separator inventions by others have been of immaterial details or variations, upon which patents have been taken, if at all, more for the sake of the name than by reason of any real value or usefulness attaching to them.

The first practical continuous flow centrifugal Cream Separator was the invention of Dr. Gustaf de Laval in 1878, the American patent application being filed July 31, 1879, and issuing as Letters Patent No. 247,804 October 4, 1881.

This was the original Cream Separator—of the "Hollow" or empty bowl type—and it has been followed from year to year by the various steps of cream separator improvement and development, all De Laval made or owned inventions, the American patent applications being filed and letters patent issued as follows:

The original hand Cream Separator of the "Bevel Gear" type; application filed October 2, 1886, issuing as Letters Patent No. 356,990 February 1, 1887.

The original hand Cream Separator of the "Spur Gear" type; application filed January 17, 1887, issuing as Letters Patent No. 368,328 August 16, 1887.

The original Steam Turbine-driven Cream Separator; application filed December 8, 1886, issuing as Letters Patent No. 379,690 March 20, 1888.

The original "Tubular" shaped "hollow" bowl Cream Separator; application filed April 19, 1886, issuing as Letters Patent No. 372,788 November 8, 1887.

The original "Disc" bowl Cream Separator; application filed May 12, 1890, issuing as Letters Patent No. 432,719 July 22, 1890.

The original vertical curved or interlocking "Blade" Cream Separator bowl, covered likewise by the application filed May 12, 1890, issuing as Letters Patent No. 432,719 July 22, 1890.

The original "Bottom Feed" Cream Separator bowl; application filed July 24, 1889, issuing as Letters Patent No. 445,066 January 20, 1891.

The original "Suspended" bowl Cream Separator; application filed August 21, 1893, issuing as Letters Patent No. 512,203 January 2, 1894.

The original "Star" or "Pineapple Cone" shaped series of cylinders Cream Separator bowl; application filed August 24, 1893, issuing as Letters Patent No. 521,722 June 19, 1894.

The original "Curved Disc" Cream Separator bowl; application filed January 18, 1905, issuing as Letters Patent No. 892,999 July 14, 1908.

The original "Split-Wing" Tubular Shaft Cream Separator bowl; application filed April 29, 1898, issuing as Letters Patent No. 640,358 January 2, 1900—which invention, with a series of later improvements, is the type of bowl construction used in the De Laval machines of today, and still covered by protecting patents which prevent its appropriation by would-be competitors.

The patents thus enumerated are but a few of the more important of the more than 500 original Cream Separator patents owned, controlled and developed by the De Laval Company during its thirty years of creation and development of the Cream Separator industry throughout the world. They are recited because they show in the most illustrative and conclusive manner possible De Laval originality and leadership from 1878 to the present day.

In addition to these patent-protected features, the De Laval machines have within two years been mechanically redesigned and reconstructed in every part, from top to bottom, so that the new and improved line of De Laval machines are today, even more than at any past period, fully ten years in advance of any other cream separator made.

These are the Rock-of-Gibraltar-like separator facts against which the mere "word claims" of would-be competitors fade away like the mists of night before the rays of the morning sun.

Truckenbrod's Standard Barred Rocks

Teddy V, Our Second Prize Cockerel Chicago Show, 1908
Bred and owned by us

are world's best, famous prize winners. Made a world's record at great Chicago show by winning 1st, 2d, 3d, 4th and 5th prizes on males the last three years, more prizes on cockerels than all competitors combined. We have for sale 15 fine, Standard weight, pure Latham pullet bred cockerels and 20 fine, Standard weight, pure Bradley Bros. pullet bred cockerels at \$3, \$4 and \$5 each. Every one is a fine individual. Also have for sale 50 fine, Standard weight cockerel bred cockerels, pure Bradley Bros. & Teddy line bred, best in United States, at \$3, \$4 and \$5 each. All of these will make good breeders and winning cock birds for next year's shows. Fifty fine cockerel bred pullets for sale at \$3 each; pairs, trios and pens mated for breeding at \$7, \$10 and \$15. Our birds will please you. Satisfaction guaranteed. Write us for free circular showing our Chicago winners from life. Eggs from best matings only \$5 per 13, \$9 per 26.

Standard Rock Farm
TRUCKENBROD BROS., MENDOTA, ILL.

color and clear barring; he also wins the male shape special.

Pullets. First, a beauty, shown at her best possible condition, excellent in form and just the right shade of color; barring very clean and sharp; she also wins shape and color specials. Second, another of the rarest quality, very close to first, but a mite past her best and laying. Third, sharp, clean barring and fine type. Fourth, closely barred and good shape. Fifth, similar to third, a little young. These five winning pullets were as good as I expect to see at any show.

Pens. First, skillfully mated and grandly shown, with an extra fine male and four of the best quality females; wings on all extra fine. Second, another hot pen, with a dandy male and grand females. Third, had four very fine females, male unfinished in wing. Fourth and fifth, both good pens, but evidently some passed their best.

White Plymouth Rocks.

A splendid class faced the judge here, with quality and superb condition the feature. Several exceptional birds were found here, as will be noted below, among them the king of the show, for whom the owner now seeks a name.

Cocks. First, the equal of any White Rock (dead or alive); he was awarded by seven judges present the gold medal for best male at the show; in shape, color, finish and condition he was all that could be desired. Second, a grand cock with fine head and well shown. Third, not at his best here, still a fine bird. Fourth, good in both shape and color. Fifth, a grand winner of other days, and a most valuable breeding bird.

Hens. First, a royal beauty in every way and a great winner. Second, a beauty, but a little overdone (feed). Third, close up and dandy. Fourth, and fifth, both very choice hens.

Cockerels. First, good in type and head. Second, probably the best in condition, but fails some in comb. Third, not finished, a good white bird. Fourth, will make a grand one in time. Fifth, also needs time.

Pullets. First, meets our every desire, perfect in condition and very fine shape. Second, also extra fine and very close to the winner. Third, very good, color of the best. Fourth, a dandy, needs a little filling. Fifth, nice in color and good type.

Pens. First, a great winner, headed by a strong cock, nicely finished, and four females of size and form and good heads. Second, a grand pen well shown in condition. Third, very close up, the male a beauty. Fourth, one of the best but not well shown. Fifth, a good, even pen of merit.

Buff Plymouth Rocks.

A small class for this variety and show. We had expected a good class here, with the specials offered. First

Don't This Prove My Statement?

"I've Got the Goods"

When I state my birds won at Philadelphia, Chicago, Washington, Scranton, Illinois State Fair, Memphis, Portland, Me., and at Vancouver (beating A. Y. P. and Toronto Industrial winners), as well as hundreds of other shows this season North, South East and West? But, again, no distance is too great. The big Dairy and Crystal shows, England, were also gathered in by Duston's stock. I was physically unable to make an exhibit this season, but my record for three years at the hottest

White Wyandotte

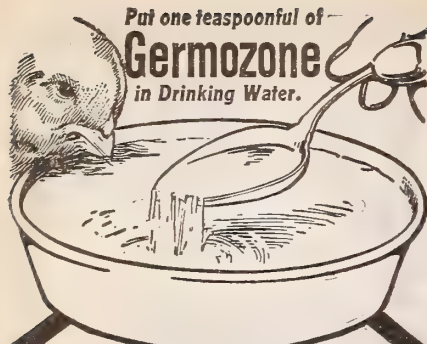

show in the world, Madison Square Garden, where I won First Collection two years out of three, is a final proof. The best in the country shows up there if it can be bought. Just ask the boys what about the shows of '08 and '09, when practically all of the Boston winners of a week later never got a "look-in." Don't that tell of quality? The best judges say "it was the best judged class there has been at New York in years." Now, here is the prettiest part of the whole thing to me, and to my customers as well. I did not have to go out and put a small fortune into buying a whole flock or part of one. I just "toddled" up to my own houses, picked out my birds, washed them, and sent them to the show, winning first, fourth and fifth cockerel, first and third pullet, second hen (considered by many the most typical female in the show), fifth cock and second pen (only for the tail of the cock being injured in washing, the pen would have been an easy first), and first collection for the second time in three years. Never been equaled by any White

Wyandotte breeder. Now, who dares stand up and say they won at New York on birds of their own breeding? It's interesting, this story of showing and winnings. It is expected that one may buy winners at times and perhaps for some years, but barring accidents and trouble, it seems that the strongest claimants for honors should be able to produce a few for the fall shows or winter showing. Now you know what I have done, as well as furnished winners for sixteen years all over the country. Don't this prove

Duston's White Wyandottes

are a winning strain and that "I've got the goods"? I can furnish the highest class breeding birds in cocks, cockerels, hens and pullets, also stock of medium and average quality, write me your wants today. Eggs ready to ship now from the choicest matings I ever sold from. You get the benefit of it this season. There is going to be a big rush. Order early. Price \$5.00 a set; two sets, \$8.00; three sets, \$10.00; five sets, \$15.00, or \$20.00 in hundred lots. Send 10c for illustrated catalog to the breeder that has made possible the World's Best Flocks.

Arthur G. Duston
P. O. Box 1020 **So. Framingham, Mass.**

Put one teaspoonful of—
Germozone
in Drinking Water.

For Perfect Poultry Health

I produced Germozone as a poultry raiser, and for my own use. My poultry needed something. Nothing on the market "filled the bill." To continue to let diseases take their course meant more losses—losses no poultry raiser, large or small, could afford to endure. I experimented with more than \$100 worth of ingredients and finally produced Germozone. The neighbors knew what it was doing for me, and bought. They endorsed it then, and now. Trainloads of it have been sold on proven, undisputed merit.

What Germozone Does

Germozone is a germicide, a bowel regulator, a system builder. It goes to the seat of the trouble and usually effects a speedy and permanent cure.

Given in the drinking water **twice-a-week** it cures disease, prevents contagion, and keeps the fowls in a healthy, vigorous condition. Prepared either in tablet or liquid form and will be sent, postpaid, on receipt of price.

Germozone is the best health insurance you can have for your poultry. Cost is small, and it is sold on an **absolute guarantee**.

cock was a particularly fine bird. Other winners of good quality and well placed.

Columbian Plymouth Rocks.

One of the best quality classes we have seen east or west. The first cock in type and markings a wonder, head extra fine. First hen a beauty in color and grand markings; wings fine. First cockerel a male of both shape and choice markings, as were also others. First pullet another of the sure winning kind. First pen a grand one and well placed, but third and fourth should have been placed up a notch and the second brought down to fourth.

Silver P. Plymouth Rocks a fair class of very choice birds. Type and head points the attractive feature here.

White Wyandottes.

Formed one of the best classes. Sev-

up. Other winners good. Type was well shown in this whole class.

Silver Laced Wyandottes.

Here was a beauty class grandly filled and the extra high quality shown appealed to all who saw them. The first cock, a very silvery bird with elegant head points and as good a breast as we have seen; shape of the best. First hen, fine in type; her clean, open lacing with perfectly clean edging made her one of the best to be found. Second close up. Cockerel first an equal runner with first cock. Pullets, the three winners were close, of grand form and fine markings. First pen well mated and of a high and even grade.

Golden Wyandottes.

Another good class of Wyandottes, well shown and of good type all through. The winners without excep-

eral birds were seen here in each class. The winners were all well placed and type the feature.

First cock shown in good form, with fine head, back and tail. Second close up, splendid condition. Third one of the best in type. Fourth and fifth very good birds, both up in type.

Hens. First, one of the best brought out this year; back, breast and tail elegant. Second, another hot one, well shown. Third, fourth and fifth, all very good hens and well shown.

Cockerels. First, a corker in type and well finished. Second and other winners were all good birds.

Pullets. First, a beauty, closely followed by the second. Third, a grand bird, with fine back. Fourth and fifth, both well shown and finished.

Pens. First, a beauty in color and mating; the male here one of the best. Second and third, both choice and close

tion were good birds with good markings.

Buff Wyandottes.

A beauty class of 107 birds, as large and good a class as was brought out this year. Here color followed type closely for the feature honors, with head points up very close. The winners were classy birds; they could have been taken out and still the judge would have found plenty of worthy specimens for the ribbons. The three best cocks and the five winning cockerels were of a shade of color most desirable; the same can also be said of all the winning females. This, with a high average of head points and good eyes, completed the birds seen here, and it made one of the most attractive shown.

Columbian Wyandottes.

Sixty birds of this variety were shown. They formed another good collection, with the winners excellent on

Barred Rocks

WE CANNOT tell you in this space all that we want to say about the merits of our Barred Plymouth Rock winners at Toledo, Detroit and other large shows, and also our high-class utility stock. We have, however, published a new handsome catalogue telling about our stock and containing many fine illustrations of our yards and buildings, and also individual pictures of our birds. These pictures are untouched and show the birds true to life. If you are intending to purchase either stock or eggs, send us one dime today for this elegant catalogue. We guarantee that it will interest and please you.

Automatic Feeder

Also send at once for free circular telling all about the Poultry Feeder and Exerciser shown in this picture. It is the greatest feed and labor-saving device ever placed in a poultry yard. We have fifty of these Feeders and Exercisers in constant use in our yards. The price of the Feeder and Exerciser is 8-qt., \$2.50; 14-qt., \$3.25; 20-qt., \$4.10; 32-qt., \$5. Send us the price of the size you want and we will ship it to you on 30 days' trial. If you do not want to keep it, return to us and we will refund your money and pay express charges both ways. We refer to the editor of this paper and to the Citizens' Banking Company, Perrysburg, Ohio, as to our financial standing. Write today. Remember, the Barred Plymouth Rock catalogue is only 10c in silver or stamps and the circular telling about the Poultry Feeder and Exerciser is free.

R. H. SHUMWAY, Rockford, Illinois

Enchantress

Finest floral novelty of the season. A magnificent large flower with long stem, of perfect shape and just the color of the noted Enchantress Carnation. Free bloomer and you'll like it. Really worth 25 cents per packet, but we desire to place our large, beautifully illustrated catalog of seeds and plants in the hands of every flower lover and will send it with packet of 50 seeds of Enchantress Aster **FREE**, if you mention paper. If you have had our catalog, please say so. Iowa Seed Co., Dept. 2, Des Moines, Ia.

type and color, as well as markings. The winning cockerel, hen and pullet were extra birds of best quality and well conditioned.

Partridge Wyandottes.

About fifty birds of this variety completed the Wyandotte classes, the first and second cocks. First, second and third cockerels were rich in color and form. The winning females and in particular the first hen were choice birds, worthy of every honor.

Rhode Island Reds.

There were sixty-nine Rose Combs and 122 S. C. Reds shown at their best form. Color here was the feature in both classes, well showing the improvement made. Good shape also prevailed, with head points and eyes following. The first cock birds of each variety were favorite old-time winners, hard to beat. The other placed birds were all well up and grandly placed by Judge Denny, making two very fine classes of these popular varieties.

Orpingtons.

Were shown in all varieties, and excepting the Buffs, in not as strong classes as we had hoped for. The general quality was good, with several exceptional birds in each class. The Buffs made the best showing and the winners were a worthy lot.

Black Minorcas.

The Rose Comb Black Minorcas numbered sixty-five birds and formed a beauty class complete in every department and of the very best grade. The first cockerel was easy the gem of the class, fine in station and grand in type, finished in detail. The first, second and third cocks were rich in color and with good heads. First hen, another wonder, with second close up and well shown. All the five winning pullets great birds, with sound color. First pen fit to win at any show and in any competition.

In S. C. Black Minorcas fifty entries faced the judge in a hot class of the best quality birds. The first and second cocks were large birds of type and color, with fine heads. The winners in cockerel were also of the same grade and grandly shown. All the winning hens and the first and second pullets were choice birds.

The Leghorn Classes.

The Single Comb White Leghorns were one of the three classes of the show, with 130 birds in line, a complement to Judge A. C. Smith. Here size, type and condition prevailed, and here again the winners could have been withdrawn, still leaving enough of the best quality to satisfy all. The winners were very fine birds, and the head points came out strong as a feature in this remarkable class.

Single C. Brown Leghorns followed the Whites closely in quality. Here the winning males looked extra, while the first three females placed in both hens and pullets were of the best of color and markings.

Rose C. Browns were another real good class, with plenty of size, good markings and very good heads.

Rose C. Whites, not as large a class as usual, but high grade birds. The winners were well shown. The first hen and first pullet were of grand size and shape, with ideal heads.

Both Single and Rose Comb Buffs were well shown and in real good num-

Bees, Fruit, Poultry

A GRAND COMBINATION AND A SURE MONEY MAKER—Poultry thrives on orchard insects and bugs; bees get honey from orchard blossoms and fertilize the fruit. No work, small expense and big profits from the honey, eggs and fruit you sell.

Fruit growing pays big! \$300 an acre is nothing unusual from Apples, Peaches, Plums, Blackberries, Raspberries, Strawberries, etc.

Let me send you, charges prepaid and free, my grand Combination Catalog on Orchard Trees, Small Fruit and Farm Seeds. I am giving away 20,000 live, hardy fruit plants, and you will get one of them in proper season if you ask for it now. Catalog free. Write to-day.

414 Howard Street Melrose, Mass.

bers. The winners were a nice shade of buff, the sound kind.

Black Langshans

Were a great class, one of the best brought out this year. Shape the noted feature. This, with remarkable color and extra condition, completed a wonderful class. Here Canada beat Buffalo and won the gold, but we think some of those good birds will stay over here.

Anconas.

These formed another large and beauty class. Buffalo wins here and evens up matters for above. It is very seldom that we see a class of this in Anconas, their popularity was well shown here.

In Hamburgs and Polish was seen a display worth your time. Canada sent over here her very best, which alone is full guarantee of what was seen here. They were shown in all varieties, and to the best advantage. The W. C. Black Polish in particular formed a great class and finished a most attractive exhibit. The Hamburg varieties are also all beautiful and attractive, and when seen as here, desirable.

Cochins in Buff, Partridge and White, and Light Brahmas, were shown to good competition in well balanced classes. The type of both was well seen and the markings of the Brahmas very fine. Toe feathering extra.

In both Cornish and White Laced Red Cornish elegant birds were shown. The markings of the White Laced Red Cornish are very beautiful and we now can predict that they will become one of our popular varieties. Their form of body, with abundance of breast meat, and as Friend Harp says, the best morsel of meat ever was, they are sure to win their way.

Bantams.

Some 200 bantams were shown, and

in all the popular varieties. The Polish were a complete collection and one of the best we have seen. Cochins Bantams are always popular and in both type and feather were shown here with many exceptionally fine birds. The attractive Game Bantam was also here with two grand and well known collections competing. Rose C. White and Black and Seabrights filled in with little beauties of the best kind were favorites and found many admirers.

Turkeys, geese, and ducks were here in good numbers. Here was also the largest Tom we have seen, weighing 50½ pounds, and was sold for \$100 to a California man. H. P. Schwab.

RED BANK, N. J., SHOW.

The second annual exhibition of the Monmouth Poultry Club was held at Red Bank, N. J., January 26, 27, 28, 29, 1910. In point of numbers and quality of the bird coops it was by far the largest and best show the association ever held. There were 1,700 birds shown of about the best quality we have seen outside of New York and Boston. In fact, many winners of the above named shows were to be seen at Red Bank. The hall was kept scrupulously clean, and the birds received the best of attention by those having them in charge. Secretary Gisleson and Treasurer Schroeder were right on hand at all times looking after the welfare of the exhibitors and birds, and much of the success of the show is due to their untiring efforts. The number of silver cups offered at Red Bank was certainly an eye-opener. The writer counted over fifty which were on exhibition in two china closets. The winners of these grand prizes are to be envied. A pleasant feature of the week was the banquet given on Thursday evening by the members of the club to the visiting

fanciers. It was a most enjoyable affair and will last long in the memory of those present.

Lakewood Farms Products Company's exhibit was in charge of Fred Harries, who had on exhibition his noted White Orpington pullet, "Betty." The Pruna Food Company's booth, represented by Wilkinson, Gladdis & Co., Newark, N. J., was in charge of Mr. S. G. Morrill. Stump & Walter Company, of New York City, made a large display of their seeds, feeds and poultry supplies, in charge of W. Harry Orme. The Cypress Company had a large exhibit of their well-known line of goods and reported a good business.

Notes of the Show.

Greenwood & Yeomans, of Paterson, N. J., showed a fine string of Light Brahmas, the penciling in hackles and striping in saddles being almost ideal.

Barred Rocks were the largest class in the show, the quality of the winners being of the best. Mr. A. Schroeder, of Red Bank, made the phenomenal win of first and fifth cock, first and second hen, first cockerel, first and second pullet and first pen, which speaks for the quality of his stock.

Wilhelmina Poultry Farm, Morganville, N. J., E. L. Geisel, proprietor, had a string of their well-known Barred Rocks on exhibition, winning fourth cock, fifth hen, fourth and fifth cockerel, first cockerel bred pen and second pullet bred pen. Mr. Geisel is the originator of the Barred Cuckoo Wyandotte and made a nice exhibit of this new variety, which attracted considerable attention. At Madison Square Garden, Richmond Hill, L. I., and Red Bank he made a clean sweep on his Wyandottes. In color they resemble the Barred Rock, but have the rose comb and Wyandotte shape.

The large exhibit of Oak Hill Farm,

The Peerless "Ringlets"

True to Their Tradition, Are Again Great Winners at New York

At the Imperial Madison Square Garden Show, 1909

E. B. Thompson's Barred Plymouth Rocks

win First, Third and Special Prizes on Exhibition Pens; special prize Cock; special prize Cockerel; numerous specials on hens and pullets, and the Harding \$50 Challenge Silver Cup offered for best exhibition pen. The race at this 1909 New York Show was a Marathon for speed and quality, and my First Prize Silver Cup Exhibition Pen was declared by expert opinion to be the finest ever exhibited—a paragon of perfection—and created a sensation as the finished achievement in modern Barred Rock breeding.

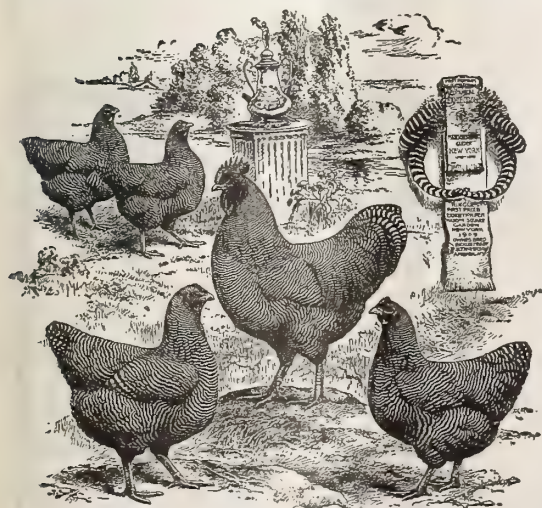

The "Ringlets" are always imitated—but never equalled. They are first in record, first in quality and first in popularity

Their record at New York for 22 years is **GOLD LINED**

—it is a calendar of successive victories demonstrating step by step their irresistible advance towards the world's absolute leadership

The Enormous Prestige of the "Ringlets" Created by Superlative Quality Has Made Them the Standard by Which All Other Barred Rocks are Judged

I now have on my farm the largest and finest lot of superior exhibition and breeding birds I ever owned; they show the "Ringlets" barring and the sharp contrasting colors that win under all judges.

"Ringlets" First Prize Exhibition Pen and Winners of Sweepstakes Silver Cup at Madison Square Garden, New York, 1909.

Richly illustrated 58-page catalogue mailed upon request; it is full of original pictures of New York winners from life. 1000 grand breeding and exhibition cockerels for sale. Elegant hens and pullets in any number. Show birds fit to win in any competition. Eggs from the world's finest exhibition matings: One setting, \$6; two settings, \$11; three settings, \$15; four settings, \$18. You may have the product of my skill reaped by 30 years' experience, at reasonable prices. Your wants will have my very best and personal attention.

SILVER LACED WYANDOTTES
TRUE WYANDOTTE SHAPE
STANDARD SIZE & WEIGHT
FINE LACING IN ALL SECTIONS
ESPECIALLY STRONG IN LACED WING BAR

HENRY STEINMESCH
Eggs, \$3.00 for 15. St. Louis, Mo.

R. F. D. No. 1, Red Bank, N. J., was in charge of Mr. I. M. Elston, poultry manager, and he was kept busy during the show explaining the many fine points of its different specimens, which were made up of White and Colored Wyandottes, White Rocks and Single Comb Rhode Island Reds. We were informed the Oak Hill exhibit was the largest in the show and it certainly was in splendid condition. Some of their important wins were: Silver cup for best display of White Wyandottes, silver cup for best display of White Rocks, silver cup for best Columbian Wyandotte in the show, silver cup for best male bird in the show went on their White Wyandotte cockerel.

Owing to the demands upon his time Secretary P. J. Gisleson was unable to show but a pen of his Columbian Wyandottes which won the blue; one of the females was awarded the shape special offered by the Columbian Wyandotte Club. The cockerel at the head of this pen is a bird of much quality and fit to win in the best of competition.

Mr. W. D. Campbell, Bloomfield, N. J., R. F. D. No. 1, made a grand showing with his Buff Leghorns, winning in a strong class first and second cock, hen, cockerel, pullet and first pen. The first prize cockerel is the best colored Buff Leghorn male we have seen in years, being absolutely a rich bright golden buff from head to end of tail.

Mr. and Mrs. Charles Smith, of Wild Goose Farm, spent a day at the show renewing acquaintances and enjoying the different exhibits.

C. R. Applegate, Battleview Farm, Freehold, N. J., was right there with the goods in Rose Comb Rhode Island Reds, winning first cock, first cockerel, third hen and second pen in a good strong class. It is funny how some men will take all the credit of making a successful exhibit, but always have their wives with them to tell of its good quality. We met Mrs. Applegate while at Red Bank.

R. W. Bates, of Little Silver, N. J., made a splendid showing of strictly high quality Silver Laced Wyandottes, capturing first hen, first and third cockerel and third cock.

We were much impressed with the quality of the stock shown by Briarwood Farm, Rumson, N. J., Mr. John Daly, manager. They showed all three of their varieties and it was a quality exhibit from start to finish. In Columbian Rocks they were awarded second cock, second hen, second and third cockerel, first and second pullet, first pen and special for best display; Silver-Penciled Rocks, second cock, first and second hen, first, second and fourth cockerel, first, second and third pullet, second, fourth and fifth pen, special for best cockerel, best hen, best pullet and best pen, also silver cup for best display. At the late Madison Square show Briarwood Farm was awarded the silver cup and second for best display on this variety. In Buff Orpingtons they made one entry, a pen, winning fourth.

W. A. Smith, Metuchen, N. J., the Minorea specialist, was on hand with a grand string of birds in all varieties. In Single Comb Blacks he had on exhibition several of his Madison Square Garden winners, including the first cock, who was also first cock here. The first New York hen also won the blue. His other winnings were first, second and third cockerel; first, third and fifth pullet. In Rose and Single Comb Whites and Rose Comb Blacks Mr.

Paint Without Oil

Remarkable Discovery That Cuts Down the Cost of Paint Seventy-Five Per Cent.

A Free Trial Package is Mailed to Everyone Who Writes.

A. L. Rice, a prominent manufacturer of Adams, N. Y., has discovered a process of making a new kind of paint without the use of oil. He calls it Powderpaint. It comes in the form of a dry powder and all that is required is cold water to make a paint weather proof, fire proof and as durable as oil paint. It adheres to any surface, wood, stone or brick, spreads and looks like oil paint and costs about one-fourth as much.

Write to Mr. A. L. Rice, Manufr., 70 North St., Adams, N. Y., and he will send you a free trial package, also color card and full information showing you how you can save a good many dollars. Write to-day.

"Kant-Klog" Sprayer gives twice the results with same labor and fluid. Also for spraying trees, vines, vegetables, etc. Agents Wanted. Booklet free. Address

Rochester Spray Pump Co.,
36 East Av., Rochester, N.Y.

Smith made a clean sweep, winning every prize offered in the different classes.

William A. Winter, Red Bank, N. J., the Rose Comb Rhode Island Red specialist, showed the quality of his stock by winning second, third and fourth cock; first, second and fourth hen; second and fourth cockerel; first, second and fifth pullet, and third and fifth pen, in strong classes. We can recommend Mr. Winter to our readers, also his stock, which is of the highest quality. He is a breeder of Collie dogs of the bluest blood and each season produced some of the very highest type specimens shown.

THE CANANDAIGUA (N. Y.) SHOW.

The First Annual Show of the Ontario Poultry Association With Nearly 1,000 Birds Shown—Dr. C. J. Andruss, President.

Canandaigua has held its first show, after a late start, only organizing in December, and with shows all around, the fanciers have succeeded and held one of the best first attempts we have seen. With the well known breeder of Columbian Wyandottes, Dr. C. J. Andruss, as president, and backed by such able fanciers as Dr. L. D. Southerland, W. F. Brace, L. L. Smith, F. S. Bradt, etc., it was a success from the word go. Entries came from all sections and the class of birds formed a handsome display of great merit.

In Barred Rocks 101 birds were shown, showing well, the winners were a grand lot. White Rocks, strong in condition but not so large a class; Buff,

Columbian and Partridge Rocks were all good classes.

White Wyandottes, a good strong class, winners well done. Buffs were a large and beauty class, color the feature. Silver Laced I quality one of the best seen, the winners here were exceptional birds. Columbian, also a

good class, as were also the Partridge. Here birds of rare markings and type were seen.

The Leghorn classes were all well filled and grandly shown, the S. C. White, Brown and Buff were particularly fine. Rhode Island Reds in both Single and Rose comb were good in

Flock of S. C. White Orpingtons, each pen having access to orchard, on farm of J. S. Haupt, Easton, Pa., breeder of White, Buff and Black Orpingtons.

fine class with several New York winners shown. The New York winning hen of Dr. Andruss was the show feature, being shown in a large cage and attracting much attention. Black Wyandottes were also a very large and

color and a little extra in form. The winning males looked very good to us.

The Houdans formed a beauty class. Here were birds of the very highest grade, shown in the best of feather.

In Orpingtons, and in particular

Planet Jr. Tools

get largest crops with least work

What's the use of drudging to get ordinary results when a Planet Jr Seeder or Cultivator does six men's work, and gives you an increased yield besides? Planet Jrs are patents of a man skilled both in farming and manufacturing for over 35 years. They are light, strong, lasting, and fully guaranteed.

No. 4 Planet Jr Combined Seeder and Wheel-Hoe saves time, labor, seed and money. Almost all useful garden implements in one. Adjustable in a minute to sow all garden seeds, hoe, cultivate, weed, or plow. Pays for itself quickly, even in small gardens.

No. 8 Planet Jr Horse Hoe and Cultivator will do more things in more ways than any other horse-hoe made. Plows to or from the row. A splendid furrower, coverer, hiller, and horse hoe; and unequalled as a cultivator.

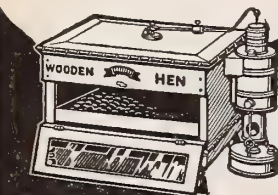

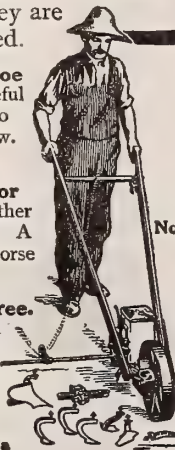

The 1910 Planet Jr catalogue is free.

It illustrates and describes 55 different implements for the farm and garden. Write for it today.

Hatch Chickens By Steam

Stahl Incubators were among the first to be put on the market; to-day they stand as they did then—the best—approved by thousands of particular fanciers the world over.

This isn't luck—it's merit—perfect incubator value, produced by the right kind of material and workmanship, backed up by an unbroken line of splendid results. The

Excelsior and Wooden Hen INCUBATORS

have a standard hatching record of a chick from every fertile egg; they maintain this splendid showing because all features of their construction—heat, moisture, ventilation, and similar details—are carefully looked after and perfectly worked out.

The **Excelsior** or **Wooden Hen** will hatch a brood before your hens stop laying. You can market your early broilers and mature pullets into quick layers at a time when both will yield an extra big profit.

Buy a "Stahl" and eliminate trouble and worry. Catalogue illustrates complete line of Incubators, Brooders, Poultry Supplies, etc. Free on request.

WRITE FOR FREE CATALOG AND BOOK OF PLANS

The Famous PEERLESS INCUBATORS & BROODERS

More than 30,000 in actual use. Every one of them hatching and raising a larger percentage, with less attention and less expense than any other made. No other machine has so many improvements—so many money savers—so many labor savers as the Peerless. Here are a few of the special features:

Automatic ventilation and moisture; cold-rolled copper tank; heat distributing bars; tandem, double-compound thermostat regulator; automatic lamp; acme trip burner with combined damper and flame regulator—this is the safest burner made. It saves half the time, labor and cost of operation.

My Lampless Brooder—the greatest brooder success of the age. No lamp, no tank, no expense to operate. Raises a larger percentage of healthy, vigorous chicks than any other brooder on the market.

Either Knock-Down or Ready For Operation

I manufacture a complete line of Incubator and Brooder Supplies and fixtures; everything to repair or remodel your old machine or build new ones. I will also make to order anything special you may want in my line.

Send for my combined catalog and book of plans. It is free. It contains more than 100 photographic illustrations, showing step by step how Peerless Incubators and Brooders are constructed and how easily you can build them yourself. Whether you build an incubator or buy one ready made, you will save money by buying from me. Send for my free book today and learn all about the "House of Quality."

H. M. Sheer Company,

Box A5, Quincy, Ill.

Blacks and Whites, good classes were shown. The first Black pen, a show feature here, was extra color with beautiful type and well mated.

Light Brahmas were seen in quality. The first cockerel and pullet were a choice pair. The few Langshans shown were of good type and color.

A grand display of White Crested Black Polish were shown here. These beauties hold favor here and fine birds were the rule. The winning pen made a great showing with its grand crests and sound color.

Bantams, turkeys, geese and ducks filled out the display in excellent style, well shown in each class and plenty of each to fill the desires of all. The winning pair of Pekins were of extra size and with grand shaped backs. Pigeons brought out some fine birds. Here were also seen several from a well known Rochester fancier that have won the country over.

Williams' Extractor, the well known poultry remedy, was given a test here and fully satisfied all with its work-

ings. We have used this preparation for some years and now more than ever wish to recommend it to the fancy as one of the things to keep on hand. Write Williams & Co., 28 Delaware avenue, Albany, N. Y. H. P. Schwab.

OMAHA SHOW.

The show held by the Omaha fanciers has come and gone and will be remembered as one of the best in the west this season. The quality was better than expected and this is saying much. The show management did all in their power to give the visiting fanciers every courtesy and the breeders present from abroad appreciated it. This is the first show the far west has seen by the comparison system and it was voted that the next season show would be handled in the same way. Comparison is certainly going west into the realm of the score card. We have not the space here to make mention of all the meritorious exhibits, but will have something to say of a few of the American's patrons.

The George H. Lee Co., of Omaha,

REDS

SINGLE COMB. My best pen contains Madison Square Garden and other winners. Eggs, \$5 per 15. Second pen headed by cockerel winning at Philadelphia and Norristown, Pa., mated to select females, \$3; other matings, \$2. My birds have superb shape and color. Breeding cockerels, \$5 and \$10. Baby chicks, \$15, \$25.00 and \$40.00 per 100. Write me. I can please you.

J. H. CROSSLEY, Box 177, MAGNOLIA, NEW JERSEY

Carver & Avey's Part. and Silver Penciled Wyandottes Are Always Winners

At the Missouri State Poultry Show, held at St. Louis, Dec. 6 to 11, 1909, in the largest class of all the Wyandottes, we won on Partridge, 1st cockerel, 5th cock, 1st, 2d pullet, 2d, 4th hen, 1st pen. Four Partridge Wyandotte Club specials and grand sweepstake silver cup for best pair in the show. On Silver Penciled Wyandottes in a large class with competition from three states, won 1st, 2d, 3d cock, 1st, 2d cockerel, 1st, 2d, 5th hen, 4th, 5th pullet, National Silver Penciled Wyandotte Club special for best colored male, best colored female, best shaped male, best shaped female. At Ohio State Poultry Show, Jan. 10 to 15, 1910, with four entries of Silver Penciled Wyandottes, we won 1st cock, 1st cockerel, 1st pullet, 1st hen. 300 EXHIBITION cocks, cockerels, hens and pullets, fine enough for any show or any competition. We are the **LARGEST SPECIALTY BREEDERS OF PARTRIDGE and SILVER PENCILED WYANDOTTES in AMERICA.**

CARVER & AVEY

BOX A

COLUMBIA CITY, INDIANA

**Clemans' Columbian Plymouth Rocks**

Won every first on single birds and pen and silver cup for display at the Great Chicago show, Dec., 1909. Following great males head 1910 pens: Pen 1, cock first Chicago. Pen 2, cock first Madison Square and Buffalo and heading first pen Chicago. Pen 3, cockerel first Chicago. Pen 4, cockerel 2d Chicago. Pen 5, cock 2d Chicago. All above males are the big boned real Rock type and great color. All the Chicago winning females and others as good in these pens. Eggs from above, \$5 per 15, \$15 per 50. From other good pens, \$3 per 15, \$5 per 30.

BLACK WYANDOTTES. My original prize strain, acknowledged by authorities the original Black Wyandottes. Eggs from great pens, \$4 per 15, \$7 per 30. Birds for sale. Circulars.

Combination prices at a big saving. Write today for our free bulletin, published quarterly.

STRUBLE'S S. C. BUFF ORPINGTONS

Won First Pen at Madison Square Garden, New York, Show, 1908 and 1909, with 15 pens competing, and we won on old birds, our competitors showing young birds. This pen was the sensation of the show and we refused \$500.00 for this pen offered by a prominent breeder, but we still have them in our yards and can sell you cockerels and pullets bred from this pen and others their equal that are properly mated for best results in and will produce winners for the best of shows.

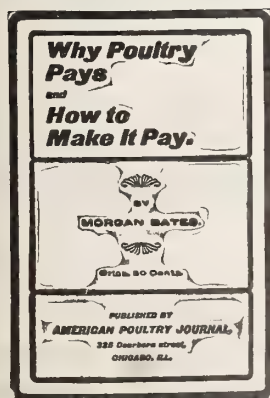

We have helped others to win the blue at our largest shows and can help you and for the first time in five years we have decided to sell a few eggs at \$1.00 each, and as we will only spare 200 of these eggs this season, first come first served. We expect to hatch our Madison Square Garden winners from these eggs and you have an equal chance with us.

Why not place your order with the man that breeds the winners for some of the best shows in this country and the only breeder that has confidence enough in his stock to ship them C. O. D., which is the only fair way to buy high-class show birds of anyone? Nuff said.

Z. D. STRUBLE

ORPINGTON SPECIALIST AND LICENSED CLUB JUDGE

LOCK BOX 16, BASCOM, OHIO

**WHY POULTRY PAYS AND HOW TO MAKE IT PAY**

A book for the beginner in poultry raising and for those engaged in it who are interested in securing from the business the greatest profit obtainable. This book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs. Also contains a chapter on Poultry Diseases and simple remedies for same. Gives instructions on incubators and brooders and much other valuable information, and is profusely illustrated with ideal drawings of Standard fowls.

We are selling this book at the popular price of **50 cents**. This book and one year's subscription to American Poultry Journal for only **75 cents**. Send all orders to

AMERICAN POULTRY JOURNAL PUB. CO.
358 DEARBORN STREET CHICAGO, ILLINOIS

had on the floor one of the finest exhibits ever put up by this company. They are making a good machine and pleasing their customers, the which is after all the true test of a machine. The Mandy Lee machine was in operation during the show, bringing out a great number of hearty chicks. The poultry appliances that are manufactured by this company were also on display and created favorable comment. The company knows after years of experience just what the trade is wanting and does its best to make up good appliances at right prices.

Frank Miltenberger, Cortland, Neb., was one of the successful exhibitors of Columbian Wyandottes. He had out a great showing and won liberally of the blue ribbons. We are glad to see Mr. Miltenberger doing so well with the Columbians, as he has good stock and lots of it, and sells it at reasonable figures. The males he showed were very shaply and while some of his females were still young their good quality could be easily seen and the judges appreciated it. Get in touch with this flock if you want Columbians.

The exhibit of W. D. Barrett, Shelton, Neb., was good all the way through. He showed some fine White Orpingtons and Houdans, and got well up in the money in all classes he showed in. Mr. Barrett has been an advertiser for a number of seasons and we can say that his exhibit was up to the high standard he has set with his birds.

Burhans.

We lead, others follow.

ASHTABULA, OHIO.

The Northeastern Poultry and Pet Stock Association held one of the most successful shows ever held by the association in the Warren block, February 1-15, 1910. The boys certainly upheld their slogan of "Better, Busier and Bigger Ashtabula," as attendance was large and the interest keen, which shows that the exhibition was a success, both financially as well as from a fancier's standpoint. The center of attraction was the large pen of pheasants which was placed in the front part of the building.

The largest entry was to be found in the S. C. Rhode Island Red class. Mr. O. O. Hansch, of Perry, Ohio, captured the lion's share of this class, which were as follows: First, second and third pullet, fourth cockerel, first cock, first and third hen and first pen. His first pullet was a beauty, she also having won color special on female at the Youngstown show, 1910.

The White Rock class was a close second to the Reds. In this class Mr. Wm. C. Eagley, of North Gilead, Pa., won first and third pullet, third cockerel, second cock, second hen and third pen.

Next year the association will hold its exhibition in the Lyceum, the largest public hall in the city, as the enthusiasm has been so great among the old and new members that it was found impossible to hold their next show in the present quarters. All indications point

to the fact that the Lyceum will be filled to its utmost capacity.

SCALY LEGS.

This disease is usually caused by fowls sleeping in filthy quarters. It is also caused by a small parasite which works underneath the scale of the leg. Oftentimes their legs will be twice their natural size. If the legs of each fowl were anointed once each month with equal parts of sweet oil, kerosene oil and alcohol they would never become scaly. A good remedy is lard and kerosene oil, equal parts; add enough sulphur to make a paste, then apply this to the legs and bandage them, leaving the bandage on for a week. If at this time the scales have not disappeared, repeat the treatment, as it is a sure cure.

NEW MANAGER.

Mr. E. T. Jacobs, of New London, Ohio, who for the past seven years has been connected with the poultry plant of Mr. Chas. McClave, of New London, Ohio, has accepted the position of superintendent of the poultry department of the Hartman Stock Farm, succeeding Mr. Hugo B. Hark, who resigned February 1. Mr. Jacobs is a well known fancier of about twenty years' experience and has the reputation of knowing how to pick out the good ones.

"We lead, others follow," is our slogan.

KAUFMANN & WINDHEIM'S FAMOUS "AMERICAN BEAUTY STRAIN" OF ROSE COMB RHODE ISLAND REDS

"HOLD THE WORLD'S SHOW RECORD"

Our record for the past three years at twenty-three of the best shows held in America stands unequalled. No record held by any breeder in this country can compare with it. Exhibiting thirty times, not only in one section or under one or two judges, but going from coast to coast and under twenty-four different judges, this record was obtained. Exhibiting at Madison Square Garden, Boston, Chicago, Indianapolis, the Jamestown Exposition, Washington, St. Louis, Augusta, Scranton, Allentown, Nashville, Paterson, Trenton, Richmond Hill, Newark, Orange, Morristown, Dover, Rutherford, Englewood, Montclair, Sacramento, Cal. and the Alaska-Yukon-Pacific Exposition, winning more first prizes than all other Rose Comb Red exhibitors combined, proves that the American Beauty Strain stands in a class by itself. We have also furnished for years first prize winners at the big shows—East, West, North and South; and today hundreds of Red men are exhibiting and breeding our strain.

If you are in the market for eggs that will hatch out winners for any show, write today for our handsome catalogue, showing photos and records of the winners that are in our pens this season. Compare us with the others—then judge for yourself. We have the quality, our prices are honest, and as for our reliability, ask any poultryman or judge in the country.

Kaufmann & Windheim, Originators - The Largest Exhibitors of Reds in America - Nutley, New Jersey

White Wyandottes

NEW YORK AND BOSTON WINNERS—Our birds have won at America's leading shows for the past twelve years and at the late show at Madison Square Garden our birds were again among the winners, capturing fourth and fifth cock, fifth hen and fifth cockerel. We are offering fifty high class breeding cockerels that will put **QUALITY** into your flock. A few pens and trios at "live and let live" prices.

Our White Rocks

Won at Madison Square Garden in the past, and for 3 consecutive years we have bred first chl. and color special at the Garden, and at Boston, 1910, on three entries we won 1st and 3d chl.; special for best colored male and \$100 challenge cup for champion male. These winnings added to our past record should convince you we have the quality you're looking for. Anyway, you may return them and get your money back if not as represented. Write for prices.

EGGS

From our pens, both varieties, which will contain all of our prize winners, carefully mated to produce more prize winners at \$5 and \$10 per fifteen. We sell you the same eggs we would set ourselves. We satisfied all our customers last year and we will please you. Write us today. Remember, we breed and raise all our winners. Stamp for mating list.

Rockandotte Farm W. R. GRAVES MRS. S. H. GRAVES **R. R. 3, Southboro, Mass.**

When it comes to producing fine poultry or holding poultry shows, the state of Indiana pre-eminently takes the lead. The Indianapolis show which just came to a close was another fine example of this kind. Quality is a word that fits in to perfection here, especially in Barred Rocks, White Wyandottes and Reds nothing better could be had. While the Tomlinson hall is not very large the entries had to be limited, so great was the demand that many entries had to be refused. The attendance was of the best and many fine sales were made. The poultry press was well represented and all did good business.

At the annual election held the following were elected: President, U. R. Fishel; vice presidents, C. L. Buschmann, C. Milhouse.

With these gentlemen in charge of the next show there can be no doubt that it will be better than ever. It was suggested by some that the boxes be removed from the sides and rear of the hall. This would give considerably more space and accommodations for 500 birds more would be secured in this manner. There was general satisfaction of the work of the judges and no kicks were registered. This is noteworthy on account of the hot competition in some of the varieties.

S. A. Nofztger's and C. L. Buschmann's exhibits as well as U. R. Fishel's

\$5,000 hen "Louise" were the center of attraction at the show and they did a rushing business. C. E. Spaugh, J. C. and C. I. Fishel were visitors at the show and reported record breaking sales, in fact J. C. said that this was his banner year so far and that the demand for his Wyandottes this year exceeds all former records. U. R. Fishel reported a \$1,100 shipment the week previous to the show.

In connection with the poultry show was held a cat show, a dog show, and this year they also had a pigeon department. The show was an unqualified success in every particular, the exhibition being better and larger than ever before and the attendance broke all past records. Something over 1,500 head of poultry was on exhibition and the hall was taxed to its utmost. The Barred Rock class was first, which means that it was a hot class at Indianapolis. One of the pens which particularly attracted our attention was that exhibited by G. Earl Hoover, Mathews, Ind., which contained a very fine line of specialties.

Considerable enthusiasm was exhibited at the exhibition of Partridge Plymouth Rocks by S. A. Nofztger, North Manchester, Ind., who had a fine line of these birds and captured first, second and third cock, first and third hen, and first, second and third cockerel, first and third pledge, no pens being entered.

The Rhode Island class was large in

both the rose and single combs. In the rose comb class C. L. Buschmann, 4939 Meridian street, Indianapolis, Ind., succeeded in capturing all the first prizes on a very fine string of Rose Comb Reds. Mr. Buschmann had displayed his non-fading Rose Comb Reds, around which was always to be found a crowd of admiring fanciers who appreciated a high class quality of birds exhibited by Mr. Buschmann. It will be remembered that Mr. Buschmann's birds have been large winners at a number of other important shows during the last several months.

Dillon & Bell, 4106 Colerain avenue, Cincinnati, Ohio, exhibited some nice Rose Comb Reds, winning third cock, third hen. They also exhibited some fine Golden Wyandottes, winning first and fourth cockerel, third and fifth cock, second hen and third pullet, first pen, second club ribbons, and silver cup for best display from the city of Indianapolis.

One of the important winners in the White Wyandotte class, whose exhibit showed high class specialties, was George F. Schmidt, Martinsville, Ind. He won first and second pens, fourth and fifth cockerel, fourth pullet and fifth hen. Also silver cup for best display.

One of the sensations of the show was the first prize Black Orpington cock "Othello" exhibited by the Blue Ribbon Poultry Farm, Columbus, Ind., the bird having been first prize winner at Manchester, England. He shows excellent type, being low down and cobby, good length, broad back, and well spread tail, with head points that are perfect, and color of the first type. He is pronounced by several competent judges to be the finest Black Orpington cock exhibited this year. The Blue Ribbon Farm will have him mated to six ideal mating hens, and best results are assured from this mating.

Mr. Carl Byers, Hazelrigg, Ind., showed the first prize pen of Black Orpingtons, and first prize pen of Buff

Hover with top \$7.00

THE MODEL HOVER WORTH MORE: COSTS LESS

You want to get a brooder as cheap as possible and you can do it if you use judgment. First make sure that there's lots of heat in the brooder; then make sure that it is built good enough to hold the heat; then figure out how many chicks it will hold--how much floor space you are getting and you can then decide whether or not you are getting the best bargain.

There are no brooders that equal the Models on all these points, many thousands have been sold. Many experiment Stations use them in preference to all others.

Drop us a card for free particulars about our big line of brooders--the best and most complete line made.

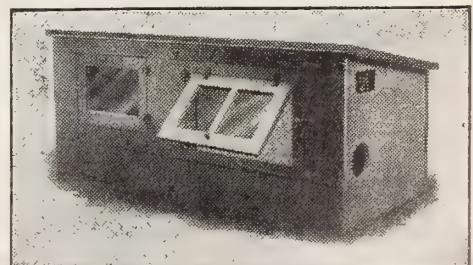

ORDER TODAY; SAVE YOUR CHICKS.

At the great Missouri State Show held in St. Louis, December, 1909, in the largest class of White Orpingtons ever shown in America, I won 1st and 2d pen, 1st and 4th hen, 1st, 3d and 4th pullet, 5th cockerel, \$10 special for best display and silver cup for best male and female.

J. W. JONES - - BROOKFIELD, MO.

RUSSELL FARM WH. WYANDOTTES

WINNERS AT GUELPH, TORONTO, BOSTON AND OTTAWA

This season at above shows they won seven first prizes out of a possible 16 competed for in the best and largest classes ever seen with over 700 birds competing as follows, at

GUELPH—Canada's Great Winter Fair: 1st and 3d cock; 2d, 3d and 4th hen and best collection. **TORONTO**—1st, 4th and 5th cock; 1st, 2d and 5th hen; 4th, 5th and 6th cockerel; 1st and 2nd pullet and specials. **BOSTON, MASS.**—5th cock and 4th cockerel. **OTTAWA**—Eastern Ontario: 2d, 3d and 5th cock; 1st, 2d and 5th hen; 1st, 2d, 3d and 5th cockerel; 1st, 3d 4th and 5th pullet.

Our pens are mated and contain all above winners, those of last year and our choicest reserved breeders of two years, including the first prize cock at Boston, 1910, and the second prize cockerel at New York, 1910.

FOR SALE: Young and old stock of excellent quality. We guarantee to please or refund purchase price. Booking egg orders now. Write me your wants.

JOSEPH RUSSELL, PROPRIETOR, 1308 QUEEN STREET EAST, TORONTO, ONTARIO

HALBACH'S WHITE PLYMOUTH ROCKS

Established a BIG RECORD by winning:

Best Display at Chicago, January, 1907

Best Display at Chicago, December, 1908

Best Display at Chicago, December, 1909

You would be surprised to know that in addition to winning year after year, birds purchased from me or hatched from eggs I sold, have won at the largest shows in the country. I could mention show after show where my birds have won the best prizes, but I honestly believe this honor belongs to the purchaser. So, when you buy birds from me, you need not be afraid that your winning will be published by me. Write for mating list with a cut of "Leader," my first Chicago cockerel and other famous birds. A choice lot of breeding cockerels left at from \$3.00 to \$10.00.

H. W. Halbach Box A Waterford, Wis.

Orpingtons, which latter was the sensational pen of the Orpington alleys. He won three special silver cup on three pens. Mr. Byers reports being especially strong in Buffs at this time. He had on exhibition a large star made of ribbons won on his Orpingtons at many of our premium shows. This was a handsome piece of work, and attracted considerable attention.

Thaddeus E. Allee, Chicago, Ill., exhibited six White Langshans, winning two firsts and two seconds, one third and one fourth. His birds showed good Langshan type with good feathering, and were white throughout.

J. H. Trobaugh, Delphi, Ind., exhibited White Plymouth Rocks, winning third pullet, fourth and fifth hen, fourth cock and fourth cockerel.

C. C. Herron, Hope, Ind., breeder of Pekin ducks, won eight ribbons on eight entries as follows: First and second old duck, first and second young duck, second and third old drake, and third and fourth young drake. Mr. Heron makes a specialty of Pekin ducks and has a large flock of them and is prepared to furnish eggs and stock in any numbers.

One important class at the Indianapolis show was Single Comb Buff Leghorns, in which Peter S. Hurt, of Thorntown, Ind., won second cock, first and fifth hen, fourth pullet, and first and second pens, special for best shaped male, special for best colored female, special 26-piece silver set for best display. Mr. Hurt reports that he exhibited five different strings of Buff Leghorns at five different shows, including Chicago, St. Louis, Boston, Cleveland and Indianapolis, and that his birds were always well up among the winners. He also exhibited some Indian Ducks at Indianapolis, which birds were typical specimens and were among the winners. In the Buff Leghorn class some of the winning specimens were birds which had come from Mr. Hurt's yards.

Among the poultry supplies was the Norwich Automatic feeder. J. G. Herman & Co. had on exhibition a nice display of their poultry food and made many sales during the show.

Welldon's Fireless Poultry Fountain and Feeder had an exhibition at Indianapolis, which was in charge of John C. Plane, and much interest was taken in their fountain and feeding device, which certainly solves the problem of keeping warm water before the poultry during the cold weather, for water in this fountain will remain warm for many hours.

Louis A. Stahmer.

Not as many S. C. Blacks as previous year, but of excellent quality. The winners of the Middle West brought together for the final contest. First cock, good, long back, good color, but only fair comb; every feather perfect and in first class condition. Second cock, ten and one-half-pound bird, good, even comb, elegant color; tail broken from too much showing. The sire of 1st cock and 2d and 4th cockerel. First hen one in a thousand. The largest we have ever seen. Good comb, ear lobes elegant color and rare type bird. First at St. Louis and, we believe, a Madison Square Garden winner. Second hen a good, large bird; good style and color, only a fair comb. Fourth hen looked to us better than third. Had a longer back and better style and color. First cockerel, fine style, elegant color, good comb and low tail. Worthy of first place. Second a good, high-stationed

bird, good color, low tail, fine wattles and ear lobes. Middle spikes in comb a little broad. Third cockerel good type bird, good color and comb. Fourth cockerel late hatched bird and undersized.

Pullets. Six of the class almost evenly matched. Took Judge Tucker thirty minutes to place the 1st. She was good in all points and possibly a 96-point bird; was also Chicago first-prize winner. Second pullet good type, large size, good color, very fine bird. Third pullet elegant color, fine style, tail a trifle high. Fifth pullet a very fine bird and two unplaced ones worthy in a class of less quality.

Cock in first pen fine in shape and color, good head points, tail too high. Hens a good even lot, with good style and color.

Second pen had two grand hens, one out of condition and one pullet only fair. Cockerel undeveloped, good head points, tail a little high and broken.

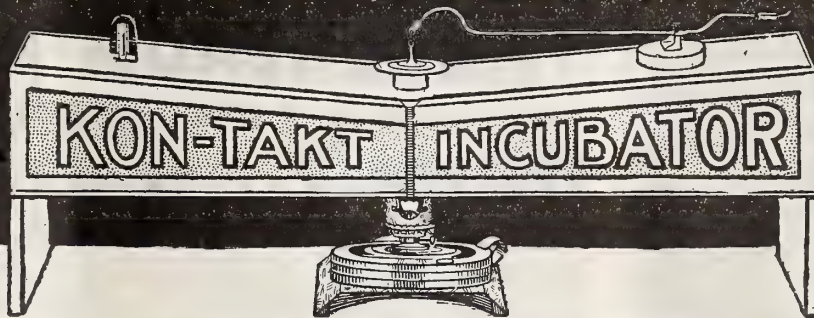

Rose Comb Minorcas. First and 2d cocks very fine specimens, good style, color and size. The same may be said of 1st and 2d hen. First cockerel a fine, large bird, having good type, color, head points; about as good a specimen as we have seen for some time. Second cockerel not so good in comb, only fair size, but good color. Fourth a very promising youngster, but undeveloped. Four extra good pullets, third having a shade on the others, but all but one feather missing in her tail. First pen is where the real quality lay, an elegant cock, with fine comb and ear lobes; good, long back, low tail and fine color. Hens the largest specimens we have ever seen, true Minorca type, fine color and beautiful combs and ear lobes. Second pen very fine; also cock not as good as first but fine specimen, good type and all good color birds. Third pen capable of winning against most any pens but these two. No White Minorcas shown.

UTICA (N. Y.) POULTRY SHOW.

The fourth annual exhibition of the Utica Poultry & Pet Stock Association, held January 17-21, 1910, was an unqualified success as to the number and quality of the birds on exhibition and from a financial standpoint. Supt. I. N. Gaymonds and his assistants had things well in hand. The exhibits were well cared for and the hall kept neat and clean. Empire coops were used, which showed the birds to the best of advantage. The promptness with which the officers got out the marked catalogue could well be followed by some of our larger exhibitions. Secretary Austin G. Warner was on hand most of the time looking after the work connected with his office and giving a general welcome to all. In all, there were about 1,400 fowls, pigeons and cats on exhibition, and if the Utica show keeps on growing the association will have to get a larger hall for its next ex-

BOTH GIVEN AWAY

1. A "KON-TAKT" INCUBATOR
2. A FULL \$1.00 PACKAGE OF WILBUR'S POULTRY TONIC

The Wonderful "KON-TAKT" Incubator

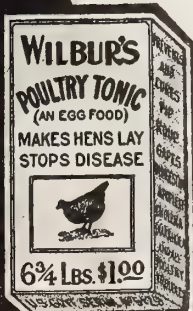

ALL METAL AND THEREFORE FIRE-PROOF

Sets like the hen, with the body in contact with the eggs. Heat distributed and regulated perfectly and uniformly at all times in all parts of the egg trays. There is no "moisture problem" because there is no circulation of hot air to absorb moisture from eggs. Natural moisture remains in eggs as it does under hen. Hatches every egg that the best setting hen could hatch.

The "Kon-Takt" follows Nature's method, and gets Nature's results—a strong chick from every strong, fertile egg. Most convenient incubator made. Can be placed on a shelf, table or in any convenient place in any room, and is easily moved from place to place. Half gallon of oil completes a hatch.

Our Great Introductory Offer

In order to introduce Wilbur's Poultry Tonic, we will give away a complete "Kon-Takt" Incubator, together with a full size \$1.00 package of Wilbur's Poultry Tonic, to every person who accepts our offer and mails attached coupon at once. Send the coupon now and get complete description of the "Kon-Takt" Incubator, and full particulars how to get it without costing you a cent.

What Wilbur's Poultry Tonic Is

A perfectly healthy hen will lay. She is an egg machine. When her system is kept toned up to its normal activity the food she eats is turned into egg production.

Wilbur's Poultry Tonic keeps hens in healthy, normal, active, egg-producing condition. It has been used for twenty-five years by tens of thousands of poultry-keepers, and is now the most popular of all poultry tonics, because it never fails to give money-making results.

It keeps young chicks growing, making early broilers. It keeps cocks vigorous, insuring fertile eggs. In short, it keeps the whole flock in pink of health and condition with the natural result—highest production.

hibition. The Barred Rock classes contained some exceptionally fine specimens, notably the 1st cockerel owned by Fred Zumbrum, and the pullet bred pen of A. C. DeForest. White Wyandottes made up the largest class of the show and birds of quality were the rule. Ira N. Gaymond's exhibit from Marcy, N. Y., attracted much attention and received many compliments. We understand Mr. Gaymond made some good sales of stock during the show. Columbian Wyandotte classes were full of quality. Those shown by Austin G. Warner, New York Mills, N. Y., were of the correct type, with splendid striped hackles and well laced tail coverts. There was a rare clearness of color noted all through this exhibit. Mr. Warner also breeds White Wyandottes, but informed us that he was unable to find the time to show them this year. Rhode Island Reds, both Rose and Single comb, were large classes, the winners being of good type and color. Leghorns brought out several first class birds and nearly all varieties were shown. There was a small exhibit of Orpingtons, the Whites leading the other varieties in numbers. We had the pleasure of handling some of

Newton Adams' dark Brahmas while at Utica. We have heard for years that Mr. Adams owned one of the finest flocks of this grand old breed in the country, and after handling them we can only say we believe he does.

The display of feline beauty was the center of attraction for the ladies and children, many of the most celebrated cats of the country being on exhibition. Entries were made from Michigan and many of the Eastern states.

Harry M. Lamont.

THE BUTLER (PA.) SHOW.

The Butler County Poultry Show, at Butler county, Pennsylvania, was a complete success. It is said that the classes were the largest, and quality the best in the history of the Butler county shows.

The Butler County Poultry and Pet Stock Association held their sixth annual exhibition February 1 to 5, 1910, in the Atwell building, West Wayne street. There were 760 entries, including turkeys and water fowl. The coops were single-decked, and arranged on two large floors of the building, in excellent shape.

The association, as well as Judge A. F. Kummer, and H. B. Arble, he being construction engineer of the Butler county association, is to be congratulated on the neat appearance of the showroom.

The attendance was very good, considering the weather, and every one who attended was well satisfied.

Judge Kummer got down to business on Wednesday of the week and the awards were all placed, and every one pleased and smiling by nightfall Thursday.

On entering the showroom, right at the head of the hall, was a large decorated enclosure filled with thirty beautiful white fan-tailed pigeons, which gave the entrance to the show a very beautiful appearance. Passing on into the aisles to where the Rose Comb White Leghorns, Blue Andalusians, Mottled Anconas and White Wyandottes were stationed, every one expressed delight at seeing such a beautiful lot of healthy birds. Along the middle aisle was a display not to be forgotten. Dr. Ford H. Hayes had twenty-two very fine Rose Comb Black Minorcas which were conceded by all to be the best of their class ever exhibited at Butler. On pass-

First prize and color special at Cleveland, 1910

TANNENBAUM FARMS

—"VICTOR" STRAIN—

Barred Plymouth Rocks

Continue to keep in the front rank at the big shows and there is no reason why they shouldn't as they have been produced from lines that have been winning for the past several years. At Cleveland this year we won first and fifth and color special on hens and second and fifth pens. Our matings this year are second to none, as our "Victor" strain are so named because they combine high class exhibition quality with utility being exceptional good layers.

Our Columbian Wyandottes

Are also getting their usual share of high honors. At Cleveland we won second and fourth hens and second and fourth pens, showing none of our previous winners. At Madison Square Garden we won first on pullet and have added second cockerel and second pen at this same show to our breeding pens. First and second pullet and second cockerel at the Ohio State Fair are also among our list of winners. We have mated a few unusually choice breeding pens. Send for catalogue containing mating list, description and photos of plant, stock for sale, etc.

Tannenbaum Farms, Willoughby, O.

1st prize Col. Wyandotte pul., Madison Sq. Garden, '10

ing into Brown Leghorn row we found P. C. Cronenwett doing honors with his display, carrying off a silver cup, as well as a score of blue ribbons. Golden and Silver Laced Wyandottes were well represented by W. J. Fox, of Cabbot, Pa. He showed his \$500 cockerel, also a string of the finest gold and silver laced Wyandottes ever seen in this part of the country, carrying off a large silver cup, also winning grand special for largest display in the showroom.

excellent showing in the largest class of Single White Orpingtons ever exhibited at Butler.

GRINNELL, IOWA.

At a recent meeting held in the office of H. O. Shaw, Grinnell, Ia., a poultry association was organized and officers elected. The association will be known as the Grinnell Poultry Association, and its members are limited

KING PERFECTION.

Cockerel heading first prize White Wyandotte pen at Boston, 1910. Bred and owned by J. W. Andrews, Dighton, Mass. This pen was called by experts by far the best pen ever shown at Boston, where the best from the United States and Canada competed. This is Mr. Andrews' fourth win of first pen at Boston. He also won first, second and sixth cockerels.

R. A. Poole, Butler, Pa., also had a fine display of Gold Laced Wyandottes, but did not compete, he being president of the association. White Plymouth Rocks were nobly represented by J. C. Lydon, Burton Bros., also S. H. Lyon, of Butler, Pa. The birds bred by these gentlemen were beauties, and it was a toss-up for honors. Orpingtons of all varieties were out in full bloom, but the exhibit that attracted attention was the Single Comb White Orpingtons, bred and owned by L. A. Glessmen, of Mars, Pa. They were exact duplicates of Kellerstrass' famous birds, and made an

in Powesheik county, together with parts of Jasper and Marshall counties as are natural business tributaries to Grinnell. The initiation fee will be \$2, and annual dues, \$1. The following officers were elected:

President, L. L. Woods; vice-president, A. C. Norris; secretary, D. A. Hopkins; treasurer, H. O. Shaw. Board of directors: R. A. Terrell, F. C. Stickle, W. K. June, J. P. Dale, Dr. G. B. McGuin, Hilary Goode, John Hastings.

BOX M : : WHITING, IND.

This department is open to all readers and advertisers in the eastern territory and all are invited to send in all poultry news items that come to their attention. Address H. P. Schwab, eastern representative, Irondequoit, N. Y.

It's just as natural for the A. P. J. to lead as it is for others to follow.

In mating bear **QUALITY** foremost in mind, bend every effort to secure this. It is not a question with the fancier of how many, but how good.

The receptions handed the exhibitors and visitors at the Buffalo show was as welcome as it was gratifying to all. Buffalo **NEXT**, will ring down the line from now on—to the next.

How about your vote for the next A. P. A. meeting? Buffalo is asking for this, and they deserve all they ask for. Buffalo has made good.

At the annual meeting of the American Plymouth Rock Club, held at Buffalo, Mr. C. H. Welles, Stratford, Conn., was re-elected president, and Mr. A. C. Smith, Waltham, Mass., secretary and treasurer. This is also Mr. Smith's second term. Both have proven valuable officers and we are pleased to chronicle their re-election.

Mr. Theo Hewes should feel highly honored at his Buffalo reception, the news of his grand work at the Chicago show had preceded him here, and his welcome was all that could be desired. He has done for Chicago what no other could, and has placed it in line with our best and greatest shows.

What lessons has the 1909-10 show season taught? Have you noted the prosperous breeders, the general improved quality of birds, the particularly improvement in shape and condition, the increased entries, and the increased number of shows, the ever great increasing demand for better stock, the spirit of the breeders, and the spirit of

the times, and, above all, the general interest shown by the public?

There are reasons for all this, it is the sign of the times. Prices have warranted all this, and the demand has outdone even the prices. These conditions will continue, they will better, and it is up to every poultryman to give his best efforts in producing more and better stock, and to reap in return the harvest that awaits them.

If you are looking for some nice and handsome variety to breed, try the White Laced Red Cornish. Their style and form, as well as color and markings, are very attractive. They have an abundance of breast meat, and it of O. K. quality too. Ask J. Thomas Harp, of Buffalo.

Two Sides.

A little boy was given too much underdone pie for his supper and was soon roaring lustily.

His mother's visitor was visibly disturbed.

"If he was my child," she said, "he'd get a good sound spanking."

"He deserves it," the mother admitted, "but I don't believe in spanking him on a full stomach."

"Neither do I," said the visitor, "but I'd turn him over."

Just sixty-five breeders from Canada were exhibitors at the great Buffalo show, and most of them attended. Their part in the show, as well as in the festivities, was conspicuous, and we were assured they had the time of their lives. Colonel Dick Oak arrived on Friday from the Cleveland show and just in time for the closing seances.

"The American breeders should remem-

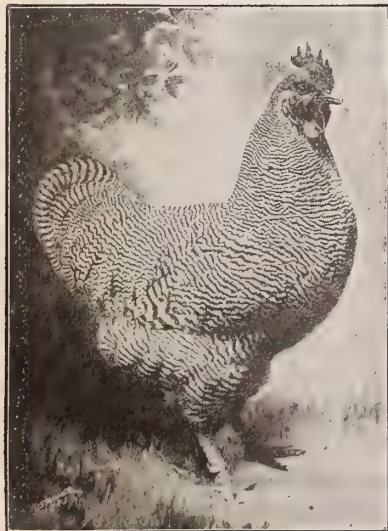

ber the winter fair at Guelph. This is Canada's greatest show, and worthy of best consideration. They will not only find a grand display of the best to be had in poultry, but they will also find a welcome banquet and a general good time.

We would like to have a list of the political officeholders that are poultrymen. This would be interesting reading. There is our old friend Sam D. Lapham, Dearborn, Mich., who has bred "Birds of Quality" in Buff Rocks for many years. His winnings would fill books, and among the boys he is only known as Sam, but in his home town it is The Honorable, for there he is mayor of the city and has now served several terms with general satisfaction.

Down in Connecticut Charlie H. Welles is the whole show in his home town of Stratford. When he is not figuring on how to produce more "Fluffy-Ruffles" he is busy with the business of the town, of which he is presiding elder (or something of that kind), and they say he has been just as successful in that roll as he has been as one of the very best breeders.

Mr. D. M. Coverts, of the Coverts Barred Rock Farm, Willoughby, Ohio, was elected a member of the American Plymouth Rock Club executive committee at the Buffalo meeting. Here is some new blood and of the right kind for the club. Mr. Coverts has done well as a breeder and he will make good in any office intrusted to him.

In the last issue of the A. P. J. were shown some of our artist's (L. Stahmer) best work to date. The Chicago winning pen of S. C. Buff Leghorns, bred by F. A. Teckonius, Racine, Wis., is an artistic and beautiful piece of work. The Leghorn type shown here is ideal, while the finish and detail work is perfection. Mr. Stahmer also further illustrates his abilities with other work, and in particular on page 233 with four cuts of White Leghorns. Note the pen cockerel and the first Chicago pullet. In this pen cockerel Mr. N. P. Easling, Pekin, Ill., has a wonder in form and style. We congratulate the owner of such birds and also the artist for his

Spaugh's Result II. 1st cockerel Springfield and Indiana State Fairs, 1909.

WIN EVERY FIRST

SPAUGH'S BARRED ROCKS again show their superiority by winning at the late Columbus, Indiana, show first and second cocks; first, second and third hens; first and third cockerels; first, second and third pullets; first and second pen and silver cup for best Barred Plymouth Rock. This winning, together with their other grand record this season, demonstrates that

success in nosing birds and bringing out all that is best in them.

An Indignant Outcry.

"What's the matter with the hens, Mandy?"

"Why, they've been making that same fuss ever since Jirab dropped the circular in the barnyard tellin' how eggs wuz 40 cents an' goin' up. Jirab ought to had more sense. I s'pose now they'll demand better feed or quit layin'!"

* * *

The first prize New York pen of Barred Plymouth Rocks shown on page 195 is another splendid piece of work and perfectly natural. Here can be seen the quality required to win at the Madison Square garden show. We have seen and handled these birds and a more life-like illustration could not be made. While we value and admire this work we also feel indebted to Owen

publish them so that our readers may also know what A. P. J. advertisers are doing in the show room.

At the "Ontario," held at Guelph, on R. C. B. Minorcas Dr. MacRae won second cock, first hen, first and second cockerel and first pullet; all club specials and all cash specials. On Black Cochins Bantams first and fourth cocks, first and third hens, with special for best Cochins Bantam male and female, of any variety.

At the International, Buffalo, N. Y., he won on R. C. Black Minorcas in a class of sixty-three birds first hen, first cockerel, third pullet and first pen; with club specials for best hen, cockerel and pen. This from a class containing several New York winners. On Black Cochins Bantams he won first cock, first hen, second cockerel, third pullet and first pen; with specials for best Cochins Bantam male and female, any color; also for best pen ornamental bantams,

A view on the Buff Orpington plant of A. E. Martz, Arcadia, Ind.

Farms for the skill displayed in breeding and mating such birds. They were grand winners, unquestioned.

* * *

We have just learned (February 12) with great regret of the death of Mr. M. S. Gardner, Palmyra, N. Y., a brother judge and breeder, and associate editor of the R. P. J. According to report Mr. Gardner was stricken on Tuesday, February 8, with appendicitis and operated on the same day. Mr. Gardner has not looked his old self for over a year. Working with him at the Canandaigua show last week he informed us that he was gaining and now feeling as good as ever before. How little we dreamed at that time that within the week he would leave us. We cannot find the words to express what his family and friends have lost. But poultrydom has lost a grand fancier and a successful breeder. H. P. Schwab.

DR. J. N. MACRAE, GALT, ONT.

Breeder of Rose Comb Black Minorcas and Black Cochins Bantams.

In writing us lately Dr. MacRae adds: "I presume a complete list of my season's winnings will interest you, so give them below." They do interest us to such an extent that we want to

and silver medal for best ornamental bantam, any breed, in the show.

Of first R. C. Black Minorca cockerel Judge J. H. Minshell says: "A wonderful bird, great size, with fine shape of body, good full breast, broad shoulders and fine carriage of tail. His color is almost perfect, comb is good and good lobes."

Of first Black Cochins Bantam cock Judge McNeil said: "A nice little fellow, splendid head, good comb, ear lobes and wattles, nice short back, with good cushion and short tail, grand leg and toe feathering, about as green as a bottle all over. He is the best Black Cochins Bantam I ever saw, and I recommend him for the best male in the show."

We hope in this issue to show cut of Dr. MacRae's first Buffalo R. C. Black Minorca cockerel made by our Mr. Stahlmer. We had the pleasure of inspecting this line of birds at the Guelph show, and there made the remark that they were the best in color we had seen. This, with their grand size, make them a most desirable line. For further information we would refer you direct to Dr. MacRae, Galt, Ont.

Dick Blue: Have you seen the last copy of the A. P. A. proceedings?

John Back-in-the-Brush: Well, I should hope so!

You do not want ordinary Buff Cochins—you DO want Hanchett's Buff Cochins. Write for handsome free booklet and state wants.

H. N. HANCHETT, Jackson, Mich.

Questions will be answered in this department only when full name and address is signed by the writer.

Question—(1) Have had one or two of my Buff Orpingtons that have something wrong with them for which I can find no relief. Their necks appear as if swollen just above the crop, but when examined found that instead the neck just seems to be drawn in that shape, and stiff. Seems to give the fowl pain if you attempt to straighten the neck. They have difficulty in lowering their heads to the ground, also in picking up food, but can swallow food all right if placed in their mouths. They will remain this way for some time and finally die. Does not appear to affect other fowls. What is the cause and remedy, if any? (2) In a locality where eggs sell at from 20 to 30 cents per dozen from November till January inclusive, from 22 to 18 cents in February and 16 cents from March throughout summer, and young chicks sell from 20 cents in early spring down to 10 cents in fall, old fowls at 10 cents, which would be the more profitable breed to keep, Leghorns or Orpingtons? (3) What would be a fair average of eggs if given proper care for each of the following breeds: Leghorns, Orpingtons, Wyandottes, Reds, Minorcas? (4) Which of the Orpingtons are easiest to breed for fancy, white, black or buff, and why? A. W.

Ridgeville, Ind.

Answer—(1) Will some of our readers please answer. We are unable to do so. (2) This all depends on the man who is keeping them. One man will make more out of Leghorns under these conditions, while another will make more out of Orpingtons under same conditions. (3) A 50 per cent average is

considered fair for these varieties. (4) The breeders of these varieties claim that one is just as difficult as the other to breed to Standard requirements.

Question—(1) Will you please inform me through your paper how to build trap nests and dropping boards; also brood coops? (2) Also inform me of the Standard weight of B. P. Rocks; also the average egg yield? A. R. C.

Lilly, Pa.

Answer—(1) Space will not permit us here to give this information. There are a number of books on these subjects which are sold at a nominal price. (2) Cock, 9½ lbs.; hen, 7½ lbs.; cockerel, 8 lbs.; pullet, 6½ lbs. There is no exact data to go by on average egg yield, but an average of 150 eggs per year is considered fair.

Question—(1) In St. Louis and Chicago markets, which brings the highest price, white or brown eggs? (2) How high must a fence be to keep Leghorns in? (3) Are there any large exclusive egg plants where they keep only one breed other than Leghorns? J. D.

Murphysboro, Ill.

Answer—(1) There is very little difference, if any. (2) Eight to ten feet unless one of their wings is clipped. (3) Not that we know of.

Question—(1) How is blood meal made? (2) In using meat scraps, are they fed raw? And is liver used? (3) What are the symptoms of tuberculosis in young chicks? (4) What is the best all around chicken for amateur? (5) In starting to raise pure bred poultry is

it advisable to get eggs from different breeders? (6) Where does the most profit lay, in raising show birds or market poultry? E. M. D.

Bear Creek, Mont.

Answer—(1) This is made from dried blood, but we are not familiar with the process of manufacture. (3) They have a stunted appearance and do not develop in all sections in proportion. Sometimes the body will develop and the other parts will not; it may be only the head will develop very rapidly and they will have the head of a mature bird and the body of a chick. There are various other symptoms that space here will not permit us to mention. (4) Any variety that the amateur takes a liking to. All Standard varieties are good. (5) No. (6) In combining the two.

Question—(1) I am a young man that wants to raise exhibition Barred P. Rocks and Rose Comb R. I. Reds, but don't know a thing about it. I would like to have a book that told all about it. Where can I get it and at what price? (2) What is inbreeding? Outcrossing? (3) Is line breeding dangerous? (4) What is smut on a R. I. Red? (5) Is it safe to breed cockerels and pullets together? Cocks and hens? (6) How should R. I. Reds and B. P. Rocks be fed when in the breeding pen? (7) How is a good way to ventilate the roosting room? (8) I would like to learn how to score B. P. Rocks and R. C. R. I. Reds. Where can I find out how? (9) Which are best to raise exhibition chickens in, lamp brooders like "Cypress", or fireless ones like those of the Philo system? (10) Will eggs from hens that are penned up hatch as well as from those that have free range? (11) Will they lay as many eggs when penned up? H. O.

Charlestown, Ind.

Answer—(1) Get a copy of the American Standard of Perfection. Price, \$1.50. For sale by us. (2) The

A CLEAN SWEEP

After winning the beautiful Silver Cup presented by the President of the National Single Comb White Leghorn Club at Madison Square Garden, New York, December, 28th, 1909, to January 1st, 1910, for the best Cock, Hen, Cockerel, Pullet and Pen, we sent our stock to the Boston Poultry Association Show at Boston, Mass., January 11th to January 15th, 1910, and made the greatest win in Single Comb White Leghorns that has ever been made in Boston, entering two pens, one of old and the other of young birds and three cocks, three hens, three pullets and three cockerels.

We made a clean sweep of six firsts and a place with every entry, and won every special offered, including a silver cup, several money prizes, and many badges and ribbons. The first prize cockerel was awarded the American Poultry Association silver medal for being the finest cockerel of all the Mediterranean Class. He also won seven other specials. The first prize pullet alone won seven specials. In Barred Plymouth Rocks we won third and sixth cocks, fourth and sixth cockerels, fifth hen, fifth pen, and the special for the best shaped female in the Barred Plymouth Rock Class.

Canada's Best R. C. and S. C. Black Minorcas

We won at Boston, January, 1910: S. C. cock, 1, 2; hen, 1, 2, 3, 4; cockerel 1, 2, 3; pullet, 1, 2, 3, 4; R. C. cock, 2, 3, 4; hen, 1, 3; cockerel, 1, 2, 4; pullet, 2, 3, 4, 5. Buffalo, January, 1910: S. C. cock, 1, 2; hen, 3, 4; cockerel, 1, 2; pullet, 1, 2. We sold the eggs that produced the R. C. Cock that won First at Guelph, Boston and Buffalo this season. We bred and raised the First S. C. Cockerel and Second S. C. Cock at Madison Square, New York, December, 1909, also first prize winners at Chicago and other large shows. To clean out we will sell 35 S. C. and R. C. Pullets at \$2.00 each. All eggs are \$5.00 per fifteen. Ten eggs guaranteed fertile in every setting. No mating list.

T. A. FAULDS : : : LONDON, ONTARIO, CANADA

Andrews' Wh. Wyandottes

At Boston, 1910, won First, Second and Sixth Cockerels, First Pen, Fifth Hen. This was the hottest class of cockerels that without doubt was ever shown in America. My first pen was called by expert judges the grandest ever shown. Won first pen at Boston for four successive years and have had first cockerels 1907, 1908 and 1910. Have won at Boston for 13 consecutive years. The above record was never equaled by any breeder, and I breed my winners. At Chicago, 1909, on four entries, won four prizes and color special. They have also won for my customers at largest shows in United States and Canada. Buy your eggs from a strain that has a winning line of blood back of them and can win now. Send stamp for 1910 mating list. Book your orders early.

J. W. Andrews, Box J, Dighton, Mass.

: : "RINGLET" : : Barred Ply. Rocks

have won more prizes at the leading shows of America than all others, which stamps their superior quality. I now have the finest and largest lot of exhibition and breeding birds I ever owned. They show the ringy barring and sharp contrasting colors that win under all judges. Write me just what you want and I will make you a low price considering the stock you get. Eggs from the world's finest exhibition mating, one setting, \$4.00; two settings, \$7.00; three settings, \$9.50; four settings, \$12.00.

Also White Rock Club Ribbon for best Cock. Exhibition and breeding stock always for sale. Eggs from these matings, \$3.00 and \$5.00 per 15.

CADILAC POULTRY FARM, W. J. H. GOETZ, 1150 CADILAC AVE., DETROIT, MICH.

Answer—(1) Not any warmer than other varieties. It is a mistake to have hen houses too warm. (2) Yes. (3) There is no Standard weight for Leghorns. (4) See our book, Origin and History of all Breeds of Poultry. (5) If the comb is out of all proportion it will be cut accordingly. (6) Yellow. (7) Horn color. (8) No fowls require a great amount of meat, about two ounces three times a week. The amount of feed to give a given number of fowls can only be determined by observation and experience. (9) Best quality whole wheat, together with green food, beef scraps, etc. (10) Yes. When fowls become overfat they are diseased, and a sick fowl will not lay.

Question—Lately my hens have been picking the feathers out of each other and eating them, continuing this until they were quite bare. It does not seem to injure them, but spoils their appearance. Will you kindly give me the reason for this and also some remedy?

North Spencer, N. Y. J. J. G.

Answer—Feather eating is one of the worst vices that fowls can have and is caused by the fowls being kept in close confinement and not given enough exercise. Powdered aloes sprinkled on the feathers will usually break them of this habit.

Question—I find eggs sometimes when boiled will smell and taste very bad. Can you tell me the reason. I am feeding corn, oats, bran, bone meal, turnips and oyster shell. I have had some trouble in summer time.

Pontiac, Ill. H. S.

Answer—Fowls must have access to something which they eat to cause this.

Question—We have a hen and two pullets that seem to be weak in the legs and fall when they try to walk, and also have a white discharge.

St. Paul, Minn. A. F.

Answer—This may be due to your system of feeding, or it may be a touch of rheumatism. Give a tablespoonful of common baking soda to each quart of drinking water.

Question—(1) How much is a Buff Plymouth Rock pullet worth that scores 94 points under Judge W. C. Ellison? (2) Another scoring 92¼ after being cut two points for weight?

Templeton, Wis. C. J. T.

Answer—(1) We cannot say. She might be worth a hundred-dollars and maybe only five. (2) The same answer applies to this.

Question—(1) In about what quantities should the following grains be mixed to obtain a 12 per cent amount of digestible protein: Oats, buckwheat and peas. (2) What would be the approximate amount of fat per cent in such a ration? (3) Does a light brown, frothy condition of the droppings indicate a presence of too much protein in the food?

North East, Pa. R. B. F.

Answer—(1) Oats 75 per cent, buckwheat 15 per cent, peas 10 per cent. (2) Twenty per cent. (3) No.

Question—(1) I wish to feed wheat, oats and corn in litter, with grit, oyster shell and charcoal in hopper; also beef scrap and some hopper feed in hopper. Will you kindly suggest composition of a good hopper feed to use under above

circumstances? (2) Hatch small chicks under hens. Wish to give beef scrap, oyster shell, grit and charcoal; also hopper feed in hoppers. Please suggest composition of hopper feed? At what age should I begin giving beef scrap? Should grit, oyster shell, etc., be before them from the time they are hatched. Will use commercial chick feed at first. At what age should I begin with hopper feed? A. B. K.

Wears, Mich.

Answer—(1) If you are going to hopper feed, don't feed in the litter. You cannot use both systems of feeding at the same time successfully. Wheat, oats and cracked corn can be fed in hoppers successfully. (2) Get book, "From Shell to Show Room," or "Chick Book," for information on feeding chicks. Space in this department will not permit us to give details on this question.

Question—(1) Would this be a good scratch food? Cracked corn, 25 lbs.; wheat, 25 lbs.; oats, 25 lbs.; cracked stock peas, 15 lbs.; millet seed, 5 lbs.; sunflower seed, 5 lbs.; total, 100 lbs. (2) Would this be a good dry mash? Corn meal, 50 lbs.; linseed meal, 20 lbs.; alfalfa meal, 20 lbs.; beef scraps, 10 lbs.; total, 100 lbs. (3) Are there Rose Comber Plymouth Rock fowls? Clayton, Mo.

J. N. F.

Answer—(1) Yes. (2) No. The following would be better: Corn meal 10 lbs., chop feed 40 lbs., alfalfa meal 20 lbs., linseed meal 10 lbs., wheat bran 10 lbs., beef scraps 10 lbs. (3) There is a variety known as Peacomb Barred Plymouth Rocks, but they are not bred to any extent nowadays.

Question—How would you advise one to construct dropping boards under the roosts in my chicken houses?

Urbana, Ill.

Mrs. J. W. B.

Answer—Dropping boards should be made wide enough so that they extend far enough on both sides of the perches to catch all the droppings, and should be about six inches below the perches and so constructed that they can be easily taken out and cleaned or scalded when necessary.

Question—(1) Should egg shells be fed to chickens? (2) What is the richest egg, the one with a dark yellow or a light yellow yolk? (3) Where is the best R. C. B. Leghorn poultry establishment located? D. B.

Grafton, W. Va.

Answer—(1) They may be, with good results. (2) The dark yellow yolk is considered the richest in flavor. (3) Consult our advertising columns.

Question—Will you kindly state what proportion of chicks hatched are males? Denver, Colo.

E. G.

Answer—This varies so that it is impossible to give any set rule on the proportion.

Question—Please tell me why my hens do not lay. I have twenty hens and two roosters in a pen 75x50 feet, with a house 8x10 feet; feed them a mash early in the morning composed of potato peels, bread crumbs, greens, turnips (cooked), poultry regulator mixed with milk. At about 5 in the afternoon I feed them half corn and half wheat. Yet I do not get eggs. They have

BLACK and WHITE ROSE COMB MINORCAS

Bred for eggs as well as show in open front houses and trap-nested. Rose Comb Black cockerels, Rose Comb Black and White eggs from prize birds.

High Ridge Farm, Repp & Aires, Laurel, Md.

Chickens Won't Eat Vitazone

It would not hurt them if they did—it is harmless.

Vitazone is sure death to bugs, fleas, lice, mites or such poultry yard pests. Use Vitazone nest eggs and roosts and have clean healthy poultry. No microbes or disease—no foul odors or bad air where Vitazone is used. Prevents and cures roup and colds—keeps chickens in fine feather.

Used by poultry farmers everywhere—endorsed by all—economical—lasting—convenient.

Comes in several forms.

Ask your dealer for Vitazone or send 25c (stamps or coin) for two large cakes and free booklet on poultry house sanitation. Farmer Agents Wanted.

FENTON'S COL. WYANDOTTES

AT CHICAGO

Made a winning (in the largest class of Columbian Wyandottes ever shown there) that has never been equalled by any other breeder.

We have undisputable claim to the best flock of Columbian Wyandottes in the West. Not only did we win in the West, but in the East, North and South our birds, in the hands of customers, won the leading prizes. MEN WHO KNOW, who have visited the foremost shows throughout the United States and Canada, tell us that.

QUALITY AND QUANTITY considered, we own the largest and finest flock of Columbian Wyandottes in the world. It is backed with such a show record as this, backed by their records at Fenton Farms as The Best General Purpose Fowl, that we offer you

Eggs from six grand pens : Each pen headed by a Chicago winner

Pen 1—First Chicago Pen—Eggs, \$10.00 per setting. Pen 2—Headed by 1st Chicago Cockerel and seven hens, including 1st Chicago hen—Eggs, \$10.00 per setting. Pen 3—Headed by 3d Chicago Cock and eight pullets, including 1st pullet—Eggs, \$5.00 per setting. Pen 4—Headed by 3d Chicago Cockerel and eight females, including 3d and 5th hens—Eggs, \$5.00 per setting. Pen 5—Headed by 4th Chicago Cockerel and six females, including 3d pullet—Eggs, \$3.50 per setting. Pen 6—Headed by 5th Chicago Cockerel and seven of my best exhibition females—Eggs, \$2.50 per setting.

Our Motto is, "Quality and Satisfaction"—and we live up to it to the letter.

CARTER'S BARRED ROCKS

Excelsior Strain

Carter's Excelsior Barred Rocks lead in the combination of show-room qualities and practical results. The males and females in my breeding pens this season will score 91-93½. They are mated to produce high-class exhibition birds. In selecting my breeders have chosen vigorous stock whose chicks will live and grow rapidly. For the egg trade I have four pens mated to produce Exhibition Pullets of the right color, shape and size. Also three pens mated to produce high-class Exhibition Cockerels. When desired, will divide and fill egg orders part from each mating. One sitting, \$4; two, \$7; three, \$9. A few choice cockerels for sale. Extra values at \$6 to \$15 each. Some cracker-jacks pullet bred.

T. J. Carter Box 2 Jonesdale, Wisconsin

plenty of water and green food. They seem to be healthy and all right, but I do not get any eggs. Please let me know what the trouble is. E. L. L.

Kosciusko, Miss.

Answer—Leave out the poultry regulator and give them a little fresh meat or liver about three times a week. Also give them a feed of whole wheat and oats at noon.

Question—(1) Can I hatch geese in an incubator and raise them in brooder same as chickens; also ducks? (2) Will beef heads make good green bone for poultry. (3) I have twenty Barred Rock pullets and two cockerels. Are they enough for a beginner? (4) How many turkey hens will I mate with one tom? (5) What kind of grain will I grow for poultry feed? (6) What breed of ducks is best for market fowls? (7) Do chickens do better on free range or in pens? Mrs. M. L. P.

Loogootee, Ind.

Answer—(1) Yes. (2) Yes. (3) Yes. (4) From seven to ten. (5) All kinds of grain are good, but some are better than others. Wheat and oats should be the main feed. (6) Pekin. (7) On free range.

Question—I have a hen that carries her head slightly to one side and at times turns her head until the top is toward the ground, sometimes falling over, and directly straightening up and appearing as well as usual. She eats well and seems to be all right except as above stated. What is the matter with her and what shall I do for her? Wistboro, O. J. E. H.

Answer—We are unable to answer. Will some of our subscribers give cause and remedy.

Question—Please answer through your next issue the cause and cure of my turkeys. When about ten to fourteen days old their knees swell and their feet and lower legs turn at right angles and their toes draw and finally walk on their knees. Eat heartily all of the time. Had to be killed. Oak Ridge, Mo. R. M.

Answer—The indications are that rheumatism is the trouble. Probably caused by dampness. Give a tablespoonful of common baking soda to each quart of drinking water.

Question—Are turkeys and chickens raised successfully in California? Which is the best part for chickens? Are chickens bothered with the different kinds of diseases there like in the state of Illinois. M. L. D. Scottville, Ill.

Answer—Yes. Around Petaluma are located some of the largest poultry ranches in the world. Chickens are subject to diseases in all localities unless they are given proper care. But where they are bred from good healthy stock and given the care they should have disease is unknown.

Question—I have a dozen S. C. Black Orpington pullets and one or two cockerels raised from eggs purchased from a trustworthy neighbor and some have recently seemed to develop an unusual amount of purple barring on the feathers, while my neighbors have not. Is this caused in any way by feeding, and can it be helped by change of feed; or only by careful mating in the future? Ashland, Mass. C. W. McC.

Answer—Feed, no doubt, has a great deal of influence on the feathers; but do not believe you can remedy your trouble any way but by careful and systematic breeding, and by the introduction of new blood into your flock.

Question—(1) About what per cent of eggs will hatch from an incubator as a rule? (2) Are the R. I. Reds a good utility bird? (3) How many chickens will a house $9\frac{1}{2} \times 4\frac{1}{2}$ ft. accommodate? (4) What is a good food to feed laying hens.

H. H. H.

Toledo, O.

Answer—(1) 85 to 90 per cent of the fertile eggs. (2) Yes. (3) Six. (4) Good quality whole wheat and oats, together with plenty of green food, beef scraps, etc.

Question—Kindly tell me in your next issue how many chickens can be raised on a lot 340×50 , all devoted to chickens?

W. E. W.

Rome, N. Y.

Answer—This all depends on the man. If given proper attention, probably 500 to 700 could be handled successfully.

LEARNING THE POULTRY BUSINESS.

Take time to learn the poultry business.

The man who wishes to become successful in business or in working at a trade must begin at the bottom and learn thoroughly every detail which aids in the accomplishment of his undertaking. If he fails to do this he can never hope to stand much above his competitors.

It is particularly important to begin on a small scale and gradually work up in breeding poultry, because the breeder ordinarily attends to all parts of the work himself instead of employing an experienced foreman to take charge of his plant.

The numerous vacant and discarded poultry houses, which may be seen scattered throughout the country, speak more eloquently than words of the large number of people who have failed to make as great a success of poultry cul-

ture as they expected to. If instead of expecting to earn a lot of money easily, these people had realized the amount of time and patience required to make any one skillful in breeding and handling poultry there would have been a greater number of them who would have persevered until they had earned reputations

it took to learn to run a naphtha launch and his answer was: "It depends upon the number of times the engine breaks down at first." Thus in the chicken business, everything depends upon the difficulties overcome and profited by.

The best plan is to take up hens only as a side line at first. This makes the

Mrs. J. S. Haupt and a flock of her favorite R. C. White Orpingtons. Fairview Farm, Easton, Pa., breeders of Rose and Single Comb Buff, White and Black Orpingtons.

for themselves in the poultry world. It puts a man on his metal to feel that he is trying to solve a difficult problem which no one can solve for him, and it encourages an amateur, if he has the right spirit, to tell him that he is doing as well as any beginner and will succeed in time if he keeps on trying. All successful men have overcome great difficulties before they have done anything worthy of notice.

I once asked a young man how long

first experiments and mistakes less expensive, and gives the beginner a chance to decide along what lines he wishes to proceed and what breed (not what breeds) he thinks is the best suited to his needs.

Most inexperienced people try to keep more birds than they have facilities for handling properly, but much better results will be obtained by starting in with a few birds of one breed only.

Saco, Maine.

H. W. Sanborn.

Champion Brooders Lead the World

No brooder ever made produces the same successful results as The Champion. Tens of thousands of them are in successful operation in all parts of the world. No one ever heard of a Champion Brooder disappointing a purchaser. It raises larger percentages of chicks than any other type of brooder. Raises larger and better chicks. Makes bigger profits for the poultry breeder, because it raises more and bigger chicks. Raises chicks where all others have failed. Saved thousands of dollars in cash for thousands of poultry raisers all over the world.

No "secrets" or "methods" ever equaled it's phenomenal records. The Champions have stood the test of time, winter storms, blizzards and summer heat for years. No record has ever been made of a failure with The Champion Brooder. Thousands have proved that it cannot fail; nothing about it to cause failure; simple and perfect in every detail. Has fewer parts than any other, every part a working part. No "frills" or delusions in its make-up. It's all business, does things, does them all the time, year in and year out. No dull seasons with The Champion. You don't have to lay them up in cold weather, nor put them under a shed in rainy weather. "Hard times" and "bad luck" stories are never told by users of The Champions. They have no reasons, their chickens live to maturity and bring their owners "the coin."

Don't go on blindly tying yourself up to a brooder made by a company who is simply after your money. A big name or a big price never made a good brooder. It doesn't take \$12.00 to \$20.00 to buy a good brooder. We'll sell you better ones for about one-half that money. We'll sell you brooders, not fads and fancies. Our brooders are known all over the world as the best value ever put on the market. The Champion is big and good, full nine feet of floor space. Note other makers do not give size of their brooders. Size is not mentioned, except in a few cases, and then the prices range from \$12.00 to \$20.00 each. You don't need a bigger brooder, The Champion will hold as many as any single brooder should hold. Chicks do better when kept in flocks of 50 to 100. The Champion will hold that many chicks, and raise every one of them. We prove results.

The Champion Brooders have saved thousands of breeders from total failure and bankruptcy. Thousands were about to give up the raising of poultry in despair until as a last resort they gave The Champion a trial. Other thousands have rebuilt their high-priced brooders into Champions with the The Champion's heating apparatuses. Here are a few who have made these changes:

"Georgetown, Mass.

"I want to install your system in some other brooders I have of other makes. Have seven high-priced brooders and they will not heat up.—W. B. Evans."

"Pleasant Grove, Pa.

"I am greatly pleased with your Champion Brooder and will replace the C— which I am using with Champions.—W. S. Schofield, manager Black Barren Farms."

"McNab, Ill.

"I have four brooders of another make which I can't heat up in cold weather,

and they can be remodeled very easy. I want to get your heaters and lamps and remodel them.—W. E. Devereaux."

"Springdale, Conn.

"Have one of your brooders and it gives the most perfect satisfaction. I wish to rebuild some of my others with your fixtures. Send me price of three sets.—Oscar Sperl."

If we had the space could name hundreds of similar cases. We can show any interested persons hundreds of letters, in black and white, where The Champions

have replaced every known make of brooders. High-priced and low-priced The Champion "lay over them all."

If your chickens have died like flies, wasted away with bowel disease, drooping wing and leg weakness, or if your pullets failed to lay well after maturity your brooders are at fault. Change your luck; try The Champions this year; stop your leaks. Don't stay with a sinking ship, believing that there are no ships which will not sink. Don't confuse our famous Champion Brooders with any of the fake "systems," "methods" or "sprouted oats" plans. We mean all we say in this advertisement; every word is true. We can prove our words by the

testimony of disinterested users of The Champions. We have never given away a Champion Brooder except to worthy charitable institutions, and then we have never published their testimonials. We sell them for cash to government experiment stations and all others. No "big breeder" ever endorsed our brooders because we gave him some of them for nothing.

We were making brooders many years before most of the incubator and brooder concerns in this country "invented" their machines. The Champion Brooders enter into the "web and woof" of the entire poultry industry of this continent.

They are in operation in every state and territory of these United States and provinces of Canada. They are not experiments. The Champion Brooders will raise winter chickens. They don't have to be kept under a roof nor in a brooder house.

Using 50 Champions Outdoors.

Middle Falls, N. Y., Feb. 9, 1910.

Messrs. J. A. Bennett & Sons Co.

Gentlemen: The 50 Champion Brooders which we purchased from you in one shipment are giving the best of satisfaction, and the greater part of them are in operation at this time. The first season we run them we brought to salable age nearly 4,500 chicks. Wishing you prosperity in health and business, we beg to remain, Very truly yours, A. M. Crandell & Sons.

Every Champion Brought Through to Marketable Age 90 Chicks—Better Work Than a \$12.00 Brooder.

Pittsburg, Pa.

J. A. Bennett & Sons Co.

Sirs: The Champion Brooder bought of you two years ago has given perfect satisfaction. I also have a C— \$12.00 brooder which doesn't begin to give the satisfaction I get from yours. Yours truly, Chas. F. Blackburn.

Lost 1,000 Chicks Last Year.

Yankton, S. D.

J. A. Bennett & Sons Co.

Dear Sirs: I have a dozen brooders now, but they are no good. I lost over 1,000 chicks last year. Please send me a Champion Brooder at once. Respectfully, H. W. White.

Seymour, Conn.

J. A. Bennett & Sons Co.

Gentlemen: The brooder I bought of you three years ago has been out all winter with chicks in it that were hatched late in the fall. The weather has been 10 degrees below zero and I never lost a chick. J. C. Holden.

Lost But One Chick All Winter.

Rahway, N. J.

J. A. Bennett & Sons Co.

Gentlemen: Your Champion Brooder is all right in every respect and will do all you claim for it. I have run mine outdoors all winter and lost but one chick, and that was no fault of the brooder. Harry Gage.

Use a Champion Brooder this year and get in line with the successful poultry raisers. Don't take any risks, with the chances 100 to 1 against you. The Champions will save you money in first cost and make you money by raising every chick you hatch out. You can't afford to run along in the old slipshod way, "Tails you lose, heads I win" system of brooding your chicks. Other makers talk about the great things their brooders do, but talk is cheap. They can't make a brooder out of "printers' ink." We can help make you a big successful poultry raiser if you will give us a chance. The only secret of success is to raise your chicks. No money in dead chicks, nor weaklings. Strength, vigor and size make for early maturity and profits.

The Champion's chicks are big, lusty fellows, the profit makers. They pay big margins with all risks eliminated. Put the chicks on the scales; they'll show up

two to two and one-half pounds in eight weeks.

Our New Model.

Our new model Champion Brooder will operate either outdoors or indoors at any season of the year. Can instantly be changed into a roosting coop, then when chicks are larger into a small colony house without use of a tool. Finally, if you wish a lampless brooder for warm weather you can purchase our lampless attachment for \$2.50 and raise your chicks without heat. We do not recommend lampless attachment except for summer time use.

The Champion Brooder is large and roomy, full three feet square, nine square feet of floor space. Price only \$6.50 each.

Freight rates: We can reach any point as cheaply as any maker. To New England and middle states, 50 cents each; western states, 65 to 85 cents each; Pacific coast points, \$3.00 each. We make prompt shipments.

Send for free catalog today.

THE GREAT "ONTARIO" SHOW.

Canada's Greatest Poultry Show—Held in Connection with the Winter Fair at Guelph, Ont.—A Display of Canada's Best—About 5,500 Birds of All Varieties Shown.

THE poultry breeders of Canada surely have in the "Ontario" a show to be proud of. This year (December, 1909) we found there close to 5,500 entries and of a quality that has won for the show the title of "The Madison Square Garden Show of Canada." Here are found yearly Canada's best. They meet on common ground, fill their mammoth show building and have a good time in general, with a banquet thrown in.

The Government Poultry Experiment Station is also located at Guelph, and a visit to this institution and a talk with Prof. W. R. Graham are one of the side features we have enjoyed for three years now. Of course, Jerry is still there, and a good part of the show.

The classes, and in particular those of the more popular varieties, are always well filled with an exceptionally fine and high grade of stock. The winning Barred Plymouth Rocks were of a quality to show any place. Each of the four first winners were exceptionally fine and choice specimens. Here Mr. John Pringle, of London, and Mr. I. K. Millard, of Dundas, made records to feel proud of.

The White Rocks were another large and hot class, with splendid form and head points the feature. In Buff Rocks some exceptionally fine birds were shown. In particular we would mention the first prize cockerel. We believe him the best Buff bird we have ever seen.

White Wyandottes were the largest class shown here. The class was filled with quality all through, and the ever popular James Tucker had hard picking here among all the good ones. Wm. Dawson, East London, Ont., won well with a choice string of birds, well shown; size, type and head points are their feature. To win the Display special in this class is a feat worthy of consideration. Mr. Joseph Russell, of

Barred Plymouth Rocks

I am offering 10 choice cockerels bred from Indianapolis winners at bargain prices. The kinds that possess clean, snappy surface barring with undercolor to match. Free range birds with size and vigor. Just the kind you are looking for. Eggs, \$2.50 and \$3 per 15.

Oscar Wurtz - Box A - Edinburg, Indiana

"BETTER THAN EVER" STRAIN OF WHITE PLYMOUTH ROCKS

Won at the large shows of Cincinnati and Hamilton more prizes than all other exhibitors combined. Judge Pierce pronounced them wonders in White Rocks. Large, healthy farm-raised stock. For sale, 100 pullets and 50 cockerels. Eggs from prize winners, \$3 and \$4 per 15. Send for circular.

H. L. Brown, R. F. D. No. 4, Oxford, Ohio

Styers' COLUMBIAN Wyandottes

Our stock has won prizes at Chicago, New York and other great shows. If you want to raise chicks with black wings, fine, sharp laced necks and tail coverts, you will buy our eggs. We offer the best Columbian Wyandotte eggs for hatching ever sold at prices in reach of all. We guarantee fertility and replace all infertiles. Surplus stock all sold. Write at once. Eggs, \$5 per 15, \$8 per 30, and \$20 per 100, from prize matings.

Fred Styers, Route 25, Greensburg, Ind.

WHITNEY'S WHITE ROCKS

WON

At Ontario, the Madison Square of Canada, 1st Hen, 2nd Cock, 3rd Pullet.

At International, Buffalo, 1st Pen, 2nd Cock, 2nd Pullet, 4th Hen.

Only limited number of eggs from best birds at \$4.00 per 15. Let me book your order now, and raise some winners.

C. J. Whitney

Galt, Ontario

HARRIES' WORLD'S CHAMPION WHITE ORPINGTONS

STILL IN THE LEAD

At the great Philadelphia show, under one of our best judges, on two birds only, never before shown, 1st PULLET, 2nd COCKEREL, Silver Cup for best WHITE, Silver Cup for BEST ORPINGTON IN SHOW and two other Specials. Let Steinmesch Tell You How
Everybody who knows chickens knows Steinmesch.

I know how to raise more chickens and better chickens, to get more eggs and better eggs and how to get more money for both. I know how to pick out and breed fowls that pay in poultry and eggs and win in the show room. I ought to. I have been at it for 30 years and own my own complete farm. I fed and looked after 10,008 fowls at the St. Louis World's Fair, the largest poultry show ever held in the world, and I am a Life Member and Member of the Executive Committee of the Am. Poultry Association, President S.W. Branch Am. Poultry Association, Pres. Silver Wyandotte Club of America and the St. Louis Fanciers Association and Member of the Missouri State Poultry Association.

Now I'm Going To Tell What I Know FREE
I am going to give others the benefit of what I have learned. I am going to offer plain understandable suggestions to those who want to know how to make the most out of their poultry. This information is not for sale. I'm going to give it to you and show you how to really make money in poultry. I will send the whole story of my success and my methods to you in handsome book form without one penny from you. Just send me your address and say: "Steinmesch, tell me how." Address **Henry Steinmesch, President** 211 Market St., St. Louis, Mo.

Toronto, also won well, both in this class and with his Reds.

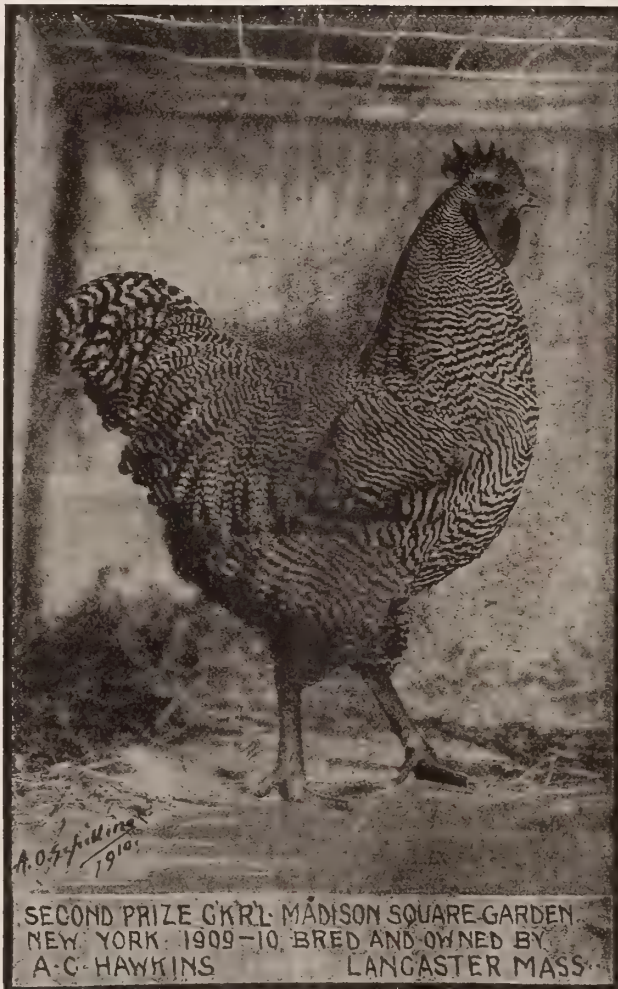

Canada is strong on Minorcas. This is evidently one of their most popular varieties. This year was no exception to the rule, and we found there large and strong classes of these beautiful birds. In the S. C. Blacks, Mr. Folger made a notable winning in each class. Besides these, he also won the class collection special.

In the R. C. Blacks, Dr. J. N. MacRae, of Galt, carried off a great share of the awards. For size, his birds equal any of the S. C. birds we have seen, in color they are very sound and clean, and all his birds have most excellent head points. The doctor also won well with his entries of Black Cochins Ban-

Cormack, also of Brantford, Ont., came up strong in the winning with first cock and hen and several others. He also won the cup for best cock, hen, cockerel and pullet with all Leghorns competing.

Hamburgs and Polish, as may be expected, were beautiful classes, well shown. The winners were all birds of the highest merit. The first prize Golden Spangled Hamburg cockerel was by far the best Hamburg we have ever seen.

The Bantams were a feature. The classes were simply great both in the ornamental and game varieties. Many imported birds were shown here, and the station of some were really grand. The Cochins Bantams were a beauty class and very finely shown.

tams, and if we remember rightly, his first cockerel was awarded one of the Sweepstakes cups. They are grand little Cochins.

The Orpington classes were among the largest and best at the show. All colors and all varieties were shown to advantage and grandly handled by the "Peerless" Dick Oak. Rhode Island Reds, of both varieties, were good sized classes and of rare quality. The color special male pleased us greatly.

The S. C. White Leghorns were a very large class. Here condition prevailed; head points were also a feature. Mr. Wm. Ferguson, Brantford, Ont., won ten regular prizes and cup for best shaped cockerel. Mr. J. L. Mc-

Turkeys, geese and ducks formed a good collections. The Toulouse geese made a record showing in both numbers and quality.

The management was all that could be desired. The veteran Jack Saunders has been superintendent for many years and knows his book, as do all the exhibitors. Not a hitch of any kind occurred and all was lovely. Our dear old friend, William McNeil, did his part in the management, as well as some of the judging. He is as popular as ever with the boys. No matter what happens, the advice is "See Billy," and then all is right.

Here is a pointer for the American breeders: Show your birds at Guelph.

More of us should make this show; it is fully worth our best efforts, and if you have the goods, go over and try. There is a great field there for business, and if you can show the Canadian breeders anything you can get their friendship and coin. But remember, if you go with any such intentions, above all, be sure you have the goods with you. H. P. Schwab, :

A SATISFACTORY REMEDY FOR GAPES.

Have some one hold the chick and hold its mouth open, draw the tongue out sufficient to see the top or opening of the wind pipe, and when the chicken inhales and opens the aperture at the top, with an ordinary dropper (such as used in filling a fountain pen) inject a drop or so of kerosene oil into the windpipe.

The chick will be well in a few days. The kerosene oil destroys the gapeworm and the chick is not injured by the operation like it would be by trying to remove the worm with a wire, straw or horse hair. Besides, you are certain to get the oil to the place where the worm is lodged. I doubt not that spirits of turpentine or any other such liquid that kills the worm without much injury to the chick could be used, and I believe the ordinary dropper could be improved upon by some one making a better injector, but it answers the purpose. A few times using, however, will soak the rubber with oil and render it useless. Millard F. Snider.

Clarksburg, W. Va.

POULTRYMEN'S GREATEST ENEMY.

Editor American Poultry Journal.

Dear Sir:—If asked what I consider the largest obstacles in the path of poultrymen I would unhesitatingly say lice.

Every poultryman has his own pet way of fighting them and I have a method that is very simple, cheap and effective, being the only method I have ever tried that actually rid my chickens of lice.

Our feed room is thoroughly cleaned out once every two weeks and the ground sprinkled lightly with common coal oil and then filled from four to six inches deep with clean dry straw.

Every morning before feeding grain I empty the ashes from the stove in this litter, then scatter the grain right in the ashes. The chickens will scratch in the ashes for the grain and will dust in them during the day.

Once every week I clean all nests, put a few sifted ashes in bottom of nests, sprinkle lightly with coal oil and put in clean dry straw. This kind of nest I have used for setting hens and not cleaned during entire time of incubation and no lice on hen when hatching time came.

When nests are cleaned I sprinkle all roosts with coal oil quite liberally, and I have examined my flock several times for lice and I have not been able to find any and believe that if you will try this plan you will find it the best method of keeping your flocks free from lice. W. H. Blemis.

Brownlee, Sask.

Jonas Hayner, Box 411, Livingston, N. Y.

LETTERS from our SUBSCRIBERS

MOTTLED ANCONAS.

Editor American Poultry Journal.

Dear Sir:—Just a word or two in favor of this handsome and profitable breed of fowls, as the writer has been a constant reader of your valuable magazine for a long time, and has been waiting, oh so long, for some fellow breeder to speak of their merits, and outside of Mr. McNary, of Bannock, O., have seen nothing whatever written up about this beautiful fowl, and will at last have to come to the front in their behalf.

The writer is new to the poultry magazine readers, but old in breeding, having bred all kinds of fowls for pleasure, likewise what profit was in same for years, and never until the last two to three years found so much pleasure in breeding and working with chickens as with this new old breed of Mottled Anconas.

Dr. F. H. Ballard's article in December issue is very good, and I presume I will be classed as the "Stranger at the gates."

He also makes a statement that any of the new varieties can successfully be raised, advertised and sold at a profit, and I heartily agree with him, especially with a new beginner entering the poultry field to compete with the old time breeders.

In behalf of the beautiful Ancona, would say I have bred all of the old line birds, such as Rocks, Wyandottes, Reds, etc., and I never got the results from them as from the Anconas.

They are handsome, hardy, full of vitality, easy to raise, and they are a veritable winter egg machine, which we all seem to be after in this strenuous race for a living.

Being a non-setter makes them still more desirable, and would say there is some great laying records behind this

breed, with some of the popular breeders, not any one month record, but for the year or six months straight laying, so any person contemplating starting new in the poultry business would pay them to investigate the merits of this prolific fowl.

Being a born chicken crank, nothing suits me better than to meet another of my caliber at the fairs, poultry shows, when I can possibly attend same, and talk chickens, and their merits, especially the Mottled Ancona, and if the other chicken crank is not an Ancona breeder, he is liable to be converted before leaving the show, unless he is a dyed-in-the-wool crank to his own particular breed. The writer does not want to discredit any breed of fowls, but from his own personal experience thinks that the Ancona has it on any other breed, and can see this far into the future, "that the Mottled Ancona will soon be in the front ranks, and will be recognized with any of the old standard breeds."

We are gaining ground very fast, having a membership outside of our own state in the International Ancona Club, of one hundred members, and very near this amount in our own state, while the Ancona Club of America hovers around about the same basis, and we expect the International to grow amazingly fast this coming season, owing to the popularity of the Mottled Ancona.

Trusting you will find a little corner somewhere in your valuable magazine

White Orpingtons and White Wyandottes

My Wyandottes made a great victory at the recent Youngstown show, where, in one of the hottest classes ever gotten together, I won three firsts and two seconds, two thirds, National White Wyandotte Cup for best cock, hen, cockerel, pullet and pen. Best display. Three \$25 loving cups, three \$10 cups, three silver medals and other prizes. My winners are all in my breeding pens.

White Orpingtons

are the same high class birds I have in my Wyandottes. I will not have any but high class birds on my place. Eggs are \$5 and \$10 per setting, and I pay express where an order is \$10 or more. I will give you honest value for your money.

F. D. Sutton

68 St. Louis Avenue

Youngstown, Ohio

Biggest Sale in R. I. Red History

The most important sale of Rhode Island Reds ever made in the history of the poultry business was one just made by the administrators of the estate of the late Robt. C. Tuttle, of Hartford, Conn., to Maltbie & Shelley, of Geneva, Ohio. One hundred and seventeen birds were sold for the largest consideration for a like number of birds that has ever been paid. These birds were the ones saved and mated by Mr. Tuttle for this year's breeders. Of these we shall retain about fifty, as we only have room for a limited number, already having a large and fine flock of our own.

TWELVE GRAND PENS FOR THE EGG TRADE

Yards headed by the New York, Chicago and Boston winners. For reduced prices on stock and eggs send for our sale sheet.

MALTBIE & SHELLEY

121 WEST MAIN STREET

GENEVA, OHIO

for this, my first attempt, I will say farewell, and will be pleased to furnish interested readers with any further information if they so desire, concerning the beautiful Mottled Ancona.

St. Clairsville, O. J. O. Somers.

Editor American Poultry Journal.

Dear Sir:—I noticed in several of the different poultry journals recently an item regarding the Light Brahmas

Brahma breeders to show their birds. The largest number of the poultry shows place all the specials and cups on one breed and the majority of the shows do not place anything on the Asiatics.

If there were more prizes offered for the Asiatic class than there is, there would be more breeders of this class show their birds. There is no encouragement for the Asiatic breeders to

shows, there would be large entries and lots of competition, but the majority of the shows do not offer anything for this breed, and therefore there are but one or two breeders show their birds, and have not enough competition to bring them back the next year.

Altoona, Pa.

W. E. Leightly.

Editor American Poultry Journal.

Dear Sir:—Regarding the article

Laying house, 16x154 feet, on the Minnehaha Poultry Farms, McNary & Smith, proprietors, Bannock, Ohio.

becoming a thing of the past. I want to say that this grand old breed is as popular as ever and always will be, but the only reason they are not praised up as much as the other breeds is on account of the poultry shows not offering any prizes or specials on the Brahmas like the other breeds, and hence there is no encouragement for the

show if there are no special prizes offered.

The birds in the Asiatic class are good layers and are the largest fowl for market, and there should be no reason why they should not be classed along with the other breeds.

If there were some attention given to the Asiatic class at most of the poultry

written by Mr. Bent, as seen in your February issue, pertaining to artificial light for fowls, would say, during the winter months for the past four years I have used a lantern in my coop for the night's feed with success. In the morning at daylight I feed wheat in deep litter. At two o'clock cracked corn and oats, and at 7:30 a moist

BUFF BLACK ORPINGTONS : R. C. REDS S. C.

Winners at N. Y., Chicago, Cleveland and Pittsburg Shows

Special Prices on Grand Breeding Cockerels in above varieties. This is your opportunity to get a fine male from us to improve your flock.

Other grand matings of Prize Winners, \$5.00. Send for catalogue, giving you all our late winnings at the above shows in competition with the best.

Craig & Mapes : Box 4 : Mt. Lebanon, Penna.

The George W. Mitchell Partridge Cochins

Having purchased the entire flock of these famous birds, with the good will, from Mr. Mitchell, I am in a position to offer exceptional opportunities to those wishing to buy, as I have a few fine birds that I am willing to dispose of. Also eggs from the prize matings which Mr. Mitchell has made for this season. Those desiring further information address

Robert F. Clark

87 Milk Street

Boston, Massachusetts

mash. They not only eat the mash up clean, but take to the shell box and water liberally. And they have frequently laid eggs before returning to roost, and I have proven that by the use of the light they not only lay more eggs but the eggs are better fertilized. Then, again, it gives one a better idea as to the fowl's condition. If they are too lazy to come off the roost they are too fat to lay. Very truly yours,
Bessemer, Mich. T. H. Whitburn.

Editor American Poultry Journal.

Dear Sir:—Just a few words concerning Bantams. This morning I received the February issue of your paper and read it through carefully. To my disappointment I found not a single word of praise for the kings and queens of the fowl kingdom. Your report was

very fine of the Boston and New York shows as far as it went. The various varieties of larger birds came in for much praise, but where was the bantam? In your report of Boston show he is not mentioned, and I doubt if there was a single variety of birds in the room that deserved more credit or mention than these little birds. Neglected as they are by nearly all poultry papers, they nevertheless are pushing ahead and fighting their battle alone and shall in the near future stand supreme. Then the papers will shout their praise and beg for ads. But let me say the bantam is not to be outdone. Already one editor has seen this to be true and started the "Bantam," a paper devoted entirely to bantams. Success will be his and to the "Bantam" all other papers will bow; bantams in

a few years will outrank several larger varieties in number and quality and a bantam show by itself is certain in the near future. Already several papers are devoting a department to this little fowl and others will follow. Bantam breeders will advertise where their ads are appreciated and certainly their money is as good as any one's. I am in no way, Mr. Editor, directing this to your paper alone, but to the majority of poultry papers in the U. S. Give us a show, just a little space each issue devoted to our birds and see if the reward is not twofold and even more. As a breeder I desire to see the bantam get a square deal, but if we can't we shall fight alone and sooner or later down those who are now trying to down us.

C. Harold Porter.

A Genuine Buffalo Incubator \$8 Made By CHAS. A. CYPHERS

The new "Buffalo" Incubators made by Chas. A. Cyphers are selling far faster than any of my former high priced models ever sold. An avalanche of orders has poured in since the day I first announced that I am producing an incubator equally as well made and containing the same vital hatching principles as my

former models, though it sells for half.

But it's no wonder the orders are coming in fast! The Buffalo is simply a marvel. It's fire-proof, has heavy packed walls, strong and durable, perfectly constructed, easy and economical to operate, sure to give a high percentage hatch and guaranteed to do all that any incubator in the world will do, no matter who makes it or what the price.

How Do I Do It?

I use a new system of machinery. I use new and better materials (fibre board and sheet metal). I have reduced the cost of making and actually increased the result producing quality. I do not spend a fortune in fine catalogs and big advertisements. I depend upon these incubators to sell themselves. And they are doing it. Whoever sees the "Buffalo" wants one. When any poultry raiser compares a "Buffalo" with another model selling at \$8 to \$12 more, I get his order every time. Again I get the order when he compares a "Buffalo" with the cheaply made boxes (called incubators) that sell at "Buffalo" prices. Saving a little in the cost of making and a lot on advertising expense I save you fully 50%.

Strongest Guarantee Ever Given With any Incubator

I positively guarantee that the "Buffalo" will hatch as well as any incubator made, regardless of price. I guarantee it to be as substantially made, as well and as easily regulated as any incubator costing \$8 to \$12 more, egg capacity considered. I guarantee it to be fire-proof and to last as long as any incubator ever built. I guarantee the "Buffalo" in every way to be the best incubator ever offered at any price.

This space is too expensive to give all the specifications, but if you want more information before ordering, write for my illustrated circular fully describing "Buffalo" Incubators and Brooders.

ORDER TODAY --- SAVE ONE-HALF

Send me your order today. Say which size you want and enclose the price with your order. My guarantee as stated above assures absolute satisfaction and protects you in every way.

50 egg size **\$8.00**;
200 egg size **\$16.00**;
300 egg size **\$20.00**

We are turning out "Buffalo" incubators in thousand lots, but the orders are coming in fast, so don't delay. You can order with perfect safety, directly from this ad, because my guarantee protects you.

Buffalo Brooders

I can also save you one-third on brooders. The "Buffalo" brooders are the best ever turned out under the direction of Chas. A. Cyphers. They are strong, durable, automatically regulated. Prices are fully a third lower than on any of my former designs.

"Buffalo" Indoor Brooders..... **\$7**

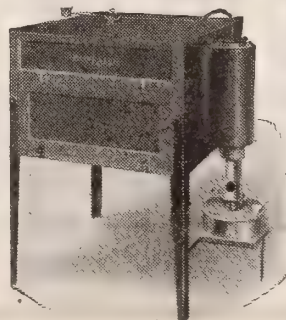

"Buffalo" Colony Brooders..... **\$10**

Don't forget to send me your order today.

CHAS. A. CYPHERS

President, Buffalo Incubator Co.

4700 Ellicott Square, Buffalo, N.Y.

Editor American Poultry Journal.

Dear Sir:—I think you will be interested to know that the South Dakota State College has arranged to provide correspondence, courses for home study in agriculture, domestic science and nature study. There are courses of study for all the members of the farm family, for school teachers and everybody everywhere who wishes to learn.

The state college has not planned these home studies for financial profit but to extend the privilege of scientific and practical instruction to those who cannot attend college, yet are ambitious to gain instruction which will be helpful in their work and life. The systematic course in poultry culture is of especial value to all progressive poultry keepers.

Full information will be furnished to any of the readers of American Poultry Journal on request.

A. A. Brigham,
Director College Extension, Brookings,
S. D.

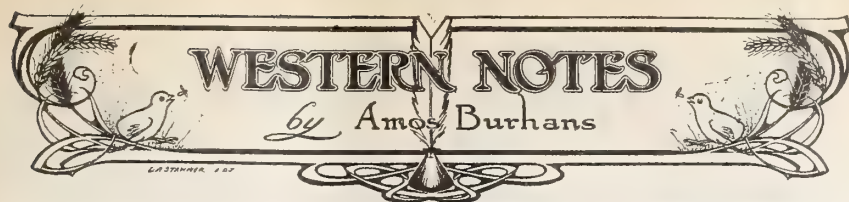

Editor American Poultry Journal.

Dear Sir:—Will you kindly allow space in your valuable paper, as some poorly informed person or persons started a false rumor at the last Madison Square Garden show, that I was about to sell out my business and go west, much to my detriment and harm. I wish to emphatically deny this and brand it as absurd, as I have retained all of the best birds which Mr. Northrup turned over to me and I am getting out my egg orders promptly, and doing so much business that I have had no time in which to change my advertisement. Yours very truly,
Raceville, N. Y. Geo. W. Hey.

**R. C. TUTTLE'S R. C. REDS SOLD TO
MALTBIE & SHELLEY, GENEVA,
OHIO.**

The entire flock of Rose Comb Rhode Island Reds owned by the late R. C. Tuttle has been purchased by Maltbie & Shelley, Geneva, Ohio, who are well and favorably known as breeders of Rose Comb Reds, their birds having won in many of the important shows throughout the country. It will be remembered that they won a majority of the prizes at the late Youngstown, Ohio, show, where the Red Club meeting was held. The adding of all of Mr. Tuttle's stock to their own certainly puts them in the front rank of breeders of Rose Comb Reds.

This is the most important sale of Rhode Island Reds ever made in the history of the poultry business. The birds purchased were the ones served and mated by Mr. Tuttle for this year's breeders. They will part with a few of these birds and can supply eggs from twelve grand pens. Send for circular and sale sheet. See ad in this issue. Address Maltbie & Shelley, 1127 Main street, Geneva, Ohio.

This department is open to all readers and advertisers in the western territory and all are invited to send in all poultry news items that come to their attention. Address Amos Burhans, Waterville, Minn.

The boys out west are having a lot of fun with Billy Russell about the Silver Penciled Wyandotte cocks and the Silver Wyandotte cocks all being passed on by him as Silvers. Billy has the half-nelson on the fellows though, for his cards showed that they were all Silvers. Billy tells them where to drop off in his reply in the Northwest Poultry Journal for January.

What the Poultry Record writer ought to do to get those weighty matters off his mind is to prefer charges. It must be an awful strain to know something all by ones self and yet be unable or afraid to let it loose as occasion demands. Get it off your mind.

We see so many notes in the journals saying that the poultry business is booming that we almost believe it ourselves. If a fellow wants to find out how high the boom is getting all he must do to get a good idea is to ask for prices on Black or White Orpingtons. The facts are that good birds

are getting higher and higher every year. The point is plain: He who went in early and went in right is reaping the reward.

A. F. Hunter has severed his connection with the Poultry Advocate. He has been holding down the editorial woolsock for nigh onto five years and we have enjoyed many of the practical articles which have come from his pen.

Dr. Graham, of Rochester, Minn., is putting in the foundation of one of the finest Orpington flocks in the country, having bought birds from the Palace show, England, and purchases only what he knows will do his future career as a breeder much good. The west is mighty proud of the men who are putting up good breeding establishments for the production of good fowls. The doctor will breed all the Orpingtons.

Pacific Poultry Craft is the new name of the Live Stock Tribune, which we have missed from our exchanges for

some time. The new cover is attractive and Mrs. Basley is still editor. She is one of the best writers on the Coast. A friend of mine who keeps pretty close track of A. P. A. things said that if they kept getting rougher and rougher he thought he would buy the paper I have mentioned and change one letter in its name and do a good business.

Mentioning the Poultry Craft reminds me that I have not heard from Kruckeburg, who used to edit the old Tribune, for some time. He was one of the fixtures of the Coast, we all thought, and then with the suddenness of a comet appearing in the sky he dropped out of poultry editorial harness and has been out to pasture ever since, so far as we know.

The middle western breeders are sending some good birds further east if I can believe my eyes. Not long since I saw a pen of Silver Penciled Wyandottes, from the yards of Carver & Avey, purchased through the American direct from an advertisement, and they were tip-top stuff. These breeders, we understand, are making a specialty of Partridge and Silver Penciled Dottes and are doing well. Years ago the writer bought a pen of Partridges from this firm and they, too, were good.

Another breeder who has been breaking out further west than his home state is E. R. Bradley, of Hillsdale, Mich., caught sending out good Black Orping-

Riley's Victory Supreme BARRED PLY-MOUTH ROCKS

At the great International Show, *Buffalo, N. Y.*, where the best birds from Canada and the United States were shown in one of the hottest classes of the year, I outdistanced all my competitors. *Wil-liamsport, Pa.*, the great A. P. A. Penna. branch show, my victory was complete, winning four out of five firsts and gold medal for best cockerel in the show. *Baltimore, Md.*, the banner show of the South, my winnings were in keeping with my wonderful records already made.

For four years in succession the leading honors at the *Great Philadelphia Show* have been won by birds of my strain.

My Winnings Are Supreme : They Are Convincing

The best birds I have ever owned are in my yards this year and my eggs cannot fail to hatch you winners. Let me send you my mating list, giving full information of the *world's peerless exhibition strain*.

Henry D. Riley, Box B, Strafford, Chester County, Pennsylvania

White Orpingtons

The entire stock of M. P. Pratt's famous winning white Orpingtons have been added to our pens, which places Brookdale Whites at the top for REAL QUALITY. Send for full information before you buy.

Brookdale Farm : W. E. Stanfield : Hillsdale, Mich.

tons into Minnesota. He has found out that western buyers are after their money's worth and know it when they get it, and sends good stuff to fill his orders. We need more fanciers in the ranks like these two firms we have mentioned.

It does seem as if the Orpington men will not cease shouting. The breeders of Orpingtons out there in California have formed a state Orpington club and will plan to hold a few summer meetings, where birds will be exhibited. To keep a breed in the public eye it must have merit, and then have men behind it who are doing all they can to breed better ones. The Lean One would suggest that other states get in line and stay in line. Organizing only to wither away is not worth while. Get down to business.

Not long since there was a man fearfully maligned in one of the poultry journals who now not only has a host of

supporters at his back but whose customers are running to the rescue. It is not always best to make grand stand plays like this to win hollow applause. First, brethren, be sure. Let him who is blameless cast the first thirteen-inch shell.

We had planned a lot of good notes for this department of this month's issue, but the fellow editors who we were depending upon did not get their papers out before we had to get our copy in. Do you notice that the American is about a week ahead of the bunch? Just another case of leading and letting the stray lambs follow.

Reese Hicks is taking a lot of time to boom Tom Quisenberry for the executive board of the A. P. A. Next time, Reese, get your cards out earlier. Our nomination ballot had gone back to Kimmey and we dare say Tom lost some votes in other quarters on this account. But remember Tom in the vote, western-

ers, if he is successful in the nominations.

The next Missouri state show goes to Kansas City. We learn that Mr. Kellerstrass has offered to furnish the hall and the decorations, which means that this will be done on a more sumptuous scale than heretofore in any room of the kind in America.

Professor Stoneburn, of Connecticut, is going out to Missouri to hold a short course poultry school at the Missouri State Agricultural College. Just another Missouri show-me stunt.

We have a letter from a St. Louis Booster Club man who says we should try to land the A. P. A. meeting there this coming August. The meeting will be held there, all right, all right, and there will be a great aggregation of westerners on hand to make the work fly.

Tom Ricksecker was awarded the blue ribbon for the heaviest layers in the last Kansas City show. He had forty-one birds down there on display only and they laid more eggs than—well, it is but getting into a fight to say it, so we refrain. The idea is that Tom won the ribbon and the show officials gave it to him fairly.

Uncle John is knocking the Chicago show again. No wonder! They tell us his dyspepsia is worse o'winter than summer. He's beginning to find out he doesn't cut much congealed water and it makes him crusty. We'd say a lot of mean things only we turned over a new leaf on the first day of nineteen ten.

BACK TO NATURE (?)

A little while ago I was reading an article on the "Open Front" style of henhouse in which the author was setting forth the beauties of that style of architecture. I am not sure that I remember all the arguments he adduced in support of the theory that hens did well when exposed to all the rigors of winter in this climate, but there was one argument which did make an impression on my mind, and that was as follows:

"We ought to let hens stay outdoors during the winter, because in a natural state the feathered tribe live outdoors all winter without artificial houses, etc., AND THE THING WE OUGHT TO DO IS TO GET BACK TO NATURE AND NATURAL CONDITIONS."

The BACK TO NATURE argument seemed conclusive to him and seemed to settle the question. Away with all the artificialities of life and BACK TO NATURE! Let hens live under natural conditions. The sooner we get back to natural conditions, the better for the flock, etc., etc., etc., ad infinitum and ad nauseam!

Well, I wonder if the man knew what he was talking about? What is a state of nature, applied to chickens, and what would be the results? Let us ponder and reflect a minute.

The modern gallus domesticus, the chicken of today, is a highly "unnatural" bird; the result of centuries and centuries of domestic handling. The result has been a highly "unnatural" production of eggs and a highly "unnatural" size and edibility and a highly

White Quill White Wyandottes and S. C. Leghorns

MR. FANCIER—Do you know and realize that WE have supplied the winners to discouraged fanciers and breeders that were once quitters but are now successful poultrymen. If you are discouraged, a trio of our birds or a setting of eggs will make your competitor sit up and take notice while you get first money. Remember they are winners in Detroit, Toledo, Ithaca, Marion, Wapakoneta, Elmore, and Sylvania. Scores, 93 to 96%. Let us book your order for eggs. Write for prices. Give us a trial. WE CAN PLEASE YOU. Our Prices are Right. WE HAVE NO DOLLAR BIRDS—BUT WE HAVE BIRDS OF SUPREME QUALITY.

Amatite ROOFING

Needs No Painting

MOST ready to fing require special painting and coating, and unless this is done regularly, you are sure to have leaks and trouble right along.

If you use Amatite, nothing of the sort is required. You will have real roof protection *without painting* of any kind.

Amatite is made to stay waterproof and give protection year after year, without any thought or care on your part.

First—Because it is waterproofed with Coal Tar Pitch.

Second—Because it has a real Mineral Surface.

Amatite, owing to these features, is the most economical roofing made. Its first cost is low, and you are *saved* all future expense for repairs or paint because it will need neither

If you haven't seen Amatite, write for a sample to-day. From it you will very quickly understand why it doesn't require painting; why it does not leak; and why it saves you money.

Address nearest office to-day.

BARRETT MANUFACTURING CO.

New York Chicago Philadelphia Boston Cleveland St. Louis
Cincinnati Minneapolis Allegheny New Orleans Kansas City London, Eng.

"unnatural" lack of power of flight. The bird has lost its habits of migration to warmer climates during the cold season and has become "unnaturally" tame and tractable. He has been subdued to man's use and is one of the most economically productive animals known.

What has brought about this change?

We have fed the bird and this has relieved him from the necessity of seeking his food; this has gradually curtailed his power of flight. We have housed him and this has led to the loss of the migratory instinct. By housing him from the rigors of winter we have produced artificial conditions that have induced laying of eggs and has produced size and weight. Housing, personal care and constant feeding have completely changed the disposition of a naturally wild bird. Of course this required centuries and centuries to accomplish; but we see the results today in our domestic chicken.

The point is that the modern hen that lays say 200 eggs a year and stays about our dwellings summer and winter is the result of artificiality, and most decidedly not the result of "natural" conditions.

Assuming that we could revert to "natural conditions," what would be the result? Well, use your eyes and answer the question. A migratory bird, here today, somewhere else tomorrow. A bird that roosts in trees, inaccessible to man. A bird that lays perhaps four eggs per year. Here you have your STATE OF NATURE, to which, according to our sciolist, we should be glad to return! How much per dozen am I offered for such birds? Who would contract to supply a hotel with eggs from such a bird? The argument is silly.

There is no question that hens with certain type of combs can live in an open shed all winter and will lay eggs. Why? Because they have acquired the habit through countless generations of artificial treatment at the hands of man through centuries and centuries. They lay now, under adverse conditions, because of long-continued previous favorable conditions, not as the result of present adverse conditions, dissimilar to those conditions under which their ancestors acquired the habit of laying say 200 eggs a year. They lay in spite of adverse conditions and not because of adverse conditions. The birds of the trees lay four eggs a year under conditions which may be called "natural." If you capture them and put them in confinement, they do not immediately change their habits. Under the best care that we can give them, the wild birds continue laying eggs just as they have always done for thousands of years: that is, about four or five eggs a year.

On the other hand, take your domestic chickens and give them the so-called "natural" conditions (open shed, free range, etc.), they continue laying as a result of past conditions through centuries of domestication. If we took a dozen hawks, for example, and put them under conditions in which our chickens ordinarily live—would they immediately change their habits, lay 200 eggs a year and become tame and edible? Would not their usual wild and predatory habits continue?

This brings us to the profound, universal law that all animals, as well as

all plants, are the result of surroundings and tend in the course of time to harmonize themselves with their environment. The hawk is the result of environment and the conditions of life with him are harmony with those environments. The domestic chicken is the result of his past surroundings and he conforms to his environment. For centuries and centuries he has been fed and watered, handled, housed, protected

of the cry: BACK TO NATURE AND NATURE'S CONDITIONS, as applied to domestic fowls.

"A little learning is a dangerous thing."
E. L. C. Morse.

A CORRECTION.

In our February issue we stated that John S. Martin won first on White

from the extremes of weather by man. As we see him today he is the inevitable product of those long existing past conditions.

The ordinarily intelligent reader will thus see the absolutely silly character

Wyandotte pen at the late Boston show, but J. W. Andrews informs us he won first pen, competing against both old and young pens, which makes his the champion White Wyandotte pen at that show.

**RILEY'S BARRED PLYMOUTH ROCKS.**

A Visit to the Home and Yards of Mr. Henry D. Riley, at Strafford, Chester County, Pa., One of the Old Time Breeders Whose Record as a Winner Dates Back Many Years.

There is always a certain expectancy mingled with many desires when visiting a poultry plant. We expect to see fine stock, kept in approved fashion. Satisfy this and there still remains the desire to meet the "boss" and to find in him a fancier and breeder whose success has been made by his own efforts.

We have known Mr. Henry D. Riley for a great many years. Have handled his birds at New York, Philadelphia, Williamsport, Buffalo and other great shows, and when on February 8, 1910, the opportunity came to visit him at his home, we gladly accepted, for we knew him to be just one more of the kind of breeders we want to meet in his yard.

A short ride from Philadelphia brought us to Strafford, a very pleasant village affording homes to a thousand busy merchants of the great city but 15 miles away. Close by was the home of Mr. Riley and his poultry yards, occupying forty acres. Here we found a home of our ideal, away from the humdrum of the city, still within easy reach, and in a location naturally beautiful.

Mr. Riley has been an ardent fancier and breeder of Barred Rocks for about fifteen years, being a most liberal exhibitor. His success is proven by his many winnings at our best shows for years back. His record this year is a stunner, including three of the greatest shows held in three different states.

At Williamsport, Pa., the A. P. A. state show, he was awarded four first prizes, two second and two third prizes, gold special for best male in the show, silver medal for best cockerel, gold special for best display of Plymouth Rocks, gold special for best cock, hen, cockerel and pullet; special for championship male and specials for both shape and color.

At Baltimore, 1910, the beauty show, and one of the best held this year, his winnings were fourth cock, first and second hen, fifth cockerel, third and fourth pullet and first prize exhibition pen.

At the Buffalo, N. Y., Great International show, in the best of competition, he won first cock, first, third and fifth hen, second cockerel, second pullet and first prize exhibition pen; gold special for best display, the club national cup for best cock, hen, cockerel and pullet, and five other gold and cash specials.

Mr. Riley is not only well and favorably known as a breeder, but also for his successful work for the Philadelphia Poultry Association, of which he has been president for several years. The prominence and success this association has attained the past four years is largely due to his work.

The poultry plant consists of three large breeding houses, two brooder houses with forty brooder capacity.

The main breeding house as you enter has a shipping and conditioning room, with everything handy for such work. Then come ten pens, each 12x14 ft., with open fronts. The office is to the right of this house with light and tele-

phone attachment. Two other houses, each 12x60 ft., are out on the range where the birds can roam at will in approved fashion.

The stock seen here from first to last was in the best possible condition, and the quality a real pleasant surprise. We expected to see good birds, but were not expecting such general high grade birds in every pen. Entering the breeding house from the shipping room we found four pens mated for cockerels and four for pullets. The first cockerel pen was headed by the first prize Buffalo cock, a bird of rare quality in shape and color; he shows plainly his breeding quality. His mates were evidently selected with the greatest care; next to type and color the head points impressed us most favorably. Next was the first Philadelphia cockerel, which was hatched from Mr. Riley's eggs and which bird Mr. Riley had the good fortune to purchase at the late Philadelphia show. He is also a wonder in color and barring, with excellent form. His mates, seven pullets, were alike and the equal of any seen. Next was the first Williamsport cockerel. A bird of rare beauty, grandly barred, with a most exquisite shade of color and barring. His mates were six grand hens with extra heads and strong color. The next pen was headed by the second Buffalo cockerel, a grand male in every section, and to him were mated hens of Mr. Riley's best. Mr. Riley can surely look with hope to these matings, and from their blood lines as told us we are assured results will be had here.

The four pullet matings came next. The first pen was headed by a pullet bred cockerel of rare form and size, mated to hens that were all winners and of Mr. Riley's best blood line. The next pen contained a cockerel equally as good in every way as the one in the pen just described and to him were mated hens and pullets of rare quality. The next pen was headed by a cockerel bred from Mr. Riley's grand hen "Thelma," first hen at Buffalo and a hen which I consider the equal of any I have handled this year. This cockerel was one that I had to look at twice; he certainly is a remarkable pullet breeder, and Mr. Riley must certainly have results from this pen. The next pen was also headed by a cockerel out of another of Mr. Riley's best hens. He was good to look at, barring very narrow, and with a color that is most desirable. He was mated to females of a bright, snappy color. In all these pullet mating pens

That Will Hatch

Prize winners I can supply you, and at prices that you can afford to pay for good stock. I guarantee satisfaction in every particular. Send for my new up-to-date catalogue.

Wm. H. Hoover, Barred Rock Specialist, R. 2, Box 4, Polo, Ill.

there were two features that strongly impressed us: they were the shapes and the beautiful wings. It is plain to see that Mr. Riley fully understands the value of good wings, and that his work along these lines has been successful.

In the two other breeding houses we found many birds of equal merit headed by cockerels of grand quality. It was evident that quality alone was wanted here. There are no fillings in any of the pens; all were carefully made and are worthy of the reputation Mr. Riley has made as a breeder of Barred Plymouth Rocks.

We here saw and again handled "Patti," Mr. Riley's famous first prize pullet at Philadelphia of four years ago. It is a satisfaction to meet with the old time winners. She is still a beauty and in shade of color compares most favorably with our best of this day. Her shape is also of the best, with a very fine wing. Mr. Riley has a favorite in her, for, as he well said, "She has made good in show room and breeding yard." Her characteristics are plainly shown in several of the females that have won highest honors at this season's shows.

Our visit, though short, to Mr. Riley's home was greatly enjoyed by us both, for the grand collection of Barred Plymouth Rocks seen and the amount of chicken talk we got away with. Mr. Riley's special interests are in his poultry. He is a thorough fancier and his greatest concern is to have pleased customers. Mr. Riley's catalogue will give all other information.

GROVE HILL POULTRY YARDS, WALTHAM, MASS.

Elsewhere in this issue is shown photo engravings of two of Grove Hill's famous winning males—"Champion Intruder," the New York 1909 champion Barred Plymouth Rock male, and one of his sons, with pedigree of this line. Here can be seen the value of line breeding, for while records of individuals are worth consideration, the records of winning lines are doubly valuable. These results effectively eliminate the questions of chance bred birds, for they have been bred along lines that have for years produced New York show winners, and if there is such a thing as "Like producing like" or improvement, then we can safely look for it in this mode of breeding.

These breeders have given the Barred Rock world many specimens of the greatest merit, and their line has characteristics of their own, well worth considering. Most prominent is their style and vigor, which are closely followed by clean, even color and narrow barring. These desirable points are requirements of our best show birds, and when had go a long ways in placing them prominent winners.

At the 1910 New York show, and in one of the best classes of Barred Rocks ever brought together, Grove Hill won first prize cock and shape special male with a grand strong barred of greatest merit. They also won first prize, color special and champion male on cockerel. We handled this bird and simply could not find a particle of foreign color in him, and placed him the unquestioned champion of the year. H. P. Schwab.

A really good illustration must be pertinent to the advertising matter; in fact, it should be an argument in itself.

GOOD TO KNOW

by C.W. Zimmer

This department is open to all readers and advertisers in the central territory and they are invited to send in all poultry news items that come to their attention. Address C. W. Zimmer, central representative, Ft. Wayne, Ind.

H. T. Marshall, of Sheridan, Ill., R. R. 53, called at our office lately. Mr. Marshall breeds S. C. Reds exclusively and reports his surplus stock all sold, but he has several fine pens mated for the egg trade.

* * *

If you breed White Rocks or White Wyandottes, the ad of Rockandotte Farm, R. 3, Southboro, Mass., will interest you. Mr. W. R. and Mrs. S. H. Graves breed the kind in both these varieties that won at Madison Square and Boston. See their ad. elsewhere.

* * *

The Single Comb Brown Leghorn when bred to perfection is a beautiful bird. This is the way they are bred by W. H. Wiebke, Box P. 348, Ft. Wayne, Ind. See his ad. elsewhere.

* * *

We are informed that J. M. Williams & Co., Box B, North Adams, Mich., were the first breeders to advertise Orpingtons in this country, having carried an ad. in American Poultry Journal over ten years ago. They still breed Single Comb Buffs and Rases and Single Comb Whites. They have some fine pens mated for the

egg trade. Send for their mating list, it's free.

* * *

If you want Indian Runner Duck eggs, the Frogdale Poultry Farm, French Lick, Ind., can supply you.

* * *

Secretary Campbell attended the Indianapolis show and twenty-eight new members were added to the American Poultry Association. Let the good work go on.

* * *

What is "Dustyne"? Why it is a dust bath and absorbent material. When given chickens to dust in it rids them of lice and when used on the dropping boards it absorbs the moisture and ammonia, keeping your hen house dry and your birds healthy. What's more, it's cheap. Better send for circular. Address Poultry Dust Bath Co., Box M, Whiting, Ind.

* * *

The best thing we can tell you this month is that most breeders (particularly those who advertise in American Poultry Journal) report an exceptionally good business. Most of them say stock

all sold, have more egg orders booked than ever before. Truly there is a general interest being taken in poultry. Better raise all you possibly can, for the demand for stock this fall is sure to exceed the supply. A word to the wise.

* * *

Peter Hurt of Buff Leghorn fame, from Thornton, Ind., was at the Indianapolis show and as usual wore that smile that won't come off. After the smoke had cleared away he still wore it. Well, yes, he won his share of the ribbons and some of the other winners were "Hurt Strain."

* * *

Mr. G. Earl Hoover, Matthew, Ind., breeder of Barred Rocks, showed a grand pen at Indianapolis, Ind., where in a hot class he captured fourth place. Mr. Hoover breeds Rocks of high quality.

* * *

Have you seen the ad of Rockandotte Farm, Southboro, Mass., in this issue? They breed White Rocks and White Wyandottes that win year after year at Madison Square Garden and Boston.

* * *

If you want Indian Runner duck eggs the Frogdale Poultry Farm, French Lick, Ind., can supply you.

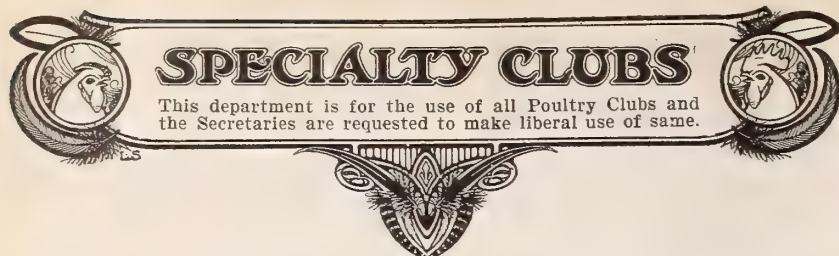

—o—

AN OMISSION.

In the report of the New York show in our February issue we failed to give credit to Glenn H. Burgott, Eden, N. Y., on his winning of 1st and 3d hen in the Buff Wyandotte class.

COLUMBIAN WYANDOTTES. NEW YORK WINNERS, OWNED BY A. C. HAWKINS, LOCK BOX 25, LANCASTER, MASSACHUSETTS

This department is for the use of all Poultry Clubs and the Secretaries are requested to make liberal use of same.

NOTICE TO R. C. BLACK MINORCA BREEDERS.

The sixth annual meeting of the International Rose Comb Black Minorca Club was held in Madison Square Garden, New York, December 29, 1909. The meeting was well attended. The secretary's report showed a gain of thirty-seven new members during the past year, and the club affairs are in good condition. The present show season marked a great increase in the number of entries of Rose Comb Black Minorcas, classes of fifty or more being quite common. The club offered specials at more than 400 shows during the past season.

George H. Northup, who had served as secretary and treasurer of the club since it was organized and who has now retired from the Minorca business, had announced that he would decline to serve longer in this capacity. Hence the election of officers was looked forward to with interest and resulted as follows: T. A. McKittrick, Hudson, N. Y., president; T. A. Faulds, London, Ont., vice-president; Lloyd C. Mishler, North Manchester, Ind., secretary-treasurer. Thomas C. Samuels, Nanticoke, Pa.; H. A. Keister, Bangor, Mich.; J. G. Yates, Spickard, Mo., and Dr. L. P. Holbrook, Olympia, Wash., were ap-

pointed members of the board of directors.

Applicants for membership who send \$2 in payment for membership and first year's dues will be credited with membership to July, 1911. Send to the secretary for application blanks. Copy of club catalogue furnished on request.

PARTRIDGE WYANDOTTE CLUB OF AMERICA.

The annual meeting and exhibit of this club for 1909 was held with Boston Poultry Association, Mechanics' building, January 11 and 15, and annual meeting at Boston, January 13, 1910.

The following officers were elected for 1910: President, M. H. Coffin, Whitinsville, Mass.; first vice-president, Dr. C. M. Baskerville, Mt. Pleasant, Mich.; second vice-president, W. A. Doolittle, Saberta, Kan.; third vice-president, J. D. Clark, M. D., Abington, Conn.; auditors, George V. Fletcher, Belmont, Mass.; W. C. Fuller, Norwood, Mass.; secretary-treasurer, H. R. Hildreth, Worcester, Mass. C. A. Ballou, Worcester, Mass., was chosen by vote of club to judge the next annual exhibit of club, which was decided to be held in connection with Boston show.

The following indorsed by the club as club judges and recommended by it to

all show associations: T. W. Rogers, Brockton, Mass.; M. H. Coffin, Whitinsville, Mass.; W. A. Doolittle, Saberta, Kan.; W. S. Macklum, Detroit, Mich.

The club voted to issue a catalogue this year, and all breeders of this variety are cordially invited to join the club.

Address all applications for membership, etc., to the secretary-treasurer.

Two dollars is the fee—one for admission and one for first year's dues.

H. R. Hildreth, Secretary-Treasurer.
Worcester, Mass.

AMERICAN POLISH CLUB.

The annual meeting of the American Polish Club was held in Mechanics' Hall, Boston, January 12, at 2 p. m., and the following officers were elected for the ensuing year:

William McNeil, London, Canada, president; Glenn Brown, Mt. Gilead, O., general vice-president; Geo. W. Trent, secretary and treasurer, Wilmette, Ill.; Frank L. Andrews, assistant secretary, Fall River, Mass.

As a result of this annual meeting, which was held during the week of the Boston show, there was an unusually large exhibit of Polish, the new president having entered 72, and every variety of Polish was well represented.

It was voted that the next annual meeting should be held west of Pittsburgh, and that the poultry association offering the best inducements would be favored. Correspondence on this subject should be sent to the secretary.

The membership fee in this club is only \$1 and all persons interested in Polish should join the club and participate in the advantages it offers to its members.

Send for application blanks to George

ORPINGTONS

Buff, Black and White

this honor. My stock of sale birds in Buffs, Blacks and Whites is complete. Can furnish you breeding birds at as low a figure as any breeder can supply, quality considered. But remember, when you buy of me you get line bred birds that are properly mated—a most important feature for which I make no extra charge. If you want to win or produce winners for the largest shows of the United States or Canada, write me; I have the birds. Make clear your requirements when writing.

Eggs: \$5, \$10 and \$15 per 15 from Special Matings, Including My Winners

G. S. BYERS ORPINGTON SPECIALIST ELEVEN YEARS **HAZELRIGG, INDIANA, U. S. A.**

WOLVERINE STRAIN WHITE PLY. ROCKS

Have won highest honors at Boston, Chicago, Detroit, Indianapolis, Toledo, etc. They made a clean sweep of all first prizes at Sherwood in 1903, Detroit S. Show in 1905, Grand Rapids in 1906, Toledo in 1907, Detroit S. Show in 1909. They are acknowledged to be one of the best strains of White Plymouth Rocks.

My breeding pens never contained such uniformly high grade stock as they do today. My new mating list, originally illustrated, tells all about them. This, and my regular 36-page

illustrated catalogue containing useful information, list of winnings, etc., etc., free, if you send two 2c stamps to cover cost of mailing. If you want to hatch your winners for next season, do not overlook me when placing your orders for eggs. I have the stock, the experience and the desire to do the right thing by my customers, and would appreciate the opportunity to show you.

LYMAN H. HILL
Station 1, Jackson, Mich.

W. Trent, secretary and treasurer, Wilmette, Ill.

AMERICAN HOUDAN CLUB.

At the recent election of the American Houdan Club the following officers were elected for the ensuing year:

President, John T. Heizer, Columbus, O.; vice-president, John Baber, Lawson, Mo.; secretary-treasurer, James Abernethy, West Pembroke, Me. Executive committee: Dr. George W. Taylor, Orleans, Ind.; Rev. C. E. Petersen, Bridgton, Me.; C. E. Arnold, Babylon, L. I., N. Y.

The club has made a very large gain in membership during the past year and is working to further the interests of the Houdan and for the welfare of every breeder of this grand old breed, which is once more rapidly coming to the front.

A new club catalogue is about to be issued, and it will be to the advantage of every breeder of Houdans, whether a member of the club or not, to write the secretary and get information as to what the club is doing, and what plans it is making to bring the Houdan more prominently before the public.

Jas. Abernethy, Secretary-Treasurer.
West Pembroke, Me.

BLACK ORPINGTON CLUB NOTICE.

The 1910 club catalogue is just off the press and is a very great improvement over any previous catalogue.

The edition is twice as large as that of last year and contains the names of many more members. In every way the catalogue is an improvement over any previous effort.

The catalogue contains the names of 250 breeders of Black Orpingtons who are in good standing. Some names having been dropped during the year.

All breeders of Black Orpingtons who do business on a high plane are invited to become members of the club. The dues are \$1 per year and entitle members to compete for club medals, cups, etc., at all the shows.

The club catalogue is sent free to members, to others the price is 10 cents, by the secretary.

Milton W. Brown, Secretary.
Sta. L, Cincinnati, O.

AMERICAN BLACK MINORCA CLUB.

The fifteenth annual meeting of the American Black Minorca Club was held January 1, 1910, Madison Square Garden, New York. The following officers were elected for the ensuing year: President, Hon. J. P. Hilldorfer, Allegheny, Pa.; vice-president, R. H. Armstrong, Richmond Hill, L. I. N. Y.; secretary and treasurer, Frank McGrann, Lancaster, Pa. Directors: W. F. Lindenberg, Fort Wayne, Ind.; P. S. Klee, Blauvelt, N. Y.; Henry Dunne, Toronto, Canada; O. E. Remsen, Annapolis, Md. A large list of new members were elected and the affairs of the club are in excellent condition.

CLUB NOTICE.

Notice to judges of Rose Comb White Minorcas; also of all breeders of this variety: Will you kindly write the club secretary, stating your opinion as to whether this variety is worthy of a place in the standard. They have been bred for nine years and are being shown at all principal shows, large classes and fine specimens being shown. Breeders are invited to send \$1 and join the National Rose Comb White Minorca Club. Fred Alger, Secretary.

Waukau, Wis.

S. C. BROWN LEGHORN CLUB.

American S. C. Brown Leghorn Club catalogue for 1910 will be ready for distribution March 1. It will contain

much valuable information on the "Browns," and should be in the hands of every breeder of this popular variety. Be sure and send for catalogue, also join the club. Annual dues, \$1. Address E. W. Staebler, secretary, West Park, O.

NATIONAL BLACK LANGSHAN CLUB.

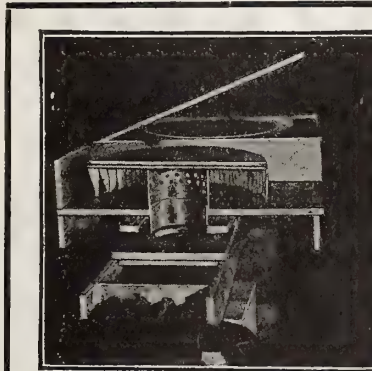

The National Black Langshan Club has just published their 1910 catalogue, which will be sent to all who request it. M. S. Barker, Secretary.

Thorntown, Ind.

JACKSON'S WHITE ORPINGTONS.

In writing up the report of the New York show for our February issue, the reporter through oversight did not make mention of the magnificent display of White Orpingtons made by Lawrence Jackson, of Haysville, Pa. At this show Mr. Jackson won third hen and second pullet, which we consider was a remarkably good record when the class that was represented there is taken into consideration. This winning, together with his winning at the late Chicago show, places Mr. Jackson in the front rank of breeders of this variety.

If you didn't increase your space this month better do so next month and get a piece of the egg business. There are plenty of buyers if you attract their attention.

INVESTIGATE THE CANDEE HOT WATER BROODER SYSTEM

The Hot Water Heater is fifteen times cheaper than oil lamps for fuel. The Temperature is automatically controlled by the heat of the water. Temperature always what you want. At all stages, "Healthy Heat Makes Healthy Chicks."

This illustration gives a partial view. Our free catalog fully describes the features that make this system the best on the market. Write today.

Candee Hot Water Brooder Co.
Box A : : DeWitt, New York

40 BREEDING YARDS OF SINGLE COMB BUFF LEGHORNS

The largest Buff breeder in the world. My birds are bred to lay. Ten pullets in 1908 averaged 222½ eggs. Each bird mated in my 40 pens is a show bird and I have over 500 of them that are the pick of over 4,000 raised last year. In 1908 I won most of the ribbons at Hamilton and the great Cincinnati show, and 2 silver cups for best display. In 1909, at Hamilton, 1st cock, 2d hen, 2d and 3d cockerel, 2d and 4th pullet, 2d pen and special for best colored male in show. The great St. Louis show, 1909, 2d cock, 2d pen, 3d pullet, 5th cockerel. Chicago, 1909, 3d pen; showing at the above three shows at the same time. Dayton, 1910, 1st and 2d hen, 1st and 2d cockerel, 1st and 2d cock, 1st, 2d, 3d and 4th pullet, 1st pen, four club ribbons and silver cup for best display in Mediterranean class. Columbus, 1910, 1st cock, 5th cockerel, 2d pullet, 2d hen, 1st pen. Cleveland, 1910, 3d cock, 5th pullet, 1st pen. Indianapolis, 1910, 2d cockerel, 2d pullet, 4th cock. Toledo, 1910, 1st hen, 2d and 3d cockerel, 1st, 2d and 3d pullet, 1st pen. I have over 900 birds for sale and running 17 250-egg incubators and can furnish day-old chicks at \$20 per 100; eggs, \$2 to \$10 per 15, and \$10 per 100. Write me if you want good stock or eggs.

F. S. SMITH, BOX C & D, HAMILTON, OHIO

SHEPPARD'S FAMOUS ANCONAS THE WORLD'S ::: BEST :::

Have won three times as many First Prizes and Silver Cups, four times as many Special Ribbons, as all Ancona breeders together, in both Single and Rose Comb classes, in the great national 1910 meeting of the International Ancona Club. For four consecutive years my birds have won four times as many first and second prizes at the big Madison Square Garden show as all my competitors combined. Have won first at Dairy Show, London, England, and many firsts at Cleveland. My birds are not only noted as prize-winners, but are famous for being such heavy winter layers. A flock of Sheppard's Famous Anconas has laid the wonderful average of 256 eggs for each hen for year. Can furnish you with hatching eggs that will produce prize-winning and heavy laying stock. Rose or Single Comb. Circular free. One splendid English bull dog, 9 mos., old for \$25.

H. Cecil Sheppard : IMPORTER EXPORTER BREEDER : Box M, Berea, Ohio
President International Ancona Club

DILLON & BELL WIN

All varieties at Chicago Great Mid-West Show, December, 1909; Cincinnati, Ohio, Show, December, 1909; Youngstown, Ohio, State Branch A. P. A. Show, January, 1910; Boston, Mass., 1910 Show, and Indianapolis, 1910, Show. We breed Golden White and Columbian Wyandottes, Rose and Single Comb R. I. Red and Single Comb Buff Orpingtons. Farm raised stock for sale. Egg orders booked now; \$1.50 to \$5 per 15. List of winnings and matings free. Write your wants to

Dillon & Bell, 4106 Colerain Ave., Cincinnati, Ohio

Barred Plymouth Rocks and S. C. White Leghorns

No better stock to be obtained than are in my yards this season and their record at the leading shows proves this assertion. I guarantee satisfaction. Write me for prices and particulars.

Elden E. Cooley : Frenchtown, New Jersey

Bennett's Red Pyle Games

THE KIND WITH YELLOW LEGS. I won 1st cock, 2d hen, Madison Square Garden; 1st cockerel, 1st pullet, Buffalo, N. Y.; 1st cockerel, 1st pullet, 1st hen at Pittsburg, Pa., and every place shown. I have six grand pens. Heavy layers, good setters and best of all for table stock all out. Eggs, \$5 per 15, as long as I can fill the orders. Get some real fancy chickens.

Henry Bennett :- Brown, W. Va.

Hanlon's Buff Leghorns

Produce the winners. They have won the best prizes for years past. Lamons old strain pure. Choice show and breeding birds for sale. Two cocks and five hens of very fine Salmon Faverolles for sale at a bargain. Write for prices.

PHILIP HANLON, JR. :: WATERTOWN, NEW YORK

COLUMBIAN WYANDOTTES

True in type and color. On exhibits at three large shows this season, my birds have won ten first prizes, including first hen at Madison Square Garden, in the hottest kind of competition. I shall breed ten matings of high class birds this year, from which I offer eggs for hatching same as I use for myself. Mating list cheerfully mailed for the asking.

Dr. C. J. Andruss, Canandaigua, New York

EVERGOLDS

now stand on the highest pinnacle of excellence, as proven by this year's winnings. The most notable being in the National Meet American Buff Wyandotte Club, practically all noted breeders from ocean to ocean competing. **BEST DISPLAY** in this Terrific Battle of the Giants, is the last word. Evergold Buff Wyandottes are best. Circular.

Feather Fine Farm : Gerald Williams : Wellington, Ohio

GREYSTONE WHITE ROCKS

win by a mile at Madison Square Garden, at five shows 1905-1910, won 12 out of 25 first (more than double nearest competitor), 3 out of 5 best displays, 3 out of 5 best cock, hen, cockerel, pullet and pen, 5 out of 8 champions (five times as many as any other exhibitor), 5 out of 8 shape specials. Eggs, \$5, \$10 and \$15 per 15.

Greystone Poultry Farm, F. H. Davey, Mgr., Yonkers, N. Y.

S. C. Reds

Two fine pens containing my winners mated for the egg trade. Pen 1 headed by fine Red Raven cockerel from Zimmer mated to select pullets, \$5.00 per 13. Pen 2 headed by cockerel in cut mated to choice pullets, \$3.00 per 15, \$5.00 per 30. Pen 3, \$3.50 per 50, \$6.00 per 100. Fair hatch guaranteed. Circular free.

H. T. Marshall, R. R. No. 53, Sheridan, Illinois

Brown's Exhibition Barred Rocks

Winners at the leading shows in Illinois, 1st and 2d cock; 1st and 4th hen, Downer's Grove, Ill., Jan. 13-15, 1910. 1st and 2d cock, 1st hen, Mendota, Ill., Jan. 25-29, 1910. 1st cock, 2d, 3d, 4th hen, 1st cockerel, 2d, 3d pullet, 1st pen, Dixon, Ill., Dec. 28-31, 1909. Am now booking orders for eggs from the finest matings ever put together at \$3.00 and \$5.00 per 15. Write for mating list and list of winnings.

EDWARD BROWN
R. R. 37 :: Mendota, Illinois

A. E. MARTZ, ARCADIA, IND., BUFF ORPINGTON SPECIALIST.

Mr. Martz, who makes a specialty of breeding high class Buff Orpingtons, is prettily located on the edge of the town of Arcadia, which is located on the Indiana Union Traction line and Lake Erie & Western railroad. His residence is a large dwelling, with plenty of shade trees around it, having a nicely kept lawn, which in summer sets the place off to good advantage. The place consists of six acres of well fenced land. Cleanliness prevails everywhere. The buildings are all well painted and everything is kept as neat as a pin. The buildings consist of five houses 14x20 feet, in which are two pens of birds, making ten pens of spe-

M. S. GARDNER.

It is with much regret that we announce the death of M. S. Gardner, who on February 8 was stricken with appendicitis and did not survive the operation which was performed on him that day.

Mr. Gardner has been prominent in

the poultry world for a number of years and during the past few years has been closely identified with the field and editorial work of Reliable Poultry Journal, in which capacity he has made a host of friends from the Atlantic to the Pacific who will be greatly shocked to learn of his sudden death.

cial mated birds. These houses are all well built, being double walled with building paper between. All yards are boarded up to prevent the males from fighting, and all houses have eave spouts to catch the water, which is conducted into a sewer system, therefore affording perfect drainage. All houses are provided with drop doors, which are closed every day. Trap nests are used throughout in the pens, every hen being provided nests, and only good layers are permitted to remain in the breeding pens, which pen is provided with a large grass range and has plenty of shade.

Mr. Martz has been a Buff Orpington breeder for the past seven years, and was elected president of the Buff Orpington Club at Kansas City this winter. This honor was well merited by

Mr. Martz, and as he devotes his exclusive time to his poultry business, he has time and is capable of filling the office.

Mr. Martz by many years of careful mating and breeding has built up a flock of Buff Orpingtons second to none, as is proven by the fact that he has been winning in the premium shows for many years past and his winnings at Indianapolis in 1909, which was the Buff Orpington Club meeting, a hot class of birds was therefore brought out, and he won more ribbons than all other competitors combined, winning five silver cups. At the Chicago show, December, 1909, he won first cockerel, second and third cock, fifth hen and first pen. Cash special for four best specialties, and four silver cups, winning more cash prizes than any other exhibitor. All of these prize winners are to be found in his several pens, which are mated to produce best results. He also has two large pens made up for incubator eggs. At the time we visited the birds were certainly shell ing out in goodly numbers, for in the incubator cellar we saw fully one thousand eggs, and Mr. Martz had just shipped four hundred eggs that morning. They had about 175 young chicks out, and four hundred eggs being incubated, so he expects to raise a fine bunch of youngsters which will be ready for the winners at the fall fairs and early winter shows. Quality and cleanliness are always to be found on Mr. Martz's breeding plant, which suggests a good fancier's plant.

Mr. and Mrs. Martz both devote their time to looking after the many details that make it so thoroughly a success. The eggs are gathered in baskets, and

are placed on the small end in boxes of bran, each being labeled with the pen from which they were gathered. The temperature is maintained close to 50 degrees by the use of the gas burner. Nothing is kept in this cellar but eggs, and it is perfectly clean and sweet.

The eggs are first packed in the regular shipping boxes, and then packed in boxes with excelsior around them. Safe arrival of all eggs is guaranteed. So, many satisfied customers and other people order eggs from Mr. Martz. He issues a 52-page catalogue, which contains valuable information on the Buff Orpingtons in general, also his system of trap nests and breeding. It contains some 28 illustrations of his prize winners, and several views of the plant. All breeders of Buff Orpingtons will find this very interesting and will do well to send to A. E. Martz, Box C, Arcadia, Ind., for it. His ads appear regularly in the A. P. J.

THREE CHEERS FOR THE WYANDOTTES.

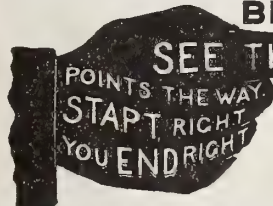

In the September number of the American Poultry Journal we read with interest and, may I add, indignation the article by Dr. H. F. Ballard on "Does

It Pay to Buy Eggs for Hatching?" Now, we have a great respect for the medical profession in general, but when it comes to their opinion on the different breed of chickens we believe they are courting a protest, for "opposition is the life of trade." Now, we are, in a modest way, building up a profitable little business with—dare I mention it?—the despised White Wyandotte hen. When we got down to the bitter denunciation of the Wyandotte hens righteous indignation arose, hence the taking up of our pen in defense.

We have had Wyandottes for several years, and better-natured chickens I do not ask to see. I have had many breeds in the past, not all pure-bloods, though, except the Cochins. (Tears are not far distant when we read what we have missed by not having them.) I have something good to say for them all. I have had various breeds of hens pick their chicks to death, but I never thought it was because they were of a certain kind. Let us always be a fair judge. One writer says he gives chicks to the hens with the most sense. His judgment, according to his own statement, fell far from the mark in two instances at least. Mrs. W. Elzie Scott.

Denver, Hancock County, Ill.

BREEDERS MAGIC EGG TESTER

shows the strongest hatching eggs BEFORE incubation. Think of the saving! Thoroughly advertised and tried last year. 12,000 now in use. **Uncomparable testimonials.** "Strongest germs in eggs testing 'xx'."—SEILER. How do your eggs test? Send for one and find out. Use the Tester now at our risk and for sixty days after the first hatch is off. If not desired, money refunded. A boy can test 10 per minute. Sent prepaid, complete, with newest methods of incubation, on receipt of \$2.00.

MAGIC EGG TESTER WORKS, Buffalo, N. Y. and Bridgeburg, Canada.

EGGS - EGGS - EGGS

Bickerdike's White Rocks Are Bred For Egg Production and Have Trap-Nest Records Up to 240 Per Year

Our breeding yards this season contain such birds as these: 1st Pen, Illinois State Fair, 1909; 1st Pen, Missouri State Show, at St. Louis, 1909; 1st Cockerel, Illinois State Fair, 1909; 1st Cock, Illinois State Fair, 1909; 1st Pullet, Illinois State Fair, 1909; 1st Cock, Illinois State Show, 1909; 1st Pullet, Illinois State Show, 1909; 1st Cock, Missouri State Show, 1908; 1st Hen, Missouri State Show, 1908; 1st Cockerel, Decatur, 1907; 1st Pullet, Illinois State Fair, 1907; 1st Hen, Effingham, 1907; 1st Cockerel, Effingham, 1907; 1st Pullet, Effingham, 1907; 1st Cockerel, Farina, 1907; 1st Pullet, Farina, 1908, and many others of like quality. We were never in so good position to supply good quality in eggs for hatching. Eight grand breeding yards containing all the above winners. Eggs from all yards as they run, only \$5.00 per 15. Place your order early. Order from this ad or ask for our spring circular. It's Free.

Choice breeding stock for sale. Remember, our White Rocks are pedigreed and a Written Pedigree goes with every bird. We can give the individual blood lines back of every egg.

J. A. Bickerdike : Box A : Millersville, Illinois

SPRATT'S CUP

Awarded at the great St. Louis Show, December, 1909, by Spratt's Patent (America) Ltd. for the best male bird hatched in 1909, reared, fed, or put into show condition on Spratt's Poultry Food. This Sterling Silver Cup was won by the cockerel heading our 1st pen at St. Louis; 5,250 birds in the show.

SUBSCRIPTION DEPARTMENT

Well, what are you going to do about it. The pen of birds you want can be had for a little of your spare time. Let us know what variety you desire.

You say you'd rather have an incubator or brooder at this season of the year. We'll give you one if you so desire for only a few minutes of your time each day during the month of March. Read our most generous offer on page 328-329 of this issue.

I'll tell you what else we do—we give you free a copy of our great book, "Origin and History of All Breeds of Poultry," which contains the colored illustrations of 198 birds, for just about one half-hour of your time tonight. A complete description of this grand book can be found on page 337.

You cannot afford to overlook this offer if you are interested in poultry and if you desire to add some new blood to your flock, increase your plant or enlarge your library.

Mr. J. H. Jackson, the prominent White Wyandotte breeder of Hudson, Mass., was successful last year in winning \$200 cash as his prize for obtaining subscriptions to American Poultry Journal. He wrote us the following letter upon receipt of his \$200 check:

American Poultry Journal Pub. Co.,
Chicago, Ill.

Gentlemen: Please accept my thanks for your promptness in sending me the check for \$200, my prize in your subscription contest. It was gratefully received and well worth working for.

I made up my mind to take this up after the contest started and feel that getting your journal into the hands of beginners is bound to make fanciers.

Wishing your journal continued success, I remain,
J. H. Jackson.

If well known breeders like Mr. Jackson find it worth their time and trouble, we feel that we are offering something worth looking into by every reader.

Mr. Jackson's birds have won prizes at the most prominent shows during the past 12 years and his ad, appearing on page 321 of this issue, will give you somewhat of an idea of what kind of a breeder he is. Those who were interested in the January contest and who were successful in winning fowls and incubators are: Arthur S. Johnson, Montclair, N. J.—he selected a \$20 Prairie State incubator; W. S. Dunbar, of St. Albans, Vt., a \$15 pen of fowls, and L. W. Ranker, of Tiffin, Ohio, who selected two Cycle Hatchers for his. Other satisfied agents express their gratification as follows:

Mt. Vernon, O., R. D. 6, Jan. 26, '10.
American Poultry Journal,

Dear Sirs: I received the trio of Single Comb White Orpingtons from C. S. Byers, Hazelrig, Ind., which was awarded me as ninth prize in your fall contest, and am very well pleased with them, and I thank the American Poul-

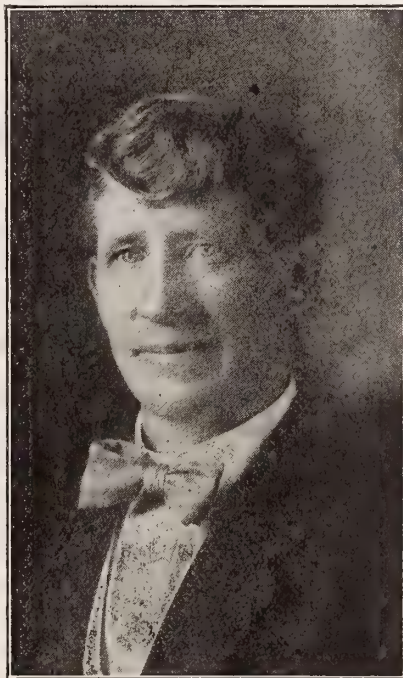

try Journal people for their fairness to me and thank Mr. Byers for his good selection and prompt shipment.

Yours truly,

A. E. Boyd.

Smithfield, O., Jan. 31, 1910.
American Poultry Journal,
Chicago, Ill.

Dear Sirs: I am pleased to acknowledge the receipt of the gold watch, being the 18th premium in your fall of 1909 prize contest. Thanking you for your courteous treatment and wishing

J. H. JACKSON

the American Poultry Journal a successful future, I am yours truly,
John Galbraith.

Collins, Wis., Jan. 26, 1910.
American Poultry Journal,
Chicago, Ill.

Gentlemen: Yours of the 15th came duly to hand. I was surprised to hear that I was awarded the 28th prize, which is a bone cutter, and I'm very much obliged.

I am well pleased to say that the American Poultry Journal Publishing Company has treated me fair and square in all cases, and I remain, yours very truly,
Louis Lemke.

Wadsworth, O., Jan. 14, 1910.
American Poultry Journal Pub. Co.,
Chicago, Ill.

Gentlemen: I wish to thank you for the prize I won in your subscription contest for the fall of 1909, which is

a twenty-year gold watch. My friends tell me it was worth working for. All the subscribers I got are well pleased with the Journal, and I am satisfied with the watch.

My treatment was fair and cordial in the contest, and I will keep right on trying to get subscriptions for the best poultry Journal published.

Yours respectfully,

Oscar C. Nicodemus,
Wadsworth, Ohio.

Brookside, N. J., Jan. 24, '10.
American Poultry Journal,

Gentlemen: Kindly pardon my long delay in answering yours of the 15th. I am somewhat surprised to hear that I am the winner of the 22nd prize in your last contest, which is a bone cutter. I thank you very much for same and also for other premiums received at different times during the contest. I am a breeder of the S. C. Buff Orpingtons, and have had quite some experience with them, but I find the American Poultry Journal has enlightened me a great deal more about the breeding of chickens and is one of the best poultry papers I ever studied. All subscribers that I have received are well pleased and are breeders of poultry. I am somewhat sure they will patronize advertisers who advertise in the American Poultry Journal. I found it was no hardship to secure subscribers after they once saw the Journal.

And I would of gotten more subscribers if my occupation had of allowed me to do so. But I stand ready to do whatever I can for the American Poultry Journal in the future.

Very respectfully yours,

S. A. Haines,
Brookside, Norris Co., N. J.

HAVE YOU NOTICED?

You can get one year's subscription to American Poultry Journal, American Poultry Advocate, Poultry Item, and Commercial Poultry Journal, all four, for \$1. This is a \$2 value and you should take advantage of it at once.

Renewals will be entered from the date your present subscription expires. Send all subscriptions to American Poultry Journal Publishing Company, Chicago, Ill.

THREE FOR THREE QUARTERS.

That's what you get when you order our Big Three combination—American Poultry Journal, Western Poultry Journal, and Farm Poultry. A \$1.50 value for 75 cents—all three journals for one year. Send your renewal now to American Poultry Journal Publishing Company, 358 Dearborn street, Chicago, Ill.

We lead, others follow.

NOTES ON SPRINGFIELD, ILL. SHOW.

THE Sixteenth Annual Show of the Illinois State Poultry Association, held January 3-8, at Springfield, was a decided success in every way but that of attendance. It was held in the fine State Arsenal Building, one of the best lighted show rooms we have been in this winter. It was attractively cooped by the Empire Cooping Company. The admission was free, but either the weather or lack of interest kept the public away. There were 113 exhibits and about 1,000 birds. In many classes the competition was keen, and any ribbon well worth the winning. The judging was acceptably done by Messrs. Pierce, McCord, Kimmer and Fite.

At the annual meeting of the association, held Wednesday night, the following officers were elected for 1910:

President, George A. Heyl, Washington; vice president, W. H. Shaw, Canton; secretary, O. L. McCord, Danville; treasurer, J. A. Leland, Springfield; superintendent, A. L. Moore, Bloomington.

Executive committee: J. J. Klein, Macon; H. C. Wilhite, Greenfield; W. O. Chase, Hillsboro; T. S. McCoy, Golconda; John L. Waddell, Decatur.

Barred Rocks were a hot class, W. H. Shaw, Canton, winning first cockerel on a bird exceptionally good in type and color. Mr. Shaw is an old breeder and exhibitor with many wins to his credit, the week before having landed first cockerel, second and fifth cock and first and fifth display yard at the Canton show in a good class. Mr. Shaw breeds the cockerel line exclusively. His winnings speak for his quality.

White Rocks were a good strong class. W. E. Jones, Millersville, won

first and third cockerel, first and second pullet, and first pen with extra good quality. One of the best hens the writer has seen this winter won second for J. L. Rafferty, of Canton, who also had an unusually good pullet that failed of a place only through being a bit out of condition. The week before Mr. Rafferty won first pullet and first cockerel at Canton, and his birds suffered somewhat through over-showing. In good condition they would be hard to beat.

In Single Comb Buff Orpingtons, Chas. C. Miller, Atlanta, Ill., showed two remarkably good birds, winning first and second in a strong class. He also won third pullet and second pen and first display, showing consistently good quality in both sexes. In Black Orpingtons he showed some extra typical birds, winning on them first, second, third and fourth, and second cockerel. In blacks Mr. Miller won

POULTRYMEN MAKE BIG MONEY GROWING ASPARAGUS BY THE FRENCH METHOD OF INTENSIVE CULTIVATION

You can double the price and double the profit. Do not wait three years after you start your asparagus bed before cutting; cut it at the end of four or six weeks by our method.

FORCING ASPARAGUS HAS HAD A THOROUGH TRY-OUT IN THIS COUNTRY. The reliable and successful method had its beginning in France. A French merchant, upon retiring from business, removed to the outskirts of Paris, where he devoted his energies to vegetable growing, giving particular attention to Asparagus Culture. It is his successful method of forcing that is related in our book. Every one knows the big profits in asparagus. By this method you double the profits; you do not need a greenhouse or hotbed.

This book will be sent postpaid, with flexible cover, for \$1.00. The Library edition, \$1.25. Postoffice money order, bank check or registered letter.

Albert S. Dietzman, 682 Fourth Ave., Louisville, Kentucky

INTENSIVE CULTIVATION IS THE MOST PROFITABLE METHOD OF VEGETABLE GROWING. It produces the best crops and the earliest. Getting to market first with the earliest vegetables brings the advanced price. Our book is the only practical treatise in this country on the French method of intensive cultivation. Besides the story of asparagus forcing, the book gives all the principal methods that allow the working of the smallest amount of land, with the largest financial returns.

BUFF AND WHITE ORPINGTONS

THE OLDEST SPECIALTY BREEDERS IN THE UNITED STATES

OUR SHOW RECORD on Buffs at Madison Square Garden is unequalled—winning Silver Cup for best display, showing only 9 birds and having 7 points more than our nearest competitor. In same show also won handsome Silver Cup for Best Cockerel. Our winnings at Chicago, where we won more firsts than all competitors, cannot be equalled.

Can there be any question where you should order your stock and eggs?

OUR MATINGS in Buffs and Whites are the finest we ever owned and with our long line of show producers in the past convince us winning specimens will be produced. Send for free mating list. We are quoting special prices to close out some grand breeding cockerels at this time. \$10 to \$15 gets a grand bird. This is your opportunity. We breed for quality, health, vigor, and egg production. Write us your wants. Mention American Poultry Journal.

J. M. Williams & Co., Box B, No. Adams, Mich.

second and fourth hen at the big St. Louis Show, so readers may know that he has the quality.

In Single Comb White Leghorns, Robert D. Parmenter, Knoxville, Ill., practically made a clean sweep, and the class was a good one, too. He took first and second cock; first second and third cockerel; first, second and third hen; first, second and third pullet, and first pen. Such a winning with his previous show record stamps Mr. Parmenter as one of the leading breeders of this variety in the country. His first cockerel was far in advance of the usual winning birds seen at this winter's big shows, and undoubtedly will produce, with his sire to second him, blue ribbon quality for Mr. Parmenter egg customers. Allen J. Coe, of Springfield, won fourth cockerel and fourth hen on two good specimens.

H. Cregar, Forrest Park, Ill., won three firsts and two seconds on five Single Comb Buff Leghorns that would be hard to criticise in any particular. Their Golden Rod strain is rapidly obtaining a leading position.

In R. C. Brown Leghorns, W. O. Chase, Hillsboro, Ill., took everything in sight. His birds are always found among the winners. In S. C. Black Minorca, Mr. Chase won first cock, first and third hen; second and third cockerel; first and second pullet; first and second pen. In Rose Combs he won first pullet; second and fourth hen. Mr. Chase was a good winner at St. Louis, has consistent quality all through his flock, and we believe that he is producing some of the best Black Minorcas in the country today.

J. S. Bales, of Springfield, by winning second cockerel, second and third pullet; third hen and first pen in this strong class of R. C. Black Minorcas has made an enviable name for himself as a breeder of this variety. He won first yard display also. Mr. Bales was a St. Louis winner, taking fourth and fifth pullet in the strong class there, as well as first, second, third pullet, second cockerel, and first pen at the Illinois State Fair, 1909.

Charles H. Ring.

THE IMPRESSIONS I RECEIVED DURING A FEW HOURS' VISIT WITH ERNEST KELLER- STRASS.

I was on my way to Enid, Okla., and being late in Kansas City, having missed my train, I found I had some ten hours to wait, so I availed myself of this opportunity to go out and see the Kellerstrass Farm and the home of Peggy. I was cordially received by Mr. Kellerstrass and son and spent some very pleasant hours with them. I shall not attempt to write up the farm, but will tell you a few of the impressions which I received during my conversation with them.

First, I would like to say the farm is beautifully located on a hill, a grand view is to be had over the surrounding country for miles around. This view makes one feel good just to know that he is living, and we know that these beautiful surroundings would be conducive to that rest, contentment and happiness which we found here, this could not be bought with dollars and cents. This impression was made

stronger by the beautiful home and well kept surroundings, including the aviary of pheasants and an artificial lake. In our conversation with Mr. Kellerstrass and son we were at once impressed that the poultry business with them was a business and was handled along business lines, business methods and systems being employed which would be bound to prevent any leaks and make the same profitable and a success in every way.

In our many talks with people about Mr. Kellerstrass and Peggy, the hen that really laid the "Golden Eggs," the question often came up "could any one chicken possibly be worth \$10,000.00? Could such a bird be a profitable investment at such a price?" and other questions along these lines. During our visit we asked Mr. Kellerstrass a number of questions, and we can honestly say that there is no doubt in our mind but that Peggy has been a profitable investment to Mr. Kellerstrass even at the value of \$10,000.00.

A few of the facts as to why we came to this conclusion are these: We absolutely know that Mr. Kellerstrass actually returned \$5,800.00 last year to people who sent to him for eggs, and he was not in position to fill their orders, having actually sold more eggs even at the high price which he asked for them than he could supply. We absolutely know that he sold 1,024 eggs at \$2.00 each, or a total of \$2,048.00 for 1,024 eggs. Then, again, Mr. Kellerstrass is now nearly sold out of stock, especially on the class of birds which he can afford to sell for less than \$50.00 a trio, and he tells us that this year he raised three times as many birds as last year,

Owen Farms' Eggs For Hatching

from Buff Orpingtons

Black Orpingtons

White Orpingtons

White Wyandottes

Barred Ply. Rocks

White Ply. Rocks

Eggs for Hatching

This is the important matter before all of us from this time until the whole hatching season is over. Owen Farms has taken a departure this year and we feel that it should be explained fully, so that every one who runs may read and thoroughly understand what we are doing and why we are doing it.

In the first place, the writer has a large interest in the success of the poultry business in the United States, an uncommon desire to see it grow and prosper. Each one who writes Owen Farms, either for information, advice, price on stock or eggs, becomes to a certain extent an acquaintance of both Mr. Owen, the Proprietor, and Mr. Delano, the Manager, and we feel a personal interest in them. I have carefully gone over our business of the last few years and I have come to the following conclusion, that nineteen people out of twenty cannot afford to pay \$20 a sitting for the best eggs that Owen Farms can produce. Having \$20 pens, which we would allow the customers who could afford this price to entirely monopolize to the entire exclusion of the other nineteen

out of the twenty, seemed to us not to reflect and express that intimate, close interest which we have in each and every enthusiastic fancier.

No One Excluded From the Possibility of Growing the Best Birds of the Year

We therefore decided that we would list our pens just as we always have, describing the matings carefully and mating only our very best birds, limiting our mating considerably, and that we would have one uniform price, giving everybody a square deal and taking eggs from the pens in such a manner that every one who bought eggs of us should have the undoubted possibility and probability of raising some of the finest chicks of the year. To the man who could pay \$20 for a sitting this method does not work to his disadvantage as he might at first suppose. If, for instance, he was buying two sittings at \$20 a sitting he would pay us \$40 and get thirty eggs, according to our methods of last year. This year he may purchase of us for \$50 one hundred eggs and among that hundred eggs he would receive probably as many as thirty eggs from the matings that we have heretofore listed at \$20 per sitting. He gets, therefore, in addition to what he would have received last year great possibilities in the balance of the eggs, for I can assure each and every customer that we will not have a single mating that will not produce birds of remarkable quality.

We do not pose as philanthropists in this matter, but so long as the writer, Mr. Owen, lives and continues in the poultry business, the fair interest of our customers shall be our first consideration.

To state it clearly just what you can do with Owen Farms this year in eggs for hatching I would say that you may receive from any of our varieties:

Owen Farms

Wm. Barry Owen, Prop.
Maurice F. Delano, Mgr.

Box A, Vineyard Haven, Mass.

but, on the other hand, he sold four times as much stock this year in October as last October, five times as much stock this November as last November. Then, again, Mr. Kellerstrass says he has had over 900 inquiries for eggs since August 20, 1909, and his average of mail per days is 250 to 350 letters. In view of these facts and the prominence which Peggy has created, particularly from an advertising standpoint, we were forced to come to the conclusion that Peggy was indeed a very valuable and profitable investment for Mr. Kellerstrass even at \$10,000.00.

Mr. Kellerstrass certainly has put brains into his business and has made the biggest success yet on record in fancy poultry. If some more of our breeders would do likewise there is plenty of business awaiting them. However, the poultry business requires careful attention in all of its details to make it a great success, but the most important of all is the fact that you must advertise. You must first have quality and the stock that justifies it, and then you must advertise, and advertise extensively, like Mr. Kellerstrass has been doing, if you wish to make the most possible profit out of the business; therefore, we would advise you to "take heed and do likewise." C. W. Zimmer.

AN EGG LAYING CONTEST IN OHIO.

F. J. Stamm, of the River Home Poultry Yard, Perrysburg, Ohio, corresponds with the Ohio Agricultural Experiment Station relative to starting an egg laying contest under the supervision of that station. We give below a copy

of the correspondence and suggest that our readers take up the proposition and correspond with Mr. Stamm and get the contest under way at an early date.

River Home Poultry Yards,
Perrysburg, Ohio, Jan. 6, 1910.
Ohio Agricultural Experiment Station,
Poultry Department,
Wooster, Ohio.

Gentlemen:—There is, as you know, a very great deal of discussion going on upon the subject of the relative egg production of the different breeds of chickens. All kinds of claims are made by breeders for their respective varieties or strains and some very extravagant statements are made upon this subject.

The principal difficulty with all of these statements is the fact that there is no official record of the number of eggs laid by any hen, or any number of hens, with the exception of some records in foreign countries, and perhaps a very few old records in this country. We do not refer, of course, to records made at state experimental stations, but are referring to statements made by individual breeders.

It seems to us that the matter is of such importance and has reached that stage that the poultry raisers are entitled to have some official and authentic record on the subject.

We believe that the best way to settle the matter is to have a laying contest conducted under the management of a state experimental station. This would prevent any claim being made that the contest was unfair and would settle this much mooted question in a way that could not be questioned.

We assume that the state has not

made an appropriation which would enable you to carry on such a contest at the expense of the state and therefore propose that you take charge of such a contest and that the breeders entering their birds pay the expense. We do not know what this expense would amount to, but so far as we are concerned we stand ready to contribute toward the expense at the rate of \$100 per pen.

We will enter a pen of our Light Brahmas and also a pen of our Barred Plymouth Rocks and pay \$200 toward the expense of the contest. The contest should be conducted under such rules as you would promulgate, and among these rules should be the following conditions:

1. The contest should last for one year.

2. The eggs should be counted and also weighed, and all publications of results should give both the number and weight of the eggs.

3. Automatic feeders and exercisers should be used for feeding all grain, if the contestant so requests. We will furnish free of charge the automatic feeders and exercisers for the contest. We have demonstrated that they increase the normal egg production from 15 to 20 per cent, and we should want them used in our pens, but this would be optional as to other contestants.

4. Results should be made public on the first of each month of the number and weight of eggs laid during the preceding month.

Of course you would promulgate any other rules that you should deem proper.

If this suggestion meets with your approval we will undertake to give this

Owen Farms' Eggs For Hatching

10 Eggs for.....\$ 7.50	14 Eggs for..... 10.50
11 Eggs for..... 8.25	15 Eggs for..... 11.25
12 Eggs for..... 9.00	50 Eggs for 60c each, or. 30.00
13 Eggs for..... 9.75	100 Eggs for 50c each, or. 50.00

Every egg will be marked with the number of the pen and the variety from which it is taken, and by comparing it carefully with our mating list you will see just what you are getting, and that we shall give the same satisfaction in results that we have heretofore we are positive, for already we are hatching from our eggs with great satisfaction as to fertility and hatch.

We guarantee three eggs out of four to be fertile, and where the number is an odd number and cannot be divided by four we shall give our customers the benefit of the extra egg.

We advise early booking of orders, for this allows shipment to be made at the time you wish them, and in some of our varieties particularly the number of the pens to be mated is somewhat limited and you are likely to be disappointed if you put off your orders too long.

We shall continue to pack them with the extreme care that we have used heretofore and can assure our customers that they can order eggs fearlessly from any point in this country or Canada, as our reports have been extremely favorable from eggs shipped to the extreme North and South and to the extreme West.

Express Charges on All Original Orders for Eggs for Hatching Prepaid to Points in the United States or Canada

This is not the first time that Owen Farms has proposed something which is an innovation. Among other things they were the first to introduce to the poultry world stock guaranteed to win at any show in America.

In adopting this very broad proposition for the benefit of their

customers they are acting with care and a knowledge of just what it means, both to themselves and to their customers, and they have no hesitation in doing it. As almost every one well knows, express rates can be made better if made at the point of shipment, and particularly when paid in advance. We know how much the express will cost us; you do not know how much the express will cost you. We believe that this step that we are taking is the greatest step that was ever taken in the poultry world for the protection and benefit of the customers of any one particular farm.

Mating List

Our mating list for 1910 is all ready and is yours for the asking. Our matings are as carefully described as in years gone by, and that you ought to receive one whether you purchase eggs of us or not I confidently believe. A postal card naming the variety you are interested in will bring it with the least possible delay. Do you not owe it to yourself to carefully read our mating list before you buy eggs this year?

Breeding Stock

We can now give you a wonderfully good lot of young birds that have come on and developed since our showing at New York and Boston. Just at this time we are in a splendid position to furnish our customers with really wonderful quality in males and mated trios and pens for breeding purposes. Our matings are made and we will sell any bird on our place not included in these matings. This year we are selling eggs for hatching only at one price, those from our best pens; which have been reduced in numbers. Consequently, we have more first-class birds to sell than ever before at this time of year. If you need a grand male bird to head your finest pen or if you wish to start in one of our varieties with a trio or pen mated for the best possible results and having the best blood lines in the world, write and ask us what we can do for you. We cannot tell you what we have unless we hear from you and know that you want to hear from us.

Owen Farms Wm. Barry Owen, Prop.
Maurice F. Delano, Mgr. **Box A, Vineyard Haven, Mass.**

HENRY'S PART. WYANDOTTES

have been winners at Chicago, Minneapolis, St. Paul, and wherever shown. My record for the asking. Some stock for sale. Grandest matings ever for 1910. Eggs, \$3 and \$5 per 15. Correspondence promptly and cheerfully answered.

EARL HENRY, Box A, Albert Lea, Minnesota

Buff, Black and White Orpingtons and S. C. Rhode Island Reds

The verdict has been rendered—that our matings were correct. 92 prize winners in five 1909-10 shows. More National and State show winners in our pens than on any other farm in Michigan. This takes quality, size, type, color. Let us tell you more in our mating list. Send for it.

Valley Poultry Farm : Galesburg, Michigan

S. C. Buff and Black Orpingtons

Winners 1909-1910 at Boston, Providence, Worcester, Branford, Meriden, Middletown and Bridgeport; the leading shows of New England. I will sell eggs this season from pens composed of all prize-winners at \$5 and \$10 per 15, and guarantee you get what you order. Let me make you one of my satisfied customers. A few extra male birds at \$5 each. Some winners, reasonable.

A typical "Aristocrat." The type of this pullet has attracted world-wide attention.

Champion S. C. Red Pullet

At the New York State Meet of R. I. Red Club, Buffalo, 1910. The great international show. This pullet won 1st, both color and shape specials and the championship over all winners, both combs, declared to have practically perfect type and color. I won, in all, 10 prizes on 11 entries. At the Ohio State Meet, Youngstown, I won 17 prizes on 14 entries. State cup, two other cups and gold specials. At the National Meet of Red Club, Chicago, December, 1909, I won 4 prizes on 8 entries. Mating list describing new system free. Catalog with photos of birds, showing best type in the world, 4c stamps.

Ira M. Crowther, Box A, Willoughby, Ohio
HOME OF "ARISTOCRATS"

letter and your reply thereto proper publicity in the leading poultry journals, and have no doubt but that the principal breeders of the leading varieties throughout the country will be glad to enter birds and join in the expense.

No doubt if sufficient number would enter the expense per pen would not be excessive.

We would be very glad to hear from you as early as possible with any suggestions that you may have to make and also, if possible, an estimate as to the probable cost of such a contest.

Yours very truly,

RIVER HOME POULTRY YARDS,
By F. J. Stamm, Manager.

Ohio Agricultural Experiment Station,
Wooster, Ohio, Jan. 17, 1910.

Mr. F. J. Stamm,
Perrysburg, Ohio.

Dear Sir:—Your letter of January 6th has been received during my absence from the station. This station would gladly conduct an egg laying contest, providing sufficient number of Ohio poultrymen will enter contesting birds, so as to make the contest worth while and contribute sufficient funds to cover the cost of the test. With a large number of pens the cost would, of course, be much lower than if only a few pens were entered. It should, with ten or more pens, surely be no higher than the amount you offer to pay per pen.

I should be glad to have a description of the feeder you mention. It would probably be best not to insist upon its use in an egg laying contest—other poultrymen might have devices that they consider superior, and with a number of different feeding devices, the contest would not be an egg laying contest more than a test of feeding devices. The station should define a rational plan of feeding and management, and then treat all pens absolutely alike. Of course it might be that all would willingly use this device.

It would require some little time to perfect plans for this work and if Ohio poultrymen would care to have it done I should be glad to have sufficient time to have all preparations made before any birds are sent in.

Assuring you that we shall be glad to do all we can to further interest in poultry matters, and that we shall be glad to hear from you further concerning this interesting proposition, I am,

Yours truly,

B. E. Carmichael,
Chief in Animal Husbandry.

River Home Poultry Yards,
Perrysburg, O., Jan. 20, 1910.

B. E. Carmichael, Chief, Department
Animal Husbandry, Ohio Agricultural Experiment Station, Wooster, Ohio.

Dear Sir: We have your favor of the 17th inst.

We have no doubt but that all of the contestants will be only too glad to have Automatic feeders used in their pens. However, if any of them should object, we will not insist upon this as a condition. We only suggested it for the reason as stated in our former letter, that hens will lay from 15 to 20 per cent more eggs where the Automatic feeders are used and we are sure that all of the contestants would want their hens to lay as many eggs as possible.

We shall take the matter up at once

with other poultrymen and in the poultry publications and will ask them to write us or write you direct on the subject. We think, however, that the contest should not be confined to Ohio poultrymen, but should be a general contest in which any breeder in the United States might enter one or more pens in the contest. There should be a large number of pens entered, the more the better, because it would be more of a test and also would make the expense less to each contestant. We do not think there will be any difficulty in getting at least twenty pens entered, and there may be fifty if the breeders who are talking about their "200-egg strain" and their "laying strains" mean business and want to show that they can make good.

As above suggested, we will push the matter and if anything occurs to you in the meantime we would be glad to hear from you further.

The poultry industry is the most important industry in this country, and it is too bad that our state has not taken up the subject more vigorously than it has. We have been contemplating writing Governor Harmon and also to the members of the legislature asking them to see that a liberal appropriation is made to be devoted to the investigation and furtherance of this great industry. It is a subject in which every man, woman and child in the state is interested, either directly or indirectly, as a producer or a consumer.

In compliance with your request we are mailing you some literature in regard to the Automatic feeder.

Yours very truly,
River Home Poultry Yards,
By F. J. Stamm, Manager.

SECRETARY CAMPBELL'S VIEWS.

Editor's Note.—At the New York show we asked Secretary Campbell to write us his opinion of New York and some other views on the poultry conditions, and we are pleased to publish his letter as received.

Madison Square Garden. Quality, excellent and numbers equal to any previous exhibition; attendance, good—again places the garden show, for the twenty-first time, in the front rank of the world's greatest poultry exhibitions. It could not be otherwise, with the wonderful and efficient system in which all things are conducted; every detail is well nigh perfect, and the feeling of the visitors, the exhibitors and judges is that nothing but strictly business principles will be tolerated. Justice to all; special privilege to none.

Good-will, harmony and true sportsmanship is in the atmosphere everywhere. Nothing escapes the eagle-eye of Secretary Crawford. His gentle, yet firm, manner of doing things is appreciated.

The quality of birds in all classes this year has never been excelled, if equaled. The American Poultry Association was much in evidence; the president officiating as one of the judges; the principal exhibitors being members. The new emblem buttons were in great demand and about one hundred were sold by the secretary, Superintendent Crawford being the first to wear the button.

It was quite evident that the American Poultry Association is in the ascendancy and that it is accomplishing great good.

Progress, Purity and Protection is in

Harvester Strains

S. C. White Leghorns and Columbian Wyandottes

Always layers of large eggs. Twenty eggs from five hens in five days during Feb. 7-12. Always winners of blue. Three firsts, 1 second and 18 specials at A. P. A. show. Send for mating list. Satisfaction guaranteed. Eggs, \$3 and \$1.50, 15.

Chas. C. Wine : : : Route 1, Mt. Sidney, Virginia

the air and the grand old association is gaining in power and prestige.

It is to be hoped that this great show may be continued, if not in Madison Square garden another location equally as good, we believe, will be provided.

The judging in all classes was generally satisfactory. The Barred Plymouth class is usually the strongest, and here the greatest care and best judgment is required.

Judge Schwab was highly commended for his work in placing the awards.

S. T. Campbell.

THE GREAT ILLINOIS STATE SHOW.

The Sixteenth annual exhibition of the Illinois State Poultry Association, which was held in the State Arsenal building, Springfield, Ill., January 3 to 8, 1910, was one of the most successful shows in the history of the State association, it being the second comparison show since the organization. It may be that, in point of number, one or two previous exhibitions have had more birds, but for quality and beauty it was generally conceded by old-time exhibitors and judges the most artistically arranged and best conducted show they had ever attended. The uniform cooping of beautiful new Empire coops, with every row draped to the floor with bunting and each variety of fowls classified, added much to the appearance of the exhibition. Another new feature adopted by the State association was the yard displays, which extended around the entire room, yards consisting of one male and six females.

All of these features will be duplicated at the next exhibit, which will be held the first full week in January, 1911, and many others will be added, such as gold specials and silver cups. Prizes will be awarded to the most scientific mating in the different vari-

eties. A special effort will be made to secure meetings of all the Specialty Clubs and Poultry Institute will be held during the week of the show.

The following list of officers were elected at the annual meeting:

President, George A. Heyl, Washington, Ill.; vice-president, W. H. Shaw, Canton; secretary, O. L. McCord, Danville; treasurer, J. A. Leland, Springfield; superintendent, A. L. Moore, Bloomington.

Executive committee: J. J. Klein, Macon, Ill.; H. C. Wilhite, Greenfield; W. O. Chase, Hillsboro; T. S. McCoy, Springfield, and J. L. Waddell, Decatur.

The above men are all enthusiastic breeders and fanciers and have had wide experience in the conducting of poultry shows. The president, Mr. Heyl, has been a breeder of poultry and Shetland ponies for years and has exhibited at all of the prominent state fairs and exhibitions in the United States. All of the five members of the executive committee are prominent breeders and exhibitors at the leading poultry shows and fairs. The treasurer, J. A. Leland, is prominent among all stock and poultry fanciers in the West, being an exhibitor of sheep, hogs and poultry for many years, and has one of the finest stock farms in the West, and the association feels that its funds are in safe keeping. A. L. Moore, as superintendent, has been tried before and is an old hand at the business, and all poultry fanciers know that birds sent in his care will have the proper attention.

In fact, every effort will be put forth to make the 1911 Illinois State Poultry Show the one big show of the state.

EGGS FOR TESTING.

C. F. Townsend, president of the National Poultry Association, is conducting his second annual test of various

breeds, foods and appliances. These tests cover laying, fecundity, hatching, vitality and maturity; also food values, various appliances, cost and other valuable and interesting points.

The breeds under test this year include Rhode Island Reds, Buff Leghorns, Houdans, Plymouth Rocks and other standard varieties—all fine birds from noted breeders.

Full reports of these tests will be published in our succeeding issues as rapidly as data can be gathered, and complete reports will appear in the Association Year Books.

A few surplus eggs will be furnished at nominal cost to those who will agree to report results in full. This is done to make a test of various methods for packing and shipping eggs to different points. Send stamp for agreement and particulars to C. F. Townsend, Weedsport, N. Y.

MISSOURI STATE SHOW AT KANSAS CITY.

The Missouri State Poultry Show has been located at Kansas City and will be held in Convention Hall, November 28-December 3, 1910. Ernest Kellerstrass, the great White Orpington breeder, offered to furnish the hall to the State Poultry Board and decorate it as no showroom was ever before decorated. The show will be cooped with Empire coops, and you can begin now to get ready for one of the biggest and best shows ever held in the world. Kellerstrass says he wants the Missouri Poultry Board to eclipse any show ever held at any time.

SPECIAL

STOCK at one-quarter to one-half value to close out surplus quick. EGGS. We will book two orders in each county at almost half price, as we want to build up new trade.

"A pleased customer is the best advertisement." We have found this to be true and we do everything in our power to please.

We sell a \$1.50 bird for \$1.50, not \$5, like some I have gotten for \$5. We sell a \$3 or \$5 bird for that money and \$10 to \$25.

If not pleased when you deal with us, let us know and we will return money or do something else to please you, so you and your friends will buy of us year after year. Some nice white birds, scoring 94 to 96 points, for sale cheap. Barred Rocks and Buff Orpingtons, nice ones cheap. We have a great bred-to-lay-and-win strain. Individual records above 260 eggs per year. Pen records above 240. Our birds have won at all the leading shows. Catalogue free. Also one W. W. cockerel, score, 95½ at one-quarter value; 2 W. Rock cockerels, 94¼, one-quarter value.

F. Gage Cutler - R. F. D. 13 - Carthage, Ill.

The Lullaby Brooder

Patent applied for

Makes Chick-Raising Easy

Artificial brooding has never kept pace with the artificial hatching of poultry until the invention of the **LULLABY Brooder**.

Experienced poultrymen pronounce it the most practical brooder ever invented, excelling even the mother hen. It is so simple any novice can successfully operate it. It requires no artificial heat and thus does not affect insurance rates.

The hatching season comes at a time each year when the poultryman is busy from daylight to dark with other work and the chicks are allowed to run their legs off following the old mother hen around, or are housed in poorly ventilated, unsanitary brooders. Thus they frequently get chilled, are often hungry, and altogether get a poor start. Chicks of this kind do not make heavy winter layers.

The **LULLABY Brooder** has wonderfully simplified the rearing of chicks on the farm, the professional poultry plant, or on city lots.

It reduces the amount of attention required to a minimum — just a minute or two night and morning. So simple any novice can successfully operate it. Better than any other brooder, regardless of price.

It Costs Only \$1.50 Delivered

We have such unbounded faith in it, we will allow you to use it for one hatch, and if not satisfactory send it back and we will promptly refund your money.

The theory that range is necessary has been effectively exploded. With proper brooding facilities the chicks will be stronger and sturdier, will grow plumper and begin laying earlier if only limited runs are provided. As layers they will be happier and more prolific, and the eggs sweeter and more salable if no runs whatever are provided.

SPECIAL: Send us the name of your poultry supply dealer and we will send you our Poultry Almanac for 1910 free. It gives expert advice on every detail of poultry raising and should be in the hands of everyone who owns laying hens.

BOX 295

URBAN FARMS, BUFFALO, N. Y.**Black Langshans and White Plymouth Rocks.**

That all the good birds are not stored away in any one section of this great country is evident from a perusal of the poultry journals. Those of our readers who attended the late Buffalo show had the opportunity to see birds of the above varieties that were national winners and as choice specimens as were ever produced or shown. Mr. George Urban, Jr., determined to have the best, now has his pens headed by the following males in Black Langshans: First prize cock at New York, 1910; first prize cock Chicago, December, 1909, and first prize cock Buffalo, 1910. In White Rocks his two best pens are headed by Buffalo champion, first prize cock and gold medal winner for best bird in the show, Buffalo, 1910, and Genesee Chief, first prize cockerel and special for best Plymouth Rock at the Rochester show, 1910. The females are of the same high quality and the matings contain many prominent winners.

The poultry fraternity owes much to Mr. Urban. His interest in the fancy and the breeders are identical, which was clearly proven at the Buffalo show, when the breeders presented him with a handsome silver loving cup as a token of esteem. We wish all our readers could meet this man. You can at least get his mating list, which is furnished on application. Address Urban Farms, Pine Ridge, Station E 22, Buffalo, N. Y.

H. P. Schwab.

IS YOUR OLD WAGON GIVING OUT?

If your wagon is giving out it is altogether likely that the trouble it with the wheels. That is where wagon troubles usually begin. Tires wear out, felloes shrink, spokes work loose and the wheel goes to pieces generally while the running gears are still good.

That is the common experience with wagon users. If it is true in your case, what will you do—make scrap of the old wagon and buy a new one or undertake the job of having the wheels made over?

Let us suggest another very sensible thing to do? More than likely you have been reading in the advertisements of the Electric Wheel Company in this paper about making old wagons over by fitting the running gears with the low, broad-tired, steel wheels which that company makes. If your wheels are going, let us suggest that it is a very good time for you to put the matter to a test. There is no question but that you can have practically a new wagon at a very small cost. You will have the low handy wagon that is everywhere becoming so popular for farm work. But if you want high wheels you can have them in steel, too—anything from 20 to 60 inches. Don't scrap the old wagon. The Electric Wheel Company is at Quincy, Ill. Take the matter up with them by writing. At least, ask them to send you their free book, to tell you something about their steel wheels and handy wagons, and what a set of the wheels would cost. The wheels are guaranteed to fit any wagon.

The Newtown Producing Company, of Newtown, Pa., starts a large ad. with this issue. We are pleased to have with us a firm standing so high in the poultry world. Their plant, one of the finest equipped in the world, is devoted exclusively to S. C. White Leghorns. It comprises fifty-three acres a short ride from Philadelphia and Trenton, N. J. Mr. H. L. Watson, the general manager, is one of the substantial business men of that section and their immense business is being built by according all customers square and honest treatment. Their watchword is a heavy laying strain of exhibition White Leghorns. In this they have succeeded far above their expectations.

All the equipment of this plant is modern in every particular. A new laying house to hold 3,000 breeders has recently been built in a most substantial manner. The incubator cellar holds 10,200 eggs. Twelve thousand breeders have been sold during the past twelve months. They cater to the highest quality of exhibition stock and those willing to pay a fair price can get birds for any competition in the world. Their guarantee is "Money refunded if goods are not as represented or not satisfactory."

Twenty-four pens of their best birds have been mated up, from which eggs will be sold at a very reasonable price. Besides, 2,500 of their best yearling hens have been mated for egg producing flocks. These latter are the same breeding as their twenty-four exhibition pens. No matter what you want, eggs for hatching, baby chicks or breeders, the Newtown Producing Company can fit you out in an intelligent and satisfactory manner. Their baby chick trade is by no means the smallest part of their business.

If interested in high-class White Leghorns write them for a copy of their catalog. The representative of this paper had the pleasure of calling on this firm and can vouch for their high grade business system.

Profits from the poultry yard are dependent simply upon the health and growth of chicks from the day they are hatched to maturity.

Perfectly healthy chicks will grow speedily into broilers and roasters. Perfectly healthy pullets will lay early and often. The only problem, then, is one of insuring perfect health.

To do this the chicks and hens must be provided with those elements of a tonic nature which they were wont to find for themselves in their original wild state, and which they still, in a measure, secure with ample range.

Wilbur's Poultry Tonic has been the favorite for twenty-five years with poultry keepers, because it has proven in practice the claims of its manufacturers—that it is a scientific tonic, providing just what the fowls need without over-stimulating or "forcing" growth or abnormal egg-production, to the injury of the fowls.

The Wilbur Company makes a most liberal offer of free packages, in order to prove the value of their tonic, direct to every poultry keeper. Their introductory premium offers are remarkable, and of such a character as to enlarge the opportunity of the poultry keeper, they depending for their final profit on the continued use of their tonic. The poultryman who has once given the Wilbur Tonic a fair tryout, makes it a daily ration for his flocks in every stage of growth.

For the most liberal introductory offer you have ever had, write today for particulars to Wilbur Stock Food Company, 965 Huron street, Milwaukee, Wis.

Wm. H. Hoover, Polo, Ill., the well known breeder of Barred Plymouth Rocks, has just issued his new 1910 catalogue, which is chuck full of valuable information about this, the greatest American variety. Everyone interested should have a copy and we request our readers to write for one at once and get acquainted with Mr. Hoover, the breeder who knows how to produce Barred Rocks that are up to standard requirements.

If you are troubled with roup or canker in your flock you should try Cura, which prevents roup, canker, gapes, etc. Those who have tried it recommend it very highly. Write to the Cura Chemical Co., Dept. A, Akron, Ohio, for full information and mention American Poultry Journal.

White Faced Black Spanish and Single Comb White Orpingtons are the two varieties bred by the Portage Poultry Yards, Elmore, Ohio. If you are interested write them for full particulars and mention American Poultry Journal.

J. S. HAUPT, FAIRVIEW FARM, Box 110, EASTON, PA.

D. O. BOOTY, CARTHAGE, ILL.

D. O. Booty, one of the most prominent members of the poultry raisers' fraternity in Illinois and Missouri during the past score of years, has lately accepted the position as manager of the extensive poultry farm of F. Gage Cutler, of Carthage, Ill. This strong combination of poultry

experts will now operate Mr. Cutler's farm. He has one of the best poultry farms in Illinois. Mr. Cutler started with the finest combined bred-to-lay-and-win strains of poultry in the United States, and has been breeding them as near perfection as possible for combined winning and laying qualities.

Mr. Cutler has had wonderful success in the breeding of Barred and White Plymouth Rocks, White Wyandottes, Buff Orpingtons, Bronze and Bourbon Red Turkeys, Pekin and Indian Runner Ducks and Toulouse

F. Gage Cutler, Carthage, Ill., one of the prominent poultry fanciers of the West.

Geese. In view of this fact he is disposing of all his other breeds at a sacrifice, and will continue the breeding of the above-named varieties, getting them as near perfection as is possible.

He will no doubt meet with still better success now, as Mr. Booty has had twenty

years of experience with fine poultry and takes charge of Mr. Cutler's yards, as the business has grown to such proportions that Mr. Cutler is unable to attend to both the business department and the breeding properties.

Any fancier desiring the best in stock or eggs from the varieties which Mr. Cutler raises could do no better than to send for his free catalogue. As he is closing out many of his breeds at a low figure, he has a number of fine birds to sell in nearly every variety of poultry raised.

In view of the fact that so many have secured eggs of every variety from him in the past, Mr. Cutler has made arrangements with his friends and neighbors to raise the breeds which he no longer keeps, and he can supply eggs from those yards.

CHANGE IN OWNERSHIP.

White Oak Poultry Farm, Lima, Ohio, which was established by Frank J. Banta, has been sold to Mr. R. H. Gamble, who is an experienced poultryman and comes to us very highly recommended. Mr. Banta had made a wonderful success with his White and Black Orpingtons, and had built up a good trade on them, but owing to the rapid growth of his large manufacturing business was compelled to sell his poultry plant, which is one of the most up-to-date in the state. Mr. Gamble informs us that in addition to S. C. White and Black Orpingtons he has a large number of White Leghorn baby chicks to sell. Our readers are requested to write him for full particulars and mention American Poultry Journal.

A CORRECTION.

In the report of the Chicago show credit was given another exhibitor of winning first and third pens in White Orpingtons, whereas Mr. Carl Byers, Hazelrigg, Ind., won first and third pen, and he reports that he has since purchased the second prize pen of White Orpingtons, and now has in his yards the pens which won first, second and third at the Chicago show.

W. W. Thomas, Anna, Ill., the strawberry plant man, has favored us with a copy of his folder, title of which is "Dollars in Asparagus." This folder will give our readers a great deal of information

on how to make money by raising asparagus. Send for a copy and mention American Poultry Journal.

One of the most artistic and best printed catalogs that has come to our desk this season is that put out by R. C. Caldwell,

Lyndon, O., the baby chicks of quality man. This catalog contains twenty-four pages and cover, printed on heavy enameled paper and profusely illustrated with beautiful half-tones. The cover is printed in three colors and the design thereon is a work of art. Better send for one today

and get acquainted with the man who is up-to-date in this business.

Feb. 21, 1910.

This certifies that I have sold my entire stock of White Orpingtons to W. E. Stanfield, Brookdale Farm, Hillsdale, Mich.

M. P. Pratt.

This places Brookdale Farm in front on White Orpingtons, as this stock, together with the quality already at Brookdale, makes a combination unequalled. The stock is all same breeding, line bred and trap nested for years, which means heavy egg production as well as quality.

W. J. Battles, Akron, Ohio, breeder of White Wyandottes, has a display ad. in this issue. He produces the kind that have size and shape and are absolutely white. He has supplied the winners at some of the large shows this season. Write him for particulars and mention American Poultry Journal.

Are you familiar with the Briggs system of making cheap feed for poultry? If not, you should get his book, "Profits in Poultry Keeping Solved." It tells you how to make feed for 10c a bushel. Write him for circular. A postal will bring it. Address Edgar Briggs, Pleasant Valley, N. Y.

Ira M. Crowther, Willoughby, Ohio, reports that his first prize Rhode Island Red pullet, which won first at the late Buffalo show, was also given shape and color special and the championship over all winners in both campaigns.

At the great International Show, Buffalo, N. Y., Chas. C. Wine, Mt. Sidney, Va., won four prizes on his Barred Rock cockerels. This shows the quality of his stock. He also breeds Single Comb Brown Leghorns of same quality. Write him and mention American Poultry Journal.

Fence users will be pleased with Kitselman Brothers prices—14¢ cents a rod up. See ad in this paper and write them today for free catalogue.

W. A. Kain & Son, Ashtabula, O., are breeders of White Wyandottes of the prize-winning kind. See their ad in this issue and write them for prices and particulars.

A MADISON SQUARE NEW YORK VICTORY

FOR

BRIGHT'S BROWN LEGHORNS BARRED PLYMOUTH ROCKS

At the last New York show our Barred Plymouth Rocks won more prizes and more points than those of any competitor, including the most sought-for prize in the whole realm of poultrydom.

Champion New York Barred Rock Male

and this for the third time in the last four years.

Bright's Brown Leghorns

have been the champions for more than a dozen years. They have made the big wins in big classes. Surely supreme at three world's fairs, at the last Madison Square New York shows, 1909-10. Three firsts!

The best lot of breeders in either line, both males and females of either variety, that we ever had for sale at just right prices.

EGGS from the best matings we ever had, from our N. Y. winners, \$10 to \$25 a setting; from birds closely related of nearly equal merit, \$5 a setting.

Dr. S. R. Harrison, Shelby, Ohio, writes: "Your tablets have saved birds for me that were more than half dead."

THE COLEMAN COMPANY
DESK 4 : : : LEXINGTON, OHIO

LOOK UP DUSTYNE AD IN THIS ISSUE.

If you are in the poultry business to stay you cannot afford to be without Dustyne. If you are raising little chicks you will need Dustyne. Used under the hovers and in brooders and colony houses Dustyne assures the growing chick of freedom from lice, mites and the attendant conditions of disease. Used on dropping boards and under hovers Dustyne promotes a fine sanitary condition. As a dust bath for the grown stock, the fowls free themselves of lice and their houses of mites. At any stage of the business, every month in the year, every week in the month, every day in the week and every one of the twenty-four hours of the day you need Dustyne.

F. S. SMITH.

Mr. F. S. Smith, Hamilton, Ohio, has been in the poultry business for over twenty years and, for the past ten years has devoted his entire time to the production of Single Comb Buff Leghorns. During the past he has exhibited only at his home show, but last year he raised over 4,000 birds and decided to make some of the big shows, which he did with great success. Mr. Smith claims to have the largest Single Comb Buff Leghorn farm in the

world. He has at this writing over 2,500 eggs in incubators and about 300 young chicks and expects to hatch at least 10,000 chicks this season.

Next season he expects to make all the large shows and be on the floor himself.

Mr. Smith is a life member of the A. P. A. and a life member of the Single Comb Buff Leghorn Club, and he comes to us very highly recommended. See his ad in this issue and write him for full particulars about his stock.

A MISSTATEMENT.

In our February issue the statement was made that Mr. F. D. Sutton, of Youngstown, Ohio, had made almost a clean sweep at Youngstown, O., defeating both Chicago and Cincinnati first prize cocks. Mr. M. F. Morris, owner of first prize Chicago cock, informs us that he did not exhibit at Youngstown.

A CORRECTION.

In our February issue appeared two half-tone illustrations of Simmons Bros. Golden Wyandottes, and the inscription stated that they were first prize winners at Chicago in 1909. Our artist made an error in this. It should have been Chicago 1908.

B. E. Darling, Natick, Mass., breeder of Light Brahmas and Single-Comb White Orpingtons, is in a position to help you improve your flock, for he breeds the kind that wins the blue at such shows as Boston, Providence and Brockton. He is prepared to furnish eggs from pens of A 1 quality. Write him for what you want. He will treat you right.

COCHIN BANTAMS—WHITE, BUFF AND BLACK.

My little four-year-old son, George M. Hill, took so much interest in poultry, that in the spring of last year (1908) I purchased for him breeding pens of each of the above varieties of bantams. These were the best of their kinds that I could purchase; most of them coming from Canada, and a number of them being First and Second Prize winners at the great Guelph show of 1907, and the Toronto Exposition of 1908. These birds and some of their progeny were exhibited at the Jackson show (December, 1908), winning a Silver Cup for best display of Whites; a Silver Cup for best display in Buffs, and a Silver Cup for best display in Blacks.

They were also exhibited at the Detroit State Show, January, 1909, winning extremely well in the very hottest competition.

Will mate up two pens in each of the above varieties for the coming season, a circular describing matings to be ready for mailing about March 15th. If interested, a copy will be sent upon request.

The Whites in these pens are exceptionally good in size, shape and toe feathering. The Blacks are fine in size, color, shape and combs.

The Buffs are exceptionally good in color and toe feathering, in addition to being very small and of true Cochin shape.

My son will take care of these bantams and has a bank account already started from proceeds from sales of stock and eggs. I expect that for a few years I will have to take charge of his correspondence and some other details of his business, and have therefore appointed myself as his Manager and Private Secretary. I can bespeak fair and honest treatment from him and expect that some day he will be well and favorably known to a multitude of "chicken cranks."

Lyman H. Hill.

Jackson, Mich.

PANGALOW FARM, INDIANAPOLIS, IND., R. R. 12, BREEDERS OF WHITE WYANDOTTES.

This farm is located seven miles from the border of Indiana on the Ben Harrison Interurban Line. W. R. Patsell, superintendent, who has had a very practical experience, has been lately engaged to take charge, and he reports that he will have eight very fine pens of White Wyandottes, consisting of many prize winning specimens, and will spare a few eggs at reasonable prices. They have a large number of breeding birds yet for sale. Their breeding yards are all arranged on the clean-house plan, and their young stock when about six weeks old have the full range of the large wood lot. They are now running their incubators and intend to hatch a

large number of early chicks, and will be able to take care of early calls for exhibition stock at fall fairs and early winter shows. Their advertisements will be found regularly in the columns of the A. P. J.

"Among our new advertisers we wish to call your attention to that of Gratton & Grafton, East Liverpool, O., breeders of the 'Blacks and Whites'—R. C. Black Minorcas and S. C. White Leghorns. The gentlemen who form this partnership are the originators of the new chinaware trophy cup, which is bound to rapidly take the

place of the old silver cup, but their fowls are just as beautiful and good as the new cups, consequently it is no surprise to find them winning heavily in the 'blue.'

The above is part of a reading notice that appeared in our February issue. We recently received a letter from Mrs. G. G. Goppert, East Liverpool, O., informing us that we were in error when we stated that Gratton & Grafton were the originators of the new chinaware trophy cup and that this cup was originated by George A. Goppert. If we are in error we stand corrected.

In our February issue we made the statement that the first prize Barred Rock cock at St. Louis was bred and owned by Gus A. Lengfelder, Mt. Vernon, Ill. This was an error, as the bird was not bred by Mr. Lengfelder, but purchased by him at the St. Louis show. Also wish to state that Mr. Lengfelder did not state to us that he had bred this bird. Therefore the error was ours. We wish to state, however, that Mr. Lengfelder showed a very nice exhibit at St. Louis and the purchase of this bird will add greatly to the value of his flock.

The S. C. Rhode Island Reds bred in the Cherry Red Poultry Yards, D. E. MacGowan, Proprietor, 1129 College street, Memphis, Tenn., are bred from a long line of prize winners and showed their breeding by winning in four states in 1909. Mating list is now ready. Better send for one and learn how they produce up-to-date Rhode Island Reds in the South. He guarantees fair treatment, as his motto is: "Of a customer make a friend."

H. C. Franklin, Townshend, Vt., breeder of Rose Comb Brown Leghorns, has made a grand record with his birds the past season, and has just issued his 1910 mating list, which tells all about his winnings and his breeding pens for this season. If you want something good in this variety, you should communicate with him and mention American Poultry Journal.

Harmon Bradshaw, Lebanon, Ind., the well known breeder of S. C. White Leghorns, showed 13 of his birds at the late Indianapolis show and won 2d cock, 1st and 2d hen; 1st, 2d and 4th cockerel, 1st and 4th pullet and 1st pen. Every bird he entered won a prize. Send for his free mating list and mention American Poultry Journal.

Edgar G. Simpson, Naperville, Ill., the well known breeder of Barred Plymouth Rocks, has just issued his 1910 mating list, a copy of which will be sent on application. Send for one and mention American Poultry Journal.

Turley & Scobee, Mt. Sterling, Ky., breeders of S. C. White Leghorns, are now prepared to fill your orders for eggs. Write them before placing your order. They guarantee satisfaction and a fair deal.

The 1910 mating list of George L. Buell, Lorain, O., is now ready for mailing. If you are interested in S. C. Rhode Island Reds send for one, and mention American Poultry Journal.

If you want to raise prize winning Barred Plymouth Rocks write George H. Bie, Racine, Wis., for his mating list. He has the kind that win and produce winners.

SPRUCE ROW BARRED ROCKS

The Champions of Canada.....

make a record at the great Buffalo International Show, 1910, by winning 3d cock, 2d hen, 1st cockerel-3d and 5th pullets, 2d pen, championship special for best male in class, best colored male, 2 silver cups, etc. Won at Guelph, Dec., 1909, 2d and 5th cocks, 2d, 3d, 6th and 10th hens, 1st, 2d, 4th and 9th cockerels, 2d, 5th, 7th and 8th pullets, the Dawson special and 18 other special prizes. Your wants have my special care. Mention American Poultry Journal when writing.

I. K. MILLARD, DUNDAS, ONT., CAN.

**EVERGOLD BUFF WYANDOTTES
WIN AT CLEVELAND.**

My winnings at Cleveland were 1st hen, 1st pullet, 2d cockerel, 4th pen, best display, the H. V. Franks silver trophy cup, the Cleveland Fanciers' Club (challenge), silver trophy cup offered by American Buff Wyandotte Club for best cock, hen, cockerel, pullet and pen; the Cleveland Fanciers' Club cup offered to the members of American Buff Wyandotte Club winning the greatest number of points; cash and ribbon special for best female on my 1st hen that was beyond all doubt the best Buff Wyandotte in this the hottest and largest show of Buff Wyandottes ever held (179 birds); twenty Evergolds shown by me here and at the same time fifteen Evergolds shown by me in the Toledo, O., show, which was the Ohio state meet (sixty birds), winning 1st cock, 1st and 2d cockerel, 3d pen, special for best male and A. P. A. medal for best cockerel in American, Asiatic, English and Mediterranean classes. All these thirty-five birds were raised by me except my unplaced Cleveland cock, "Capt. Jack," who won 1st cockerel at Chicago last year, purchased and bred by me the past season. Was elected to National Executive Board, American Buff Wyandotte Club at Cleveland and at Toledo, O., state vice-president; just joined A. P. A. and Cleveland Fanciers' Club. Winnings at Marion, O., November 27-December 1, 1909, 1,234 pullet, 123 cockerel, 134 hen, 1 pen, 8 specials. These winnings should convince you of the high quality of Evergold Buff Wyandottes as we breed them at Feather Fine Farm, Wellington, O., R. R. 3, Gerold Williams, proprietor. Send for circular. My ad appears elsewhere in American Poultry Journal.

**LONGFIELD POULTRY FARM, BOX
321, BLUFFTON, IND., BREED-
ERS OF SINGLE COMB
RHODE ISLAND REDS.**

At the Fort Wayne show the Reds exhibited by the Longfield Poultry Farm were the most important ones in this class. In Single Comb they won first and second cock, second, third and fourth hen and second and third cockerel, first, second, third and fourth pullet, and first pen. In

Rose Combs they won first cockerel, first, second, third and fourth pullet and first pen. They also won special for best display in the American class, and \$25 silver cup for the best display in breeding on variety. The Longfield Poultry Farm are breeders of Rhode Island Reds, and have been among the winners for many years.

First prize S. C. W. Leghorn cockerel, Buffalo, 1907, also winner of shape special at Boston, Mass. Bred and owned by G. L. Wheeler & Son, Penn Yan, N. Y. We be-

lieve this to be one of the best type Leghorns ever produced. Now in his fourth year, he is still a model in form. This line of stock has been carefully bred for sixteen years and have played an important part at several of our greatest shows, including Boston, Buffalo, Baltimore, Rochester, etc., for several years. This line has excellent size, with type, and are pure white. We will tell more of this strain in our next issue. All interested should have their mating list.—H. P. Schwab.

J. H. JACKSON.

J. H. Jackson, Hudson, Mass., breeder of the world's foremost White Wyandottes and first prize winner in our fall subscription contest, has had to hustle to get to the front as a breeder of White Wyandottes. He started in a small way and carried only small display ads, but by persistent effort he has been able to secure customers all over the United States and Canada as well as in many foreign countries. His continuous advertising is what he claims has been the foundation on which he has built his business, and is willing to acknowledge that he could not do business unless he advertised. Mr. Jackson doesn't claim to raise thousands of birds each year, but what he does raise are good, which is proven by the fact that he produces birds good enough to win at Madison Square and other big shows. Mr. Jackson has a host of friends among the fanciers in the East, and no matter whether he wins or loses at a show he is always the same. He is considered a good entertainer and at the last two banquets given by the Boston Poultry Association he has been engaged to entertain the guests with monologue and singing, and in his home town his services in this line are in constant demand.

He has a faculty of making friends and keeping them always, which, in our opinion, is another reason for his success in the poultry business.

This season he has mated up an exceptionally fine lot of breeders and is prepared to do the largest egg business since he started in to breed fancy poultry. See his large ad in the front part of this issue, then write him and get acquainted with the man who knows how to produce White Wyandottes just a little better this year than they were the year before.

SUNSWICK MATING LIST.

The 1910 mating list of the Sunswick Poultry Farm, South Plainfield, N. J., is ready for mailing and if you have not sent for one, better do so now. It gives a full description of their several pens of S. C. Buff, Black and White Orpingtons.

The annual mating list of the Rockandotte Farm, Southboro, Mass., is now ready. Better send for one if you want something extra good in White Wyandottes or White Plymouth Rocks.

REDS

We offer you high class exhibition quality in S. C. Reds and mate our prize winners for best results, backed up by seven years of successful breeding. Eggs from our extra choice matings, \$8 per 15; \$15 per 30; regular matings, \$5. Some fine breeding males yet for sale. Special sale of trios for \$15 and pens at \$20. Write us today.

Odenheimer & Odenheimer : : Lumberton, New Jersey

Andalusians

I have bred Andalusians nine years and in competition at the leading shows have won more firsts than all competitors. At the late Ohio State Show I won 1st cock, 1st and 2d hens, 1st cockerel, 2d and 3d pullet, 1st pen, on six single and one pen entries. Also won silver cup for best pen in Mediterranean class and silver cup for best male bird in Mediterranean, Asiatic and French classes.

R. C. Bantams

I breed both White and Black Rose Comb Bantams and deem it sufficient to call your attention to my winning all firsts at both Chicago and Toledo the same week on Blacks. In Whites I have the same quality. Stock and eggs.

Swiss Chard

Swiss Chard belongs to the beet family, the tops making a wonderful growth and can be cut repeatedly. Poultry is very fond of it. One ounce of seed will drill a 100-foot row and make green food for at least 100 hens. Price of seed, 10c per oz. Order direct from this ad.

Established by Wm. Simpson, Sr.

GEO. M. BENHAM, CANANDAIGUA, N. Y.

Breeder of Barred Plymouth Rocks—A Fancier for Years and Well-Known Winner at Buffalo, Rochester, Etc.

For a great many years Mr. Benham has devoted most of his time to the breeding of Barred Plymouth Rocks, and it is a pleasure to note that his efforts have met with uniform success throughout.

For several years we have seen this line at the shows, and well know their worth. For two years we found them among the best of winners at the Buffalo shows. Another of Mr. Benham's favorite traits has been to exhibit at Rochester and cop a good allowance of the awards there. Other prominent shows have also been made with success, that have placed this line in the very front ranks and have won for Mr. Benham a name as a very careful and successful breeder.

A year ago we enjoyed a visit to his home for a day, the time being pleasantly passed seeing his good chickens and enjoying a breeding talk, which is always of interest to Barred Plymouth Rock breeders. It was in this that we found Mr. Benham's real worth. We have seen his progress, and were greatly pleased with all seen here.

This year it was Mr. Benham's idea not to show, but when the Canandaigua association was organized he was one of the first to respond, and there was nothing to do but to make an exhibit. His winnings here in a class of 101 birds are: 1st and 3d cock; 1st, 2d and 3d hen; 2d and 4th cockerel; 1st and 3d pullet, and 1st, 2d and 3d pens. He was also awarded the cup for best display at the show, besides other specials. See advertisement in this issue.—H. P. Schwab.

A NEW FIRM.

C. W. Zimmer, who has been a prominent breeder of Single Comb R. I. Reds for a number of years past, has entered into a partnership with J. G. Budde, of Oak Park, Ill. Mr. Zimmer has been carefully breeding up his Red Raven strain of R. I. Reds for a number of years past and has several hundred prizes which he won on his birds when he was exhibiting in the show room, and for several years he has been supplying breeders with high class exhibition quality.

The Red Raven strain is well and favorably known throughout the country, and we wish to inform the public that the firm of J. G. Budde & Co., as the new firm will be called, will continue to mate the birds from year to year. They expect to raise at least 2,000 head of young stock which will be for sale next fall and winter.

A limited number of eggs only will be sold from their best matings at \$15 per 15, as they prefer to raise all the birds possible this year, in order to stock their several large farms which will be devoted to producing nothing but Red Raven Reds.

It is the intention of J. G. Budde & Co. to become one of the largest producers of R. I. Reds in the country, and full details of their plans for doing this will be furnished the public later on.

Their ad will appear regularly in the columns of American Poultry Journal and their address is Oak Park, Ill.

F. D. Sutton, Youngstown, Ohio, who has been making a specialty of White Wyandottes and White Orpingtons, who wins his share of the prizes wherever his birds are shown, attended the Cleveland show and purchased a fine White Orpington cockerel, which had won third place. Mr. Sutton is a thorough fancier and is engaging in the poultry business extensively, and if you are in need of stock or eggs in either of these varieties you will do well to correspond with him.

J. W. Simmons and B. W. Chittendon, of the firm of Simmons & Chittendon, Geneva, Ohio, attended the Cleveland show and report that they will have six fine pens of Single Comb Reds containing their Youngstown and other winners, mated for best results, from which they are offering eggs at reasonable prices. Their ad will be found elsewhere in the columns of American Poultry Journal.

One Gallon of Oil For a Hatch

One filling of the lamp; no heat waste; no danger with the

X-RAY INCUBATOR

Thermometer always in sight. Eggs need not be removed during entire hatch. Other incubators require frequent filling and consume three times as much oil as the X-Ray. We absolutely guarantee to hatch 100 chicks with one gallon of oil. The X-Ray controls the flame—burns high or low; generates just enough heat to maintain hatching temperature. Absolutely no waste. Others always use a strong flame and allow the surplus heat to escape.

The X-Ray Heats to Hatching Temperature in 15 Minutes

Others require 6 or 7 hours. Ventilation complete. Simply raise the lid—all hatching fumes rise instantly. The only really different incubator. Enamel-steel-covered; rosewood finish. Glass doors on top; lamp in center; flame control. Write now for free book and know the greatest of all incubators. Address

X-RAY INCUBATOR CO., 1st St., Wayne, Neb.

RHODE ISLAND REDS

The "mortgage-lifting" poultry—now have a book worthy of the breed. This work tells where the Reds came from, gives the standard in full, and contains a wealth of practical facts. It shows the superiority of the Reds as business hens, for fanciers and as the best breed for farmers. Housing, feeding, attention when sick, etc., are discussed in a way that will help every poultryman.

At Last—Real Color Pictures!

In this book for the first time chickens have been pictured true to life. Every picture is from a photograph—a typical bird of each sex by the wonderful new French color photography. No oil painting can surpass these color pictures in beauty, and they are absolutely true to life. Such pictures in colors have been the dream of poultrymen for decades—in my book that dream has come true at last. Each of these color engravings cost over \$100 before a single perfect picture was secured.

HOW TO GET THIS BOOK, FREE. Send me ten 2-cent stamps to help bear the cost of the book—it would sell in the regular way for at least fifty cents, so you'll get a bargain. Each copy contains rebate 20 cents on your first order of me of eggs. When you become a customer, the book has cost you nothing—and until then 20 cents is a trifle compared with its value. Send now—edition is limited; no more can be made within a year! Don't miss it; order today.

Whitewashing Made Easy

You don't have to put in a whole sloppy half-day whitewashing your chicken-house and fences; you can do it easier, cleaner, better and quicker with a

DEMING SPRAY PUMP

This method has put the old way out of business because the wash is forced in—not simply "laid on." It goes into the cracks and strikes the lice and mites. Use the same Pump for spraying your orchard and garden. We make Hand and Power Pumps for all uses. Sold by leading dealers almost everywhere. Ask yours for prices and information. Catalogue free.

THE DEMING COMPANY, 737 Depot St., Salem, O.

WILLIAMS' EXTRACTOR.

This well known poultry remedy is sold by the Williams company, 28 Delaware avenue, Albany, N. Y. For some years back, and, in fact, each year, we have seen at all the leading shows that we have made, including the New York, Boston, Philadelphia, Chicago, Rochester, Detroit, Buffalo and other shows, Mr. Williams, representing his company and selling his popular extractor.

Mr. Williams gave us some information regarding the popularity his remedy has attained, and, great as this is, we were not at all surprised, for we are just one of the thousands that have found his extractor valuable to have around at all times. We have seen testimonials from a great number of our best known breeders and know it to be generally used by them.

Williams' Extractor is sold in 50-cent and \$1 sizes by most of the poultry supply houses, or is mailed on receipt of price by Williams & Co., 28 Delaware avenue, Albany, N. Y.—H. P. Schwab.

George H. Bie, Racine, Wis., the well known Barred Plymouth Rock breeder, has been making a wonderful show record with his birds this season, his latest winning being at Waukesha, Wis., where he entered six birds and won 1st cockerel; 1st, 2d, 4th pullets; 3d hen, and 1st pen. He has bred this strain in line for the past thirteen years and has produced some wonderful specimens. He absolutely guarantees everything to be as represented, or money back. What more can the buyer ask? He still has a few of those choice pullet-bred cockerels to spare. Write him for prices and particulars, and mention American Poultry Journal.

G. B. Smith, North Baltimore, Ohio, breeder of S. C. White and Black Minorcas, reports winning at the Bowling Green fair, where 3,000 birds were shown, six firsts and four seconds on fourteen entries. At Findlay, Ohio, January 10, he won in Whites first and second cockerel, first cock, first and second hen, first and second pullet, first pen. At the late Toledo show he won first and second hen, first pen in Blacks, and in Whites first and second cockerel, first, second and third pullet and first pen. He has some fine birds in Whites for sale and eggs in both varieties. See his ad elsewhere in American Poultry Journal.

H. Cregar & Sons have recently moved from 447 Hannah avenue to Jackson boulevard, Forest Park, Ill., where they have a much larger place and will be able to handle their rapidly growing business with more ease and convenience. They are disposing of all their S. C. White Leghorns and in the future will breed S. C. Buff Leghorns exclusively. Anybody wanting some good S. C. White Leghorns can get a bargain now. Their mating list is now ready for mailing. Write for one. Address H. Cregar & Sons, Forest Park, Ill.

C. E. Ewell, Milan, O., breeder of White Wyandottes, reports a shipment of 36 hens and four cockerels to Bocus Del Toro, Panama. The birds were purchased by the United Fruit Company. This speaks well for the quality of his White Wyandottes.

"ENTERPRISE" BONE, SHELL AND CORN MILL

Just the mill for farmers, poultrymen and all who keep poultry. Cracked grain, ground bone and shell is the proper food to feed to increase the egg production, and with one of these mills you can turn grain and waste materials into food for your poultry.

The "ENTERPRISE" Mill is thoroughly reliable. Runs easily, is strong, durable and doesn't get out of order. Look for the name "ENTERPRISE" on the machine you buy. Mill shown in cut weighs 60 lbs. Grinds DRY bones, Oyster, and other shells. Capacity 1½ bushels of corn per hour.

Illustrated catalogue free. Our famous recipe book, the "ENTERPRISING HOUSEKEEPER," sent anywhere for 4c in stamps.

THE ENTERPRISE MFG. CO., Dept. 33 PHILADELPHIA, PA.

125 Egg Incubator and Brooder For \$10

Why pay more than our price? If ordered together we send both machines for \$10.00, and pay all the freight charges. Hot water, double walls, dead-air space between, double glass doors, copper tanks and boilers, self-regulating. Nursery underneath the egg-tray. Both Incubator and Brooder shipped complete, with thermometers, lamps, egg-testers—all ready to use when you receive them. All machines guaranteed. Incubators are finished in natural colors showing the high grade lumber used—no paint to cover inferior material. If you will compare our machines with others offered at anywhere near our price, we will feel sure of your order. Don't buy until you do this—you'll save money. It pays to investigate the "Wisconsin" before you buy. Send for the free catalog today, or send in your order and save time.

WISCONSIN INCUBATOR CO., Box 50, Racine, Wis.

Wis. Inc. Co. Dear Sirs:—I am well pleased with your incubator. I have been in the poultry business for years and handled all kinds of incubators and there is only one I like as well as yours and that is a high priced machine. My poorest hatch was 128 from 130 eggs; all nice, strong, healthy chicks. WILL PHILLIPS.

Wis. Inc. Co. Dear Sirs:—Received incubator from you last April and had very good success. From the first hatch got 109 chicks from 115 fertile eggs. From the second hatch, 120 chicks from 124 fertile eggs. Am well pleased with the \$10 machines. Will hatch as many as any high priced machine. MRS. HENRY BECKWITH.

CAN YOU MAKE A BOUQUET?

A PRIZE FOR EVERY CORRECT ANSWER!

If you will cut out these eight pieces here illustrated and join them together in their proper places you will have a very beautiful picture showing a collection of flowers suggested by the flower seeds we are giving away. The eight pieces being all the same shape makes this look hard at first, but if you will give your whole attention to it for a few minutes, you will be surprised how easy it is to do this and how fascinating it becomes. If you succeed in correctly joining them together so as to complete the picture, we want you to paste them on a piece of paper and send to us.

Here you have all the Seeds for Your Flower Garden

Ten Varieties

Our Dear Old-Fashioned Favorites

- Poppies
- Nasturtium
- Mignonette
- Bachelor Buttons
- Sweet Alyssum
- Sweet William
- Cosmos
- Calendula
- Candytuft
- Sweet Peas

All Guaranteed True to Name
Cultural Instructions Included

10 Prize Seed Packets Given

To every one who sends us the entire eight pieces pasted together correctly we will award as a prize 10 of our beautiful packages of seeds all as specified above. This is a practical puzzle. After you have cut the pieces out, trimmed them and found out how they go, we want you to paste them on a piece of paper, write your name and address on it and send to us with 4 cents in postage stamps, and, to pay you for your trouble, we will send you these 10 assorted packages of flower seeds. We have a wonderful assortment. When we send you these 10 packages we will also make you another big offer that will surprise and amaze you. Cut out the pieces today and see if you can put them together so as to make the original picture, then send to us with 4 cents in stamps, if you want the valuable seed prize award and want to know what our big surprise offer is. Send answer and 4 cents in stamps to

Do You Want a World's Champion Incubator?

At a recent incubator trial conducted by the Government Poultry Expert at the New Zealand International Exposition, a Reliable Incubator made the World's Hatching Record. When you buy a Reliable Incubator you have the World's Champion Incubator, and made by the House of Quality.

Reliable Incubators have won 648 prizes at international exhibitions and incubator contests in this country and throughout the entire world.

We build incubators different from most makers. We make the whole incubator—everything in our own factory—the largest of its kind in the world.

We have made incubators for 28 years and had years of experience in the poultry business before that, so Reliable Incubators have something more in them than just quality. They have success guaranteed.

You ought to get the "Reliable" book that tells all about incubators—the Reliable Incubators especially. It tells all about poultry raising, too. There isn't any other book like this, and there isn't any other incubator like the Reliable. Don't buy an incubator till you read it.

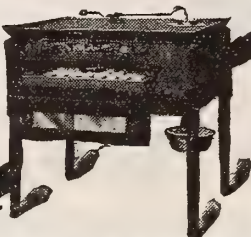

We Want to Sell You

DR. C. J. ANDRUSS, CANANDAIGUA, N. Y.

The Well-Known Breeder of Columbian
Wyandottes—Winner at New York
and Other of Our Best Shows.

In Dr. C. J. Andrus we have undoubtedly one of this country's best known breeders and fanciers, one who has done as much for the strict fancy industry as any other has. He has taken varieties and bred them up to the very highest standard requirements, and his wonderful records made with Black Minorcas and Buff Rocks at New York and elsewhere stand as a monument to this man's ability as a breeder and fancier.

When the Columbian Wyandottes first came out he was one of the first to see in them a coming popular variety, selling all his old-time favorites and giving his every attention to this new breed. How well he has succeeded is yearly shown at New York. Each year he sends down a few to compare, and each year he better his record.

This and other seasons we have handled his birds at the shows and have noted the progress he is making and also his aims in breeding. In this we wish in particular to call attention to the shape of his birds. In this they excel. He has the form and very good color and markings; and now that he can give more attention to color, we look for his further success.

At the late New York show the doctor won first prize hen in the best class ever shown. This hen is in shape and color an ideal one, well to copy after; her wing is as good as we expected to see.

The winnings of Dr. Andrus at the Rochester show included 1st, 2d, 4th cock; 2d and 3d hen; 1st and 4th cockerel; and 1st, 2d, 3d and 5th pullets, and, we believe, all the specials; while at Canandaigua, N. Y., he won 1st, 2d and 3d cock; 1st, 2d and 4th hen; 1st and 3d cockerel; 1st, 3d and 4th pullet, and all specials. At Baltimore, Md., January, 1910, on four entries he won 1st cock, 1st hen, 1st cockerel, 2d pullet and six special prizes.

Here is a record well to have made, and in these well known shows. Dr. Andrus is president and one of the organizers of the Canandaigua association. We have known him for years and are pleased to have him as an advertiser in the American Poultry Journal. The fancy needs more such men and breeders.—H. P. Schwab.

White Feather Poultry Farm, Rocky River, Ohio, H. T. and C. H. Whitney, proprietors, have been breeders of Single Comb White Leghorns for a number of years past, having won first on pen at Cleveland in 1908, and have demonstrated that they can reproduce the quality necessary to win by coming back and capturing the coveted prize again in 1910. Mr. Whitney is a close student of the art of mating his birds to produce the highest quality of Standard Leghorn type, at the same time giving attention to the laying qualities of his fowls, and he has produced not only a strain of birds that are white and have the qualities necessary to win in keen competition such as was found at the Cleveland show, but his trap nest records can prove to you that he has a strain unequalled as egg producers. He has this year mated several pens of extraordinary fine specimens, from which he will sell you eggs that should produce show birds of the highest type. He also has pens from which he will sell incubator eggs at reasonable prices. He guarantees satisfaction, and we suggest if in need of White Leghorns you look up their ad elsewhere in this issue.

Foster & Johnston, Fort Wayne, Ind., breeders of the celebrated Duke of Kent strain of Black Orpingtons, report the following winnings at the late Fort Wayne show: 1st, 2d, 5th cocks; 1st, 5th cockerels; 2d hen; 3d, 4th pullets; 1st pen, and best display of Orpingtons, sixty-four S. C. Black Orpingtons competing. Send a 1-cent stamp for the history of the Black Orpingtons, and mention American Poultry Journal.

George C. Schwegman, Richmond, Ind., makes a specialty of breeding Houdans and S. C. Buff Leghorns and breeds only the best of each variety. He is offering eggs at prices that will attract buyers. Write him today and mention American Poultry Journal.

REAL GALVANIZING.

Undoubtedly the farmers of this country have wasted a great many thousand dollars in recent years on poor wire fence. Many of us have been unable to understand why what seems like a good fence will become utterly useless in such a short time. Our eyes have recently been opened on this question by a little booklet written by an expert on this subject, who shows how in the rush to get rich quick many manufacturers have neglected the fundamentals of good fence building. They have built fences with light uprights, and have used wire that was hardly galvanized at all. Mr. Brown, the author of the book, points out that in true galvanizing the galvanizing compound is not merely washed on the wire like cheaply plated jewelry, but that a chemical action takes place whereby the spelter used for galvanizing becomes a very part of the wire. It is not a simple covering for the wire, but a part of the wire itself. He attributes the long life and durability of the Brown fence to its superior galvanizing and its extra heavy uprights.

We know every one of our readers will be interested in Mr. Brown's little book. Write to the Brown Fence & Wire Company, Cleveland, Ohio, and ask for it. Mention American Poultry Journal.

To the readers of American Poultry Journal to whom the name of O. F. Mitten-dorf, of Lincoln, Ill., may not be familiar, it might be well to state that he has raised thoroughbred poultry for some twenty-five years. Being occupied in the mercantile business, he was able to devote only part of his time to the careful study and breeding of his birds, although he began by selecting Barred Plymouth Rocks as his choice and bred them for some time, he nevertheless took up several other varieties, only to discard them again and go back to what he claims to be the business fowl of the age, and therefore is now devoting his energies and all his time in the Parks and Gowell strains of bred-to-lay Barred Plymouth Rocks. He believes in the useful qualities of his choice as well as the fancy, as few people can afford to raise poultry for looks only. Having disposed of all surplus stock, he has mated up four superb pens of heavy layers for

this season's trade. See his ad elsewhere in this issue and send for circular.

Philip Koehlinger, 1414 East Grand avenue, Fort Wayne, Ind., breeder of Columbian Wyandottes, reports that he has exhibited his birds at several shows this winter, winning as follows: At Kendallville, Ind., January 4 to 10, he won 1st cockerel; 2d cock; 1st, 2d, 3d and 4th pullets; 2d pen. Huntington, Ind., January 18 to 21, he won 1st cockerel; 1st cock; 1st and 4th pullets; 1st pen; special for best display. Fort Wayne, January 25 to 30, he won 1st cock; 1st and 2d cockerels; 2d, 3d and 4th hens; 3d, 4th and 5th pullets; 1st pen; also 3d for best display in American class. Mr. Koehlinger has been breeding high class Columbian Wyandottes for a number of years and has five pens containing his finest specimens and prize winners mated for the egg trade from which he is selling eggs at very reasonable prices and guarantees to please you. His mating list is free for the asking and his ad is to be found elsewhere in the columns of American Poultry Journal.

Mr. W. E. Phillips, Wellington, Ohio, owner of Wellington Red Poultry Farm, who makes a specialty of breeding high class Single and Rose Comb Rhode Island Reds, reports that he has been winning on his stock during the fall and winter and that at the late show at Elyria, Ohio, he won in hot competition on Single Combs second and third cock, second hen, second cockerel, first and second pullet, first pen and special for best display; in Rose Comb he won second and third cockerel, first and third pullets and second pen; no old birds shown. Mr. Phillips' stock not only wins for him, but also in the hands of his customers, and he will have a number of very fine pens mated for the egg trade. He will also sell chicks from his best pens containing stock scoring from 93 to 95, as well as from his general matings. He issues a circular which is free and guarantees satisfaction or money refunded. We advise you to look up his ad elsewhere in this issue.

B. M. Billings, Oberlin, Ohio, breeder of Single and Rose Comb Reds, reports that his stock has never failed to make a good

showing for themselves wherever shown, and that he has won over 150 prizes on his birds during the past five years, having shown at such shows as Cleveland, Toledo and other shows. He won second place on cockerel at the Cleveland show this year on a very fine specimen and is prepared to furnish you eggs from his high class matings which should produce winners for you the coming year. He issues a circular describing his stock and giving hundreds of testimonials from satisfied customers. His circular is free for the asking, and if you contemplate investing in Reds, you will do well to send for it. His ad is to be found elsewhere in the columns of American Poultry Journal.

H. B. Hark, who has been manager of the Hartman Stock Farm, Columbus, Ohio, for the past six years, has accepted a situation with the Sheffield Farm, Glendale, Ohio, where he will assume full charge of the poultry department. They are just starting a new poultry plant on this farm and Mr. Hark informs us that it is to be a "model fanciers' plant" in every particular. Mr. Hark has been a specialist on Partridge Wyandottes for a number of years, having produced some of the finest specimens of this variety in the country, and Partridge Wyandottes and Rhode Island Reds will be the two varieties which will be bred on the Sheffield Farm. Our best wishes go with Mr. Hark.

The Edgedale Poultry Plant, at Wheeling, W. Va., keep winning on their Quality Reds wherever they exhibit. Won at Wheeling and at Smithfield, W. Va., in strong competition. Their birds show the true R. I. Red type and are red to the skin, proving that Mr. Clohan has acquired the proper knowledge in mating. You may get their descriptive price list by mentioning the American Poultry Journal.

Glen H. Richards, Le Grand, Iowa, one of the youngest breeders in the state, in a class of forty entries on poultry judging at the Iowa state contest at Ames won the \$250 pen of Crystal White Orpingtons given by Ernest Kellerstrass. As Mr. Richards was a breeder of Crystal Orpingtons previous to this winning, this adds materially to his already excellent flock.

YES—Count Your Chicks Before They're Hatched" IF you are using the— Tycos Thermometer

The success of an incubator rests with the Thermometer—if your Thermometer is wrong, it means a poor hatch, loss of eggs, loss of time and loss of money. If your Thermometer is a "Tycos" your success is assured, for "Tycos" stands for Temperature Insurance. Therefore, if your incubator is equipped with a "Tycos" Thermometer you can **Count Your Chickens Before They're Hatched**, in spite of the old saying to the contrary.

Thermometers may look alike, but there is a great difference in their quality; and it's this quality that makes Thermometers having the "Tycos" trade mark attached dependable. Although the Thermometer is the smallest part of an incubator, it is the most important. It really is the heart of an incubator, and you know that the heart is the vital organ of the human body. When you buy an incubator see that it is equipped with a "Tycos"

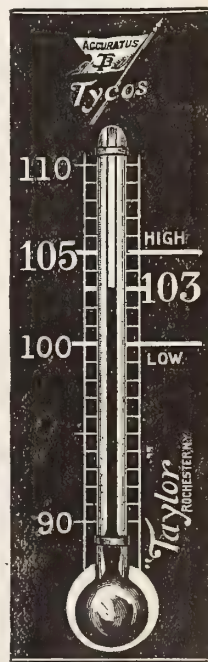

"Tycos" Incubator Thermometers, 75c. each; two for \$1.25.

"Tycos" Incubator Hygrometers, for indicating Moisture (Humidity), each \$1.50.

Send us the make of Incubator you are using and we will send you free our pamphlet

"THERMOMETER FACTS WORTH KNOWING."

Taylor Instrument Companies, Rochester, N. Y.

THE LAKESIDE MAISON DORE COMPANY AT NEW EGYPT, - OCEAN COUNTY, NEW JERSEY.

INCORPORATED UNDER LAWS OF NEW JERSEY—BUILDINGS AND IMPROVEMENTS ARE ALREADY UNDER WAY.

The Object of the Company—To erect a hotel on the lake front of the sixty acres of ground which the company already owns, a 200-room Inn and other buildings. The Cuisine will be furnished by the Poultry and Farm Department, thus assuring the company both the retailer's and wholesaler's profits. Stables, Garage, Ice House, Gas Plant, and other buildings and enterprises that charter covers are being erected.

THE LAKESIDE POULTRY FARM, with housing capacity of 5,000 hens and 12,000 incubating capacity and colony houses for the accommodation of 50,000 chicks. Well established and profitable business of the Glenolden Poultry Yards which had the reputation under the management of Howard L. Davis to be one of the most successful plants in the United States; also the established business of poultry supplies, including Fireless Brooders, Trap Nests, Davis Pemican Powder, Davis Germ-Acid, Davis Head Louse Salve, Davis Moisture Gauge, etc. A farm and orchard will be a valuable asset to the company. The Egyptian Theater is already a grand financial success.

The Prospectus now ready, and contains full particulars, details and objects of the company. Send for one at once.

HOWARD L. DAVIS,
PRESIDENT.
NEW EGYPT, NEW
JERSEY.

THE MAN YOU OUGHT TO KNOW MORE ABOUT.

Getting an interview with a man isn't a difficult proposition as a usual thing, but getting an opportunity for one is a difficult thing—altogether different.

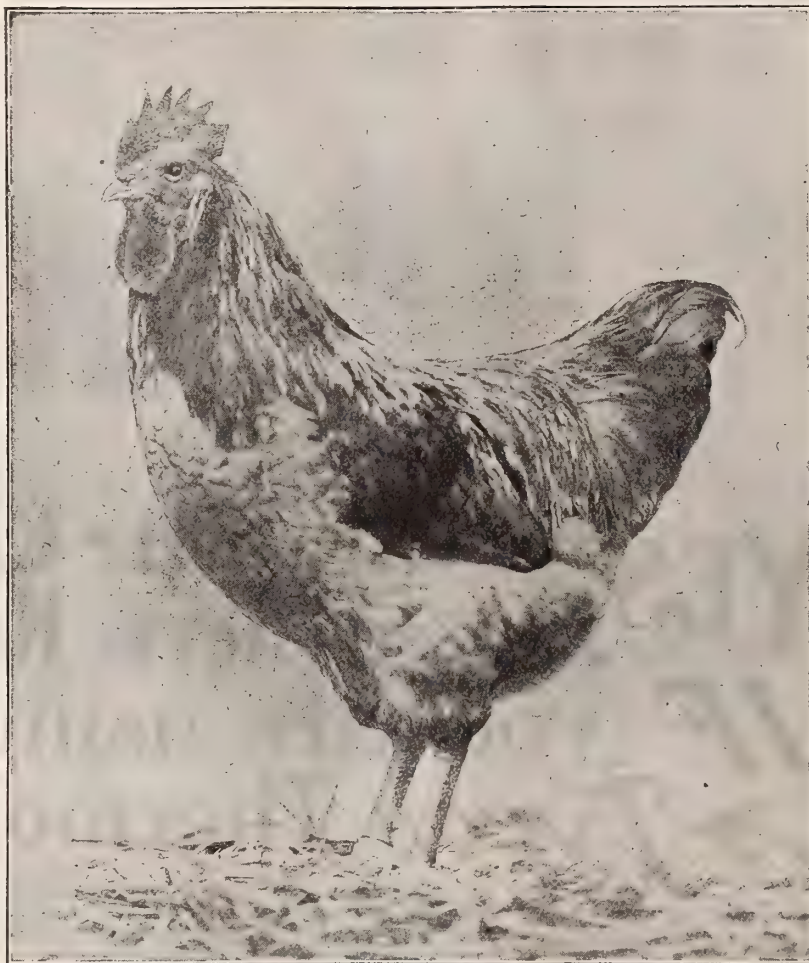

Among the advertisers of this publication is one man who has had much to do with improving conditions among poultry raisers and promoting poultry raising as an industry, and this is the initial opportunity to tell something of Geo. H. Lee, of Omaha, Nebraska, that cannot be found in the advertisements of his firm.

This article will serve to show the human side of a man who, when a boy, could play in the front yard at his parents' home in Le Claire, Iowa, and have full, unobstructed view of the Mississippi river—in short, Mr. Lee is an Iowa product. At fourteen he was in a new home with his parents, at Exeter, Nebraska. Both custom and necessity caused the family supply of eggs to be bought from Exeter grocers, and like all

ning of just how he actively entered the making of them as told by Mr. Lee is most interesting:

"A business woman here in Omaha started a poultry farm in one of our suburbs, purchasing some incubators and brooders manufactured in the East. During her first season she hatched a good many thousand chicks and lost them practically all in the brooders. I think, if I remember right, that she had about a hundred left in the fall. She came to me and said, 'Mr. Lee, if I cannot get a brooder that will raise the chicks I will have to quit handling poultry. Can you not give me a brooder that will really take the place of the mother hen?'"

"I told her that I would try and I immediately set to work on brooder problems, working throughout the day and oftentimes through more than half of the night. I constructed a great many different kinds of brooders, finding objections here and there until I settled upon a design which seemed to be satisfactory. I immediately gave this brooder to the lady above mentioned for her

First Buff Rock Cockerel—Missouri State Show, St. Louis, Dec. 6-11, 1909. Bred, owned and exhibited by J. J. Bleakley, Abilene, Kan. Note the perfect head points, nice long sweep of back, full rounded breast, complete tail and perfect symmetry of this great bird. His color was just as great as his shape, although a slight contrast is shown on wings in this picture, yet in life this bird is free from all contrast, being a pure buff throughout.

other grocers they bought from the farmer without question—and sold without question.

These conditions in Exeter were not unlike any other smaller town's conditions from one end of the country to the other.

So young Geo. H. Lee bought a dozen Plymouth Rocks and added some Buff Leghorns. His father being in the hardware business made it somewhat easier for his son to have a little workshop of his own. The whole poultry proposition opened itself before him. Poultry raising appealed to him and his mechanical turn of mind combined to help him enter the broad field that it has proven to be. Lee experimented, persevered and succeeded in developing his flock and means of handling, but at no time did he lose sight of the probable possibilities of incubators and brooders, but the begin-

to try at the farm. She put in a batch of chicks and at the end of a couple of weeks was quite surprised that she still had all of the chicks, having lost none of them. She immediately wanted us to make some more of these brooders for her and this led to the development of our incubator business, which now amounts to a good many thousands of machines each year.

"In our factory we employ from fifty to a hundred people, depending on the season. Our factory occupies some thirty-five thousand square feet of floor space and we are willing to make the assertion that we turn out more incubators and brooders in more limited manufacturing quarters than any other firm in the business, everything being handled very systematically and moving on from one department to another until completed."

Mr. Lee has written a new booklet, Lee's "Chicken Talk." Tell the Omaha firm who and where you are and they will send a free copy.

Mr. Lee is trying to arrange for sufficient time to permit him to attend the leading poultry shows of the country.

CHARLES McCLAVE'S WINNINGS AT THE LATE CLEVELAND SHOW.

White Wyandottes, cock, 2d and 3d; hen, 3d; cockerel, 2d; pullets, 1st, 2d, 3d and 5th; pens, 1st and 2d. Cup for best cockerel and pullet. Cup for best female. Cup for best pen and cup for best display. Club special for best pullet and best pen.

Bronze turkeys, 1st and 2d cockerels, 1st and 2d pullets, silver cup for best gobbler. Narraganset, 1st cock, 1st hen, 1st cockerel and 1st pullet. Silver cup for best male, winning all the firsts in the turkey class.

Toulouse geese, 1st and 2d cocks, hens, cockerels, pullets. Africans, 1st cock, 1st and 2d hens, cockerels and pullets. Brown Chinese, 1st and 2d cocks, hens, cockerels, pullets. White Chinese, all firsts and seconds, old and young. Wild, all firsts, old and young. Embden, cock 2d, hen 2d, cockerel 1st, pullet 3d. Cash special for best display.

Ducks—Pekin, cock 1st, hen 2d, cockerel 1st, pullet 1st. Rouen, cock 1st, hen 1st, cockerel 1st, pullet 1st. Black Cayuga, cock 1st, hen 1st, cockerel 1st, pullet 1st. Crested White, cock 1st, hen 1st, cockerel 1st, pullet 1st. Colored Muscovy, cock 1st, hen 1st, cockerel 1st, pullet 1st. White Muscovy, cock 1st, hen 1st, cockerel 1st, pullet 1st.

Cash special for best display and winning more first prizes on poultry than any other three exhibitors combined.

Albin J. Thuneman, Defiance, Ohio, reports the following winnings on his Black Rose Comb Bantams, at the late Defiance show: 2d cock; 1st, 2d, 4th, 5th hens;

First prize R. C. R. I. Red cockerel at Indiana and Illinois State Fairs, Girard and Litchfield shows, 1909. Bred and owned by W. D. Liipe, Litchfield, Ill.

1st, 3d cockerel; 1st, 2d, 3d, 5th pullet; 1st, 3d pen; silver cup for best pen of Bantams, score 192%, and also cash special

for the best ten bantams, all bantams competing. If you want good birds or eggs write him for prices and mention American Poultry Journal.

One of the neatest circulars received this season, describing a full line of corrugated cardboard, Egg, day old chicks and fowl shipping boxes, with letters of recommendations from noted breeders that have tested them, has been received from the Rippley Mfg. Co., Grafton, Ill.

These boxes are guaranteed by the above firm to stand the weight of five men, and to save one-half the express charges. They are made in various sizes. The Rippley firm has an ad. in this issue of these wonderful boxes.

Edward Brown, Mendota, Ill., reports the following winnings at the late Mendota show: On Barred Rocks, 1st and 2d cock and 1st hen in a class of 82. On Pekin Ducks, 1st cock, 1st and 2d cockerel, 2d, 3d and 5th hen; 1st, 2d, 4th and 5th pullet; 1st pen. Write him for prices and particulars on Barred Rocks and Pekin Ducks and mention American Poultry Journal.

James Kugler, Jr., Maple Hill Farm, Route No. 1, Frenchtown, N. J., has issued a booklet of his famous Single Comb Buff Leghorns, describing the matings and quoting prices of eggs and stock. Maple Hill Farm's stock has been among the winners at some of the large shows this season. Write for their booklet and mention American Poultry Journal.

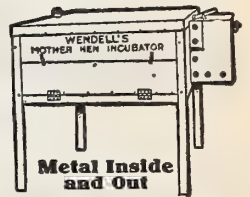

And they say that there is good money in raising Buff Turkeys. You bet there is if you have the right goods to start with. Wm. Osburn, Morris, Ill., specializes Buff Turkeys. He also has some fine Barred Rocks and R. I. Reds. Better send for his catalogue today and start right.

Mother- Incubators and Brooders

Our Incubator is covered with galvanized iron inside and out. It is padded on the inside and out with asbestos board and paper. It holds the heat, saves oil and maintains an even temperature—you don't have to set up nights with it—self-ventilating. If you want a cheap machine don't bother us, we are busy. Our BROODERS are the first invented that provides a warm flannel to lay on the chicks back—mother-hen. No steps to climb, no crowding, all metal. Send for our Book No. Z "The Incubating and Brooding Question Solved."

AUTOMATIC HATCHING COMPANY, Holly, Michigan

Metal Inside and Out

EDGEMONT POULTRY FARM.

200 prizes won this season at the Illinois, Indiana and Western Michigan state Fairs, Missouri and Illinois state shows, and the county shows at Girard and Litchfield, Ill. Closing out 200 pullets and cockerels at \$2, \$3 and \$5 each. Eggs and chicks from 30 grand breeding pens, consisting of the finest bunch of prize winners in the west. Send 2 red stamps for 30-page catalogue, the most elaborate Minorca and Leghorn catalogue ever gotten out.

KIRKWOOD, St. Louis County, MO.

THE BROODING PROBLEM SOLVED.

The Lullaby Brooder, which created such a sensation at the Madison Square and Boston Poultry Shows last month, is undoubtedly the most advanced step that has been taken in poultry appliances in the last decade.

Heatless brooders are not a new idea, by any means. They have been on the market

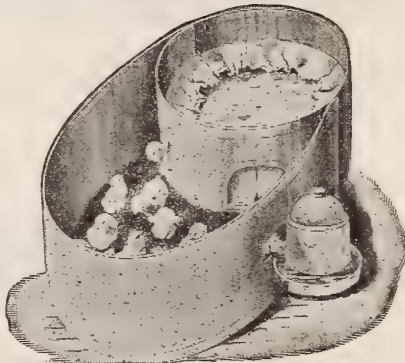

for a good many years, but until the Lullaby was produced, none of them were really capable of taking care of the chicks regardless of temperature without the help of artificial heat.

Every brooder previously invented was made of a fixed size. If they were able to successfully brood the chicks for the first few days after their escape from the shell, they were entirely too small as the chicks began to grow. If they were made large enough to take care of the chicks two or three weeks old, they were too big for the newly hatched youngsters. To be successful in cold weather, a heatless brooder must be filled to its capacity with chick life.

The warmth in this class of brooders is supplied entirely by the animal heat of the chicks and if the space to be heated is much greater than that actually occupied by their bodies, there will not be sufficient heat generated to keep them comfortable.

The first heatless brooder (or for that matter heated brooder) ever invented that would expand with the growth of the chicks, is the Lullaby. The operation necessary for its expansion is so simple that the only wonder is that the idea was

not thought of long ago. A heatless brooder has many advantages over those requiring artificial warmth.

To grow strong and sturdy, it is just as necessary that the young chick should have an abundance of pure, fresh air as it is for the laying hen. If artificial heat is provided, the outside air comes to them in a baked condition and greatly enervates them. They are made susceptible to colds and kindred evils. Their growth is retarded and the egg laying date is delayed, and when it arrives, the hens are not in sufficiently robust health to assimilate their food and produce them in any quantities.

It is very essential that chicks intended for egg producing purposes should get a good start. Every little drawback in their chick life has a telling influence on their egg producing capabilities later on.

You cannot raise a chick any old way and expect it as a matured hen to lay eggs in quantities.

The manufacturers of the Lullaby Brooder claim that it solves all the problems of artificial brooding, and it really looks as if their contention was correct. It is a well attested fact that poultry raisers have

usually had better success with the first brood in the wooden brooders than with the succeeding ones.

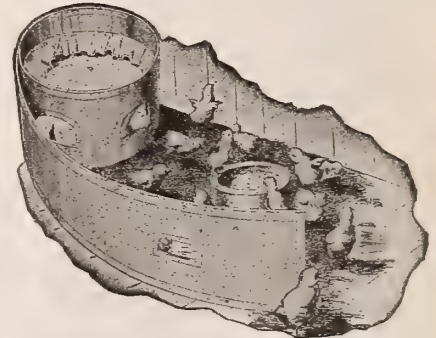

The Lullaby people say that the reason for this is that in the first instance everything is new and scrupulously clean, but that after the first brood has gone through it, it is next to impossible to thoroughly cleanse the brooder.

Our illustrations show this brooder in operation in four different stages.

Starting, as in figure 1, with the newly hatched chicks just from the incubator or from under the hen, the youngsters are kept enclosed in the double-walled chamber with no chance of getting out and chilling. No feed is required and the chick gains strength simply digesting the yolk absorbed just before hatching.

The next stage of the brooder, figure 2, is arranged with an oval yard in front of the two openings. Here the chicks "hover break" themselves, for if they bunch up in the corner they push themselves right into the hover. This feature alone is worth the price of the brooder. You don't have to stand around to put them in when they feel chilly. They can't go wrong. Note that the chicks drink through a hole in the wall of the brooder which effectively prevents their getting wet and chilling. How many chicks have you lost in the past from this cause alone?

Figure 3 shows the brooder for use after the chicks are three days old, given the run of the pen or house. Here the chicks pass in or out of the double doors at will, and grow as only chicks kept under the proper sanitary conditions will thrive. The air

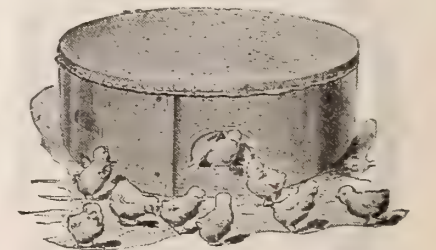

in the brooder is constantly changing, the warmed air and poisonous gases percolating up through the blanket over their bodies and down through the litter of cut clover, hay or straw. At no time during their lives in this brooder is it possible to confine the chicks in bad air.

Figure 4 shows the brooder enlarged to take care of the increasing size of the growing youngsters. This was one of the features that the old style brooder manufacturers could not anticipate. Brooders that provided the right heat and air conditions for baby chicks were much too small and stifling for three to six weeks old birds.

In the Lullaby Brooder, you "let out another tuck" and provide a hover space more than double the original size. Many common sense features previously totally ignored by manufacturers have also been added. All danger of contamination from one brood to another is avoided. You simply burn the brooder and "forget it." They are so cheap you cannot afford to run any risk; although they are much safer to use for a second time than any of the old patterns.

Like all our other appliances, they are sold on their merit; if not entirely satis-

factory, return them and get your money back. Tell your dealer about them. Order a dozen and use in place of hens. Try them under all sorts of conditions and you will find them perfectly satisfactory.

Order of your local dealer or direct of The Park & Pollard Co., Boston, Mass.

WOODMERE POULTRY FARM, W. H. HEARSFIELD, PROPRIETOR, WOODMERE, L. I., N. Y.

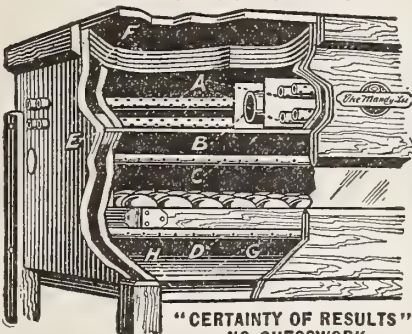

Woodmere Poultry Farm, located at Woodmere, Long Island, New York, eighteen miles from New York City, consists of twenty acres and is about five minutes' walk from the station. I have known Mr. Hearsfield for a number of years as a breeder of Barred Rocks, Cornish Indian Games and Single Comb Brown Leghorns, but had little idea to what extent his poultry operations extended. To say that I was surprised at the time of my visit February 5, 1910, is putting it mildly. There were about 1,300 head of laying stock on the place, mostly Barred Rocks and of the very best quality. Bird after bird was handled that showed that bright even, snappy barring we all like to see and it ran right down to the skin. Not a sick bird was to be found and I believe that the good health of this flock is due in a great measure to their being kept in open front houses, of which there are fifty on the place and all kept as clean as wax. If there is a poultry farm in this country where the birds run larger in size, the stock in better condition and the buildings kept cleaner I want to see it. Mr. Hearsfield is right on the job every minute and nothing is too small to escape his attention. I asked what percent of his birds were laying. He said he had never had time to figure it out but that his feed bill was running \$200 a month and the poultry paid it, and from the large number of eggs I saw in the nests I know they helped out a lot and can unhesitatingly recommend his birds as being splendid winter layers. Mr. Hearsfield started ten years ago with seventy-five mongrel hens and two houses and has reached his present proportions by hard work, which goes to show what can be done in the poultry business if you attend to it. From the start he has catered to the first-class family trade only, which has grown from small deliveries by a light wagon and a bicycle until at the present time he has three good large horses and as fine delivery wagons as can be seen on Fifth avenue, New York City. He does a large business in utility Barred Rock eggs at \$6 a hundred and I don't wonder at it after seeing his stock. In the last three years at the Garden Mr. Hearsfield has won on every entry made on Cornish Indians and Brown Leghorns, with one exception, principal among those prizes being the diploma for best pen Cornish, 1907; first Cornish cockerel, 1907, 1908 and 1909; second cockerel 1907 and 1908 was raised from a \$3 setting of eggs he sold to Joseph Cullman, Far Rockaway, N. Y., as was also the fourth pullet and the fourth prize pen. In all, seven birds, all New York winners, from a \$3 setting of eggs. At Minneola, L. I., N. Y. In the past two years he has won more prizes on his varieties than all competitors combined. At Richmond Hill, L. I., N. Y., November, 1909, in a class of over 100 Barred Rocks he was awarded second and fifth cockerel, second and fifth hen, fourth cockerel, first pullet and fifth pen. The first pullet was pronounced by Judge Drevendstet a wonder and the best he had handled to date this season in narrow parallel barring and clearness of under color. Also all the blues on Cornish Indians and S. C. Brown Leghorns the year before. 1908 the American Association diploma on S. C. B. Leghorn cockerel for best male in Med. class Barred Rocks, first cock, first and fifth hen, first and second cockerel, second and third pullet, third and fourth pen and silver cup for best display, a win on every entry in strong competition. Mr. Hearsfield said he had never won a prize at Madison Square Garden on Barred Rocks, but he is working with that end in view and anyone who looks over the stock at Woodmere and knows the man will make up his mind he will accomplish what he sets out to do. That Mr. Hearsfield is building up one of the most substantial businesses in the poultry world goes without saying, and I believe everyone placing an order with him will get his money's worth and a little more, and recommend our readers to send to him for prices.

Harry M. Lamon.

F. H. Wood, Station C, Cortland, N. Y., has been breeding fancy poultry for the past seventeen years, during which time he has produced some grand specimens of White Wyandottes. Write him for prices and particulars and mention American Poultry Journal.

THE MANDY LEE HYGROMETER

Greatest Invention Since the Incubator Itself

Experienced Incubator operators recognize the importance of moisture properly applied and maintained during the period of the hatch. Some incubator manufacturers give instructions at random without considering climatic differences and with no scientific knowledge of the problems that confront the incubator operator. The general impression has been that little if any supplied moisture is needed at the beginning of the hatch, but that much is necessary during the last few days of incubation. Mr. Lee's experiments prove that quite the opposite is true. His experiments covered a period of more than ten years and he learned how necessary it was to have a practical, accurate and permanent instrument to measure moisture. He made extensive experiments with many failures and disappointments but finally succeeded in perfecting the MANDY LEE HYGROMETER. But he was sure of its value before offering to his trade and it can be depended upon to materially add to each hatch and will pay for itself many times over each season.

Lee's "Chicken Talk" is a new book written by Geo. H. Lee himself. It and 1910 Incubator Catalog are both free and ready to mail.

\$2.00 Dividend on Every Hen

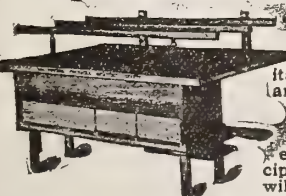

Each hen can make that amount or more for you this winter. The Potter System will reveal to you the most wonderful poultry secrets of a decade. Keep only your laying hens. The non-layers eat up the profit which the layers make. How are you going to tell which hens can never lay another egg? Just that is what the Potter System teaches you.

After reading this wonderful book you can eliminate every profitless hen from your flock. Then you have your poultry business on a money making basis. Every hen will then pay a dividend of \$2.00 each—a conservative estimate.

Winter Egg Profits

You know that winter layers are big money makers. The majority of your hens will be winter layers if you will use the Potter System of selection. With our book at your elbow you can stimulate the hens' laying organs. You can get every egg it is possible under nature's laws for that hen to lay. That's worth money to you isn't it? Then the quicker you get our book the sooner your poultry will pay you big money. Whether you have a dozen or a thousand hens, write today, enclosing two 2c stamps for catalogs and circulars telling all about the wonderful Potter work.

Potter Fixtures Mean Hen Health

Our poultry fixtures are sanitary. They are built in every size and upon true scientific principles. They will keep the poultry healthy. That means dollars to you. Potter Vermin-Proof Roosts—Perfection Feed Hopper—Simplex Trap Nests—W. P. Attachments—Feeds—Supplies of all kinds.

This Vermin-Proof Poultry House \$40

It is 8x10 ft. in size, completely equipped with two Potter henry outfits; has 8 nests, 2 pens, room for 15 to 18 chickens each. You cannot buy another such house for \$40—one dozen styles and sizes. We are now conducting the entire business of the Sanitary House Company, Lemont, Ill. We manufacture their full line of poultry houses, brood coops, pigeon lofts, etc. We will supply you a complete up-to-date poultry house cheap. Please write today for full descriptions, catalogs and circulars, enclosing two red stamps.

THE PITTSFIELD POULTRY FARM.

By Frank L. Platt.

Pittsfield Farm was started as an investment by business men. Gordon Dobson and F. W. Briggs are the men behind the farm. But "Pittsfield" has grown to be more than a commercial enterprise. In addition to working at the problems of housing and feeding, growth and egg production, Mr. Briggs became interested in the nice distinctions of shape and color.

It may not seem difficult to raise fowls and produce eggs for the food market. Breeding for market does not require that skill that detects the least fault in the makeup of a bird, but it does require economy, industry, thought. Those are the three factors requisite to the successful work of the utility poultryman, and they are something. To the breeder of standard bred fowls the same work is fundamental, but he adds to it expert judging and skillful mating.

All manufacturers and farmers may not be primarily interested in the building of the most effective machinery or the growing of the choicest grain. Whatever they can sell at a profit satisfies them. But here and again there is one who has too earnest an interest in his work and too much pride in his product to sell inferiority for mere gain. His reward is always in part the satisfaction of having sold the best that was within his power to produce. Such are the better manufacturers, or growers—or poultrymen. Such are the men who, like Mr. Briggs, may see beyond the feathers, flesh and bone, the beauty of the fowl. Such poultrymen sell excellent values for the money they receive. They are fanciers.

It is a pleasure to visit a poultry plant of such men. It is never found on the "Don't Care Farm," in the village of "Let 'Er Slide." Rather, it is the workshop "Results" on the farm "Success." So it is at Pittsfield.

Pittsfield Poultry Farm is located four miles from Pittsfield, Me. I reached Pittsfield after noon of the first day of February. That evening I visited with Mr. Briggs in his office in his home. The next morning the household arose early and Mr. Briggs and I started to the farm.

There was just snow enough on the ground to bear the cutter along, the air was brisk—just as folks at home like to have it along Thanksgiving time—but not as one would think of finding it in Maine in mid-winter. On much traveled roads, out of the village, through the valley, along the pine woods on the south, then suddenly, through a clearing the plant was in full view. It was the home of Pittsfield Barred Plymouth Rocks.

It is the Plymouth Rock with its large, full body and dark brown eggs, that is the first fowl in the New England states. The Boston market calls for brown-shelled eggs, and roasting chickens which may weigh 12 pounds, but not less than 4 pounds.

It is different in Boston than in New York City, where the fresh eggs come from the Leghorn farms of New Jersey and New York state and are white shelled. The brown eggs in the New York market are mostly western eggs that invariably have reached cold storage. Furthermore, the varicolored western eggs are candled, and it is easier to detect spots through a white shell than through a brown. So it is, the new laid eggs in New York City being white shelled, eggs from the nearby Leghorn farms and, among the candled eggs, a bad white egg seldom reaching the table, New Yorkers have acquired a preference for white eggs.

The New York vicinity farmers, catering to a once low call for broilers, have with their succulent Leghorn cockerel meat, developed a broiler market of remunerative prices. With poultry meat gaining in favor among all classes and actually becoming more necessary as a food product, a demand for roasting chickens in New York—something more than "western live" or "cold storage"—will ere long be made and met. Likewise, Boston will eventually call for 2-pound ten week old broilers, as she receives with always open market ten week old green ducks.

The Leghorn could be handled successfully in the Northeast. It is the egg-farm fowl of New York State and at the time of my trip to Pittsfield there was 16 inches of snow in upper New York and scarcely any in Maine. If plumage is the fowl's protection against cold and low temperature resistance is the

measure by which the utility of the races are judged, the Leghorn may claim 30 per cent more feathering than a Rock, in a ratio of its weight.

But Boston calls for brown-shelled eggs and roaster chicken meat for its market has brought 32 cents a pound alive, at the grower's door. So the Plymouth Rock is lord and master of the New England barnyard. There, as throughout the Central states and all of the West, the good qualities of the Barred Plymouth Rock are handed on and commended on to each succeeding year. As tradition carries in her hand the story of that granite boulder, Plymouth Rock, on which the Pilgrims stepped as they came ashore in New England three centuries ago, tradition hands us down the worthiness of the Barred Plymouth Rock race of fowl—strong as the Puritan fathers, good as the Puritan hearts, productive as virgin New England.

The Barred Plymouth Rocks at Pittsfield are a credit to their breeders. They are bred to size and type, illustrated by the most progressive styles, their surface plumage is striped in clear bars, the web of the feathers barred even and straight,

Readers of poultry papers with whom I have talked, in referring to illustrations of winning birds, have said: "If we could only breed them the way they are painted." Of Barred Rocks, I have had the pleasure of receiving an untouched photo of the first cockerel at New York, '08, the first hen, '08 and '09, and Pittsfield's first Boston cock, '10. Before me on my desk lies the photo of Pittsfield's Boston cock. He stands with grace and vigor, a Plymouth Rock! His barring goes around his breast and on down throughout his fluff in continuous rings. The barring on his hackle feathers that drape back from his throat are bands as even as though they had been weaved by the harness of a loom. I shall not forget that cock. He stood for me as if he felt I had come to take his picture—and I had. In the "Hall of Memory," in the "Palace of My Mind" his picture hangs, that I may judge all other Barred Rock males in part by the standards he has set. His eye was red; lobe soft in texture, which is an indication of vigor in American varieties; comb well shaped; tail well finished, which requires vigor in cocks of American varieties; wing

FIRST PRIZE COCK BOSTON SHOW 1910,
PITTSFIELD POULTRY FARM PITTSFIELD ME.

the under color strong and deep. The Barred Rocks at Pittsfield are more than likenesses of those champions whose feather markings and color and type are studied by judges and inquired for by breeders of the North, East, West and South. The Pittsfield birds themselves are among the champion winners. At the recent Boston show, judged by that master of the Barred Rock aisle, C. H. Wells, and in competition in a most excellent class, Pittsfield won first cock, second hen, first pen.

It was a pleasure to handle these birds and others in their breeding pens on the farm. In the first house into which I went, and in the first pen, was a pullet mating, and among the hens was one that attracted me. I picked her up and commended her barring to Mr. Briggs. He said: "She was the fourth pullet at Boston, '09, and the first hen at Portland this year; but I will show you some barring." We stepped into the next pen and Mr. Briggs pointed out the second hen at Boston, '10. To many a struggling breeder such a hen would be deemed perfection itself, and indeed such quality, it seems to me, is enough to discourage breeders in their efforts to breed the race to a higher standard.

secondaries barred like on exhibition hens. The butt of his tail was well covered and I counted twenty bars on one of the lesser coverts. Most impressively, the bird was one even color, the same on his breast as on his back.

Among Barred Rock breeders there grew a desire for plumage, each feather of which was tipped with black. This fancy became imperative and was incorporated in the "standard." Of late the tails on Rocks have been bred lower, and now there is a growing desire that the back of a Rock just before it sweeps the tail, or at the cape, be horizontal. I am reminded of this new requisite of the breeders who set the fashions by Pittsfield's first prize cock at Boston. Where his hackle meets his back, and just before his back inclines to his tail, he is flat and broad.

I might write of the various males that head the cockerel breeding pens at Pittsfield, but suffice it to say that such mention would needs be comparative. The skill of the breeder lies in combining the good points of birds and offsetting the poor ones, and with Mr. Briggs and his competent superintendent, L. A. Cowan, lies the task of breeding more cockerels

A HEN IS HUMAN

in that she does not work well unless she is well. A quart of lice would run your poultry yard. A quart of Lee's Lice Killer would help you to run it yourself, and run it right. No use trying to dodge the issue; your poultry cannot produce or be what they ought to with lice on their bodies, in the nests, or in the roosting places. Lice incapacitate, annoy, destroy.

Who loses? You do. Geo. H. Lee lost, too, from this same cause, until 1895, when he invented Lee's Lice Killer. Its enormous sales prove its value—more of Lee's sold than any other two insect destroyers on the market. Lee's is the original liquid lice killer—the only one prepared exclusively for use as an insecticide.

Lee's Lice Killer

is a distillate of coal tar and sulphur products, and kills lice, mites, etc., both by contact and vapor. Paint the roosts and spray the walls. No handling, dusting, dipping or greasing. Kills not only lice but all vermin wherever found.

Price: quart, 35c; ½ gal., 60c; gal., \$1.00; gallon express prepaid, \$1.25.

Send card to-day for Lee's "Chicken Talk" by Geo. H. Lee himself.

PRACTICAL REDS

RIDGE VIEW FARM

THAT'S it—Practical Reds. The kind that lay eggs like a Leghorn and make a roast like a Rock.

We have the best strain of Practical Reds in the U. S. We sell eggs that hatch. Send \$6.00 for 100 eggs from utility pens or \$10.00 for 100 eggs from selected pens. Get your order in now—don't wait until the last minute.

After years of careful breeding we are giving the fancier an opportunity to buy from our best stock at an exceptionally low price.

A. G. CLARK, WILLOUGHBY, OHIO

such as headed their first young pen at Boston.

The breeding pens at Pittsfield are strong. Heading one is a cockerel that, in type and size, is equal to the "first cock." In another is the third cock at Boston and the first cock at Portland, 1909. Another is the fifth cockerel at Boston and first cockerel at Portland, 1910. There are ten such pens. "Unprecedented results from Pittsfield eggs this year" is surely a reasonable, fair prediction.

The house in which the superior exhibition of birds are penned is a fresh air front house. The pens are 14 feet square. In the roosting corner, that is, at the juncture of the roof and rear wall, the house is celled. There is but one roost. The nests are underneath the dropping board. The main laying houses are 430 feet long; there are two. The pens are 20 feet square. It may be asked if Plymouth Rocks kept in large pens and hence large flocks do as well as those in small flocks. To this I will say that the Gowell house, of which the houses at Pittsfield are patterned, was built for Plymouth Rocks and it is the house that is used on each of the three large Barred Rock plants I visited in Maine. Two days ago I visited the Corning plant near Bound Brook, New Jersey. Their laying houses are patterned after the Gowell house, but they are not divided into pens. 1,500 Leghorn pullets are kept in one flock in each house. At the Newtown Producing Company's plant, Newtown, Pa., the pens in the new laying houses are 40x50 feet and from 500 to 600 Leghorns are kept in each pen. At the plant of H. E. Seaver, Brown's Mills, N. J., 500 Leghorns are kept in one flock in each house; the laying houses being built about 14x100 feet.

Last week I visited Joseph Tolman on the south shore in Massachusetts. Mr. Tolman is a White Rock breeder. He told me that eggs from his big houses containing 100 breeders in a flock were running from 6 to 10 per cent more fertile than those from birds in small flocks. It would seem that large flocks do better than small, in all varieties. How the methods of poultry culture do change! It wasn't long ago that poultry writers recommended 16 square feet of floor space to each fowl, and not over 15 birds to a pen. The poultry business is passing from the past period of experimentation and uncertainty and is becoming a man's business possible of operation on positive and economical lines.

There are 270 colony houses, 3x6 ft. each, at Pittsfield. In the growing season they are dotted over a 40 acre clover field. There is no better green food than clover. When cut it is also an excellent food for laying hens, for it contains a large percentage of ash. In addition to a relative percentage of protein and carbohydrates, a balanced ration for fowl should contain a greater percentage of ash than can be obtained from grains. Clover supplies the deficiency.

The rearing, brooding and hatching facilities at Pittsfield are not surpassed. Before the chicks go to the range they are brooded by the Hall Brooder Systems. There are four of these systems. Mr. Briggs spoke of them as a "Godsend to the poultry industry."

In the incubator cellar are two 6,000-egg Hall Mammoth incubators. Last year the machines were started in March and run until the 9th of July. 55,000 chicks were hatched at a cost of \$14 for coal. Seventy-nine percent of all the eggs put in the machines hatched.

Over the incubator cellar, in a cockerel pen, was the cockerel, now a cock, whose picture is so familiar to every reader of the poultry press that it has come to be synonymous with "Pittsfield." To see at home this bird whose picture I have seen so often and in so many places where I have read a line of poultry journalism, was a treat, and I venture to say, is enviable.

The shipping room was the last into which I went. I took a chair and watched some shipments made ready. I noticed Mr. Cowan, the superintendent, paste some large circulars on the boxes. I wondered what they might say, so I read in part: "Express Agents' Note: This shipment may be returned, express prepaid, if not satisfactory to consignee." Pittsfield's customers are the judges. They judge the birds they have purchased, in their own hands, in their own home town. Many purport to give this privilege, but Pittsfield's method is active, not passive.

J. M. Moore, Jr., formerly of East Akron, Ohio, is now located at Unadilla, N. Y., and is ready for business and can supply you with anything you need in White Rocks and White Wyandottes.

SOMETHING ON PAGE 393.

We urge our readers to turn to page 393 and read the special announcement there from one of the biggest advertisers. It contains some information on buying incubators and brooders that we are sure if more of the people who purchase incubators and brooders would follow there would be fewer failures and disappointments experienced. That it is economical to buy a good thing when you're buying goes without saying; you cannot get something for nothing, and it is cheaper nine times out of ten to pay a good price for a good article than to take chances on paying a cheap price and getting a cheap article. The Prairie State Company has gained the reputation which its machines enjoy largely because it put out the best machines for the money and the cheapest in the end because they produce a better result and give much longer service. We have no hesitancy in saying that those who buy Prairie State goods will confirm this statement from their own experience. This company has put out what has been admitted by the leading poultrymen of the country to be the best and most helpful catalog of the year. It will be sent free to anyone addressing the Prairie State Incubator Company, 468 Main street, Homer City, Pa., and mentioning this paper.

A SUCCESSFUL S. C. WHITE LEGHORN BREEDER.

Mr. Robt. D. Parmenter, Knoxville, Ill., is to be congratulated on the grand success he has made in producing specimens of S. C. White Leghorns that have won, the past season, at the leading shows in the west. Mr. Parmenter is a young man with an ambition to become the foremost breeder of this variety and he certainly has made a remarkably good start in this direction. He is now located on his new farm consisting of six acres right in the town of Knoxville, Ill. This is a beautiful place, with a fine orchard which will provide plenty of shade for his stock during the summer. He just completed one new 60-foot breeding house and has plans all made for another 100-foot house; also a modern barn and feed house, an incubator cellar and condition house. When completed he will have one of the most complete and up-to-date poultry plants in the state.

His young stock will have about five acres to range over, which will insure healthy, vigorous stock.

This season he is planning to raise at least 1,500 birds, as he will require this number to supply his rapidly growing trade. Mrs. Parmenter is also an enthusiastic

poultry fancier and a great deal of Mr. Parmenter's success is due to the assistance and encouragement given him by his life partner.

To give our readers an idea of the measure of success attained by Mr. Parmenter we give below a list of his winnings for the past two seasons.

At Chicago, 1908, first hen and N. S. C. W. L. special, with only three birds shown.

Galesburg, 1910, first and second cock; first, second, third and fourth cockerel; first, second, third and fourth hen; first, second, third and fourth pullet; first pen and numerous specials.

This is certainly a grand record and one that a much older fancier than Mr. Parmenter might well be proud of.

He will be pleased to hear from all who are interested in S. C. W. Leghorns.

WINNERS AT MADISON SQUARE GARDEN, NEW YORK, 1908-09. FIRST COCKEREL, SECOND PULLET. J. H. WILLIAMS & CO. BREEDERS, OWNERS. NORTH ADAMS, MICHIGAN, U.S.A.

At Illinois State Show, Springfield, 1909, first cock, second cockerel, tied for second pullet, third pen. At Bushnell, Ill., first, second, third and fourth cockerel, first, second and third pullet, first hen and special for best display. At Illinois State Show, Springfield, Ill., 1910, first, second and third cockerel; first and second cock; first, second and third pullet; first, second and third hen; first pen and numerous specials. At

Mountain View Farm, South Kent, Conn., breeders and exhibitors of Buff, Black and White Orpingtons of the better kind. This farm produces birds that are good enough to win at Madison Square Garden, therefore ought to be good enough to go into any breeder's yards in America. Look up their winnings at the late New York show. See their ad in this issue, and write them for prices and particulars.

STEP UP TO IT—

The magnificent winnings at the late big Chicago and Hagerstown shows by McDanell's Golden and Columbian

Wyandottes. Eggs from this stock will do it. Special exhibition matings, \$5 per 15, \$8 per 30. Regular pens, \$3 per 15, \$5 per 30. Order from this; I'll do the rest. Modern plant. 50 per cent egg yield, Jan. and Feb. 8 yrs. reliability. Catalog. Old Homestead Farms J. H. McDanell, Proprietor R. 2, Warsaw, Kentucky

INCUBATORS

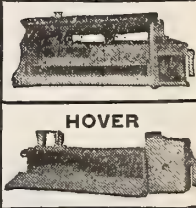

CLOSE-TO-NATURE BROODER

A Brooder built on the Most Exact Scientific Laws. Three life-saving Principles not found in any other brooder invention: Warmth by Conduction and Convection; Ventilation by Induction and Percolation; Prevention of Filing and Crowding by Mechanical Construction. Has met with a most remarkable reception the past three years, being used and endorsed by many scientific and successful poultrymen. Not a novelty, a hot air bake oven, a lampless cold storage box, nor a dollar "system", nor a quick-get-rich-forty-foot-lot plan, but it is an expensively constructed, common sense, close-to-nature chick nurse, blending the instincts of the mother hen with the reason of man and satisfying every natural impulse of the chick. Brooders are double, metal lamp box outside, hovers adjustable, double tops, triple hover floors, withstanding wind and weather. Brooders for orchard and field, and Independent Hovers ready for instant use in box or shed. Need little attention. Eminently the brooder for the business man and the farmer.

Incubators of same high merit and equal successful experience of the brooders. Catalog free.

CLOSE-TO-NATURE COMPANY, 38 Front Street, COLFAX, IOWA.

Shoemaker's Poultry Book AND ALMANAC FOR 1910

There is nothing in the world like it. It contains over 200 large pages, with many fine illustrations. A number of BEAUTIFUL COLORED PLATES OF FOWLS, showing them in their natural color.

Tells all about all kinds of thoroughbred chickens, with life-like illustrations. Prices of eggs for hatching and fowls for breeding purposes. TELLS HOW TO RAISE POULTRY SUCCESSFULLY, their care and management and how to treat all diseases common among them. Gives illustrations and descriptions of convenient poultry houses and plans to build them.

The Globe

ALL ABOUT INCUBATORS and BROODERS with the illustrations, complete description, and lowest prices. ALL ABOUT OPERATING THE INCUBATOR. This chapter is marvelously complete, and worth much more than the price we ask for the whole book. This Poultry Book is worth dollars to anyone interested in the raising of fowls. It is AN ENCYCLOPEDIA OF CHICKENDOM, and no one can well afford to be without it. Will be mailed to anyone upon receipt of only 15c. Money refunded if not pleased.

C. C. SHOEMAKER
BOX 605 FREEPORT, ILL.

A SUCCESSFUL BARRED ROCK BREEDER.

In writing to Mr. F. S. Nicholson, Otisville, N. Y., recently we asked him to give us a little history about how he started to breed Barred Plymouth Rocks, to which he replied as follows:

"My experience with chickens dates back about as far as I can remember, my first being bantams, and I have been continually interested up to the present. As a small lad I well remember of many trips made into the country (I lived in a village then) to those farmers who would let us catch pigeons, often staying until after dark so as to catch them after they had gone to roost. Then a tramp of several miles home, there to get a scolding for always fussing with those pigeons.

"As soon as I had a home of my own I laid plans for some chickens. I found a man who had some Barred Rocks that he wished to sell, these I bought, and ever since have stuck to these, the most popular fowl this country has ever known. Since that time—over fifteen years ago—I have spent much money buying the best blood I could find. Six years ago my health gave out, and having to get outside in the air, we bought our present location, which is located two miles from Otisville on the Erie railroad, seventy-five miles from New York, one and one-half miles from Valley Junction, one mile from Cuddebackville on N. Y. & O. W. R. R. We have 120 acres, about one-half wooded, mostly sloping to southeast.

"While we have not shown extensively ourselves, our customers are sure winners at many shows each season. We have won at such shows as Boston, Hagarstown and several other large shows under the best judges. Have made shipments of birds and eggs to Canada, Mexico and Europe, as well as to all parts of this country. We may have dissatisfied customers, but it is our aim to use all as we would like to be used and give more value for money received than we can get when we spend ours. Can assure any customer that any complaint will be attended to at once and all possible fairness used to please them. All birds are shipped with the privilege of returning them if not satisfactory. Anyone buying eggs and not having good success can have order duplicated at half price. It doesn't make any difference what the cause of ill luck, be it the hen or from any cause. I am willing to meet the customer half way. In over fifteen years shipping eggs, many of them the breadth of the country, I never had but one reported broken. I consider this a grand testimonial to the care we use in packing, especially when one considers that it means thousands each year.

"This season we will breed from just six pens, each one of them being made up of as good blood as can be found, regardless of price; every bird being very closely related to New York, Boston and Chicago winners, and while we sell eggs at the low price of \$3 for 15, \$5 for 30, we send only eggs from our best birds and consider the quality as good as the best.

"I will be glad to mail free my illustrated circular and mating list, containing many unasked for testimonials. In fact, I never asked for a testimonial in my life. As to responsibility, would refer to the National Bank of Port Jervis, Port Jervis, N. Y."

BEN. W. WILHITE, BREEDER OF BLACK MINORCAS AND BUFF ORPINGTONS.

Mr. Wilhite reports that at the late Crawford show he won following prizes on Black Minorcas, first and second cockerel, first and second hen, first and second pullet, first pen and sweepstake special in the show of Dore pullet. This bird was pronounced by Judge S. P. Lane as being the best Black Minorca pullet he handled this season. Mr. Wilhite has recently purchased some fine Buff Orpingtons which won at the Crawford show, first, second and third cockerel, first, second and third pullet, second and third hen, first pen. Mr. Wilhite is fair in his dealings and will treat you right.

Ridge View Farm Rhode Island Reds are in demand in all parts of the country. They are known as utility Reds, as they are great egg producers. Better send for their mating list, it will interest you. Address Ridge View Farm, Willoughby, Ohio, and mention American Poultry Journal.

SINGLE COMB PRIZE WINNERS BLACK MINORCAS AND BUFF ORPINGTONS

Fifteen years a breeder and exhibitor. Eggs, \$3 per 13 or \$5 per 25. Stock all sold. Write me for a square deal.

Express charges paid by me. Better printing for the price was never done. No order less than \$1.00 filled. Name your Express office. Cards, tags and egg labels same price as above.

Address, J. R. HUDSON, Hardin Springs, Ky
I have seen samples of Mr. Hudson's printing. It is very nice; he is perfectly honest.—EDITOR

DUSTON—WYANDOTTES.

One of the breeders that we feel we ought to congratulate this season on the splendid showing he has made on his stock during the three past years at New York is Arthur G. Duston of So. Framingham, Mass. He was unable to show at the recent New York show on account of an injury to his knee. The winning of the first collection two years out of three is a record that anyone may be proud of and never has been equaled in what is one of, if not the strongest, class at this show, which no one questions is the hottest Wyandotte show in the world. The splendid young birds bred from his New York winners of last year will be in his breeding pens this year as well as a goodly number of his old breeders. Such matings by an expert who knows the breeding of every specimen will produce rare birds and his customers can expect a large percent of winners from his eggs. It is a source of gratification to any breeder to know of the success of his customers, and while Mr. Duston always insists that a man buys ribbons, honors and all that goes with a bird, he can truly say that his birds sold direct and hatched from eggs have won highest honors in the hottest shows in the land this season, besides two of the largest English shows. We print an unsolicited testimonial:

Taylorville, Ill., December 18, 1909.

Mr. Arthur G. Duston,
South Framingham, Mass.

Dear Sir—As I am one of the bunch that do not believe in waiting until a fellow is dead to pile roses on his grave, I am going to drop you a line this morning and enclose you photos of several of my young birds, and you will readily see why I do this. The one photo is of my first pullet, Illinois State Fair, October of this year, Fishel being the judge that placed the awards, and when I tell you that Pierce and Dippel of Indianapolis had their full string in competition, and they had also bought the very best cock, hen, cockerel and pullet that Rudy would sell, and had them in competition too, and there were 11 other exhibitors in our White Wyandotte class besides Pierce and myself, of the very best in our western states, and this pullet easily won over all, you will understand what stuff is in her. But what you will be most pleased to know, and I am glad to tell you, is the fact that I used Duston's best exhibition stock on both the male and female side, pure and unadulterated, to produce her. I have exhibited and won at 10 of our leading poultry shows this year, and the most of the stock I exhibited and won on, I produced from the stock and eggs I bought of you. I enclose a list of about half of my winnings this year. I just thought I would write and thank you for past favors and for starting a fellow about right, and if it does not do you any good,

it will at least satisfy a desire of my heart.
I am, very truly,

Elmer Gimlin.

Charles Parsons & Son, Conway, Mass., the well known breeders of Barred Plymouth Rocks, did not exhibit the past season, owing to the fact that they sold so many birds for exhibition purposes and did not feel justified in exhibiting in competition with their customers, but have retained the very cream of their flock

them for full particulars and mention American Poultry Journal.

J. I. Blake & Co., Galesburg, Mich., breed both Rose and Single-Comb Rhode Island Reds, and their 1910 mating list is free for the asking. Write for it, and mention American Poultry Journal.

John W. Poley, Royersford, Pa., breeder of the world's best Buff Plymouth Rocks, has just issued his annual catalog and is

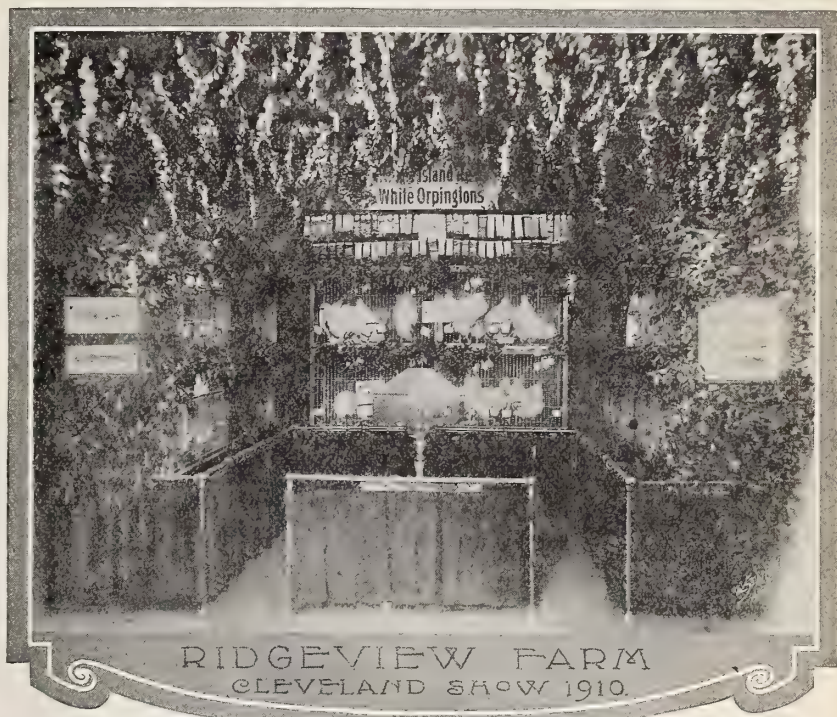

Exhibit of the Ridgeview Farm, Willoughby, Ohio, at the late Cleveland show, where their Rhode Island Reds attracted the attention of all visitors.

for the breeding pens this season, of which they have mated up fifteen for the season's trade. To introduce their stock to our new subscribers they are making very low prices on eggs, considering quality. They also have a few pullet breeding cockerels and pullets to spare. Write

anxious to place same in the hands of all those interested.

The 1910 mating list of the Owen Farms, Vineyard Haven, Mass., is now ready for mailing. You should get one before placing your order for eggs. It is sent free.

Rudy's Perfection White Wyandottes

Just from Missouri, where we did show them sure enough. Now I am going to show you the quality of my "Perfection" Strain that can be found in my breeding yards this season. My type of White Wyandottes is known all over the world as being as near Perfection as has ever been produced, and winners in most any of the best shows can be traced to my

"Perfection" Breeding

My records, at Chicago, December, 1908; Peoria, Ill., November, 1908, and Kansas City, Mo., January, 1910—the Madison Square of the West—will long stand unequalled. At these shows (the last three shown in competition) they won all the Blue Ribbons—15 out of a possible 15. At Chicago: 1st, 3rd, 4th cock; 1st, 4th, 5th hen; 1st, 2nd, 4th cockerel; 1st, 2nd, 5th pullet; 1st, 2nd pen. Silver cups and specials for best display. At Peoria: 1st, 2nd, 3rd, 4th, 5th cock; 1st, 2nd, 3rd, 4th, 5th hen; 1st, 4th cockerel; 1st, 2nd, 3rd, 4th pullet; 1st, 2nd, 3rd pen. All specials, including President's \$50 silver trophy cup for best display, all varieties competing. At Kansas City, 1st, 2nd, 3rd, 4th cock; 1st, 2nd, 3rd, 4th hen; 1st, 2nd, 3rd, 5th cockerel; 1st, 2nd, 4th, 5th pullet; 1st, 4th pen. Specials: The Weekly Kansas City Star's \$150 silver trophy cup for best bird in the show, all varieties competing. The Schmelzer Arms Company's \$50 silver trophy cup for best display, all varieties competing. All the above prize winners (with one exception) can be seen in my breeding yards this season, as I wish to give my patrons good value in eggs for hatching.

Why delay placing your orders? DO IT NOW, that the "Early Bird" may "Catch" the Ribbon. Have your orders booked early and be assured of prompt delivery. Fifteen grand pens. Mated for the Egg Trade, including all my prize winners. Eight of them headed by the best sons of "Perfection," the greatest living White Wyandotte sire. Prices of eggs: As they run (i. e., eggs from all pens), \$5 per 15; \$9 per 30; \$12 per 45; \$24 per 100. From pens of your own selection, \$10 per 15; \$18 per 30; \$25 per 45. Utility and incubator eggs (from surplus stock I carry over for next season), \$3 per 15; \$5 per 30; \$7 per 45; \$12 per 100.

Don't forget that my "PERFECTION" STRAIN is noted for Great Egg Production. Write for Egg Circular and Mating List. A few choice breeders yet for sale. Prices on application.

— Ad on Back Cover —

RUSSELL FARM WHITE WYANDOTTES.

We doubt if any other strain of White Wyandottes has come to the front in late years that has won as many prizes at several of our best shows as has the Russell line of birds.

This past season at Guelph, Canada's greatest show, competing with nearly 300 birds, he won first and third cock, second, third and fourth hen and best collection. At Toronto, first, fourth and fifth cock, first, second and sixth hen, fourth, fifth and sixth cockerel, first and second pullet. At Boston, Mass., fifth cock, fourth cockerel. At Ottawa, the Eastern Ontario, second, third and fifth cock, first, second and fifth hen, first, second, third and fifth cockerel, first third, fourth and fifth pullet.

Here is a winning that easily stands as the White Wyandotte record for the year, for at these four great shows and competing with nearly 700 of the best to be found he won seven first prizes, or within one of as many as all others combined. This year Mr. Russell also bought the first prize cock at Boston and the second prize cockerel at Madison Square Garden, New York, for new blood; also proving Mr. Russell up to date and only satisfied with having the very best.

We have seen Mr. Russell's birds for several years and were very favorably

not allowed to pass out until round in shape. Smooth articles pass out at once. This is one reason that gravel and small smooth stones are not the best grit.

Another point to be considered is that there are certain elements such as mineral matter, bone and egg elements that do not come to the hens through their regular diet. The best way to supply these essentials is by feeding a grit that contains them. A grit that combines these two features—grinding ability and food value—is the ideal grit.

Such a grit is Maka-Shel. This well-known poultry grit retains its sharp corners, thus remaining in the gizzard until absorbed. Through friction it slowly breaks up, but does not ever wear smooth. Analyzed it is found to contain very nearly all the elements that enter into the composition of egg shell. It is fitly named "Maka-Shel." It also contains iron for the blood and the minerals essential to the making of bone in a growing chick. The hens love it, and readily show their preference when offered the choice of "Maka-Shel" or the common grits.

"Maka-Shel" grit is a natural product, quarried in a section noted for its mineral deposits. It is not a by-product but is mined for itself alone. It is a perfect grit for chickens, made by Nature herself. It is quarried, carefully ground and prepared for use, and sold by the Edgehill Silica Rock Co., Box D, New Brunswick, N. J. Their booklet, "Hen Dyspepsia" and free sample

Pen S. C. White Orpingtons, owned by William Cook & Son, originators of all the Orpingtons, Scotch Plains, N. J. Winners of many first prizes.

impressed the first time we met them. From the first it has been evident that size, with type, were the features of this line. At the last "Ontario," December 29, we again had the opportunity to handle this line and were particularly impressed with the quality shown. His first prize cock in condition as well as quality was a most superior bird—with beautiful head, grand deep and full breast and body, with as fine a back and full finished tail as we could wish to see. His winning hens were also superior birds. White as snow. For further information we would refer our readers to Mr. Joseph Russell, 1308 Queen St. East, Toronto, Ont.

Having a standing invitation to visit Mr. Russell, we hope to do so soon, when we will write him up so our readers may become better acquainted with one of Canada's leading breeders. Mr. Russell is a member of Parliament, honored by his fellow men, and besides this a true fancier.

H. P. Schwab.

"HEN DYSPEPSIA."

Hens must have grit to digest their food. The grit aids the gizzard in grinding the food and preparing it for assimilation. But, just as it is so very essential to the welfare of the hens, so should care be taken to get the best and most serviceable grit.

The best grit should be hard, of course. But it is of equal importance that it be sharp-cornered. There is a peculiar law that governs the expulsion of anything from the gizzard. If the article is sharp it is

can be had by writing them, mentioning this paper.

LUCKY 13.

Harmon Bradshaw, of Lebanon, Ind., showed thirteen of his S. C. White Leghorns in a very strong class of forty-nine birds at Indianapolis, February, 1910, and won second cock, first and second hen, first, second and fourth cockerel, first and fourth pullet and first pen. Won a prize on every bird entered. The judge said that the pen was one of the best he had ever handled.

A. F. Almendinger, Buffalo, N. Y., has mated up four pens of his Rose Comb Buff Leghorns from which to sell eggs for hatching. These pens will be headed by blue ribbon winners at New York, New York State Fair, Buffalo, N. Y., and Hamburg, N. Y. If you want the best in Rose Comb Buff Leghorns, write him for his mating list for 1910, mentioning American Poultry Journal.

W. S. Robison, Fayette, Mo., the man who has been breeding Buff Plymouth Rocks for a number of years, has just issued a very neat 20-page and cover booklet and mating list, which he sends free to all who ask for it. Better send for one now and mention American Poultry Journal.

Have you seen a copy of the mating list of Guy Daily, Jeffersonville, Ind.? He breeds some good White Plymouth Rocks. Send for it and mention American Poultry Journal.

**J. M. WILLIAMS & CO., BREEDERS
OF BUFF AND WHITE ORPINGTONS,
TIONS, BOX B, NORTH
ADAMS, MICH.**

During our recent visit to this poultry plant in conversation with Mr. Williams we learned he was the first man to advertise Orpingtons in this country. This was over ten years ago, and now being one of the oldest breeders of Orpingtons, you would naturally expect him to have some good ones. Well, he has, and as trophies of the quality he has produced, we were shown eleven handsome Silver Cups. The largest of these was a very massive cup some fifteen inches high and was won at Madison Square Garden on best display. Mr. Williams only having nine birds entered and he had seven points to spare. Several other cups were nearly as large and they were won in competition with the best in the land at such shows as Madison Square Garden, Chicago, Cleveland, and the World's Fair, St. Louis, 1904. They are particularly strong on S. C. Buffs and have a Buff Hen that has one unbeaten record. She has six firsts to her credit, winning as follows: First at New York City in 1903, the World's Fair 1904, Chicago 1905-6-7, and Cleveland 1908. She is seven years old, but is still a good hen today.

At the head of their first pen we saw the cock that was first prize cockerel at the Garden last year. He was a deep, round, broad, low down bird, having come through the month in fine condition, with a nice light golden buff color. To him are mated large blocky females all of the best quality. At the head of pen two was the cock that was third cockerel at the Garden last year. He is a full brother to the other bird and of equally good quality and the females in this pen were also selected for their grand type and color. Mr. Williams has plenty of Buff cockerels for sale and is quoting special prices on them at this time. He also has a few trios in both Single and Rose Comb Whites which he will spare. He has six pens in S. C. Buffs, four pens S. C. Whites and three pens R. C. Whites, mated for the egg trade. His mating list is free. Address J. M. Williams & Co., Box B, North Adams, Mich. His ad appears regularly in American Poultry Journal.

Ira C. Keller, Prospect, Ohio, showed 19 entries at the Ohio State show in January and won 19 class prizes as follows: Golden Wyandottes—cocks, 2nd and 3rd; hens, 1st and 3rd; cockerels, 2nd and 4th; pullets, 3rd and 4th; breeding pen, 1st. Silver Wyandottes—cock, 1st; hens, 3rd and 4th; cockerels, 2nd and 3rd; pullets, 2nd and 4th; breeding pen, 1st. White

Wyandottes—cock 1st and 2nd; hen, 1st; breeding pen, 2nd, and the most coveted prize in the show, the \$50 Governor's Cup for the best pen in the American class. Laced Wyandottes have been the specialty of Mr. Ira C. Keller, Prospect, Ohio, for many years, and to him is due the credit of having produced many grand specimens

at the Cleveland, O., January, 1909 show, and stood out strong as the gem of the class. He was of superb quality in nearly every way, especially in color and lacing and head points.

Astoria Leghorn Yards, 240 Jamaica avenue, Long Island City, N. Y., are offer-

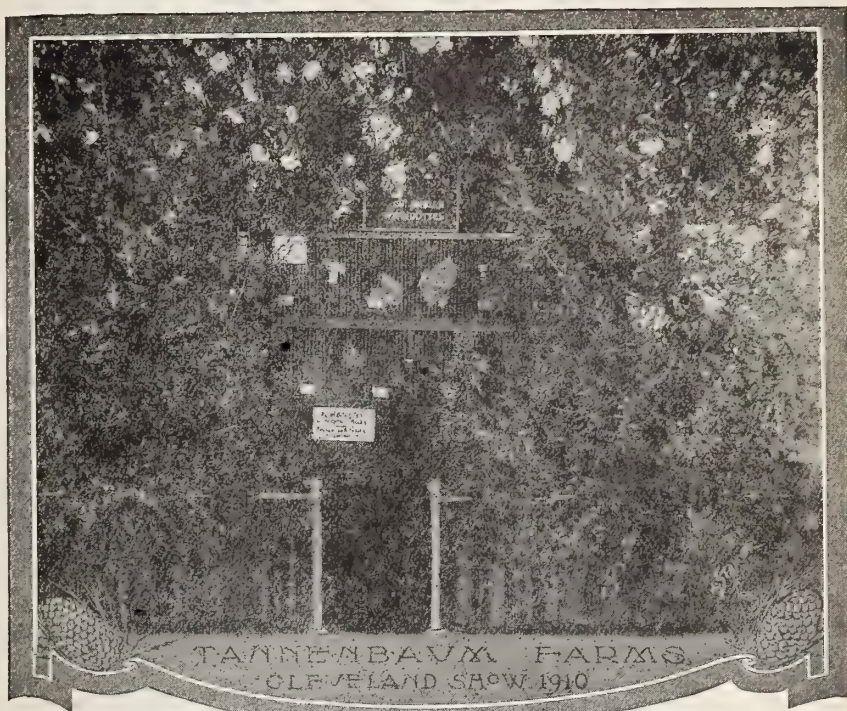

Exhibit of the Tannenbaum Farms at the late Cleveland show. This exhibit was the center of attraction at this show, the space being crowded with visitors from early morning until late at night the entire week.

of this breed, including nearly every variety. Mr. Keller is known all over the country as a most successful breeder of Golden Wyandottes, and those who follow the show records know that he has won a large share of the prizes, in close competition. The cock shown in this study was winner

ing some fine S. C. Brown Leghorn cockerels and pullets at very reasonable prices. They are also in a position to fill egg orders from either exhibition or utility pens. They satisfy their customers. Write them for prices and mention American Poultry Journal.

We entered but one cock at the Chicago show. He won first. We also won third cockerel and fourth pullet. Exhibition cockerels and pullets, good ones, \$3.00 to \$15.00. A few excellent breeding pullets and cockerels at \$2.00 and \$3.00.

THE BEST IN THE WORLD

TEMPLIN'S SPRAY PUMP

The Best Pump in the World—"Templin's"—with a poor nozzle attached, would make a very poor combination; a poor sprayer. The Best Nozzle in the World—"Bordeaux" attached to a poorly constructed pump would make a poor combination; a poor sprayer. But the "Templin" Pump and the "Bordeaux" Nozzle combined, as we have them, makes a union that for strength, durability and efficiency, fully meets the requirements of the most exacting users.

IT'S JUST WHAT YOU NEED TO WHITE-WASH YOUR POULTRY HOUSE

Guaranteed for two years. Full description and price in our 1910 catalogue.

TEMPLIN'S "WONDER" GRAPE COLLECTION

For fourteen years we have been offering this splendid collection of 8 Grape Vines for 50c. Of course, a few changes were made in the varieties by adding new and superior ones instead of the old. As it is now it contains

More good vines and More high grade varieties than Were ever before offered for 50 cents

The collection contains three black, two red and 2 white sorts; a rare selection of "the best in the world," considering hardiness, vigor, productiveness and excellence of flavor, as follows: Brighton, Concord, Delaware, Diamond, Lindley, Moore's Early, Niagara and Worden.

JUST WHAT YOU NEED FOR SHADE IN YOUR POULTRY YARD

Order today! We will send the eight varieties, good one-year-old vines, to any address, postpaid, for 50c. And if you mention American Poultry Journal when you order, we will give you one vine extra—nine vines for 50c. Our 1910 Catalogue Free—Write for it today—just now. It contains many other great and liberal offers; we can't give them here. It also contains Nine of the Best Breeds of Poultry.

L. TEMPLIN SEED CO. : BOX 90 : CALLA, OHIO

START THIS SPRING.

Begin with a small outfit rather than not at all.

If you have been intending to raise chickens, don't delay. Start now and have some chickens to sell this summer or pullets to lay next winter. It doesn't cost much to start. The George Ertel Company, of Quincy, have made an introductory price on a small outfit that is so irresistible, so appealing that you can't afford to longer delay.

The way to make hens pay is to keep them laying or send them to the market. To feed and keep a setting hen—uncertain of temper—uncertain whether she will bring off any brood or not—is not profitable when you can get an incubator at the low price they offer and be almost sure of 95 per cent hatches.

Their 100-egg Hatching Wonder, which they will deliver to R. R. stations east of the Rocky Mountains for \$10, is 26 inches long, 21 inches wide and 31 inches high. It has triple walls, triple top and triple bottom, scientifically constructed to hold the temperature necessary within the incubator for the least expenditure of oil, regardless of how cold the air outside. It has a large copper tank and heater so that we have the benefit of a circulation of hot water, which cools slowly and cannot be quickly heated too hot. Each machine is fitted with our regular Victor regulator, which maintains the temperature without appreciable variation. The heater has a double jacket, which makes a tremendous difference in the oil consumption. A big lamp bowl doesn't need filling so often and is less apt to burn out if forgotten for a few hours—a big wide burner means heat—a big stout metal chimney doesn't get broken, and that means a saving in expense. All these things the Hatching Wonder has. They are the vitals of an incubator. Below the egg chamber with its movable tray is a nursery for the care of the newly hatched chicks—taking them off of the tray containing the hatching eggs so that they do not interfere with or smother the piping chicks. The double glass in the door permits of the inspection of the interior of the incubator without the necessity of subjecting either eggs or chicks to drafts of outside air. Ventilation is provided for by air inlets in the vicinity of the hot water passage into the tank, insuring a constant supply of warm fresh air.

In addition to the substantially built incubator with its egg tray and nursery, aluminum coated tank, heater, lamp and automatic regulator, the \$10 price includes a thermometer, funnel and book of instructions, giving valuable hints as to the raising of your chicks, besides telling how to get the best results from the incubator, all delivered at any railroad station east of the Rocky Mountains.

If the brooder is ordered shipped with the incubator, the delivered price of both is only \$15. The brooder provides a necessary home to take the place of a mother hen's sheltering wings during the first weeks of a chick's life, and up to the time a hen would wean her brood. It furnishes a good, warm, evenly heated, well ventilated nesting chamber large enough to afford sufficient exercise when weather conditions do not permit of an outdoor range. Brooder cases are made warm and tight and dry. The lamp and metal work are of the same quality as go into the incubator.

Better write the Ertel Co. today and have your outfit ready to start up just as soon as possible, because the greatest profit is from the early hatches. Remit in post office or express money order or bank draft, and if the machine is not just as represented, you may send it back and this firm will return the full amount you paid. You need have no hesitation in dealing with them, as they have been in business over 42 years, and have a paid up capital of \$60,000. They have a reputation for fair, square, upright dealing, which they intend to maintain. You can ask your banker or express agent about them.

AN OMISSION.

In our report of the New York show the winner of first pen on Columbian Plymouth Rocks was omitted. Sydney C. Allen, Orchard Park, N. Y., was the winner of this prize.

We are just in receipt of a copy of the annual mating list of Chas. G. Pape, Ft. Wayne, Ind., the well known breeder of Single Comb Black Minorcas. This is free for the asking. Send for one if you are interested in this variety and mention American Poultry Journal.

**S. D. SUTTON, BREEDER OF WHITE
WYANDOTTES AND WHITE OR-
PINGTONS, YOUNGSTOWN,
OHIO.**

Mr. Sutton informs us that he has five fine pens, containing all his high-class prize winning specimens of White Wyandottes, mated for best results, from which he confidently expects in the future as in the past numerous prize winning specimens. It will be remembered that Mr. Sutton caught several prizes in the late Youngstown show, where were to be found the hottest class of White Wyandottes ever gotten together. He also has three ground pens of White Orpingtons of the highest quality, from which he is prepared to furnish eggs for hatching purposes, thus giving his fellow

BACK TO NATURE.

Not a "Man Incubator," But a Nat-
ural Hen Incubator.

With all man's wonderful new inventions and startling contrivances, nature's inner work remains to us the same marvel and mystery it was to our forefathers.

There is a great deal of talk about modern incubators, steam heated, electric lighted, hot and cold attachments and so forth, but one man who ought to know claims it is mighty difficult to improve upon wise Mother Nature.

J. F. Siems, president of the Natural Hen Incubator Company, says, "We make our great mistake in trying to improve on nature. Get back to nature—copy nature, do as nature does. That is the secret of

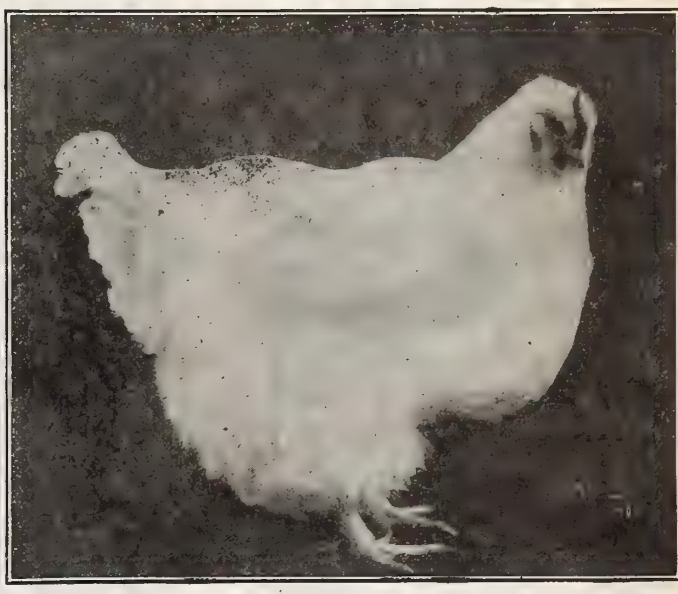

birds, raised by themselves. Their winnings were as follows: Fourth cock, second hen, fourth cockerel, fourth pullet and third pen. These winnings were made as they were, competing with the best Rhode Island Reds, which was a credit to this farm. Their winnings of four out of five at the Buffalo show last year is conclusive evidence that they are producing Reds of a high class quality year after year. They are getting up a fine catalogue of Rhode Island Reds at this time, which no doubt you will want. You can procure same by addressing Simmons & Crittenden, Geneva, Ohio.

We are sorry to learn that S. A. Nofztger, North Manchester, Ind., has met with loss by fire. His entire office and effects were burned recently, and he especially requests that his old customers send in their names, and trusts that he may again get them on his mailing lists. While Mr.

COLUMBIAN WYANDOTTE.

This female has scored 94½ in competition and shows the kind of stock in the breeding pens of Fred Styers, Greensburg, Ind.

WHITE ORPINGTON.

First hen at Toledo, Tiffin and Elmore, 1909, and part of second pen at Cleveland, 1910. Bred by Portage Poultry Yards, Elmore, Ohio.

fanciers an opportunity of procuring a start in every one of these varieties that will put them in the front ranks at once.

Mr. Sutton means to pay all express charges on either stock or eggs to any part of the United States or Canada, where the order reaches or exceeds \$10 or upwards. This is quite a concession on the part of Mr. Sutton, and should interest buyers of these varieties. Mr. Sutton is in the business because he is a thorough poultry fancier and not from a mercenary standpoint. He says that a satisfied customer is more to him than the mere fact of making a sale, and you are assured fair and courteous treatment with any order you may favor Mr. Sutton with.

the success of my Natural Hen Incubator. My incubator is built on nature's plans—not mine or some human inventors'.

Mr. Siems is very close to the truth when he decries the present attempts to promote "Man Incubators" instead of the natural hen incubator. Surely when we deal with the mystery of life, nature is the great teacher. Mr. Siems' catalog is full of pithy facts, good for all poultry raisers to read. It can be had free by addressing the Natural Hen Incubator Company, 1349 Constance street, Los Angeles, Cal.

Messrs. Simmons and Crittenden were among the winners at the show held at Columbus, Ohio. They won in every class of

Nofztger's loss was considerable regarding his office effects, yet he rejoices that it was not his poultry plant and stock of Partridge Rocks which were burned.

Baker Johnson, Lewistown, Md., breeder of S. C. Black and Buff Orpingtons, has been making some great winnings with his birds the past season. Write him for prices and particulars and mention American Poultry Journal.

P. S. Montgomery, Montpelier, Ind., breeder of White Plymouth Rocks, is mailing out his mating list free to all who ask for it. Send for it today and mention American Poultry Journal.

A VISIT TO THE PLANT OF LYMAN H. HILL.

On the 17th of February the writer visited the plant of Lyman H. Hill, Station 1, Jackson, Mich., originator and breeder of the Wolverine Strain White Plymouth Rocks. We drove out to the farm purchased by Mr. Hill last year, and I was surprised to note the great progress he had made toward establishing a model, up-to-date poultry plant.

His farm is but a short distance from the city and comprises seventy-two acres of well drained, sandy soil. He has built a new, handsome residence and has several large

have a green, well-sodded run. In addition to this house, Mr. Hill has staked out another one of the same size which he intends to build just as soon as the weather permits. In addition to these two, he has a number of colony houses scattered about his farm to contain breeders or growing stock.

I noticed particularly two pens of wonderful quality from which he is offering eggs this season. It has never been my pleasure to look at two finer pens of White Rocks in any place or any show-room. They are simply magnificent, every one of them. The two males heading these pens are snow white, clear to the skin, and in addition have bright, clean yellow legs. Their head points are fine. Tail, back and body shape are as nearly perfect as anybody ever bred,

We wish to call the attention of our readers to this noble, stately specimen of a Barred Plymouth Rock cockbird. Just examine this bird carefully and see what you think of him. We gave a detailed photograph of the head and neck of this magnificent bird in our February issue. This bird is a representative specimen of the justly celebrated "Aristocrat" strain, originated and introduced by W. D. Holterman, the fancier, Box 2, Ft. Wayne, Ind. Look up his striking ad in this issue. Mr. Holterman has developed one very valuable quality in his strain to a remarkable degree—fine, exquisite barring and rich color. His Prince Ringy is claimed to be the finest barred male bird that has ever been produced anywhere.

barns, filled with farm stock of all kinds. While there his men were just installing a hot water system in a brooder house recently erected. This is a building 12x40 feet, modern in every way. His incubator cellar is large, with perfect ventilation, and already several large machines had been started and they were preparing to fill another with eggs.

He has also erected a large power house, with gasoline engine, grain and bone grinders, etc., installed, which will prove a labor-saver.

His main breeding house is 15x120 feet, divided into twelve pens, each 15x10 feet, with a hundred-foot yard in front and a fifty-foot yard in rear of each pen. Having alternate yards for his birds to run in, it will be an easy matter for them to always

and they had the deep, full breasts and the extreme width so much strived for in Plymouth Rock shape.

I carefully noted the birds in his other pens and failed to find a bird that was not in the very pink of condition, so far as health and vigor was concerned. There was not a poor colored bird in the entire flock. There was not a bird that did not have a bright bay eye, good clean legs of good color, was not up to or over standard weight, and had a low tail and long, good back shape. I can candidly say that they were as fine a lot of White Rocks as I ever saw mated anywhere, and I have visited the plants of a good many breeders of this variety.

While at his place I took a great deal of interest in looking over the records he has

kept of his 200-egg strain. This is kept in a simple yet very complete manner. I was also allowed to read a large number of testimonial letters he has been receiving from his customers. He seems to have the ability of not only mating and raising the right kind of stock, but can give customers the best of satisfaction and is content with reasonable prices.

Were I starting in the White Rock business, knowing what I do now, Mr. Hill would certainly find a good customer in me, for I know him to be worth every confidence that can be put in him and in his stock.

C. W. Zimmer.

THE REAL SECRET OF SUCCESSFUL HATCHES.

Mr. Hugo Lemke, one of our hustling, successful business farmers, says he has discovered the real secret of big, healthy hatches. He claims that it all lies in the incubator you use. In a recent letter he says, "I just want to tell you that Queen Incubators and Brooders are the best made. I know what I am talking about, for I have used every so-called 'best' machine on the market. While I could get a good hatch in most machines, I could only raise a small per cent of them, for they were not hatched right. Now, I placed chicks hatched in the Queen in other brooders and they lived better than those that were hatched in other machines, but if I put the chicks that were hatched in the Queen Incubator in the Queen Brooder, I raised practically all of them. I did not believe before that this could be done. I prefer Queens for my own use. My other machines I will sell for whatever I can get for them, or give them away."

Mr. Lemke is undoubtedly right. There is no question but that the Queen Incubator has made a most wonderful record. While there may be a few incubators on the market that get as large a percentage of hatches as the Queen, it would seem that none of them hatch such plump, robust chickens.

Queen hatched chickens won the three big prizes at the Seattle World's Fair, first prize at the St. Louis Poultry Show and first prize at the Nebraska State Show. The Queen is a wonder on healthy hatches, as well as big hatches. Leading experts and fanciers prefer it.

Curiously enough, the Queen Incubator is not a high-priced machine. Its cost is below the average. It is sold on a liberal, free trial plan—direct from the factory—guaranteed for five years. If you want to get in touch with Incubator Headquarters, write a postal to "Wickstrum, the Queen Incubator Man, Box 4, Lincoln, Neb." Just address it that way. Wickstrum says he is loaded with poultry and incubator ideas. Better write him tonight. His books and advice are free. Any good woman or man should be able to make splendid profits with a Queen Incubator and it does not take much money to get one.

ALL STRAWBERRIES ARE GOOD—SOME ARE BETTER.

"The Lord might have made a better berry than the strawberry," goes an old saying, "but He never did." These luscious first fruits of early springtime, however, are not all alike. Perhaps one might say of them as did the unmathematical old lady of something else. "Some of them are down to the average, but none below." How to get those better berries depends largely upon the grower, and this knowledge, being stock in trade, is oftentimes closely guarded. L. J. Farmer, a veteran grower, of Pulaski, N. Y., has performed a real service to growers by compiling a book from the methods, experiences and secrets of himself and others among America's successful growers. The book is well worth its price, 25 cents. Another helpful book is Mr. Farmer's Catalogue, describing his big stock of berry plants, which upon request to Mr. Farmer will be sent free to our readers.

Kitselman Brothers, fence manufacturers, of Muncie, Indiana, have just completed their large catalogue of fencing. Their prices are extremely low when you consider the high quality of their fencing. Prices range from 14 3/4 cents a rod up. See their ad elsewhere in this paper and write them for catalogue.

Have you seen C. L. Buschmann's R. I. Red Book? This is one of the best books put out this season, and if you are interested in Reds you should have a copy. This book will be sent you for 10 two-cent stamps. Send for a copy and mention American Poultry Journal.

A 50 EGG BUCKEYE INCUBATOR

\$5

with lamp and complete outfit ready for hatching—guaranteed to hatch every hatchable egg. Our 50-Egg Buckeye is a simple, self-regulating, latest-improved machine. Hatching quality backed by a 40-day free trial or money back without dispute. 10,000 sold last season, on this guaranty, and not one returned. Larger sizes on same guaranty and at correspondingly low prices.

"Anybody can hatch Chickens with a Buckeye"

Twenty years on the market. 100,000 in successful operation. Every reader of this paper, who keeps chickens, should send for our poultry books telling how 51 chicks were hatched from 50 eggs, and "Making Money the Buckeye Way."

YOU OUGHT TO HEAR A WING PIANO

FOUR WEEKS'
FREE TRIAL
We Pay Freight Both Ways

A Beautiful Toned High-Grade Piano on Easy Payments

In 41 years we have built and sold over 40,000 WING PIANOS. All this experience goes into the WING PIANO of today, and makes it as high a grade Piano as you can buy. Thousands of customers yearly write us of the tone and durability of their WING PIANO.

Four Weeks' Free Trial. Some pianos sound well in the warerooms but are a disappointment in the home. WING PIANOS keep their purity and power anywhere; that is why we make the unusual offer of sending you one for 4 weeks on trial in your own home without payment or deposit. You can be the judge of it in the place in which it must be used. We pay freight both ways, if after a 4 weeks' trial you decide not to buy.

Agents' Profit for You

If the Piano pleases you and you decide to buy it, the price will be from \$75 to \$200 lower than any other high-grade Piano on the market. This is possible, because we sell direct to the consumer. We have no agents. We do not sell to dealers. The \$75 to \$200 lower price is just the cost of selling through middlemen. We give that to you, for to you it belongs.

2 to 3 Years to Pay

When paying for a WING PIANO we give you a choice of many different ways of paying for it. A way to meet every possible circumstance in life.

We sell for cash or on the easiest kind of easy payments. And show you how easy it is to do business with us at a distance. No collectors or solicitors.

WING & SON
NEW YORK
CONCERT GRAND

YOU OUGHT TO KNOW ALL ABOUT PIANOS

We have in press a magnificent 156-page "Book of Complete Information About Pianos." It will be the most complete and costly book ever published by any piano house. It is a complete encyclopedia of the piano, giving its history and telling about its construction. Shows how to tell a good piano from a bad one. Gives you a good start toward a musical education. Our price for the book is \$1, but by sending now for our other free book, "A Standard Piano," which ought to be in the hands of every music-lover, it will show you how to get the big book free when it comes from the printer. The book, "A Standard Piano," tells in detail the business methods of the old house of WING & SON. Why they send Pianos for free trial—why they can undersell local dealers, and how you can pay for a Piano and not know it.

Cut out here. A pia will do.

WING & SON, 372-385 West 13th St., N. Y.

Send me your book, "A Standard Piano," without any cost to me or obligation on my part.

Box 1814 Anderson, Ind., or Coffeyville, Kan.

Order Free Catalog now.

BROWN POULTRY FENCE

Does Not Cost One-Half as Much as Common Chicken Netting, Yet Will Last Five Times as Long

Size of Wires. The top wires are No. 9½ gauge—same as nearly all stock fences. Intermediate and stay wires in same proportion—all double strength high carbon spring steel wire.

One Inch Spacings. More closely woven by far than other poultry fences, because bottom wires are only one inch apart, balance in same proportion—absolutely chick tight and rabbit proof.

Stock Strong. Built of material heavy and strong enough for hogs, horses and cattle. Wires cannot possibly slip, sag or bag down.

Rust Proof. The double galvanizing of every pound of wire in Brown Poultry Fence insures the fence against rust for many years.

Saving In Cost. With No. 9½ top wires, you can save at least one-half the posts, and besides you require no top railing or bottom boards. These items alone usually cost more than the fence.

Price. Our prices are less than common netting costs. Before buying any poultry fence, get our catalog and prices. We have 160 styles of fences to select from.

For a poultry proof fence woven close enough to confine small chicks yet strong enough for cattle, this fence cannot be equalled anywhere or at any price.

Write Today—We pay the Freight

DEPT. 9 CLEVELAND, OHIO

O. L. KING, BARRED ROCK SPECIALIST, ROCKFORD, ILL.

It will be remembered that Mr. King was for a long time located at Walnut, Ill., where he bred Barred Rocks in high quality, in large numbers for many years. He reduced his flock, saving only his choicest specimens, when he moved to Rockford, Ill. And for the past year he has been stocking up his yards from this carefully selected specimens, and has now built up his flock to the point where he is able to furnish you with eggs, from ten high class matings, which he says in his judgment are the best he ever handled.

Mr. King has established a high-class fanciers' plant, and arranged the same, which according to his many years of experience as a producer of fancy poultry has convinced him was for the best. He is located just north of the city of Rockford, his plant being of easy access on the interurban. Visitors will be welcome at any time. He recently exhibited at the Rockford show, winning first and fourth cock, first and second hen, first pen, silver cup for best mate breeds exhibition cockerels. Special for highly scored pens of parti quality birds in the show. Mr. King is an old advertiser in the A. P. J. His ad is always to be found in our journal.

Lincroft Kennels and Poultry Farm, Red Bank, N. J., make a specialty of breeding Rose Comb Rhode Island Reds, and the proprietor has taken special care in his matings for the past five years, which has resulted in him producing some extra fine breeding birds which are in his pens this season. Their shape, color and laying qualities are unsurpassed. They are ex-

tremely hardy and strong and their eggs hatch good strong chicks. His breeding pens are all headed by prize-winning male birds, and the eggs from these pens are bound to produce prize winners. Write him for prices and particulars, and mention American Poultry Journal.

Can you tell me of any gingham, suitable for dresses for a young lady, that are less expensive than the imported gingham, yet fine and pretty?
M. E. R.

Fine, pretty gingham in exquisite designs and colors are called Simpson-Eddystone Zephyrettes, made by the Eddystone Mfg. Co., Philadelphia, and they are less than half the price of the imported gingham. You should be able to purchase them at any first class dry goods store. If you don't find them write the company and they will advise you of a dealer who does keep them.

Among the Rose Comb Rhode Island Red advertisements will be found that of N. B. Lints, Frankfort, N. Y., R. F. D. 3. Mr. Lints has been a breeder of R. C. R. I. Reds for the past eleven years, on his farm of 70 acres, which contains a large orchard where his birds are allowed free range. He uses the curtain front style of houses, which insures healthy breeding stock. He has also been breeding Rhode Island Whites for three years and speaks very highly of them. Send to him for his circular and mention American Poultry Journal.

Ira Phillips, Oberlin, Ohio, breeder of Columbian Wyandottes, won 1st pen, 1st pullet and 2d cockerel at the late Cleveland show. Look up his ad in this issue and write him for prices and particulars. Mention American Poultry Journal.

Write for An Actual Sample of Page Fence—FREE!

Let us send you an actual sample of Page Woven Wire Fence and our valuable Quarter Centennial Catalog Free. See the real Page Wire! Examine the method of weaving the wonderful Page Knot—the Knot that can't come off! Study the many styles of Page Fence and the Panorama of Pictures showing extreme tests which this splendid fence withstands. Read how, in our great mills and factories, we put elasticity, tensile strength and durability into High-Carbon, Basic Open Hearth Steel Wire. Learn what this means in economy.

Five Times the Durability of Ordinary Poultry Fence

Does away with the use of boards required for netting or ordinary poultry fence. The heaviest stock cannot break through it. Keeps poultry safe from prowling animals. Bottom wires set closely together, safeguarding the smallest chicks. It's the easiest and most economical fence to put up. Has many times the serviceability of ordinary poultry fence and twenty times the life of netting.

The steel from which Page Fence is made is 50 per cent stronger than common Bessemer Wire, and the galvanizing is 50 per cent heavier. Page Fence saves posts, nails, staples and labor, because its stiff, strong, coiled spring, horizontal wires support themselves over a long span. The actual saving is 50 or more posts every 100 rods.

Specified by U. S. Government as standard of quality. Approved by a million farmers.

CYPHERS INCUBATOR COMPANY'S NEW CATALOGUE.

A Few Extracts From This Big Annual
Free Book Which Indicate the
Value of Its Contents.

Extract From Chapter 1.

This chapter tells in brief form about the success of two Cyphers customers—men who displayed the good judgment to select the best incubators on the world's markets (best by oft-repeated tests) and who now use it exclusively in hatching both quality and quantity.

It tells about the sale last season of 1,024 White Orpington eggs by Kellerstrass Poultry Farm, Kansas City, Mo., to eighty-four customers for \$2,048 cash—straight \$2 per egg—and how the thirty hens that laid these eggs earned for their owner a net profit of \$3,600 in one season.

This is quality!

And every hen in the flock, with but one exception, also three of the choice male birds mated with them, were hatched in Standard Cyphers Incubators.

Extract From Chapter 2.

Forty thousand dollars is a large sum to put into a poultry plant, but Cyphers Incubator Company has expended more than this amount in the purchase and improvement of its fifty-acre poultry farm at Elma Center, a suburb of Buffalo. At Wayland, N. Y., where the factory and home offices of Cyphers Incubator Company were formerly located, the company operated a four-acre plant, but it was far too small for the work the company wished to do in its own behalf and in behalf of its many customers.

On pages 82 to 86 of this catalogue are shown excellent photographic views of the new Cyphers Company Poultry Farm.

Extract From Chapter IV.

During the early spring of 1906 Cyphers Incubator Company began a number of experiments in feeding chicks confined in a brooder house, using the hygienic cradle-back and fresh-air-brooding system. Several pens of chicks were fed in the usual manner four or five times a day; others were fed in deep litter daily, and still others in alfalfa litter eight to ten inches deep, in which enough Cyphers Chick Food had been thoroughly mixed to last one to four weeks. The results were highly instructive and proved to the company's entire satisfaction that the deep-litter method of feeding chicks is not only a great labor saver but also gives the best results.

Extract From Chapter V.

On this and the opposite page are shown amateur photographs (not retouched) of sample quality standard-bred heavy layers as produced on Cyphers Company Poultry Farm. There is not room to spare in this catalogue for a full report of the numerous feeding experiments conducted on the company's farm. Only a few specimens can be shown and a few results given.

Cyphers Company is not doing any special forcing on its farm to achieve sensational egg records at the expense of vigor or vitality. Every egg record here reported was secured in the course of ordinary breeding. The females shown in the pictures were in breeding pens with males throughout the hatching season. Trapping was practiced and the regulation "Cyphers Company Way" of feeding was employed, except in cases where experiments were made with dry ground food fed in hoppers.

The catalogue from which these extracts were taken is free. It consists of 160 pages fully illustrated and is full of information of value to poultry keepers. Write for it today. Address nearest office. Cyphers Incubator Company, Department No. 30, Buffalo, N. Y., Boston, Mass., New York City, Chicago, Ill., Kansas City, Mo., or Oakland, Cal.

The Rocky River Poultry Co., Deerfield, Ill., breeders of the famous Phillips strain of Rose Comb White Leghorns, are advertising with us again this month. Their birds won more prizes at New York and Chicago than those of any other breeder in America, and if you are looking for something extra fine you should write for a copy of their handsome new catalogue and mention American Poultry Journal.

Maplehurst Farm, Geo. M. Benham, Prop., Canandaigua, N. Y., has a very neat mating list which is mailed on application. Drop a postal for it today and mention American Poultry Journal.

CLASSIFIED ADS

UNDER this heading ads will be inserted for six cents per word each month for less than three months, and **four cents per word each insertion for three months or longer.** Changes in copy allowed every three months. Numbers and initials count as words. All ads will be inserted under **classified headings.** No ads accepted at less than an average of fifty cents per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Write your copy plainly, as upon this the correctness of your ad largely depends. When placing your ads remember that advertisers of Classified Ads get better returns from **AMERICAN POULTRY JOURNAL** than from any other poultry journal—none excepted. On writing any of these advertisers mention A. P. J.

ALL COPY FOR CLASSIFIED ADS MUST REACH US BY THE 19th OF THE MONTH PRECEDING DATE OF ISSUE

ORPINGTONS.

WHITE ORPINGTONS—Cold weather has no effect on the laying qualities of our White Orpingtons. They laid heavily, persistently and steadily during this cold weather, the coldest we have had here in 10 years. They are prize winners, too. At the great Rochester show we had in White Orpingtons, the following winners: 1st, 2d and 3d cocks; 3d and 5th hens; 1st and 3d cockerels; 2d pullets, 2d pen. Farm range fowls, housed in fresh-air houses, insuring fertility in eggs and vigor in chicks. If you want the best proposition offered on White Orpington eggs for hatching, write at once for our mating list. Grannis Brothers, R. F. D. 12, LaGrangeville, Dutchess County, New York. 1-10-lyr.

11% MORE First Prizes Total at N. Y.

SHOWS (MADISON SQUARE GARDEN) THE PAST 21 YEARS

Has Been Won By

BARRED PLYMOUTH ROCKS

Raised and Bred by Bradley Bros., Lee, Mass., than Any Other Exhibitor has won on ANY Stock. 20 Per Cent More 1st Prizes on Cockerels and 11 Per Cent More 1st Prizes on Males.

☛ All of the Silver Cups Competed for have been Won By Us 3 Times out of five.

☛ Four 1st, Four 2d and Three 3d Prizes, besides other awards have been Won by Us at a Single Madison Square Garden Show.

☛ THREE TIMES have Males of Our Breeding Won FOUR OF THE FIVE PRIZES Offered in the Class; INCLUDING FIRSTS.

24 OF OUR "LEE BELLE" LINE

Of Females have been First Winners at New York Shows Alone. First Prize in each of the Two Largest Shows and the Championship Prize in what was considered the Strongest Female Competition of the Year, is a Recent "Lee Belle" Record by Birds We Bred, Raised and Sold. (We have permission to state this, also the other records here referred to.)

☛ First Prize Winnings at Chicago and Kansas City and at the Largest Shows outside of New York which our birds have won for our customers should alone be SUFFICIENT TO DEMONSTRATE THE SUPERIORITY OF OUR STRAIN.

FOR SALE: Breeding and SHOW BIRDS, both old and young, bred from these same lines of New York and Boston First Prize Winners. We also make a specialty of furnishing Carefully Mated Trios and Pens for breeding Exhibition Cockerels or Exhibition Pullets.

TESTIMONIALS

I won 1st pullet at Galesburg, Illinois, January 17-22, 1910. This pullet was from a setting of eggs I got from you last spring. Her score was 93 by Judge Faulkner. You may use this information as you see fit.—S. E. Coddington, Woodhull, Illinois, February 8, 1910.

I believe my stock do you good advertising. At our Kansas State Show just closed my "Rox" in competition with one hundred seventy-five Barred Rocks entered, among which was a pen of Kansas City winners there, mine won 1st Cockerel, 1st Pen, 3d Cock and 1st Special for best colored cockerel, this made them crow quite testily for "Bradley Bros."—Mrs. J. T. Woodford, January 26, 1910.

EGGS From Best Pens We Ever Owned, \$8 per 13; \$15 per 26; \$25 per 50. ALL SELECTED PENS, BEST ONLY, NO POOR ONES. FEWER BREEDING BIRDS But MORE MERIT. WE INCLUDE EGGS WORTH \$25 per 13.

FREE: Illustrated Printed Matter Telling of Winnings at Kansas City, Chicago, N. Y., etc.

BRADLEY BROS., BOX 909, LEE, MASS.

DARK CORNISH AND WHITE INDIAN GAMES

1st Cornish cock and 1st pullet, Allentown, 1909. 1st White Indian ekl., 1st pullet, 1st pen. Young and mature breeding stock. Prices right. Let me know your wants. Eggs in season. Mention A. P. J. when writing.

JOHN A. MILLER : NAZARETH, PENNA.

Dawson's White Wyandottes

At the recent Ontario Winter Fair, the largest show ever held in Canada, (5,000 birds) and quality equal to any show on the continent, won first, fifth and seventh hen, first and eighth pullet, fourth and fifth cockerel, cup for best cockerel and pullet and special for best display. At the Canadian National Exhibition we won three firsts, two seconds, two thirds, one fourth, one fifth and one sixth; also cup for cock, cockerel, hen and pullet and special best display. At New York State Fair, nine ribbons on ten entries. A total of twenty-six regular prizes and numerous specials at three of the largest shows in America. Our prices are moderate. Get our mating list.

EXCLUSIVELY

Huber's famous superior strain, not only demonstrated their superior exhibition qualities at Chicago, Dec. 7 to 12, 1909, where they won first cockerel, fifth cock, fourth and fifth hen and 3d pen, BUT excel all other strains in laying as well. The past year a flock of 150 hens averaged 170 eggs each, which stands unequalled.

Our breeding pens this season will be the best we ever owned. We still have a few good breeding cockerels and pullets to dispose of at reasonable prices.

WHAT \$10.00 WILL DO

We have contracted for 100 Cycle hatcher-brooders combined, these machines are fully guaranteed and same as used by the Philo system. While they last we are going to sell them for \$10, including fifty of our selected utility eggs, which fills the machine. We would advise acting quickly, as they are bound to go quick at this offer, which will not be seen again. We are making this offer as a special inducement to advertise quickly and effectively our stock. Machines will be expressed you direct from Indiana factory.

If you are in need of stock, eggs or baby chicks, write us. Send for mating list for 1910.

Huber Bros. : Box B : Kenosha, Wis.

WINNING WHITE WYANDOTTES LAYING

In cocks, hens, cockerels and pullets I offer choice specimens with deep round breasts, broad backs, well spread tails and snow-white plumage. Birds which will lay eggs and win ribbons for you. All farm raised, healthy, vigorous stock. Write at once telling just what you need. **Harry W. Britton, R. F. D., Moorestown, N. J.**

Cortenborder's WHITE ROCKS

Winners wherever shown. My birds are ideal in type and second to none in color, in fact the best I have ever raised in my fifteen years of experience. Eggs, \$2 and \$3 per 15. For further information, write to

"RINGLETS" STAND ALONE, VICTORS OF THE FIELD . . .

At America's Imperial Show, Madison Square Garden, New York, Winters of 1908 and 1909

E. B. THOMPSON'S BARRED P. ROCKS

As usual win the leading prizes and achieve the highest honors that can come to any breed. First prize on cockerel, first prize on cock, the Great National Silver Cup presented by the American Plymouth Rock Club for best cock, cockerel, hen and pullet. Double the number first prizes of any competitor. Special for best shaped male, special for best headed male, special on hen, special on pullet, the Sweepstakes Special in Gold for best Plymouth Rock on exhibition of either sex and any variety. The Imperial prize of the show, special for champion male.

At the 1909 New York Show my 1st Prize Sweepstakes Cup Exhibition Pen was Declared by Expert Opinion to be the Finest Ever Exhibited. A Paragon of Perfection, and created a Sensation as the Finished Achievement in Modern Barred Rock Breeding.

For more than twenty years at New York my "Ringlet" victories have been complete. Exhibited by me personally they have won a grand total of 127 prizes, 69 of these being firsts and specials, being more first and special prizes than won by any competitor in the history of the show. These include the \$100 Champion Challenge Trophy, won three times; the \$100 Association Cup, won three times; the \$100 Sweepstakes Cup offered by the President for best Plymouth Rock cock, cockerel, hen and pullet, any variety.

The "Ringlet" world's record at New York four years in succession is a page of history. The "Ringlet" record of first on exhibition pen three years in succession is the undisputed Champion. My clean sweep of FIRST, SECOND, THIRD, FOURTH AND FIFTH PRIZES on pullets has never been approached in Madison Square Garden, and stands alone and unequalled.

One thousand grand breeding cockerels for sale; elegant hens and pullets in any number. Show

ROYAL BLUE BARRED ROCKS

ORPINGTONS

We have just imported some of the Crystal Palace winning **White Orpingtons** of this year. Any fancier passing near Cincinnati would be paid to stop off and see these birds: They are absolutely in a class by themselves.

In **Blacks** we have just bought Judge Stanfield's entire flock, so will be able to meet egg orders for the lower priced eggs now quite promptly. In the higher grade of Blacks, need not here repeat what every fancier seems to know, judging from our wonderful business. : : : : : : : :

In **Bufs** we now think we have the best in America, and all who have seen our birds agree with us. If you want size, type and color, order your eggs now. Stock almost all sold. Our 1910 mating list free if you mention this paper. : : : : : : : :

THE CHEVIOT FARMS : MILTON W. BROWN, PROP. : CINCINNATI, O.

BUFF AND WHITE ORPINGTONS

THE OLDEST SPECIALTY BREEDERS IN THE UNITED STATES

OUR SHOW RECORD on Buffs at Madison Square Garden is unequalled—winning Silver Cup for best display, showing only 9 birds and having 7 points more than our nearest competitor. In same show also won handsome Silver Cup for Best Cockerel. Our winnings at Chicago, where we won more firsts than all competitors, cannot be equalled.

Can there be any question where you should order your stock and eggs?

OUR MATINGS in Buffs and Whites are the finest we ever owned and with our long line of show producers in the past convince us winning specimens will be produced. Send for free mating list. We are quoting special prices to close out some grand breeding cockerels at this time. \$10 to \$15 gets a grand bird. This is your opportunity. We breed for quality, health, vigor, and egg production. Write us your wants. Mention American Poultry Journal.

J. M. Williams & Co., Box B, No. Adams, Mich.

THE FAMOUS HEN "PEGGY"
Value \$10,000.00

First prize winner at Jamestown Exposition, Madison Square Garden, New York, and everywhere she has been shown. The reason we value the above hen at Ten Thousand Dollars is because we refused \$2,500 for her after we sold five of her chicks for \$7,500; and we will give \$10,000 for a "Crystal" White Orpington hen that will equal her in every way.—Kellerstrass Farm, Kansas City, Mo.

KELLERSTRASS WHITE ORPINGTONS

Are the biggest payers because they have proven to be the biggest winter layers

KELLERSTRASS STRAIN

CRYSTAL White Orpingtons are the grandest utility birds on record today, and as to their fancy quality they won first at Madison Square Garden, N. Y., 1905, 1906, 1907, 1908; also at Crystal Palace, London, England, Chicago, and Boston. If you need some birds to improve your stock or for the show room, write us, we have them, and the kind that win, as our past record shows. Stock and eggs for sale at all times. Remember, we are the originators of Crystal White Orpingtons, and breed only the one kind. We devote our whole time to this one breed. Send for catalog; mention A. P. J.

Success- ful Egg Farming

Among people who can afford luxuries there is great demand for a regular supply of fresh eggs. The few growers who can furnish them regularly, Winter and Summer alike, get very high prices.

The Corning Egg-Book

(entitled "\$6.41 per Hen per Year"), tells how two men, in poor health, starting four years ago with only thirty hens, made from their little egg-farm a clear profit of over \$12,000 last year. It tells all about their experience, their failures, their methods and how other men or women, with good sense, care and faithful work can make money in the same way. Not a detail left out.

The Corning Egg-Book is sold in combination with the Farm Journal, Philadelphia, Pa., and we have made arrangements to make this

Special Offer

For \$1.00 (cash, money order or check) we will send postpaid the Corning Egg-Book and the Farm Journal for two years, and American Poultry Advocate 2 years, all for \$1 if order is sent at once to

American Poultry Advocate
727 Hogan Block, Syracuse, New York

Read our Freight Prepaid Offer.

WE RECOMMEND "GALVANIZED RUST-PROOF" as the best roof covering money can buy

We offer you steel roofing in three surfaces, viz.: unpainted, painted or "galvanized rust-proof." We recommend the rust-proof as by far the best and cheapest in the end of any roof covering on the market, and it is positively proof against rust or corrosion, so will last indefinitely.

Painted steel roofing is the best for the least money, and recommended to our patrons who do not feel able to invest in the "galvanized rust-proof," as the painted steel roofing will give splendid service, especially if painted at intervals of two to three years after being laid.

The unpainted sheets are sold to those who wish to cover with special paint.

Note.—When sending your order please send diagram and size of roof to be covered.

Our Guarantee The Chicago House Wrecking Co. positively guarantees every sale and every order satisfactory to you or money refunded without delay or argument. Our million dollar capital and stock is sufficient evidence of our responsibility, and you can remit in full for the amount of your order in perfect confidence that if the roofing is received and is not satisfactory that we will immediately take it back and refund your entire purchase money, or if you prefer you can send 25 per cent deposit, when we will promptly ship, and you can pay for the balance when roofing reaches your depot.

CHICAGO HOUSE WRECKING CO.
35th & Iron Sts., CHICAGO, ILL.

FREIGHT PAID

At prices quoted in this ad. we will prepay the freight on all Roofing, Siding and Ceiling orders in full to all points east of Colorado in the United States except Oklahoma and Texas. 15c per square additional for these two states. To all points west of Colorado in the United States, 50c per square additional.

HOW TO ORDER

Add 10 per cent to your surface measurement, allowing for laps; send us sketch of your building showing size of dimensions, so that we can send you proper length of sheets to lay economically and avoid waste.

FREE ROOF BOOK

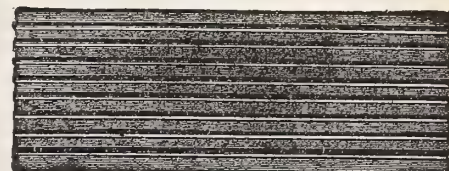

Our 1910 book on Roofing, Siding and Ceiling sent free for a coupon. Tells how to lay Roofing or Siding and contains much valuable information. Send in your name today. Get our big catalog, the wonderful "Price Wrecker," containing our newest and latest bargains on building material and merchandise of all kinds.

American Poultry Journal, 358 Dearborn St., Chicago, Ill.

It is not a fad, fancy or fake

The Norwich Automatic Exerciser and Feeder

Is a practical, mechanical, reliable, automatic machine for feeding poultry, so arranged that waste is absolutely eliminated, thus reducing feeding expenses nearly 25 per cent. Its action necessitates slow feeding and exercise, and a test at the River Home Poultry Yards, Perrysburg, Ohio, has proven that "it will increase the normal egg production approximately 20 per cent." It operates with any grain, feed or mixture, and may be regulated to feed desired quantity. Feeding labor is reduced to filling hopper when empty, and your stock will never be overfed and lazy or go to roost hungry. They feed themselves the moment they are off the roost mornings, and will keep busy all day. The machine is absolutely rat and bird proof. The Norwich Automatic Exerciser and Feeder is sold under GUARANTEE to give perfect satisfaction, to pay for itself in 90 days, or money and expenses refunded. Under our system of selling it will cost you nothing to prove our claims. Catalogue for the asking.

Norwich Automatic Feeder Co., 20 Water Street, Norwich, Connecticut

PITTSFIELD

== CAN FURNISH YOU ==

First Boston Cock

**Hatching Eggs
Day-Old Chicks
Breeding Birds**

FROM THEIR WINTER LAYING,
PROFIT PAYING

BARRED PLYMOUTH ROCKS

that have made their plant successful and famous; the kind of stock that is adapted to farmers, egg farms or broiler plants; that is really bred to lay and matures rapidly. Or we can furnish you the quality of stock that won for us

**At Boston, 1910:
1st Cock, 1st Exhibition Pen Chicks, 2d Hen
and eight other regular and special prizes**

This winning was made against the biggest and best known breeders in this country and proves conclusively that we have the **leading exhibition and utility strain of America.**

Our exhibition matings contain all of our Boston and other winners this season. They are correctly mated for best results and will produce winners for you at any show next season. We will sell eggs at our established price from all pens of \$4 per 13, \$12 per 50, \$24 per 100, or at special prices for all eggs from one pen. Results guaranteed. We will mail a detailed list of matings on request.

While we are justly pleased with our record with fancy birds, we take special pride in our reputation as successful breeders of a **healthy, vigorous, money-making utility strain**, such as nine out of ten of you want. The object of this plant is to supply eggs and stock for breeding purposes, and all of our efforts are in that direction.

Every bird in our breeding pens is a carefully selected, healthy, vigorous, range-reared individual, selected for type and possibilities. Eggs or chicks from this stock are sure to give you permanently satisfactory results.

No Barred Rock plant in the country is so well equipped to handle large orders for chicks or eggs promptly, and none take more pains with small orders. We guarantee safe delivery anywhere, and good hatches.

Price of Utility Eggs: \$1.50 per 13; \$4.50 per 50; \$7 per 100

Day-Old Chicks: \$6 per 25; \$10 per 50; \$15 per 100

Your satisfaction is the key to our success, and we guarantee it

We have a choice lot of breeding males and females on which to quote you prices if interested.

Do not lose sight of the fact that Barred Plymouth Rocks are the greatest of all American birds and best adapted to American conditions.

A Treatise on Food and Egg Production

A valuable book for anyone who is raising fowls for egg production. It gives in a very plain and concise form the composition of the different foods.

It tells how and what to feed to produce eggs in winter.

The author has sent this book on approval and has always received the money for same at once, which is proof that the book is valuable.

By special arrangement with the publisher we are offering this book and one year's subscription to American Poultry Journal for only \$1.00. Send all orders to

American Poultry Journal Pub. Co., 358 Dearborn St., Chicago

Twelve Months' Work in the Poultry Yard

By W. Theo. Wittman, Acknowledged by All to be One of
America's Foremost Authorities and Judges

Starts you in January, and take you clear through the year—telling you just what to do to successfully handle your fowls in the safest and most economical way that is consistent with good business methods, to make the largest success possible with your fowls.

It doesn't tell you how to make two hundred dollars from twenty hens

but it gives you a short, boiled down, and up-to-date treatise on lines that are practical and can be executed with safety. The contents of this book are intensely practicable, and teach a method of poultry keeping exactly opposite to that which is complicated and unnecessary. **Price 25 cents.**

THE POULTRY ITEM

The largest Eastern poultry Journal, published at Sellersville, Pa., 68 to 140 pages monthly. Special breed numbers starts in September and continue until May, 1910. Tells you how to secure larger and more profitable returns from your chickens. Extremely helpful and valuable. Get a-going right in the poultry business. Many are making \$2.00 per hen each year. Are you? The Poultry Item will keep you posted on latest methods and poultry secrets. The Item stops when time is up. **Price 50 cents the year.** Order it now at the following special terms.

A Year's Subscription to The Poultry Item and Twelve Months' Work in the Poultry Yard, only 50c

Have You Written Johnson Yet?

Now's the Time

M. M. Johnson

NOW is the time to get a Book and a Special Proposition on an OLD TRUSTY INCUBATOR and BROODER. Now is the time to find out all about the OLD TRUSTY—the Incubator that has won the First—Second and Third Hatching Prizes in a contest with over 3,000 of the best makes of Incubators in the United States during the past year.

Such a remarkable performance assures you—without a doubt—that the OLD TRUSTY INCUBATOR lives up to what Johnson claims for it—**80% or bigger hatches.**

This is going to be a great year for Poultry—and a great year for PROFITS.

The high prices on all meats and other foodstuffs make poultry more and more in demand. This is the year of all years to start—and the OLD TRUSTY is known the world over as the best Incubator to start with. Johnson is no novice in the Incubator business. He's got the experience of over 150,000 Old Trusty Incubators and Brooders at his finger-tips. He knows what they've done for others—and he knows **what they'll do for you**—so he sends the

Old Trusty—Asbestos Covered and Metal Encased On 40, 60 or 90 DAYS' FREE TRIAL—Guaranteed for 10 Years

The Old Trusty Incubator is like a good watch—it runs itself when you start it going, with kerosene in the lamp and water in the tank. Every Thermometer has stood the test of over 150,000 machines. Every feature of the Old Trusty has stood the test of 150,000 users. That means **perfection—and 80% better hatches for you.**

And remember this: Johnson bases his price on his immense volume. His output for this year is 65,000 machines.

Monday, January 17th—Johnson received exactly 2,085 letters from friends throughout the country asking for his proposition. Tuesday there were as many—and that's the way it is going—so you can see that 65,000 machines won't begin to meet the demand.

If you are thinking of getting an Incubator or Brooder, you'd better write to Johnson at once and get his Book and Special Proposition. He will quote you his price direct to you—all freight prepaid—which is less than \$10.00—let him tell you how much less.

Johnson makes nothing but Incubators and Brooders—and he's made more Incubators and Brooders than any other three men in the world. And Johnson's experience is free with his machines—and his great big book of Poultry Facts and Figures, together with hundreds and hundreds of actual photographs of friends hatching chickens with Old Trusty Incubators and raising them in Old Trusty Brooders—is all ready to go to you the minute Johnson gets your name and address.

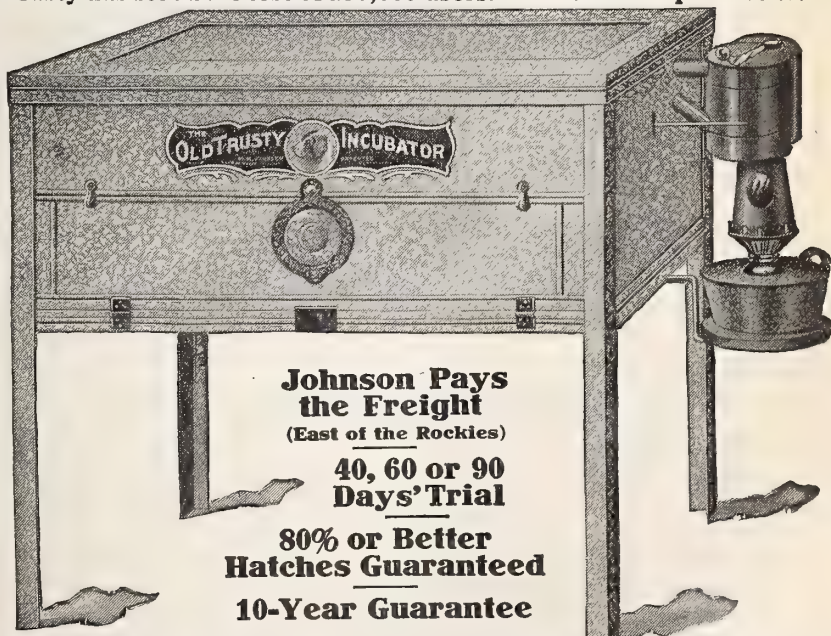

Then why not write to Johnson **today?** Just say "Send" on a postal—he'll know what you mean—then write your name and address, and address the postal to

FREE! ORIGIN AND HISTORY of All BREEDS OF POULTRY

THE greatest book on poultry ever published, contains sixty-five pages of reading matter, size 9x12 inches, also contains illustrations of 198 different fowls in their natural colors, painted from life. Regular price \$1.00. It has taken years to complete the drawings for this book. It is something never before attempted by any publication, not even the Standard of Perfection contains pictures of fowls in colors.

This book is being sold for \$1.00 every day, but we want every poultryman to have one, as it is the grandest piece of work ever accomplished in poultry literature and is a living ad for its publishers—American Poultry Journal Publishing Co. To accomplish our object and get a copy of this book into the hands of every poultry fancier, we will give one copy FREE for the first six subscriptions to American Poultry Journal you send us at one-half our regular subscription price.

Send us six subscriptions to American Poultry Journal together with \$1.50 and we will send you, postpaid, a copy of the Origin and History of All Breeds of Poultry.

BUT THIS IS NOT ALL

You can take subscriptions at any price from 25 to 50 cents and keep everything above 25 cents as your commission. For the first six subscriptions you send us you will receive a copy of the Origin and History of All Breeds of Poultry as per offer above and these subscriptions will count on the grand prizes listed below as well as any other subscriptions you send us.

Do not fail to read this list carefully as the prizes are well worth your time and trouble and will many times repay your efforts to secure the subscriptions for us.

LIST OF GRAND PRIZES

First Prize

\$600
WING PIANO

The best piano manufactured by the well-known piano manufacturers, Wing & Son, New York City, N. Y., will be given the agent sending us the largest number of subscriptions before June 10, 1910. : : : : :

Second Prize

\$100
CASH

Will be given the agent sending us the second largest number of subscriptions before June 10, 1910. : : : : :

\$200.00 will be distributed among the eight next highest agents as follows:

3d Prize, \$50	Pen of Fowls, your choice, or Incubator or Brooder, any make you desire
4th Prize, \$35	" " " "
5th Prize, \$30	" " " "
6th Prize, \$20	Trio of Fowls, your choice, or Incubator or Brooder, any make you desire
7th Prize, \$20	" " " "
8th Prize, \$15	" " " "
9th Prize, \$15	" " " "
10th Prize, \$15	" " " "

In making your selection of Fowls, Incubators or Brooders, they must be selected from Advertisers in American Poultry Journal

Special Instructions to Agents

1. Renewals count the same as new subscriptions. 2. Cash must accompany all subscriptions; this will avoid any misunderstanding. 3. Keep a duplicate list of all subscribers sent us in case any question arises when the contest closes. 4. In case of a tie the value of the prize will be divided. 5. The subscription contest closes June 10th, 1910. All letters postmarked that day will be counted, thus giving those at a distance an equal chance with those near. 6. A list of the winners will be given in the July issue, 1910. 7. All agents may work where they please; this is fair to all. Send for more coupons or any supplies you need. 8. The coupons are made with receipts at the side to be torn off and given to subscribers. This assures the subscriber that you are our authorized agent. 9. No subscription can be sold for less than 25 cents. 10. You must send at least two subscriptions to entitle you to agents' commission or prizes. 11. All subscriptions must be taken on the merits of the publication. 12. Notice—Sell our book, "Origin and History of All Breeds of Poultry," at \$1.00 and keep 25 cents as your commission, this will count as four subscriptions on the contest. Also, take three years' subscriptions to American Poultry Journal at \$1.00 and keep 25 cents as your commission, this also will count as four subscriptions on the contest. : : : : :

TODAY IS THE TIME TO START if you wish to secure one of our new books FREE. Remember, too, that if you get an early start you have the advantage of always being in the lead, and this is better than to be always trying to catch up with the other fellow.

We will furnish you with a sheet of special bargain coupons which you can use if you desire. These coupons have been successfully used on former contests and whereas you only receive 10 cents as your commission when using same, you will find that you can get many more subscribers. In fact, we have agents who give all of their commission to the subscriber and in this manner get many more subscriptions. Send for as many sample copies as you can use to advantage and they will be sent you free of charge.

American Poultry Journal Pub. Co., 358 Dearborn St., Chicago

NOTICE: SEE OTHER PAGE FOR SPECIAL OFFER THIS MONTH

Special Offer for Month of April, 1910

WE WILL give the following prizes to the agents sending us the largest number of subscriptions during the month of April, 1910. If you want a first-class incubator, brooder or a choice trio of fowls without cost, this is your opportunity. **START TODAY!**

1st Prize---A \$20 incubator or brooder, any make you desire, or a \$20 pen of fowls, any variety, advertised in American Poultry Journal, will be given the agent who sends us the largest number of subscriptions to American Poultry Journal during the month of April, 1910.

2d Prize---A \$15 trio of fowls, any variety, or a \$15 incubator or brooder, any make you desire, advertised in American Poultry Journal, will be given the agent who sends us the second largest number of subscriptions to American Poultry Journal during the month of April, 1910.

3d Prize---A \$10 incubator or brooder, any make you desire, or a \$10 pair of fowls, any variety, advertised in American Poultry Journal, will be given the agent who sends us the third largest number of subscriptions to American Poultry Journal during the month of April, 1910.

These prizes are given in addition to the grand prizes on opposite page, and all subscriptions sent us during this month will count on both the special April prizes and the grand prizes; therefore you can win an incubator, brooder or fowls, besides a grand prize if you start to work right now.

Do not delay to take advantage of this opportunity to kill two birds with one stone. Remember, you send 25c to us for each subscription and keep the balance of the money as your commission. You receive our grand book, "Origin and History of All Breeds of Poultry," for the first six subscriptions you send us besides your commission and the chance to win one of the April special and grand prizes; also you receive four counts for every 3-year subscription and every "Origin and History of All Breeds of Poultry" which you sell.

Send for samples and coupons today; they will be sent you at once free of charge. Start today, as you are getting in on the ground floor. Send all subscriptions to

breeders of the justly celebrated "Wyckoff" strain of S. C. White Leghorns, the most profitable strain
of poultry in America today. Place your orders at headquarters and make no mistake. Eggs for
hatching in any quantity from the grandest of matings at \$2.00 per 15, \$3.75 per 30, \$5.00 per 45, \$10.00
per 100. Catalogue and testimonials free. Address

C. H. WYCKOFF & SON, AURORA, CAYUGA COUNTY, NEW YORK

**Moore's Quality BLACK LANGSHANS : Cup :
Strain of : : : Winners**

My birds have always won at Indianapolis, Richmond, Dayton and Cincinnati.
At Indianapolis, 1910, I won five prizes on five entries, including Association
silver cup. Am offering twenty grand cockerels and fifteen pullets at reasonable
prices, the best I have ever bred in my fourteen years' experience. Am booking
eggs at \$3 per fifteen. If you want the best at reasonable prices, write

Whitewater Poul. Yards J. W. Moore, Manager Lock Box 324, Cambridge City, Ind.
Mem. Black Langshan Club

PARR'S S. C. BLACK MINORCAS

Winners wherever shown. Special cup East Liverpool, Ohio, 1910, for best display. No birds in pens
scoring less than 91. Eggs from special matings, \$5.00 per fifteen. From choice select matings, the
kind that hatch the winners, \$3.00 per fifteen. Satisfaction guaranteed absolutely. A few grand
breeding cockerels that will score 92 for sale.

RANKER'S SINGLE AND ROSE COMB BUFF LEGHORNS

Are strictly high class, bred up-to-date. My matings contain first prize winners at Cleveland, Chicago, Boston, 1909 and 1910. Mating list is free. Send for it now.

L. W. Ranker : Buff Leghorn Specialist
Box A : Tiffin, Ohio

Powerful Disinfectant and Louse Killer

Why pay \$1 and \$2 a gallon when you can prepare it right at home for only a few cents. For only 10c I will send you my illustrated poultry supply catalogue and complete printed instructions for preparing your own disinfectant and louse killer. It will not only kill all germs but also keep down scaly leg and lice without injury to the fowl.

Geo. Stirdivant, Box 9, Sheboygan Falls, Wisconsin

EGGS

From Ferris' S. C.
White Leghorns

Will produce winners and layers. They have been bred in line for years for size, vigor and eggs as well as for Standard requirements. Their winnings at the leading shows, including Toledo, Chicago, Louisville, St. Louis, Detroit, Grand Rapids and the Michigan and Indiana State Fairs, and in our customers' hands at practically every show of importance in the country, is proof of their quality.

We have ten exhibition matings this season, prices ranging from \$3 to \$15 per setting. Every pen contains winners mated to produce chicks that will win in strong competition. If you want to raise exhibition stock of the very finest quality, send for our mating list. It describes the matings fully and tells just why you should breed Ferris Leghorns.

Our choice utility eggs at \$1.50 per setting, \$7.50 per 100, are worth much more. We guarantee 90 per cent fertility and replace infertile eggs free of charge, the same as from our exhibition matings. The birds in these utility matings will score from 90 to 94 and they are large, vigorous and the best of layers.

Send for free catalogue and mating list containing prices, winnings and full particulars regarding this strain of winners bred to pay.

G. J. Boehland, P. 33, Rockford, Illinois

Wing's S. C. Black Minorcas

Are prize winners and great layers. At the recent Grand Rapids show we won first cock, first and second pullet and first hen. Chief Big Comb heads our breeding pens. He weighs 9½ pounds. Has been exhibited five times in New York State and Michigan in 1909-10, and won five blue ribbons. He is a strong, vigorous bird and as a sire has proven especially fine for pullets. Our layers are kept in flocks of 6 hens each. They are in the very pink of condition. We give to a flock of 200 nearly all our time and attention. They have layed well November, December and January. They are bred to strong, healthy cockerels, entirely unrelated. We are offering on account of room a few May hatched pullets now laying at \$4 each. No culls. Will book orders for two months old pullets from best pens at \$1 each, delivered June 1st or thereafter. This is a proposition worth considering. Eggs for hatching, \$1.50 to \$3 per 15. Order early. Send for catalogue.

F. C. Wing :: Box 152, Wayland, Michigan

SINGLE COMB BUFF AND WHITE ORPINGTONS

Of the highest type and quality. None better. A grand lot of young birds for exhibition and breeding purposes at reasonable prices.

EGGS FOR HATCHING

from six grand pens, \$3 and \$5 per 15. Illustrated mating list free. My stock and prices are right. Write me your wants. Satisfaction guaranteed.

Edgemere :: C. A. Keefer, Prop. :: Muskegon, Michigan

CHAS. F. THOMPSON & CO.

Box 9 LYNNFIELD CENTER, MASS.

RHODE ISLAND REDS : BARRED ROCKS : WHITE WYANDOTTES

Now booking orders for day-old chicks. 200 egg strain. Eggs, \$1, \$2, \$5 per sitting; \$6, \$10, \$20 per 100. Catalogue free. Stamp for Red Standard.

Ringlet Barred Plymouth Rocks

have won more prizes at the leading shows of America than all others, which stamps their superior quality. I now have the finest and largest lot of exhibition and breeding birds I ever owned. They show the ringy barring and sharp contrasting colors that win under all judges. Write me just what you want and I will make you a low price considering the stock you get. Eggs from the world's finest exhibition mating. One setting, \$4.00; two settings, \$7.00; three settings, \$9.50; four settings, \$12.00.

F. R. Green : Lake City, Iowa
One of the oldest breeders of Barred Rocks in the West. At it over 21 years.

YOU WANT EGGS FOR HATCHING

That are sure to give you the very best of results. When you consider the fact that our matings for this season are by far the best we have ever owned and that all our breeders are farm reared, strong, healthy birds, and that each breeding yard has an acre run, then you can begin to realize that it will pay you to buy eggs

From U. R. Fishel's White Plymouth Rocks

They are the most beautiful and profitable fowl bred today. Consider their large size, pure white plumage and rich yellow shanks, and above all, their excellent egg producing qualities; do this before you buy any other variety. In fact, there is no breed that will or has proven to be the fowl for everyone as has the U. R. Fishel White Plymouth Rock. No wonder then they are conceded to be

The Best in the World

Now why ponder over the question where to place your order for eggs. We are in a position to give you prompt service. Although our matings are better than ever before, our prices remain the same as last season.

\$8, 15; \$15, 30; \$25, 60

We have about 500 choice cockerels to sell. Splendid birds and fit to head any yard. A lot of selected breeders, and utility birds a plenty. Write us. Send 2 dimes for 56-page catalog; worth dollars to anyone interested in poultry.

U. R. Fishel, Box A, Hope, Ind.

100 PER CENT PROFIT

THE FIRST YEAR

Keeping Poultry by the Philo System

PHILO NATIONAL POULTRY INSTITUTE. 27,000 SQUARE FEET OF FLOOR SPACE

We Guarantee

That any intelligent person can make a profit of 100 per cent on an investment in the poultry business by the Philo system, and our guarantee is backed by

One Hundred Thousand Dollars

worth of real estate in the city of Elmira, consisting of thirty acres of land and the complete plant of the Philo National Poultry Institute. This entire plant and equipment has been completely paid for out of the earnings of the poultry and poultry supply business by the Philo System.

The discoveries made to perfect the Philo System are the results of forty-one years' experience by one person experimenting and investigating the poultry business. We know that still larger profits can be and are being made by following our instructions, or we would not risk a hundred thousand dollars to back our guarantee. Our book, "The Philo System," tells how to do the work from start to finish and gives you the right to use all our inventions and discoveries to get such wonderful returns.

If in doubt about our responsibility and the value of our guarantee, write Mr. D. M. Pratt, President of the Second National Bank, Elmira, New York, or any other reliable party.

Send us \$1.00 and we will send you promptly our complete book and our agreement.

E. R. Philo, Publisher : 629 3d St., Elmira, N. Y.

CONTENTS OF THE PHILO SYSTEM BOOK:

Artificial Heat

Better poultry without it.

Artificial Incubation

About opening incubator during first week.

Avoid too much cooling.

Changing position of eggs.

Cooling the eggs at night.

Cooling the eggs on special days.

Overcoming defective work of first week.

Generation of heat by growing chicks.

Never set eggs in two layers.

Rules for second and third weeks.

Temperature of working room.

The cause of failure.

The instinct of the hen.

To raise temperature quickly.

Use of woolen cloth and hot water.

Watch the damper and regulator.

Best Age for Breeders

Best results from year-old hens.

Hatching in February and March.

Hens from five and ten years old.

Winter hatched pullets quick moulters.

Breeders for Broilers

Breeders for Exhibition

American Standard of Perfection.

Chicks from first eggs after mating.

Keeping careful records.

Use of leg bands.

Breeding in Line

Bad effect of in-breeding.

To insure good qualities of your birds.

Brooders

Disadvantages of wooden brooders.

Brooder coop advantages in getting fertile eggs.

Brooding without artificial heat.

Baby chicks outdoors in zero weather.

Large brooders a mistake.

Metal Mother first week in cold weather.

Number of chicks in fireless brooder.

Use of fireless brooder.

Perfect conditions and better birds.

Care of Breeding Stock

Adaptability of our summer and winter coops.

Hardening fowls to cold weather.

Must be protected from draughts.

Wintering breeders in barn loft.

Coop Construction

Of brooder coop.

Of summer colony coop.

Of winter colony coop.

Of combination economy coop.

Double winter coop.

Fireless brooder.

Feed hopper.

Galvanized iron trough.

Egg Production

Early laying pullets best producers.

Good points of a productive hen.

How to get large egg yields.

Large hens not best.

Laying in cold weather.

The color of eggs.

The hen for market eggs.

Measuring food bad practice.

Sprouted oats.

The rest periods.

Eggs When Prices Are High

Bringing the highest market price.

Hatching in winter.

Out-of-date methods.

Summer and fall chickens.

Natural breeding season.

Fertility

Fertility and feeding.

Fertility after mating.

Fertility after separation.

Results of change in mating.

Sure results after two weeks' mating.

Food

Cooked lean beef.

Cut clover.

Chick's first food.

Feeding the first three weeks.

Feeding from three to eight weeks.

Feeding from eight weeks to maturity.

Full crops at night.

Formula for wet mash.

Food for cold weather.

Green cut bone never given.

Green food at 15 cents a bushel.

Give hens all they will eat.

Hens properly fed.

Never feed grease except for fattening.

Oats spaded in dirt daily.

Straw on floor.

Sprouted oats.

Supply bulky food in the morning.

Water supply and egg supply.

Winter food.

Gapes

Grading

Green Cut Bone and Infertility

Hatching

Get ready before ordering eggs.

Keep in advance of your business.

Hatching with hens.

Active hens the best setters.

Changing eggs in the nest.

Cleaning eggs.

Nests on ground no better than in the barn loft.

Raising the chicks in our brooders.

Saving the chicks by removing the eggs.

The causes of poor results.

Helping the Chicks in Hatch

Chicks properly grown can all be saved.

How to save them.

How to Start

Buy the best eggs obtainable.

Foundation stock hatched in February and March.

Guaranteed fertility.

Starting with two pairs of birds.

Starting where you now live.

How to Use Coops

Large and Small Flocks

Egg production.

Advantages of small flocks.

Leg Weakness

Indigestion the cause.

Remedied by care in feeding.

Seldom occurs when chicks are on the ground.

Lice

Put powder on brooder cloth.

Use of boiling water.

Use of wood ashes for hens.

Location

A combination for an acre lot.

Natural grit.

Sandy and gravelly soil.

Stony and lumpy soil to be avoided.

The new Philo plant and grounds.

Keeping Eggs for Hatching

Evaporation of moisture decreases the vitality of the chick.

Germ killed by high temperature.

Low temperature not disastrous.

Natural position for keeping eggs for hatching.

Not best to turn eggs daily while waiting.

Temperature and evaporation.

Temperature.

Two weeks the limit for keeping eggs to hatch.

Setting eggs the day they are laid.

Moisture

Evaporation while waiting for hatcher.

Excessive moisture produces too large a chick for the shell.

Supplying moisture the last week.

Too little moisture and the results.

Pedigree Breeding

Banding chickens.

Expanding the leg bands.

Mating the birds.

Record difficult to keep.

Sixteen toe marks.

Plans for a Large Plant

600 coops on two acres to accommodate 10,000 chicks.

Poultry Helps the Garden

Mixing the fertilizer with soil.

Value of the fertilizer.

Pullets

Properly matured in space of one and a half square feet.

Winter hatched pullets as breeders.

Results of Philo System

\$1,500 a year from 60 hens.

\$1,500 a year for market eggs from 1,000 pullets.

Average eggs hatched and chicks raised.

Another estimate of profits, chiefly from broilers.

Cost of starting a broiler farm with 60 lampless brooders, coops and incubators.

Setting brooder-hatcher Dec. 10.

Plan of new grounds.

National Philo Poultry Institute.

Selecting Breeders

Advantages of selecting new breed.

As to the superiority of breeds.

Breed a matter of choice.

Making setters of non-setters.

Productiveness between rest periods.

Strain considered above breed.

The good breeding hen.

Width of hen and general make-up.

Selection of Hatching Eggs

Less than 24 ounces or more than 32 ounces per dozen never used.

Shape and color of shell important.

The test by sound.

Weight of 25 ounces per dozen preferred.

Sex Control

Selection of male and female.

To raise 70 to 90 per cent cockerels.

To raise nearly all pullets.

Vitality of male and female.

Testing Eggs

Theories without foundation.

To make a living from poultry.

Not a "get-rich-quick" scheme.

Ordinary good stock.

Prices of eggs and profits per hen.

Strict attention to business daily.

Two-Pound Broilers

In eight weeks.

Raised in space of one square foot. Tender as squab when closely confined.

The food and care of broilers.

To prevent leg weakness keep on spaded ground.

Use of salt and of milk.

What investment and profit to expect.

Winter Quarters

Adaptability of houses already built.

Comfort of the fowl.

Importance of ventilation.

Keep flocks small.

Ground not so important for mature hens as for young and growing chickens.

Value of Sunshine

White Wyandottes

Come on and book your orders for eggs before you are too late. Two dandy pens. Quality strain.

HILL CREST POULTRY FARM
Eugene Luttinger, Prop., Totawa Borough, N. J.

MICA-CRYSTAL THE BEST GRIT ON THE MARKET

Contains Mica, Iron, Magnesium and Quartz, each in its purest and best form. It is of such peculiar formation that it will not take a polish as is the case with grit made from white quartz or marble and unlike limestone grit, or grit of like soluble substances, is not dissolved by the fluids in the crop, consequently it never loses its sharpness. It sharpens itself by contact, the only grit that does, and therefore excels all others as a grinder.

Without grit the feathered tribe cannot be healthy or productive. This is a well demonstrated fact in nature. Grit is to the fowl what teeth are to other members of animal creation.

Let us prove the truth of what we say by filling a sample order for you. Manufactured only by
MICA-CRYSTAL CO. - - - CONCORD, N. H.

S. C. WHITE LEGHORNS

SNOW FLUFF STRAIN—In originating and improving our strain only birds of highest standard type and greatest laying qualities as shown by accurate individual trap-nest records were used. As a result today we have not only one of the greatest prize winning strains in the world, but are unequalled in egg producing qualities. We won 1st pen Cleveland '08 and again in '10. Eggs for hatching (containing 1st prize pen 1910), \$5 15. Other grand pens of highest excellence, \$2 per 15; \$12 per 100. Incubator, \$8 per 100. Satisfaction guaranteed.

White Feather Poultry Farm : : : Rocky River, Ohio

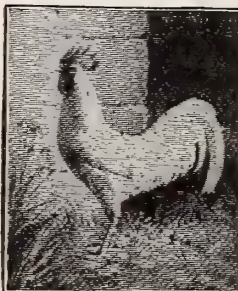

R. C. BLACK MINORCAS

In addition to my wins advertised last month, I won at the International at Buffalo in a class of sixty-three birds, competing with the bulk of Madison Square winners, first hen, first cockerel, third pullet and first pen. My cock bird was injured in shipping, throwing him out of the running.

Black Cochon Bantams

won at Buffalo first cock, first hen, second cockerel, third pullet, first pen, specials for best Cochon Bantam male and female, special for best pen ornamental Bantams, silver medal for best ornamental Bantam in show. Send for circular. Mention American Poultry Journal.

Our Wonderful Book Offer

Successful Poultry Culture, Only 50 Cents

American Poultry Journal has just closed a contract with the publishers of "**Successful Poultry Culture**," which enables us to offer this book for one-half its regular selling price, \$1.00. This is such a really good offer and such a bargain that we want every reader to read this ad carefully and take advantage of this great bargain offer. This book has always sold heretofore for \$1.00, and thousands of copies and two editions have been sold at that price, and not one kick has ever been received.

Mr. Clarence Ward

the author of "**Successful Poultry Culture**," is a son of C. J. Ward, the founder and for eighteen years the publisher of American Poultry Journal. He was brought up in a hen coop, and is one of the best experts on poultry culture in the country.

Successful Poultry Culture

contains 128 pages and 30 handsome illustrations of fowls and practical plans for building poultry houses. It is a thorough and scientific treatise on raising poultry for profit; and is especially designed for the beginner. If the instructions in this book are followed success will surely crown your efforts. The publishers have sold thousands of copies of this book to satisfied buyers all over the country, and they can show testimonials by the hundreds from people who would not take fifty times the price of the book if they could not get another one. The chapter on "Scientific Feeding" is alone worth many times the price of the whole book as it actually tells how to

Save Three-Fourths Your Feed Bill

This system of feeding is the greatest and most valuable discovery made in the twentieth century to the poultry man. It will actually double and triple your profits from the start, and has been tried in many large and small poultry plants with the greatest success, and in every case it has placed these poultry plants on a large dividend-paying basis.

The largest item of expense in raising chickens is the feed bill, and if you can reduce this bill three-fourths, it stands to reason that the matter of big profits is solved.

The revised edition of this book,

Successful Poultry Culture

contains a chapter on Scientific Feeding that fully explains this method of feeding. It is based on a fundamental law of nature and is a correct and scientific principle of feeding chickens and ducks that will **save three-fourths the feed bill**, and at the same time will make your young chickens grow faster, lessen the mortality, make young pullets lay at four and five months old; also mature young cockerels for market and show room at the same age. It will make your hens lay in midwinter every day, when market eggs are bringing the highest prices; will keep your laying stock in perfect health in close confinement, and your hens will lay fertile eggs that will hatch strong, vigorous chicks that will live. In fact, with this method of feeding you can

Double and Triple Your Profits in the Poultry Business

This is not a patented or prepared food sold by some manufacturer at a high price. If you know how, all you have to do is to buy one bushel of common grain at the market price, take it home and make **four bushels**, which four bushels will contain more and better food value than the original bushel of grain.

No expense in preparing it; no machinery of any kind needed; no fire or cooking, and it takes less time than to cook a mash and is as easy to feed as common grain. The 128-page new and revised edition of

Successful Poultry Culture

contains this valuable information, and is worth a hundred times its price to every poultryman and stock raiser. It makes no difference whether you keep only a few chickens and one cow or a thousand of each, you cannot afford to be without it. Remember, we guarantee it will tell how to **save three-fourths your feed bill**.

Buy the Book, Price Reduced to 50 Cents

Do it today, for you will need it when you want to sell eggs at high winter prices and at the same time **save three-fourths your feed bill**. If you keep only twenty hens this book will save you twice its price in a few weeks' time after getting it. If you keep more it will **double and triple your profits every day in the year**. Send all orders to

CREGAR'S GOLDEN ROD STRAIN S. C. BUFF LEGHORNS

Our pens for 1910 are of unequalled quality. Every bird in these pens has been selected with the utmost care, not only for Standard requirements but for egg producing qualities also. Quality—not quantity is our motto. All our 1908, 1909 and 1910 New York, Chicago, Boston, St. Louis and Indianapolis, in fact scarcely a bird not a prize winner. Such an array of quality never before found in the yards of any single breeder. A few extra fine S. C. W. Leghorn males and females for sale. We are closing out our entire stock of White Leghorns and can offer the greatest bargains in America for high class birds. Write for mating list.

H. Cregar & Sons. Jackson Boulevard, Forest Park. Illinois

Our New **Poultry Book**

ORIGIN AND HISTORY OF ALL BREEDS OF POULTRY

This Book Gives a Complete History and the Origin of all the Recognized Varieties of Chickens, Ducks, Geese and Turkeys, and is

Illustrated With 198 Colored Pictures of Fowls Painted From Life

SOMETHING NEVER BEFORE ATTEMPTED BY ANY PUBLISHER

This is, without question, the greatest book ever published on poultry. The artist's work alone on this book took almost one year's time to complete, but it shows the fowls in their natural colors and correct shape, and these colored pictures, together with the history of each variety, gives the fancier all the information to produce fowls for either exhibition or breeding.

How to Mate

This book also tells how to properly mate the different varieties of fowls to produce birds that will conform to Standard requirements. This is something that even the Standard of Perfection does not do. It tells you at a glance what it will take years of practical experience to learn. It is a book that no breeder or fancier can afford to be without, as it is just as suitable for the needs of the experienced fancier as for the amateur.

Price Only \$1.00

MORE PROFITS ON HOGS

My friend:—Have you hogs? Will you accept \$100 extra for feeding them?

James fed his hogs the same amount of corn that Smith did. James made his gain from 160 to 260 pounds. At $7\frac{1}{2}$ cents a pound this made \$2.25 difference per hog that Smith got out of his feeding over what Jones did, just because Jones did not know how. He was not progressive and Smith was.

James' 50 hogs brought him \$975, while Smith's 50 hogs brought \$1,087.50. Smith's knowledge therefore was worth to him \$112.50. It shows that knowing how makes success not only for the farmer as well as the lawyer and banker; it enables them all to make money. This tip ought to be worth something to you; some will make it worth \$100 this fall.

It isn't what the hog eats; it is what he digests that makes the money. Experience is our best teacher. We are all in a school, learning. We could preach you a great sermon on this; but you have no time for words or arguments. You want quick money. It costs the man who first proves an undiscovered fact (which, of course, always existed), but the man doing so is a benefactor as well as an educator of his fellow-farmer.

The principal cost of producing pork is the feed. Prof. Dietrich says "90 per cent of the farmers have nearly everything to learn about how to feed a hog to get the most out of him at the least cost." We can help every one who will be helped to progress; the others will continue to lose the hundred dollars a year.

"For \$1 we will send you the American Swineherd, the aggressive and progressive acknowledged leader, devoted to the swine industry, for 4 years, and will give you as a premium the Progressive, Scientific Feeding Formula for increasing the gain while feeding, fattening hogs, a half pound a day per hog over the customary way of feeding from the same feed given. This hygienic secret made the discoverer a fortune fattening hogs.

It is simple, sensible and just as easy feeding as the old way. Yet it is progressive and scientific. It is of such real value that no sensible man can ignore it. It has been proved so conclusively and repeatedly that we have an abiding faith in it and agree to make good or give money back, making you absolutely safe.

This fair offer is good for 10 days.

We also give additional premium, copy of the Pig Feeder's Manual, itself worth double to any hog raiser what you pay us. The paper stops at the time paid to.

Address, with \$1.

American Swineherd Publishing Co.
542 Como Building, Chicago, Illinois

KING BROTHERS'

"Ringlet" Strain of Barred Plymouth Rocks—Make another clean sweep at the big Wisconsin State Show, January 5 to 10, 1910, winning 1st, 2d, 3d, 4th and 5th on cockerels; 1st, 2d, 3d, 4th and 5th on hens; 1st, 2d, 3d and 4th on pullets; 1st, 2d and 3d on exhibition pens. Also all specials, including sweepstakes silver medal for best cockerel in the show offered by the American Poultry Association. Write us just what you want. Our prices are right and we positively guarantee every sale to please in both stock and eggs or refund your money cheerfully. Fine illustrated catalogue, containing very many strong testimonial letters for the asking. Eggs from finest matings in the world at \$5 per 15 or \$9 per 30.

King Brothers, Largest Specialty Breeders in the Northwest, Oshkosh, Wis.

Silver Laced Wyandottes, Houdans and Indian Runner Ducks

Of the rarest quality. At the great Chicago Show, December, 1909, on seven entries we won 5 firsts, 1 first and 1 third and 1 grand prize. Also winners at Illinois State Fair and Libertyville. Greatest layer in America. Laid bred over thirty years. In 1906 we furnished the late E. Orr with his entire flock of Silvers, including the majority of his sensational winners for his Beaver Hill Farm. Have nine grand matings to supply our egg trade for 1910. The picture here is not the kind of birds we breed. If you are interested in any of our varieties, we will mail you circular on request containing life-like reproductions of unretouched photos of live birds in our own yards today. Write today.

Canada's Best R. C. and S. C. Black Minorcas

Our entire stock of breeders, both R. C. and S. C. Black Minorcas to be sold during the next thirty days to the highest bidder. About 70 birds and the best lot I have ever sown. Among the lot are two S. C. cockerels that I consider as better birds than the one that won first at Madison Square, December, 1909. Also first R. C. pullet at late Chicago show, for which I paid Mr. Lloyd Mishler \$100. Will sell the R. C. and S. C. separate if desired, but will not job them out. Don't delay or you will miss the chance of your life as I consider I have the choicest flock of Minorcas on the continent today.

T. A. Faulds :- London, Ontario, Canada

BAY VIEW STRAIN

Rose Comb Rhode Island Reds

Extra strong in wing markings and known the world over as the great shape strain. I bred and sold winners for Madison Square Garden last year, also for the Jamestown exposition. If you want eggs that will produce this class of stock, send for mating list. Satisfaction guaranteed.

Edwin W. Bogert, Proprietor, Box 6, Port Washington, N. Y.

BUFF WYANDOTTES

The quality of our birds has arrived, they are not on the way or has been winning all first prizes in 2 successive years at Boston, making them : : : : :

PRE-EMINENTLY "THE" BUFFS OF AMERICA

Boston, 1909: Cocks, 1, 2, 3, 5; hens, 1, 3, 4; cockerels, 1, 2; pullets, 1, 2, 3, 4; pens, 1, 2. Boston, 1910: Cocks, 1, 2, 6; hens, 1, 2, 4, 6; cockerels, 1, 4, 6; pullets, 1, 2, 3, 4; pens, 1, 2, 3. Our breeding pens are the "last word" in quality headed by champion of champions. Champions seven Boston first and four second prize winners, as follows: First prize cock, first prize cockerel, second prize cockerel, first and second prize pen cockerels, all at Boston, 1909. First prize cock, first prize cockerel, fourth prize cockerel, first, second prize cock, second and third prize pen cockerels, first prize pen fowl cock, all at Boston, 1910. We will sell eggs from all our pens. Send for mating list

Money in Poultry, \$3,600.00

NET PROFIT FROM 30 HENS IN ONE SEASON ON
A LOT 24x40. IT IS NOT AN EXPERIMENT, IT HAS
BEEN DONE ON THE **Kellerstrass Farm**

My New Poultry Book

Covers all branches necessary for Success with Poultry. It tells you what I have done. It was written from actual experience.

IT TELLS YOU HOW—

HOW I made \$3,600.00 in one season from thirty hens on a lot 24x40 by feeding them the scraps from my table three times a day. The test was made to show what can be done on a city lot as well as on a farm. I also furnish you the names of the parties who paid me over \$2,000.00 for the eggs alone from these thirty hens, for reference, which is evidence undisputable. Remember this book is written by a man who has had the actual experience.

HOW I make my chickens weigh two and one-half pounds when they are eight weeks old.

HOW I prepared my chickens for the show room so that I won over 90 per cent of all the blue ribbons that were offered during 1907 and 1908, the last season that I showed. A "secret" that has never been published before.

HOW I built my indoor and outdoor brooders for 85 cents each, to be used either as fireless or with heat in them and plans for the same.

HOW I raise ninety-eight chickens out of a hundred that I hatch.

IF YOU RAISE CHICKENS OF ANY KIND YOU NEED THIS BOOK

HOW I took a flock of chickens and made them lay \$68 worth of eggs per hen in ten months!

HOW I keep my male birds from fighting without injuring them.

HOW I raised the five chickens I sold to Madame Paderewski for \$7,500.00.

HOW I feed my chickens for egg production.

HOW I keep my chickens healthy and free from sickness.

HOW I select a good laying hen from the poor layer.

HOW I break up my broody hens without injuring them.

HOW I pack my eggs so they will stay fresh.

HOW I mate up my chickens for breeding and fertility.

HOW I run my incubators and supply moisture.

HOW I raised my famous \$10,000.00 hen "Peggy."

HOW I build my hen houses and plans for the same.

HOW I bred my big egg-laying strain.

It also tells about broiler plants, egg plants, and remember, there is also an article in this book called "Two Years on the Kellerstrass Poultry Farm," which explains hundreds of things—just what we do in two years on the farm, or in other words, a two years' course on the "World's Greatest Poultry Plant." This is the greatest article ever written by a real practical poultryman.

Remember, this book was written by a man who has sold the highest priced chickens in the world, who also sold \$68.00 worth of eggs per hen from a flock of hens in one season, in fact, if you breed a chicken of any kind you know my reputation as a breeder. This is the first time I have ever offered to sell any of my "methods or secrets" to the breeder or to the public.

Try My Way and You Can Raise Them by
the Thousands

READ WHAT OTHERS SAY

Ernest Kellerstrass, Kansas City, Mo.

Dear Sir:—I herewith enclose you affidavit; also trap nest record of the Kellerstrass Strain Crystal White Orpington hen, register No. 503, that laid two hundred and sixty-three (263) eggs in 272 days.

(Signed) P. J. HARLLEE,
Chattahoochee, Ga.

August 8, 1909. Ernest Kellerstrass, Kansas City, Mo.

Dear Sir:—Congratulations on the splendid showing you have made by selling \$68.00 worth of eggs per hen from thirty hens in one season.

G. M. CURTIS, Editor Reliable Poultry Journal,
Quincy, Ill.

My Dear Mr. Kellerstrass:

I have sixteen of your hens that average two hundred and thirty-one (231) eggs per bird in 12 months.

LAWRENCE JACKSON,
Pittsburg, Pa.

July 19, 1909.
The simplest sort of a thing—common black dirt—has solved the problem of eradicating a chicken disease which cost thirty million chicks' lives annually, a disease which scientists of the National and State Experimental Stations have been studying without success for ten years. Ernest Kellerstrass, the Kansas City poultry fancier, found the secret.—St. Louis Republic.

May 23, 1909.
The remarkable hen "Peggy" is owned by Mr. Ernest Kellerstrass, of Kansas City, Mo. She had traveled all over the globe capturing prizes. Mr. Kellerstrass has forty-eight hundred chickens

of this family and Peggy is the most perfect. He controls the output of perfect Orpingtons.—Sunday Chicago American, March 19, 1909.

Mr. Kellerstrass is now easily one of the leading and most successful breeders in America, and perhaps during the past two or three years raised more good prize-winning birds on his farm, devoted exclusively to White Orpingtons, than any other breeder on this continent.—Poultry Success, Springfield, Ohio, February, 1909.

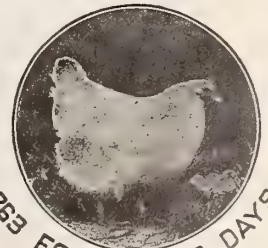

The White Orpingtons began their real history in the American fancy when Mr. Ernest Kellerstrass took them up. Mr. Kellerstrass has done for this variety and for the breed of Orpingtons in general what no other man has ever accomplished for any other breed.—American Poultry Journal, Chicago, Ill.

It was a rare treat to spend a day in September at the Kellerstrass Farm, where were originated the Crystal White Orpingtons, now famous the world over. Mr. Kellerstrass himself does the work of a half dozen expert poultrymen and does it right. Mr. Kellerstrass exhibited upwards of \$25,000 worth of birds at the Chicago Show.—Western Poultry Journal, Cedar Rapids, Ia.

Mr. Kellerstrass has taken the chicken business out of the kindergarten class, and has done more to encourage the poultry business than any ten breeders in the United States combined. The Kellerstrass Farm won over 90 per cent of all premiums offered. We doubt if any breeder in the world ever sold stock or eggs that produced as many winnings in one season as the Kellerstrass Farm did in 1908. The Inland Poultry Journal takes its hat off to men of this kind.—Judge Theo. Hughes, Editor Inland Poultry Journal, Indianapolis, Ind.

Mr. Ernest Kellerstrass, of Kansas City, Mo., is the owner of the most perfect fowl in the world, according to the National Poultry Association of America.—New York Herald, March 15, 1908.

"Peggy," the \$10,000 hen owned by the Kellerstrass Farm, was viewed by over half a million people around the southern circuit of State Fairs, which included Nashville, Memphis and Atlanta.—Southern Poultry Magazine, Nashville, Tenn., December, 1908.

Send \$1.00—and a Copy of the Latest Revised Edition of the Book Will be Sent You by Return Mail

**The Cement Workers
Hand Book****Or, The Uses of Cement on the Farm**

THE ONLY standard work on the subject. Over 400,000 copies have been sold. Written by an expert who for 20 years was a practical worker in cement. :

THE BOOK is worth its weight in gold to any progressive farmer. It gives plain, practical, explicit directions how to make anything from cement on the farm from a modern home to garden walks. :

SOME of the subjects are Composition and Mixing of mortars and cements, parts of cement and sand to be used, practical directions. Tells how to make foundations, walls, floors, ceilings, partitions, walks, drives, curbing, fence posts, cisterns, reservoirs, grave vaults, culverts, steps, building blocks, troughs, tanks, chimney tops, sewers, cow stalls, poultry houses, silos, etc.

THE BOOK contains 100 closely printed pages, stoutly bound in yellow cloth. It gives all possible formulas for mixing cement. Its directions are so plain that any one can understand them. :

THIS BOOK and one year's subscription to American Poultry Journal for only 75 cents, or the book alone for 50 cents. Send all orders to :

FOUR FOR \$1.00

Four First-Class Poultry Publications, Published in Different Parts of the U. S., at One-Half Price

American Poultry Journal - - - - } \$1.00
American Poultry Advocate - - - - }
Poultry Item and Commercial Poultry } Regular Price \$2

AMERICAN POULTRY JOURNAL needs no introduction, as it is the oldest, largest and best poultry paper in the world. Is the leader of the poultry press, and is now in its 40th volume. No poultryman can afford to be without it, as it has no equal.

AMERICAN POULTRY ADVOCATE, the great New York state paper published at Syracuse, and full of good reading matter, is always welcomed by the subscriber. Now in its 18th volume. It is conceded to be one of the best poultry papers published in the east.

POULTRY ITEM, published at Sellersville, Pa. Now in its 12th volume, and although a young publication compared to the others embraced in this offer, it is safe to state that Poultry Item is rapidly pushing toward the front. Full of valuable information and complete show winnings.

COMMERCIAL POULTRY, published at Marseilles, Ill., is now in its 18th volume. True to its name, it instructs the reader on poultry as a business. Its volumes contain articles by excellent writers who contribute regularly and make it interesting for the reader.

When reading this do not lose sight of the fact that **American Poultry Journal** contains from 60 to 166 pages of interesting reading matter; that it has a strong corps of field men who report on conditions in their territory each month so that it contains the "newsiest" news of the poultry world. A single copy is worth more than we ask for one year's subscription to all four.

\$2.00 VALUE FOR ONLY \$1.00

C. L. Buschmann's

Non-Fading

R. C. Rhode Island Reds

Birds of quality. Eggs in quantity. At Chicago, Cincinnati, Indianapolis, Kansas City, Indiana and Illinois State Fairs the six largest exhibits in the Middle West during 1909 and 1910, the total prizes I won were more than all other Rhode Island Red breeders combined.

Four Grand Cock Birds Took Four First Prizes

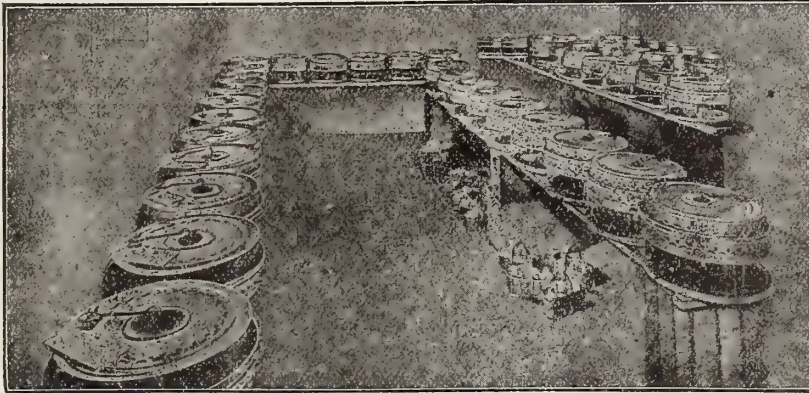

Such a record has never before been equaled. At Chicago I was the only exhibitor winning in every class. Also winning a special prize for having the five best cock birds in the exhibit. Fifty fine cockerels (no females left) for sale from these great prize winners, \$10 to \$50 each. Send for sales book and mating list. Twelve Grand Pens for 1910—Eggs from \$3 to \$25 per 15. My book, "Origin and History of Rhode Island Reds, How to Breed, Mate and Judge Them"; also "How to Line Breed," etc., all for 20c.

A Little Poultry and a Living

Is the title of a little booklet we will mail free. It was written by the author of the PHILO SYSTEM BOOK, who makes every one of his hens pay him a profit of \$50 to \$100 each.

Metal Mothers

**Our New Discoveries
Make Poultry Keeping
Easy and Profits Sure**

Our machines were used exclusively in the original Philo System plant, where over \$1,500 FROM 60 HENS IN TEN MONTHS has been cleared from the sale of eggs, baby chicks and fowls raised on a city lot 40 feet square. One of the largest hatching plants in America saved over \$700 this year by using our system of brooding. We sell the best brooder ever made for only \$2.50.

One party hatched and raised \$500 worth of poultry last year with four Metal Mothers, and hundreds of others are delighted with our machines and our new way of raising poultry. Our combined machine hatches and broods perfectly at the same time with only one lamp and one-fifth the oil used in other machines. Once filling the lamp completes the hatch. It runs as steady as a clock in any room from cellar to garret, and our Long Burning Safety Lamp runs on for weeks without attention. It is the only machine that airs the eggs in the natural way and applies the heat to the chickens like the mother hen.

Valley Falls, N. Y., Nov. 18, '09.

The Cycle Hatcher Co., Elmira, N. Y.

Sirs:—I have used your incubators, both the Cycle Hatcher and Brooder Hatcher, during two seasons, and found them very satisfactory, as they were easily managed and gave excellent results every time. The Brooder Hatcher makes a convenient place for brooding the little chicks when first hatched, before putting them into the fireless brooders. Very truly yours,

(Rev.) E. B. Templar.

The Cycle Hatcher Co., Elmira, N. Y.

Gentlemen:—No doubt you will be interested to learn of our success with the Cycle Hatchers. We have cleared over \$960 running our hatchery plant consisting of 56 Cycle Hatchers. We are pleased with the results, and expect to do better the coming year. With best wishes, we are, very truly yours,

(Mrs.) C. P. Goodrich,

Elmira, N. Y.

Our 1910 Pattern Metal Mothers

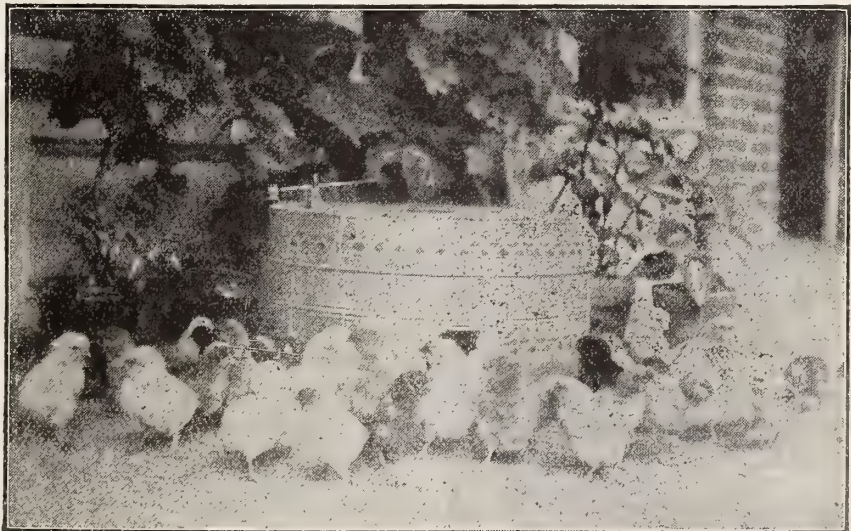

are the perfect results of the latest discoveries in artificial incubation. They will hatch hens, ducks, turkey and goose eggs equally well and at the same time. Regulation of moisture and heat entirely automatic.

Large stock of machines at Oakland, Cal., our western shipping point. Write the Cycle Hatcher at the above address for Pacific coast prices.

One Metal Mother complete, \$7.50; two, \$14; four, \$24. One Cycle Hatcher complete, \$5; two, \$9; four, \$17; six, \$24.

The booklet "A LITTLE POULTRY AND A LIVING," fully illustrated and describing these machines, and a complete line of the most approved poultry appliances, mailed free.

Cycle Hatcher Co., 214 William St., Elmira, New York

Three of the Best Poultry Publications, Practically Supplying the Entire Needs of Every Poultryman, at One-Half the Regular Price

Our Big "3" Combination

**American Poultry Journal } ALL THREE FOR
Western Poultry Journal } 75 CENTS
Farm-Poultry } Regular Price, \$1.50**

American Poultry Journal is the oldest, largest and handsomest poultry paper in the world, and is conceded to be the leader in all things pertaining to poultry. Is copied by both old and new poultry publications. In fact, it has no equal. Now in its 40th volume.

Farm-Poultry, published at Boston, Mass., is one of the oldest and best poultry magazines published in the East, and is now in its 20th volume. This magazine is always full of valuable information pertaining to thoroughbred poultry, and covers the Eastern field in a most thorough manner.

Western Poultry Journal, published at Cedar Rapids, Iowa, is in its 21st volume, and is one of the most up-to-date poultry magazines published in the West. The two, together with the old reliable American Poultry Journal, thoroughly cover the entire field of poultry literature, and make a poultry library in themselves.

The Greatest Combination Ever Offered

and especially so when you take into consideration the fact that American Poultry Journal contains from 60 to 150 pages of interesting matter, any number of which is worth more than we are asking for one year's subscription to all three magazines.

This offer is for both new and renewal subscriptions. Cut out the coupon and send in your order today. Address all orders to

Missouri Squab Co., Dept. R, St. Louis, Mo.

Poley's World's Best Buff Rocks

again make a great sweep at Madison Square Garden, N. Y., 1909-10, winning 1 cock, 1, 2 hens, 2, 5 pullets, 1, 3 pens, also winning the National Championship cup for best cock, hen, chl. and pullet; also 4 of the specials for shape and color, and best display by a very large margin, winning more points than my four next highest competitors all together. I have won nine 1sts at the last shows at Madison Square Garden, and at Indianapolis, Ind., Nat'l Club meeting, '08, I won five 1sts, championship cup and best display by a large margin. At Greenville, S. C., I also won 1st display by a large margin. This is the 3d year in succession that I have won 1st pen at Madison Square; my 1st pen was pronounced by Judge W. C. Denny to be without exception the best pen ever shown in America. My string was the sensation of the show. Write for catalogue.

John W. Poley - Box A - Royersford, Pennsylvania

BANTA

Incubator go out coupled with the I would not fool kind that from chicks, because

The heater can be more heat, and radiates has this cleanable

The cloth diaphragms work of the most lasting kind. They retain heat even better than a fireless cooker. The doors always shut air-tight against a jamb.

No change in egg trays is necessary for duck, goose or turkey eggs. The regulator is simple and sure in operation. We guarantee it.

The large nursery under the egg trays is provided with doors and a drawer so that chicks may be removed from the incubator without in any way interfering with the hatching of other eggs.

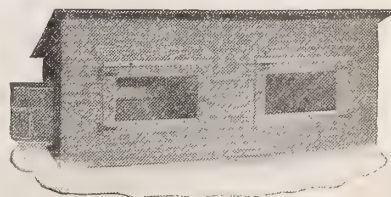

We could go on telling you many other points about Banta Incubators. Send for my catalogue and you will understand better why I am proud of my incubator and why I can guarantee it to hatch so well, last so long, and give such delight. It is a book worth your time to read. Send for it to-day. Address as below. I will get it because I give my entire personal attention to all incubator and brooder business.

That is my name, and I am proud of it. It is also the name I have given my Incubators and Brooders, and I am proud of them, too. There are many generations of Banta's with reputations for honest, square dealing, and there is now a 17 years' enviable record back of my Incubators and Brooders.

I honestly believe there are more Banta Incubators that have been in successful use five—six—seven—and more years than any other machine, regardless of price. Some cheap machines are useless before the end of the first season—or even the first hatch. These are expensively "cheap." I never let a Banta Incubator go out of my factory that I know will not last even longer than the brash claims made by some manufacturers—never let a Banta that is not as nearly perfect as Knowledge, Experience and Material can make it, when desire to make an Incubator that will hatch each fertile egg into a strong, healthy chick, a minute with an Incubator that hatched eggs and that was all—the chicks must be the very start can be developed into prize winners. The Banta Incubator will hatch strong it has points of exclusive prominence:

cleaned if you should turn up your lamp high enough to smoke. A heater filled with soot requires heat unevenly—increasing cost to operate and possibly killing your hatch. No other Incubator heater.

are removable for cleaning. The frames for these cloths are mortised and tenoned—strictly cabinet The top has thirteen thicknesses of packing and lumber; the double walls five (5), with enclosed air space.

Buff Wyandottes

AT THE GREAT WEST MICHIGAN STATE FAIR—Won in the hottest competition 1st and 3d cock, 1st and 2d pullet and 2d and 3d cockerel. Won silver cup three years in succession for best pen at Grand Rapids. We are now booking orders for eggs and baby chicks; Buff Wyandottes and K. S. S. C. Rhode Island Reds. Write for mating list.

E. A. Knapp, 451 Grandville Avenue, Grand Rapids, Mich.

Rudy's Perfection White Wyandottes

Just from Missouri, where we did show them sure enough. Now I am going to show you the quality of my "Perfection" Strain that can be found in my breeding yards this season. My type of White Wyandottes is known all over the world as being as near Perfection as has ever been produced, and winners in most any of the best shows can be traced to my

"Perfection" Breeding

My records, at Chicago, December, 1908; Peoria, Ill., November, 1908, and Kansas City, Mo., January, 1910—the Madison Square of the West—will long stand unequalled. At these shows (the last three shown in competition) they won all the Blue Ribbons—15 out of a possible 15. At Kansas City, 1st, 2nd, 3rd, 4th cock; 1st, 2nd, 3rd, 4th hen; 1st, 2nd, 3rd, 5th cockerel; 1st, 2nd, 4th, 5th pullet; 1st, 4th pen. Specials: The Weekly Kansas City Star's \$150 silver trophy cup for best bird in the show, all varieties competing. The Schmelzer Arms Company's \$50 silver trophy cup for best display, all varieties competing. All the above prize winners (with one exception) can be seen in my breeding yards this season, as I wish to give my patrons good value in eggs for hatching.

Why delay placing your orders? DO IT NOW, that the "Early Bird" may "Catch" the Ribbon. Have your orders booked early and be assured of prompt delivery. Fifteen grand pens. Mated for the Egg Trade, including all my prize winners. Eight of them headed by the best sons of "Perfection," the greatest living White Wyandotte sire. Prices of eggs: As they run (i. e., eggs from all pens), \$5 per 15; \$9 per 30; \$12 per 45; \$24 per 100. From pens of your own selection, \$10 per 15; \$18 per 30; \$25 per 45. Utility and incubator eggs (from surplus stock I carry over for next season), \$3 per 15; \$5 per 30; \$7 per 45; \$12 per 100.

Don't forget that my "PERFECTION" STRAIN is noted for Great Egg Production. Write for Free Egg Circular and Mating List. A few choice breeders yet for sale. Prices on application.

ORCHARD POULTRY FARM = ORCHARD BANTAM YARDS

THE LARGEST FARM IN THE EAST BREEDING ALL VARIETIES OF POULTRY, DUCKS, GEESE AND BANTAMS

We won more first and second prizes in the leading shows in New York, New Jersey, Pennsylvania, Maryland and Virginia than any other farm. Largest exhibit and greatest win at America's greatest fall exhibition, Hagersstown, 1909. At Williamsport, Pennsylvania's great A. P. A. show, we won five silver cups, grand medals and more cash prizes than any other farm. Exhibition and breeding birds for sale. Eggs, \$3 per 15; \$6 per 30; \$16 per 100. Our motto: "Quality, not quantity." State your wants in first letter.

S. G. Hoke & Son, Lock Box 2, Spring Forge, Pennsylvania

THE KIND OF EGGS LAID BY

MISHLER'S
ROSE COMB BLACK
MINORCAS

We Made a Clean Sweep of All First Prizes at Chicago, 1909

In the strongest class of this variety ever brought out, and besides ALL FIRST PRIZES we won 2d, 4th and 5th cocks; 3d and 5th hens; 2d and 3d cks.; 4th pullet and 2d and 3d pens. This in a class of 69 birds and in competition with nine other breeders, places the **Mishler Strain at the top.**

We have 15 pens mated for the egg trade. The finest Minorca catalogue ever issued, giving illustrations and descriptions of our breeding pens, will be mailed for four cents in postage. If you want big eggs and plenty of them, or birds that can win in strong competition, why not get a start with **Mishler's Rose Comb Black Minorcas**, the kind that **win, weigh, lay and pay?** Write now before it is too late.

Lloyd C. Mishler - R. R. 1 - No. Manchester, Ind.

Second Buff Cock, Madison Square Garden, N. Y. Owned by H. B. Prescott.

PINE RIDGE FARM BUFF, BLACK, WHITE AND DIAMOND JUBILEE ORPINGTONS

Are the down-to-date, low set, blocky kind that are winning at the best shows in the country for us and our customers. We wish you could see our birds as we see them every day, then you would know how good they are. We want you to know that our Buffs are of that bright, even, golden color down to the skin, in hackle, wing bows, back and saddle, with rich, red eyes. Our Blacks are massive fellows with a lustrous green sheen that defies criticism.

In Whites we feel we must tell you that we have some of the best that were ever imported from England; the very cream. And in Diamond Jubilees. Well! We still claim the best that were ever shown. Now just a word about our record

At New York and Boston

The last three years we have won 80 regular prizes on our Orpingtons, besides cups and specials, and we have kept these winners right in our yards to sell eggs from, so that our customers could share with us the good results to be obtained from such grand matings.

Eggs for Hatching: \$15, \$10, \$7.50, \$5, \$3 and \$2.50 per 15. We have a mating sheet that describes our different pens and want you to send for one.

— Ad on Back Cover —

Shoemaker's Poultry Book AND ALMANAC FOR 1910

There is nothing in the world like it. It contains over 200 large pages, with many fine illustrations. A number of BEAUTIFUL COLORED PLATES OF FOWLS, showing them in their natural color.

Tells all about all kinds of thoroughbred chickens, with life-like illustrations. Prices of eggs for hatching and fowls for breeding purposes. TELLS HOW TO RAISE POULTRY SUCCESSFULLY, their care and management and how to treat all diseases common among them. Gives illustrations and descriptions of convenient poultry houses and plans to build them.

The Globe

ALL ABOUT INCUBATORS and BROODERS with the illustrations, complete description, and lowest prices. ALL ABOUT OPERATING THE INCUBATOR. This chapter is marvelously complete, and worth much more than the price we ask for the whole book. This Poultry Book is worth dollars to anyone interested in the raising of fowls. It is AN ENCYCLOPEDIA OF CHICKENDOM, and no one can well afford to be without it. Will be mailed to anyone upon receipt of only 15c. Money refunded if not pleased.

IMPROVED SANITARY METAL BROODER

Poultry Raising Made Easy

By the use of Fireless Brooders

Price Only \$2.50

Follow nature's way and raise from 95 per cent to 100 per cent of the hatch. Solves the vexing Brooding Question and brings chicks to maturity healthy, stronger and larger than even the mother hens. No more death loss or stunted chicks from lice, overcrowding or overheating. A constant supply of fresh, warm air, thoroughly diffused before entering the brooding chamber, is brought about by our perfect system of ventilation. Not simply a close built galvanized iron box, but a sanitary, practical, scientific brooder from every standpoint; double walled and warm enough to place outdoors with success in freezing weather.

Whether you raise 25 or 1,000 chicks, whether you hatch with incubators or by hens, you want this brooder to raise the chicks in, if you wish the highest possible percentage of healthy chicks. Remember, no danger of fire, no loss, no overheating, no cold corners, no crowding. All successful poultrymen are adopting this method. Our brooder is no experiment; is in successful operation everywhere. Only one size made, 50-chick capacity. No brooder should be made to hold more chicks. Can be used indoor or outdoor. Send for catalog or order direct. Price for one brooder, \$2.50; two for \$4.50; three for \$6.50 or five for \$10. Address all orders to

GOSHEN POULTRY YARDS : BROODER DEPT. : GOSHEN, INDIANA

Crescent Poultry Farm, Frank Foy, Prop., Des Moines, Iowa

Foy's Big Book---Money in Poultry and Squabs

Describes and illustrates all the leading varieties of pure bred fowls and Homer Pigeons for squab raising. "Tells you all about how to raise poultry for profit, how to feed and mate, all about diseases and remedies and a great mass of useful information." "Gives plans for building poultry houses, describes and illustrates the best incubators and brooders and the famous Crescent Poultry Farm, which is the largest poultry farm in this country devoted exclusively to the rearing of pure bred poultry and pigeons." "IMPORTANT ADVICE—Tells you how to start the business in a small way and grow big. My specialties are thoroughbred fowls of a high quality, and Homer Pigeons for raising squabs. "I can supply eggs for hatching from all leading varieties by the single setting or in large lots for incubators. My prices are low. The quality is high. All who want to keep posted in the poultry business, or contemplate purchasing anything in the above line, should send for this book. Mailed to any address for 4c in stamps. Write your wants; mention A. P. J.

DES MOINES, IOWA

ELLENWOOD POULTRY FARM

ROSE COMB AND SINGLE COMB "CHAMPION" RHODE ISLAND REDS

ARE STILL IN THE LEAD, this season our winnings proved that our quality excelled, having won more firsts regular and special prizes than all our competitors combined, at four of the leading Red shows of the year where we met and defeated the best of the past season's production in the hands of the leading breeders of the continent. At the Great Mid-West Show held in Chicago where the club meeting was held this year, we won three of a possible shape specials, thus proving our quality superior, and then to finish the season at the RECENT BALTIMORE SHOW where in competition with nearly 250 REDS we won nine out of a possible ten firsts, three Silver Cups, and 15 other REGULAR and SPECIAL PRIZES. Our matings this season surpass any of our former, so if you want the best in the world do not fail to get your EGG ORDER to us in time for early delivery, you will profit by doing so, as our prices will be one-half our Catalogue price during February, just the time for you to get out your pullets and cockerels for the FALL SHOWS. This will enable you to rank with the LEADERS this coming season. Catalogue and Mating List mailed upon request. A GRAND LOT OF COCKERELS STILL FOR SALE AT REASONABLE PRICES.

White Orpingtons and White Wyandottes

My Wyandottes made a great victory at the recent Youngstown show, where, in one of the hottest classes ever gotten together, I won three firsts and two seconds, two thirds, National White Wyandotte Cup for best cock, hen, cockerel, pullet and pen. Best display. Three \$25 loving cups, three \$10 cups, three silver medals and other prizes. My winners are all in my breeding pens.

White Orpingtons

are the same high class birds I have in my Wyandottes. I will not have any but high class birds on my place. Eggs are \$5 and \$10 per setting, and I pay express where an order is \$10 or more. I will give you honest value for your money.

F. D. Sutton

68 St. Louis Avenue

Youngstown, Ohio

First prize and color special at Cleveland, 1910

TANNENBAUM FARMS

—“VICTOR” STRAIN—

Barred Plymouth Rocks

Continue to keep in the front rank at the big shows and there is no reason why they shouldn't as they have been produced from lines that have been winning for the past several years. At Cleveland this year we won first and fifth and color special on hens and second and fifth pens. Our matings this year are second to none, as our “Victor” strain are so named because they combine high class exhibition quality with utility being exceptional good layers.

Our Columbian Wyandottes

Are also getting their usual share of high honors. At Cleveland we won second and fourth hens and second and fourth pens, showing none of our previous winners. At Madison Square Garden we won first on pullet and have added second cockerel and second pen at this same show to our breeding pens. First and second pullet and second cockerel at the Ohio State Fair are also among our list of winners. We have mated a few unusually choice breeding pens. Send for catalogue containing mating list, description and photos of plant, stock for sale, etc.

Tannenbaum Farms, Willoughby, O.

1st prize Col. Wyandotte pul., Madison Sq. Garden, '10

A THING OF BEAUTY AND JOY FOREVER NOFTZGER'S PARTRIDGE ROCKS

Can you imagine this most beautiful bird with its feathers most beautifully and delicately penciled with dark brown on a mahogany brown, making a rich chestnut coloring effect with a beautiful sheen that shines like satin? If you can imagine this, then you know how beautiful they are, and then you will want to go to the originator of this breed to secure further information. He breeds the best there is, as is proven by the fact that he

Won Again at the Big Chicago Shows

all first and second prizes, also 3 thirds and 3 fourths. He not only has a few good birds but hundreds of them, and he has less culls and more show specimens than are found in the average flock of thoroughbreds. To this fact many can testify. Judge Zimmer and others have remarked about this fact in visiting his yards. Remember this, also the fact that they are great layers, docile, easily confined and embody all the good qualities of any other variety of the Rock family, and we think you will decide you want **PARTRIDGE ROCKS**. Naturally you will want stock from the originator. He is just issuing a handsome illustrated book telling all about these fine birds, giving history, etc., which will be sent for only 10 cents. Hundreds of birds for sale. Mated trios and pens. Write for prices.

S. A. Noftzger, North Manchester, Ind.

RED, RED REDS

—ROSE COMB REDS—

I breed Reds that are red to the skin, with the correct long-bodied type that is called for in the Standard. Hence they please the Judges and win in the strongest competition in the country. I not only raise a few good birds, but lots of them; to prove this I put out two strings of birds at the same time and my birds were

Winners at the Great Missouri and Oklahoma State Shows

At Enid, Oklahoma, State Show, a show of 3,200 birds in a hot class of Reds I won 2nd cockerel, 3d cock, 1st, 2nd, 3rd pullet, 1st pen, special for best shaped male, special for best colored male, special for best shaped female, special for best colored female, special handsome silver cup for best pen and special handsome silver cup for best pen in the show. This, the most coveted prize in the show, was awarded me by three Judges consulting together. These winnings clearly stamp my birds the best R. C. Reds in the Southwest. Read what Judge C. W. Zimmer says, "To Whom It May Concern—I awarded the above prizes to Mr. Robert Bretz, and I consider his birds exceptionally fine specimens and eggs from these birds are well worth the price asked—\$10.00 per 15. Respectfully,
C. W. ZIMMER, Judge."

Eggs from Prize-Winning Pens

Have mated up some grand pens, each one headed by a prize-winner, from which I will sell eggs for \$10.00 per 15. Eggs from farm range stock, \$2 per 15; \$10 per 100. Don't delay. Order today. Send for mating list and mention American Poultry Journal.

Single and Rose Comb Buff Leghorns

MADE THE WORLD'S GREATEST SHOW RECORD

Unequalled and unapproached by any Buff Leghorn breeder—was that made at Chicago, December 7 to 12th, 1909, by the Tecktonius Single and Rose Comb Buff Leghorns. At this great exhibition of the biggest and most superior class of these magnificent birds ever shown under one roof, in the history of the United States, the Tecktonius Single and Rose Comb Buffs took high honors in sixteen out of eighteen entries as follows:

Single Comb—1st pen, 1st and 2d hen, 1st and 5th pullet, 2d and 4th cockerel, 4th cock

Rose Comb—1st pen, 1st and 2d cock, 1st and 2d hen, 2d and 4th pullet, 3d cockerel

Also the Tecktonius Buffs won the silver cup and silver set—and the special for best shape and best colored female offered by the American Buff Leghorn Club. Truly, "honor enough"—for the world's best strain of the "best general purpose fowl on earth" to satisfy even the ambition of the breeder of these distinctive birds.

Tecktonius Buffs--The "Quality" Leghorn

—have proven by test to be the best general purpose fowl on earth, because they are light eaters, healthy, hardy and large Winter egg producers, choice eating, handsome, attractive birds—every inch of them.

My Success Buff Leghorn Book

My beautiful, illustrated 8x11, 32-page catalogue, with art colored cover design, contains color plate insert of a pair of Buff Leghorns (suitable for framing) showing true color and shape to breed to. This book covers every feature of the poultry business, especially the feeding, breeding, mating, conditioning and care of Buff Leghorns—also covers the diagnosing of diseases common to poultry and a specific cure for same. This magnificent catalogue will be mailed to any part of the United States or Canada, upon receipt of twenty-five cents, coin or stamps. Your money back, if not pleased.

RACINE, WISCONSIN

S. C. Brown Leghorns

Winners bred from winners—not once or twice, but year after year. Not some little local show, but such shows as Madison Square Garden, Boston, Chicago, Cleveland and Indianapolis, where my birds came in competition with the best Brown Leghorns in the land, east and west, and in every case they have

Landed a First Prize

Read this record and be convinced that like begets like, and that my S. C. Brown Leghorns are **unsurpassed in quality**.

At Chicago, Dec., 1909, I won 1, 2 cock; 1, 5 cockerel. At Boston, 1907-8, 3, 5 cock; 1, 2, 5 cockerel; 3, 6 hen. At Madison Square Garden, 1905, 1 cock, 3 pullet. At Chicago, 1905, 2 cock; 2, 3 cockerel; 1 pullet; 1 pen; 15 specials. At Indianapolis, 1 cock; 1 cockerel; 1 pullet; 1 pen.

This should convince you I have the quality you are looking for. **Eggs \$3 and \$5 per setting.** I want to hear from you. Satisfaction guaranteed.

Giant Bronze Turkeys .. America's Best .. Part. Wyandottes

At the great Madison Square Garden Shows of 1907-8-9-10 our Bronze Turkeys and Partridge Wyandottes won a total of twice as many premiums and twice as many points as any competitor. At the above 1910 show our birds won more premiums and more points than all competitors combined. The choicest turkeys and Wyandottes we ever raised for sale now. Remember, all stock found not as represented may be returned at our expense and your money will be cheerfully refunded. All birds farm raised; vigorous and unexcelled for utility purposes. Write what you want; we'll try to please you.

RUNNING THE INCUBATORS

Care of Eggs Before Incubation—Ventilation an Important
Feature—The Proper Temperature—The Moisture
Question—Experience the Best Teacher.

Written by Harry M. Lamon, Special Representative A. P. J., Adams Center, N. Y.

ANY article on the subject of incubation, it seems to me, must be a repetition, to a great extent, of those that have gone before. But I am going to try to impress upon the mind of the reader some of the fundamental facts that, if followed with average intelligence, will make for success in hatching and the rearing of the baby chicks. In the first place, you must have good, strong, healthy breeding stock—birds of strong constitution, for it is the strong constitutional sort that lay eggs, that hatch chicks, that live, and produce a profit. Now, make a mark right there and don't forget it. Almost any one can hatch a few eggs from every machine set. Just think of the loss it is to you—think what it has cost in time, feed and labor to mature a few chicks from a poor hatch. The eggs you lose amount to quite a little. I have never seen a good per cent of the chicks raised from a poor hatch, so it stands the feeder in good hand to see that the breeding stock is in prime condition. My article of last month gives a few hints as to how to acquire the above condition. Assuming that the breeders are all O. K., and the egg yield is all that could be expected, most of us find we have to hold some of the eggs quite a few days before putting them in the machines. Eggs can be kept quite some time and good hatches result if handled properly. Turn them one-half over every day and keep them in a room the temperature of which is around 50 degrees. In handling eggs for hatching, be sure your hands are clean, and do not wash hens' eggs intended for this purpose unless absolutely necessary. There are a lot of little things that help to make a good hatch, among which I will mention that eggs of one color will do better by themselves than if white and brown shells are put together, and eggs of the same age generally will hatch better than those of different ages. In starting the incubator see that it sets level. Almost any place that has good ventilation will do, but the more good fresh air you have around your machine and can control the temperature, the larger the percentage of chicks you will not only hatch, but raise, with any decent kind of brooding. It is not nearly the work and trouble to raise well-hatched chicks from an incubator that has had the proper ventilation as it is from those taken from machines that have been in a poorly ventilated room. Make another mark right there. It generally takes a few days to get a machine dried out and running properly, so figure accordingly when getting ready to start.

The first three or four days that the eggs are in the incubator, I believe, are the most important stages that the germ and unhatched chick has to go through, and I also firmly believe that the strength and health of the chicks to a great extent are controlled at this period. Remember, at this time you are dealing or are about to deal with life, and the embryo chick, germ, or whatever you choose to call it, is the weakest at this period. It is plain to all that a change of a degree of heat at the nineteenth day will not do as much damage to a hatch as a like change at the tenth day. Consequently, the first three or four days, regulate to 101½

degrees, and gradually get up to 102 by the seventh day. Now is the time to test out all infertile eggs. I should have mentioned that after the second day the eggs should be turned night and morning, and need no cooling at this time more than the time it takes to turn them and replace in the incubator.

I will also say at this point of my article, the question of cooling incubator eggs is one that I have never been able to solve satisfactorily to myself, and each operator must work along the lines which his experience will teach him. Conditions and the seasons vary, and the length of time needed to cool the eggs varies accordingly. But a moderate amount of cooling after the twelfth day, increasing a little each day, according to the temperature of the room, up to the nineteenth day, generally proves beneficial. Beginning with the seventh day, and up to the fourteenth, I would run the temperature at 102, 102½ and 103 degrees, and 103 degrees the last week—that is, as nearly as possible; never under 103 degrees. Better have it a little over, say 103½ to 104, rather than 102½ to 102 degrees. As a rule, towards the last of the hatch the thermometer will have a tendency to run above the required temperature. In this case, turn the lamp blaze down low. At times I have had to turn the light out entirely. At such a time use good judgment and you will bring off a good hatch, as it is the great numbers of live chicks almost ready to break through the eggs that make the temperature run up so high. Sometimes you will find it advantageous to take the eggs out and cool them for a while in the middle of the day. If your hatch is to be a good one, almost invariably it will start on the evening of the nineteenth day and be over by the evening of the twentieth; and should the thermometer show 105 degrees while hatching, do not get scared or open the machine. Never open it after the chicks start to pip, for in opening the incubator you will lose the moisture so much needed at this time.

The moisture question is debatable, like all other incubator problems. But my experience teaches me that the best hatches, the larger chicks and more livable ones come from the machines when moisture has been used. I like to wet down the floor of the incubator house or cellar as often as needed, and the guide I use to tell me when moisture is needed is this: As fast as the floor dries I put more on. In addition I also put a pail or pan of water directly under the lamp of each machine. Any one using right and left incubators—that is, where the lamps are on opposite sides—one pail of water will be sufficient for two. Don't be afraid of getting the cellar floor too wet, as the water answers a two-fold purpose. It not only furnishes moisture, but water is one of the greatest absorbents we have for the foul gases that are near the floor.

Remember this: The air over the machines may be warmer than that on the floor, and still not be bad. It is the heavy, foul gases that drop to the floor that cause most of the trouble in incubator cellars.

I could write pages on the handling of incubators, but might do more damage than good. Your experience will be the best teacher, and if careful it should not be over-costly. I am aware that authorities differ as to the time the chicks should be left in the machine after hatching. It runs from twenty-four to seventy-two hours. I think you are perfectly safe in taking them out at thirty-six hours.

We now come to the temperature of the brooder and the raising of the little chicks, which I will take up in a future article.

WHO'S WHO IN HENDOM

The muse fails to inspire anything for this issue of the American. Generally I take a gallop through Browning or Shakespeare, Rabelais or Kipling, to catch the muse, but this morning she was not there, so we will have to do without her, this month, at least. Even my favorite Uncle John fails to excite the necessary mental stimulus; and, thinking that I might catch some sight of the muse in Stevenson, I even turned a couple of back somersaults, threw a handspring or two among his essays and inspired works, but there was nothing didding.

Waiting for the muse is serious business. I can go down to the oats sproouting department and take a couple of stirs of the paddle to liven things up, but there is a clause in my life insurance policy which precludes this. I dare not read how to fake, else my morals become even more polluted. I can read the poultry papers a little about the various he-marvels that are shouting about this system and that system of keeping chickens; but that keeps the chickens from keeping me. Something must be done. The fool cockerels continue to get into the trap-nests and cause me trouble by making the hens and pullets lay on top of them, and then the eggs roll off and break, leaving the future prize winners to their fate. I cannot court the muse and follow the rounds of the breeding pens; hence the moments between waiting are anything except auspicious. But, as Zimmer says of the fellow he cannot land for the ad contract at once, the waiting game has to be played, so I play it.

I was cleaning out the carburetor of my six-cylinder the other morning, preparatory to making a little run down to Pennsylvania, when I happened to think that they would make good dope for the Who's Who-ite columns. But we will have to dispense with the muse in giving to the dear reader the things we saw and the things we heard. The last few years the poultrymen of the state of Pennsylvania have been the natural born targets for all sorts of honors, and we have not heard a word of suspicion connected with the name of any poultrymen about the contracts that went to enrich that new state capitol.

It was but last winter that the fanciers in the state of Pennsylvania took it into their heads to form a state league of poultry association and hold their biggest shows so they would not conflict the one with the other. Many another state should take the same plan under advisement. They are always doing things down there in Pennsy. From football to Pekin ducks, they are right in the front ranks, and intend to stay there. Now, when I say they are doing things down there, I mean it. They are busy all the time. Then, at other times they are busier still. What could, for instance, make them more busy than when a member of their state legislature, who was not favorable to a poultry bill that was up before the lower house, rose and said:

"What is more out of the scheme of things in the barnyard than to see an old hen running about in the middle of winter, clucking as if her heart would break if they did not give her eggs to set on, and this, too, mind you, with eggs at 50 cents per dozen and the price of wheat right at \$1.50? It makes a rooster turn green with envy and me feel sad to think that with the poultry industry of this state in such condition as this, that these men who call themselves the backbone of the poultry industry should come here and hire a member of this branch of the legislature into presenting such a bill and try to flimflam the state out of that amount of money annually."

Oh, man, there was something doing then!

Nearly all the hen men in the state rose up in arms, the arms being more or less fresh eggs, and said member of the lawmaking body hid himself in his lair for the time being; but things certainly got so hot that he took to the open, and the last seen of him was when he was digging out across the boundary line to the southward. He is running yet, so we

L 5

learn on good authority. To think that any man had the colossal nerve to get up there, practically before the great body poultrytic of the state of little Pennsy, and make such a fool speech as that! Why, all the chickenists in the state were hot after him before he had warmed his seat after yielding the floor. And there would have been a funeral next day if there had not been a fleet pair of heels to show to the rope committee.

To see a hen clucking in the winter time down in Pennsy means that some one has fed her well and that she has certainly laid herself out and gone into the broiler business in early spring to re-line her purse with gold. With high feed bills, the price of eggs

is just about as high. Broilers down there at the Baldoria-Castoff set you back on the siding for about steen bucks the platter, and the platters are plates at that. Ask Afton Farms—they sure know, for they are in the business and have a first lick at the game. The chicken business and the state of Pennsylvania are affinities and the courts cannot separate them. E pluribus onions!

It was not many years ago that the fancy in the state of Pennsylvania was a great deal like the big, ham-footed lummux who used to court our hired girl. It didn't know what to do with its feet and hands when it came into the parlor. Nature did not try to outdo herself in making them removable, so they had to be borne with. But they are getting organized down there, and it will not be many moons before we note the signal fires: Close in and eat them up.

Take a look at the breeders who have swept down into the Garden from the state of Pennsy and captured, wounded, crippled for life, and made prisoners of war the ribbons and competition in general. Then note how they have thrown competition open to the world at the Philly show and simply smothered the boys who came from out-state to celebrate with them. If you want to be safe in their company you must breed some good Pennsy strain or other to hide behind. But we have no kicks coming. They always did what they said they would, and have been considerate of our feelings, saying nothing about our purses.

In Pennsylvania it takes but one egg to make six egg-nogs, so they say. The effect must be great! It means that the hens of that state are the strong ones of Hendom. They get off the roost early in the morning, at the first crow of the cock, cockerel or cockerline, or the quaint note of the "potrack" guinea cock (which has been said to sound like a cross between a mocking bird's discord and a peanut roaster as it slips a few cogs), gather up a few grains here and there and yonder, devour about a cupful of cinders, pick up all the stray nails lying loose, half a bale of hay, and then they go to the nests and lay those egg-nog eggs. It is marvelous, as Watson says to Herlock Sholmes.

At Brooklyn, Pa., lives that good breeder of Rose Comb Brown Leghorns—B. A. Oakley. He was strong in the winnings at Philly and the Garden. Snavey Bros., of Lititz, are breeders of good birds of a number of varieties, and are putting out some good catalog matter about their specialties. Then, Pennsylvania sets one ahead a bit with her Cuckoo Wyandottes in the yards of a few breeders we will write of later. Fox strain Golden and Silver Wyandottes are well known throughout the state, and W. J. Fox, the originator, has been a winner with them for nearly twenty years.

Frank Shellang, Erie, breeder of grand Single Comb Brown Leghorns, has been winning at the leading shows with the line he is producing. Winona Farms, at Lansdale, are doing things in good Single Comb Reds and Single Comb White Leghorns. Arthur Trethaway, of Wilkesbarre, still produces the best of Anthracites in Minorcas, while Lawrence Jackson, of Haysville, goes right ahead breeding the best of White Orpingtons.

At Homer City the Prairie State Incubator Company is about the whole show. It is still putting out one of the best

machines, and will continue to do so if it has good health. Afton Farm, at Yardley, is one of the big poultry enterprises of the state, and one should see it. It is in all Baedeker's. Ellenboro Farm travels all over the broad land looking for competition, and finds it, and then strangles it with the hot quality it trots to the wire. "Champion" Reds are good Reds, so their customers say. That popular air, "My Birds

WHITE PLYMOUTH ROCK.

First cockerel at Akron, Ohio. Bred and owned by J. M. Moore, Jr., Unadilla, N. Y.

Are Wertzberger Birds," originally came from Altoona, Pa., where the Wertzberger Bros. hold out with their Silver Dottes, breeding them better and better every year. They have adopted the American Poultry Journal motto and are doing the leading in a step-lively manner.

Mrs. J. W. Holton is one of the state's good poultrywomen, and she is doing well at Catasaqua, where she is breeding some grand White Orpingtons. Craig & Mapes, Mt. Lebanon, are breeding some nice Buff and Black Orpingtons and Rose and Single Comb Reds. Look at that line of winnings at Cleveland, Chicago, New York and Pittsburg! Henry D. Riley, who was written up last month by H. P. Schwab, is now one of the Barred Rock pillars of the country. The Newtown White Leghorns were in the ribbons pretty deep at Philly, as per their ad, and they are sending out some good stuff.

We stopped at the big Haupt Farm, at Easton, long enough to grease up a bit and see their fine line of all the Orpingtons. J. A. Miller, breeder of the Cornish fowls, is hanging his shingle at Nazareth, and has some fine stock in his breeding yards. G. M. King, the Barred Rock enthusiast, breeds the Ringlets and swears by them.

Well, the dinner bell has sounded and we must go. There is a lot that might be said about the poultrymen in the state, but we are too tender-hearted to do it. Please forgive us if we have overlooked something out of the ordinary, as we were in a rush to make connections with a life meal ticket, and could not write up all we saw. If the A. P. A. does not convict me of taking money under false pretenses for my last scrub pullet, I will be back next month with something worth reading. But I have just heard that Matt Baldwin is going to Europe this summer on the profits he made out of his chickens last year, so I have not the time to write that I once possessed. I am a busy guy, and do not care who knows it. I want to go to Europe, too. They tell me it is a country with lots of feather-legged chickens and fanciers standing on every corner. Me for it!

POSSIBILITIES OF THE POULTRY BUSINESS

Success Within Reach—It's Up to the Man—Proper Housing
—Lessons in Feeding—The Growing of
Chicks, Capons, etc.

Written by H. P. Schwab, Eastern Representative A. P. J., Irondequoit, N. Y.

Part Three.

TO succeed is the real ambition of every person—at least, it should be. The hope of better things, of better conditions, make life worth living. If we are willing to do our level best, no matter what our calling, then the success is reasonably assured. Particularly does this apply to the poultry business. It is plainly up to the man, and if he will but observe, learn the lessons as presented, and work accordingly, then the results will surely be found on the right side of your ledger.

Experiments and Results.

We most heartily favor experiments; they are the best of teachers, and if properly made, with an object in view, and the results noted, they are bound to be of great value for future use. Following along the lines of those that have proven successful will lead to the satisfaction and the results we all aim for. Often breeders are told by others what to do and how to manage, and they will follow such advice to their graves, without question. This is not, in our opinion, the best way to attain the best results. Learn all you can from the other breeders; try their advice, but test it and know for yourself whether or not such is the proper care for your stock under your condition. What may make him may break you. It is your due to receive every possible grain of gain that poultry can give, and the breeder should be alert to his own interests and obtain it.

We also advise experiments for the purpose of creating interest in the work before us. Personal interest is abso-

A prize-winning Rose Comb Black Minorca. Bred and owned by Dr. J. N. MacRae, Galt, Ont., Canada.

lutely necessary in every undertaking where full value is expected, and the lessons so learned are not apt to be forgotten. It is a well-known fact that we can mate to produce shape, size, color, markings, and to greatly increase the laying capacity by following close to Standard lines, and to do this is something accomplished that carries with it a satis-

faction of work well done that will spur us on to renewed endeavors and greater possibilities.

Conditions Differ.

There are general principles laid down for the poultrymen that are productive of assured success, still we advocate personal experiments to positively obtain the best results. The mode that may be best and proper in New York state may not be the best in Iowa, or in North Carolina, or in California. Climate, food and water differ; each has its value, and as they differ, so do the conditions. It's plainly up to the man. And the best of all is, these questions are so simple to solve where real interest is had.

Feeding Lessons.

Here in particular is where the feed question comes in. The food they require, as well as the value of the food from the practical and productive viewpoint, are questions to be considered in experimenting. Just at this time food is very high, but it is at no time cheap enough to allow its careless use. Along both lines of quality and quantity of food that will be productive of best results, and at different seasons, is where experiments can well be made. Variety is the spice of life, and a balanced ration can be formed that will return all that is possible to receive. The fowls demand a variety,

the great returns from the plant came in. Now, this is the proper way not to succeed. No one, not even an old and well established breeder, could make of this a paying proposition. Such questions as this have been the stumbling blocks for years, and still we meet them almost daily. We wish we

One of many choice birds in the yards of F. S. Nicholson, Otisville, N. Y. Although not shown to advantage, this bird is of good shape, grand clean color and sharp ringy barring, and like all of his birds, is extremely strong in wing barring.

and this variety in such proportion that will meet their natural requirements.

We expect later to go further into this question of food; our purpose now is served by calling attention to its value, its merits and demerits, and its very important part in the general results.

Houses and Housing.

For some reason or other, the idea seems to prevail that elaborate buildings are required, that modern heating plants be installed, and that unless all modern conveniences are installed, "Biddy" will not be at all satisfied and will refuse to cash in. At the late Philadelphia show a young man confided his plans to us; he was about to enter the poultry business to make a living, and had elaborate plans drawn by an architect of the buildings and interior arrangements, with a hot water heating plant included. All this made a fine picture to look at; its cost was to be \$1,450. Then from \$150 to \$200 was to be invested in stock, and the balance, of from \$400 to \$500, all this young man's earthly possessions, was to be used as a working capital to meet all expenses until

White Wyandotte hen winning first as pullet at Toledo, 1909. Bred and owned by Geo. Barkdoll, West Unity, Ohio.

could say, once and for all, that a plain, well constructed building with a shed roof, built as long as you like, only not too deep—one that will keep out the weather, top and sides, and with open curtain fronts (to the south), is all that is required. Set it where good drainage is had, and have it

THE FAMOUS HEN BEATRICE.

Won first at Chicago, also first at Buffalo, N. Y., 1910, in competition with Canada's and America's best. Bred and owned by A. Didriksen, Whitewater, Wis.

plain and simple in arrangement, so that the stock can easily be cared for.

Colony Houses.

The colony house plan suits us best of all. We are partial to these for several good reasons, the particular one being for the larger yards they afford and that they can be

changed around if wanted. They require more labor to care for the stock and to clean; also, the cost is more. They are of advantage, especially where the breeding of exhibition birds is the object and the best possible per cent of fertility is desired. Keeping hens too long in limited yards is not conducive to health, unless the ground is turned under often.

BEAUTY QUEEN.

Columbian Wyandotte pullet won first prize at Huntington, Ind., and as seen in the breeding pen. Bred and owned by Philip Koehlinger, 1414 E. Grant Ave., Fort Wayne, Ind.

Hatching.

Chickens can be successfully hatched by either natural or artificial means; we practice both styles, and the results are about equal. The difficulties that will confront the beginner are more apt to be found in the brooding than in the incubating question. As this brooding question is just now being revolutionized, or rather has been for the past year or two, we think it best for us to hold this up, awaiting fur-

THE GREAT HEN MOLLY.

Won second at Buffalo, N. Y., 1910. She is a giant for size, and also one of the most typical Black Minorca hens ever shown. Bred and owned by A. Didriksen, Whitewater, Wis.

ther experience and the developments of our own tests. At this time we feel assured that the brooding problems are being properly solved and that the future poultryman will have much less to contend with than the one of the past.

The Feeding of Young Chicks.

Here, again, we find receipts handed down for ages; some

are good, while others are not as good as they might be; still, most of them will answer, with fair results. We are still old-fashioned enough to feed the finely chopped hard-boiled egg, shell included, for the first meal, and to follow with the egg-soaked bread crumbs, etc. For three years now we have fed almost from the first a bought prepared chick food that has given us most excellent results. While we include this with the other feeding lessons promised later, we at this time want to recommend just one food that is within the reach of most all breeders, and, in particular, where cows are kept. It is, to soak cracked corn in sour skim-milk, giving the chicks all they will eat and as often as they will eat. The corn should be well soaked for about ten hours. If there is a food that will make chickens grow faster or better than this, then we have failed to find it. We use this after the chicks are two weeks old.

Marketing Eggs and Poultry.

Here is another question that location as well as conditions will arrange to some extent if you let them. Here again it is up to the man; for, no matter where you are, there are inside, outside and other sides to the trade and demand as

During the past years "Nugget" Buff Plymouth Rocks have been among the winners at Madison Square Garden show and this year was no exception. The winning first prize cockerel and first prize pullet came from this well-known family of Buff Rocks and they added more glory to it and another link in the long chain of first honors won at this great exhibition. Mr. C. L. Pensyl, proprietor of Nugget Poultry Farm, Bloomsburg, Pa., has been producing winners for himself and his customers for a good many years, and we are informed that the breeding pens for the coming season are as strong as ever. With such specimens as the one represented in the accompanying picture, to fill his pens, we have no doubt that the coming season will equal if not exceed the past in the production of exhibition "Nugget" Buff Plymouth Rocks.—A. O. Schilling.

well as to price. You can better existing conditions. Get out of the rut. Lead, and let others that will, follow. Don't be driven. Have the quality; insist upon that, and make your own terms. This may come slowly, but it will come. Reliability and quality will assert themselves, and the advantage is your gain.

There are poultrymen today that are selling all the eggs they can produce for from 50 cents to 60 cents per dozen the year round; others we know of are selling at from 40 cents to 50 cents, and we have lately heard of one party who gets \$1 per dozen the year round for all eggs he can ship. These eggs are all used for commercial purposes, and not for

hatching, as some may suppose. They have made the demand for their goods and are now reaping the rewards in dollars. Their goods are worth it, and the people will pay the price just as soon as they know they are getting value.

The marketing of dressed poultry has the same sidelights; it offers the same class of markets, with extra profits in proportion. The quality of the article makes the price; no quality is too good, and no price too high; by giving the best you also receive the best. If your home trade does not demand such goods, then look elsewhere, for there is just such a market looking for you. The cold storage kept carcass days are as far gone as are the rumored embalmed beef days, and all these questions have drawn themselves to the fine point of quality, where it rightly belongs.

Capons.

The capon question has never come to our personal experience to any great extent; we have caponized a few for home use, and have fully enjoyed their delicious quality. We know of several who look to capons as the best thing there is in poultry raising. They have made it a regular business for some years, with profit, and, knowing this, we gladly add our O. K. The price of capons is usually from 5 to 8 cents per pound above the regular poultry price—well worth considering, along with the added weight obtained. With but little practice, by the right party, the operation can be quickly and easily done, and with a very limited, if any, loss. There is always a demand for capons in the

ROMEO.
From Minorca Range, Big Rapids, Mich.

larger cities that is seldom over half supplied, assuring at all times the best possible markets.

Fruit with Poultry.

In concluding this article, or rather part, we call attention to the addition of fruit with poultry keeping, as some may suppose that the yards and range required cannot be utilized for any other purpose. This is far from proper, as there is nothing quite as good for fruit trees as poultry, not even excepting the birds. Fruit is without doubt the best paying crop that can be grown, and should receive every encouragement. The care and harvesting of fruit crops is pleasant work, and easy compared to the regular working of the land, with much greater profit, besides adding value to the farm.

One of the best flocks of chickens we ever saw was raised and kept in a berry patch. Here the cultivator was used every week, the poultry doing the rest in growing the grandest crops of fine large berries that paid the price of the land in three years. The poultry, in working among the bushes, looked at all times as if it had just come from the laundry—so bright and sleek, as if ironed out.

We find that in this article one question leads to another and that we are still far from the end of possibilities of the poultry business. If we can make these articles read as interestingly to "our folks" as their writing has become to us, and if we can be the means of creating additional interest or of leading others in the path of successful poultry breeding, then we shall feel repaid in full.

EXPERIMENTS ON THE USE OF GRIT

A Series of Interesting Experiments on the Use of Grit for Fowls, in an Endeavor to Ascertain Their Actual Value to the Digestive Organs and Health of the Fowls

Written for American Poultry Journal by Rev. C. E. Petersen, Beldgton, Maine

IT has been stated again and again that the common fowl is graminivorous; and the general belief that this statement is correct has led to more than half of the failures recorded in the poultry business, and particularly so, when the procuring of as many eggs as possible was the chief and only object worked for.

The fowl, however, is not only omnivorous, but, unlike

Single Comb R. I. Red pullet that layed 247 eggs in her pullet year. Bred and owned by Wm. H. Klug, 895 Seyburn Ave., Detroit, Mich.

many other omnivorous creatures, it cannot keep in good health, and at the same time be a profit to its owners, on any one kind of food.

A pig will flourish on grain alone, grass and almost on meat, but poultry must have all of these three to do well at all, and besides, mineral matters must be added as well.

BUFF WYANDOTTE.
Cockerel heading first pen at Madison Square garden, 1909-10. Bred and owned by L. D. Howell, Mineola, N. Y.

When poultry has been closed up for any length of time, and grit has been withheld, the first thing they will do as soon as liberty is regained, is to greedily devour anything that will supply the mineral matter that they have been with-

out during the confinement, gravel, stones, broken pieces of crockeryware, and even glass.

That grit is necessary for the welfare of poultry we all know, but curious as it seems, it took a great many years and some of the world's noted scientists to find out the whys and the wherefores of this matter, and even with the information we have today still opinions differ.

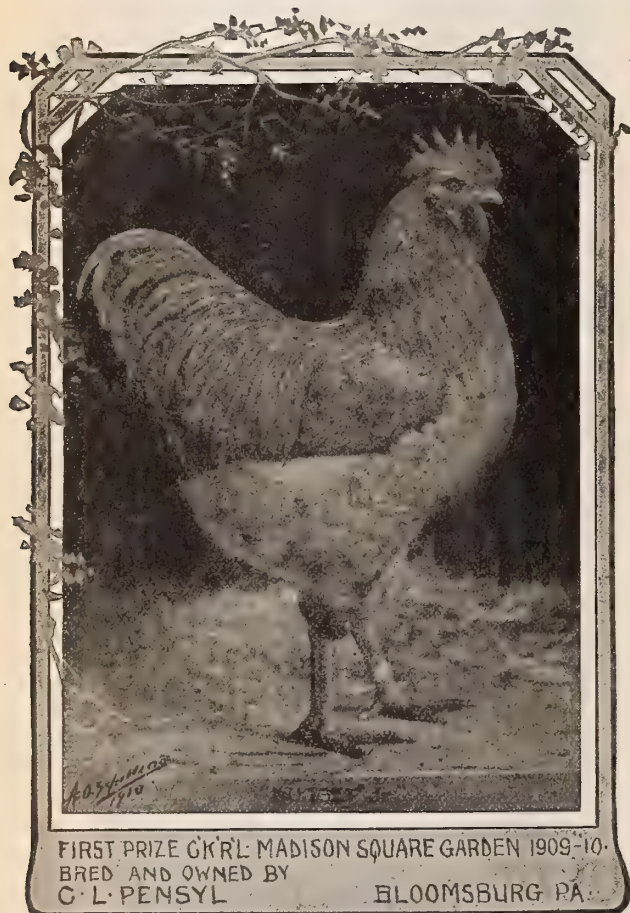

The commonly accepted opinion, that it is a means by which the fowl grinds up its food, which largely consists of hard grain, does not seem to be the conclusion that experimenters arrived at, for in the many experiments made it was proved that the food would be ground up and assimilated without any grit deposit in the gizzard.

Though it would be of more than passing interest to know the difference in time between grain assimilation with and without grit.

"Hens' teeth" we all understand to mean grit, but in reality the hen's teeth is her gizzard, for as fowls are not furnished with the necessary apparatus for the mastication of their food, they require other means for its trituration. Therefore any substance that has gone through the crop in

acts readily upon the proteids exposed by the breaking up of the grain envelopes.

A great many interesting experiments made to discover the causes and effects of the small stones which goes by the common name of grit, swallowed by most of the Gallinaceous birds, including the domestic fowls, and though some of these

Buff Rock alley at New York show was as usual one of the most interesting in this great exhibition, because there the competition is as keen as any place in the Garden. The winners may be considered the cream of the season's production and usually represent the fashion for the coming year. The honors were won by two Nugget Poultry Farm birds that won first cockerel and first pullet. They were both grand colored specimens, having the intense rich, golden, buff color of the orange cast free from any brick-colored or red pigment which usually is found in these strongly colored specimens. If breeders will obtain this shade of color they will find that it will stand the weather better than the lighter shades and will add much to the beauty of the breed. Mr. C. L. Penny, proprietor of Nugget Poultry Farm, Bloomsburg, Pa., has the right to feel proud over producing two such winners as the first cockerel and first pullet at the 1909-1910 Madison Square Garden show.—A. O. Schilling.

a solid form, is again acted upon by the gizzard by so bruising them that they become digestible.

The unbroken grains passing from the crop into the proventriculus cannot be acted upon by the gastric juice, as this secretion is incapable of dissolving their coating of cellulose.

(The gastric juice contains hydrochloric acid, pepsin and a milk curdling ferment.)

The grains then pass into the gizzard, where they are comminuted between the muscular walls, while the gastric juice secreted by the proventriculus, flowing down into the gizzard,

BARRED PLYMOUTH ROCK.

experiments seem very cruel, it is only seeming, as the consequent results did not injure the birds.

There was, however, one Italian physician by the name

First Buff Orpington cockerel, Missouri State Show, Dec., 1909. Bred and owned by L. H. Eldridge, Bradford, Ill.

of Redi, to whom the above statement does not apply, for, to say the least, his experiments on the fowl race were not only extremely cruel, but of no particular use in the general economy of fowl keeping.

It had been stated by a good many poultry keepers at that

day that grit made a part of the fowl's nourishment, and to refute this theory Redi shut up two capons with nothing but water and little pebbles for food. He found that they drank much water, but died, one in twenty, the other in twenty-four days, neither one of them having swallowed a single stone.

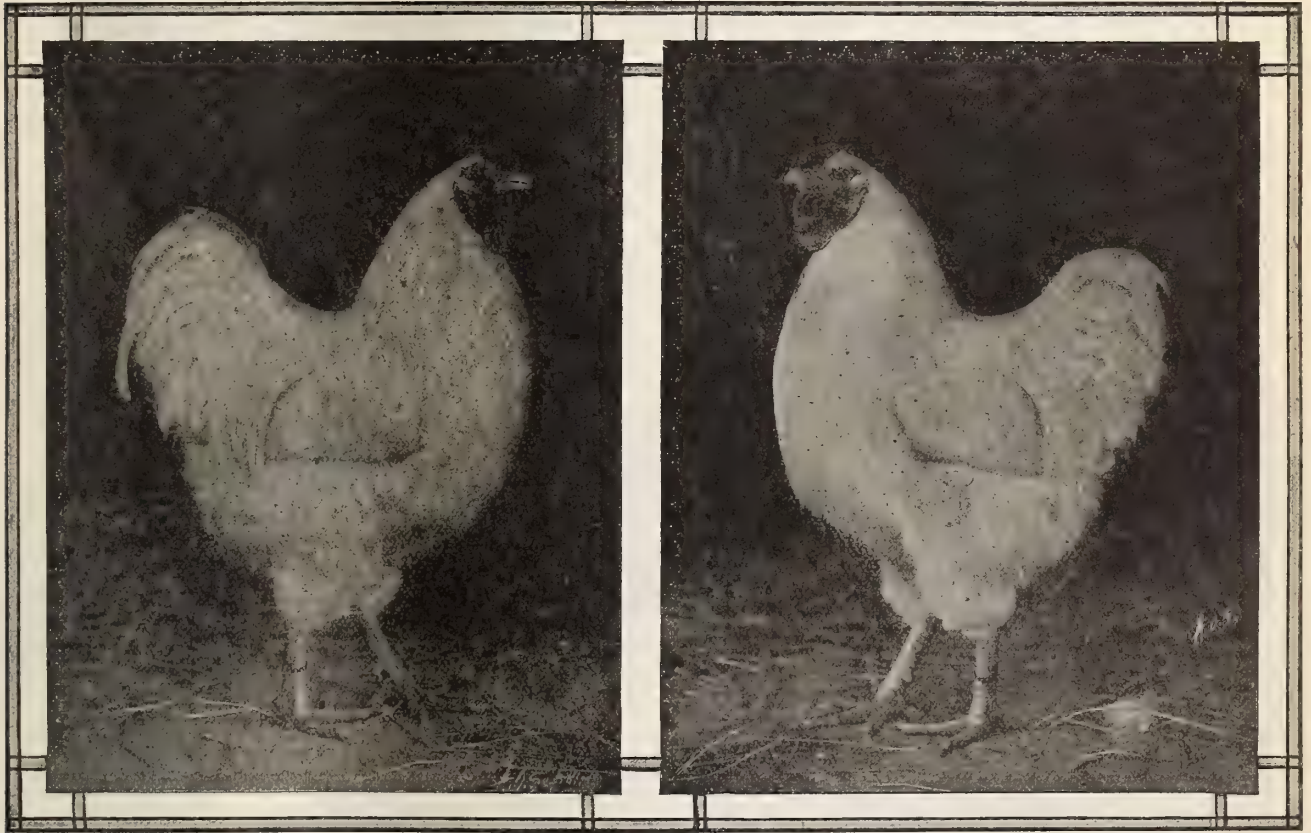

In order to ascertain the peculiar powers of the gizzard in the grinding and digesting of the food consumed, Lazaro Spallanzani, one of the most important figures in the history of science during the eighteenth century, did not think it beneath his notice to make a series of experiments that finally settled the matter as to what purpose the small stones were swallowed by Gallinaceous birds.

The following experiments are found in his two volumes of "Dissertations On the Process of Digestion," and published in 1780. In order to ascertain the peculiar powers of the gizzard in grinding and in digesting, Spallanzani, repeating and extending the experiments of Reaumur, procured small glass and metal balls and tubes, perforated with numerous holes, and filling them with different kinds of food, he caused them to be swallowed by our common fowls, turkeys, and other birds.

bruised grains, introducing them as before into the gizzards of various fowls; and his conjecture was partly verified, for in all the numerous trials which he made he invariably found that the grains were more or less dissolved in proportion to the time the balls were permitted to remain in the gizzard.

This goes to show that before the progress of digestion can commence the grain must be macerated, and such as are not macerated or bruised before passing into the gizzard are there subject to the action of the two strong muscular walls, with their horny firm layer on their internal surface which answers in function to a radula, which taken literally means a scraper.

Grew, the anatomist, long before had investigated the action of the gizzard, so far as being a mechanical structure containing great muscular power, and in his "Comparative Anatomy of the Stomach," he describes it as an organ "wherein the meat, as in a mill, is ground to pieces, and then pressed by degrees into the guts as a pulp; for which purpose the deductor serves to deliver the meat from the echinus to the laboratory, as a hopper to a mill; the four grinders, or chief operators, are the millstones."

A REGAL PAIR.

Regal White Wyandottes hardly need an introduction to those who follow up the show reports of our best eastern shows and who know good White Wyandottes when they see them. The cock and cockerel represented above were two of the winners at the recent New York State Fair and helped materially in the winning of the challenge silver trophy offered at this show for the largest and best display of White Wyandottes. Mr. John S. Martin, Port Dover, Ont., Can., has been breeding the Regal strain for many years. Today they are known throughout the country and we have often come across successful exhibitors who give credit for their winnings to this strain or family of White Wyandottes.—A. O. Schilling.

The balls having been filled with barley and other grain in their entire unbruised state, he allowed them to remain from twenty-four to forty-eight hours in the gizzard, when they were taken out and examined.

In all such cases he could not, after the most attentive examination, discover that the digestive fluid had effected the least change on the grains, though from the numerous holes in the balls they were fully exposed to its action.

The grains indeed had suffered no diminution of size and exhibited no marks of dissolution.

Similar experiments were repeatedly tried upon birds furnished with strong muscular gizzards, and the result was uniformly the same—no effect, in any instance, being produced by the digestive fluid upon the grain contained in the balls.

From these experiments proving unsuccessful, Spallanzani was led to suspect that, though the digestive fluid was incapable of dissolving the grains in their entire state, it might probably act upon them when sufficiently bruised or comminuted.

To ascertain this point, accordingly, he filled his balls with

Spallanzani, again, found that when tin tubes were introduced into the stomachs of turkeys and allowed to continue there a considerable time, they were broken, crushed or distorted in a most singular manner.

"I have seen," says Spallanzani, "instances without number of such contusions, one of which I cannot forbear here relating.

"Having found that the tin tubes which I used for common fowls were incapable of resisting the stomachs of turkeys, and not happening at the time to be provided with any tin plate of greater thickness, I tried to strengthen them by soldering to the ends two circular plates of the same metal, perforated only with a few holes for the admission of the gastric fluid.

"But this contrivance was ineffectual; for after the tubes had been twenty hours in the stomach of a turkey the circular plates were driven in, and some of the tubes were broken, some compressed, and some distorted in the most irregular manner.

"I then tried the following means of preventing this in-

convenience. Having perforated the circular plates in the centers, I passed a wire through the holes, and bound it tight round outside of the tubes; when the two ends met, they were twisted together; consequently, though the soldering should be destroyed, yet this contrivance would prevent the circular plates from receding from the ends of the tube, unless the wire passing through them should be broken.

"I prepared four tubes in this manner, and gave them to a turkey six months old. After they had remained a whole day in the stomach I killed the bird; and my astonishment was extreme at finding that the tubes, in spite of my expedient, were very much damaged. All the iron wires were broken, two where they were twisted, and the two others at their entrance into the tubes; the plates, so far from remaining soldered to the tubes, were found amongst the food; they were not flat as at first, but some were bent so as to form an angle, some curved, and in others one part was pressed close to the other.

"The tubes had sustained equal injury; two of them were flattened as if they had been struck by a hammer, the third was molded into the shape of a gutter, the soldering of the fourth was destroyed, and it was expanded like a wafer.

"These phenomena will less surprise those who have learned from Redi and Magalotti how ducks, fowls, and pigeons pulverize hollow globules of glass in a very short space, and even solid ones in a few days.

"I have already observed that I repeated these experi-

ments, but in a different direction, however, bethought himself of trying what the effect would be if sharp-pointed and angular substances were introduced into the gizzard.

A piece of rough jagged glass was introduced into the gizzard of a cock-bird and he found upon examination that after twenty-four hours the angles were all broken off, without having wounded, or scratched even, any part of the stomach.

When we take this into consideration, therefore, we should not consider the subsequent experiments either revolting or cruel, as no harm was done to the birds by these experiments, yet we don't doubt that this would have mattered little to the experimenter, in the pursuit of his researches, to establish the extent of the power of the gizzard to break up sharp points without sustaining injury.

"Twelve strong tine-needles," says Spallanzani, "were firmly fixed in a ball of lead, the points projecting about a quarter of an inch from the surface. Thus armed, it was covered with a case of paper and forced down the throat of a turkey. The bird retained it for a day and a half without showing the least symptoms of uneasiness. Why the stomach should have received no injury from so horrid an instrument I cannot explain; the points of the twelve needles were broken off close to the surface of the ball, except two or three of which the stumps projected a little higher. Two of the points of the needles were found among the food; the other ten I could not discover, either in the stomach or the long track of the intestines, and therefore concluded that they had passed out."

First prize Buff Wyandotte cock at the late Chicago show. Bred and owned by Simon Beuth, German Valley, Ill.

ments with the greatest success. Some spherules of glass blown by the lamp, and so thick that they would seldom break when thrown on the ground, were generally reduced to small fragments, after remaining three hours in the stomachs of hens and capons; the fragments were not sharp as when they were broken by the efforts of the hand, but as obtuse as if their edges and points had been abraded by a grinding stone.

"The longer the spherules remained in the stomach, the more minutely were they triturated; so that in a few hours they were reduced to a mass of particles, not larger than grains of sand.

"The rapidity of this process appears in some measure to be proportional to the size of the bird, a wood pigeon generally breaks them less speedily than a chicken, a chicken than a capon, but a goose the soonest of all. The reason is plain since the larger the bird, the larger the stomach, and as a consequence the thicker and more powerful the grinding apparatus."

It appeared from these experiments that smooth and blunt substances, though thus violently acted upon, did not injure the texture of the stomach, and so Spallanzani continuing his

CONQUEROR.

One of the greatest Barred Rock males ever produced on the farm of S. T. Divinia, St. Joseph, Mo.

In another experiment, which without knowing the previous facts we might justly have deemed still more cruel, Spallanzani tells us he fixed "twelve small lancets, very sharp both at the points and edges, in a similar ball of lead. They were such as I use for the dissection of small animals."

(To be continued.)

PRIZE ARTICLE DEPARTMENT

We would like to have all of our readers compete for the prizes offered each month in this department. Send as many articles each month as you desire. For the best article we will pay \$3.00 and for the second best \$2.00. Make your communications about a column in length, which is about 600 words. They should be timely and appropriate to the season. Articles describing appliances and houses and accompanied by rough drawings are especially desirable. All the communications must be accompanied by a letter stating that they have been sent in for competition in the Prize Article Department. All articles must be written on one side of the paper only. Articles received after the 15th of the month will be too late for competition in the month following, but will be entered the next month. No manuscript will be returned, but all who send meritorious articles will be given a year's subscription to AMERICAN POULTRY JOURNAL, whether the article is published or not.

The first prize in the contest this month has been awarded to Louie Legg, Coldwater, Mich., and the second prize to A. T. S. Fortescue, Chatham, Ontario.

DOES POULTRY PAY?

THERE are thousands of men and women who own large poultry farms and devote their whole time caring for them, and many more thousands who keep poultry as a side issue, to occupy their extra time and help pay the household bills.

Does poultry pay?

Ask this question to some, and if they say no, ask them why they think poultry does not pay, and they will generally say, "Oh, I know poultry does not pay, because I've tried it." How did all these large poultry farms grow up to do a business of from \$5,000 to \$20,000 a year if poultry does not pay?

If poultry does not pay, I am sure that there would be no large poultry farms such as those we have today.

Let us figure it out and see how the poultry business compares with other kinds of business.

A merchant generally expects about 10 per cent on his money invested. Supposing you buy a pullet for \$1 and sell her for 50 cents after the first year you keep her. During this year she would lay about 120 eggs, which is a small average if she is properly cared for. These eggs should bring about 24 cents, on an average, or \$2.40 for the ten dozen. Taking the 50 cents that was depreciated from the buying price from this, and we have \$1.90 left. The pullet would consume about \$1.10 worth of food during the year. Taking \$1.10 from \$1.90, we have left 80 cents. The cost of the food consumed by the rooster must be taken out of the money received for eggs; so if you place one rooster with every ten hens, each hen will have to pay for one-tenth

The above group of White Rocks which won first prize pen at the late Chicago show, is one of the best that has ever won this coveted honor at Chicago. Birds that have Standard quality like they simply could not lose. The cock bird heading this pen is a wonder for shape, with excellent head points and splendid tail carriage and being well over Standard weight. Note the length of back in the females and fine filled out breast. The fine condition they were in is the result of Mr. Halbach's careful management and certainly is a credit to him. He has recently organized a poultry club in his town, Waterford, Wis., and an account of same is given on another page. He issues a fine mating list. Addressing him at Box A, Waterford, Wis., will bring it.—L. Stahmer.

of the food consumed by the rooster. If the rooster consumes \$1.10 worth of food during the year, 11 cents would have to be taken from the profits of each of the ten hens. Subtracting 11 cents from 80 cents, we would have 69 cents left, after taking out the 50 cents that was depreciated from the buying price, \$1.10 for the pullet's food, and 11 cents for the cost of the food consumed by the rooster.

S. C. White Leghorn pen No. 1, headed by our champion cockerel and 10 blue ribbon females of 190 egg strain. Bred and owned by Naumburg & Booth, 1532 W. Bancroft St., Toledo, O.

We should allow at least 10 per cent for the interest on the cost of the buildings, and for accidents, etc. Then we would have 62.1 cents that is clear profit.

One dollar was what was invested, so we would realize 62.1 per cent on our money invested. This average should be

Second prize S. C. Black Minorca cock at Indianapolis, 1910.

made from large flocks as well as small ones. Of course, larger profits can be made from small flocks than from large ones. In order to be successful in any business, you must make a study of it and work hard until you master it, and then you can take it more slow and easy.

It is better to work hard at first, because you will have to work a good deal harder if you neglect your poultry and some disease strikes them, and maybe lose half of them.

Two years ago one of my neighbors started in the poultry

business. I can well remember how I laughed at him because he subscribed for three poultry journals, built a large chicken house with a cement floor, and had everything else up to date—much too expensive for hens, as I thought then.

At that time my chicken coop was made from all kinds of old boards that I picked up around the barn. I had no dropping-boards, and only paid 50 cents apiece for fowls, as I kept only mongrels, and I thought it extravagant to pay 50 cents for a year's subscription to a poultry journal.

My neighbor bought fifteen thoroughbred White Wyandottes for \$1.50 apiece. The rest of the neighbors, as well as I, told him that he would certainly go bankrupt, and that those tender, fancy chickens that he bought would all freeze to death if he should happen to leave the door of the chicken house open some winter night.

But still he kept right on, and after he had been in business two years, his hens had paid for the cost of the food they consumed, for the building, and for the cost of themselves. He now has five up-to-date hen houses, all paid for from the profits of his fowls, and last year he made \$72 clear profit from thirty-eight White Wyandotte pullets and

A breeder in the yards of F. S. Nicholson, Otisville, N. Y., although it does not show to advantage in picture, this bird is very clean cut in barring and of extra good color.

four roosters. That is a good deal larger profit than my neighbors and I made.

Now I wish I had started the way my neighbor did, but as I didn't start then, I'm going to start this spring. I have a dozen fancy White Wyandottes that I am going to breed from this spring, and am going to build a couple of hen houses like those of my neighbor, and in four years I expect to be where he is now, whereas if I had started four years ago, I would be even with him.

Now for a word or so with those who are planning to start in the poultry business this spring. When you purchase your stock or eggs, remember that you are not buying stock to sell to the market in a year or so, as you did when you bred mongrels. The stock or eggs you buy this spring is going to be the foundation of your flock hereafter, so buy the best that is obtainable.

Nearly all of our great poultrymen started with a setting of the best obtainable eggs or a pen of birds, and grew up with the business. The beginner will ask, "Where shall I go for advice?" Look to the poultry journal for advice. Reading the poultry journals and studying your birds are the two most beneficial things you can do for your own interest.

Louie Legg.

Coldwater, Mich.

HEAT IN BROODERS.

THOUSANDS and thousands of healthy chickens die yearly because of too hot or too cold or too poorly ventilated brooding apparatus called brooders. The first need of a young chick is heat. Heat helped it come into the world; a lack of heat will send it out of the world. At all times it must be able to find a temperature of not less than 100 degrees. If a chicken were compelled to remain in a temperature of 100 degrees it would be as fatal as the inability to get into that temperature. Every brooder should provide an opportunity for chickens to choose the temperature most agreeable to them. They will begin to do this when a day old, if the brooders are properly constructed. A close observer will discover that a chicken's actions, from birth to maturity, are controlled by two instincts. One is intuitively to go from a lower to a higher point. Placed on an incline, it instinctively runs upward and hesitates to run down. The second instinct is to go toward the source of heat from which it derives strength and comfort. Coupled with these instincts is the bump of location—the largest bump in the chicken's head. It never forgets the place where it has found protection and comfort, and will seek it naturally after the first experience. A brooder, therefore, should be so arranged that there is the greatest possible surface to radiate heat without getting out in the cold. It should be above the floor level, in order that the chicks will run up to it naturally, rather than seek a corner which might be on the level of the brooder floor. The elevation above the floor also provides for air drainage, allowing cold air to settle away to the lower parts.

The instinct which compels the hen-brooded chick to seek comfort and heat from the mother's body, occasionally leads to disastrous results in artificial brooding. A chicken which has once secured warmth from a sunny spot in the corner of the brooder or from the bodies of its companions in some cold spot, will intuitively and persistently continue to huddle in the same place rather than go to a warm hover

of heat. The brooder should always be supplied under the hover with fresh air from the outside. This air should be thoroughly warmed and distributed upon the chicks where they are apt to be the thickest.

By maintaining a temperature of 100 degrees near the heater the chick, when cold, can receive approximately the

First prize S. C. Brown Leghorn pullet, at Indianapolis, 1910. Bred and owned by E. J. Stuckmeyer, 1401 Prospect street, Indianapolis, Ind.

SILVER WYANDOTTE.

One of the prize-winning kind as bred by Wm. J. Fox, R. F. D. 17, Cabot, Ia.

same heat which it would from the mother's body. Under ordinary circumstances chickens are perfectly contented and happy in a temperature of 90 degrees on the floor. But, in order to provide a 90-degree temperature where the chickens lie flat or stretched out over the surface of the brooder, it will be found necessary to maintain a temperature of 100 degrees near the source of heat. This temperature should be maintained when occupied by chickens during the first three or four weeks. It is far better to err in having the heat higher than necessary, so long as the chickens have an opportunity to get away from it, than it is to have too little heat. In the latter case there is no remedy except huddling, which always results in weakness and great mortality. Chilling usually results in bowel trouble, and chicks that are once chilled may never recover from it. I am convinced that more chicks die from a lack of sufficient heat or from their inability to get away from it when they desire to be cooler than from improper feeding. The chicken has a wonderful power of adapting itself to the food it receives, but it cannot adapt itself to a lack of heat. Brooders which are perfectly comfortable when the chickens enter them at night are often decidedly uncomfortable by morning. This is partly because it usually grows colder during the night and is coldest just before daylight, and also because the lamp wick gives out less heat toward morning, as it becomes somewhat charred during the night. The floors of the brooders should be kept covered with dry soil or sand and fine litter under the hover and over the floor of the sun parlor. This keeps the chickens dry, gives them an opportunity to exercise (and don't they seem to enjoy this exercise) and makes the brooder easy to clean. It, too, absorbs dampness and all odors.

Chatham, Ont.

A. T. H. Fortescue.

near by, simply because its memory makes the place of former comfort its home. Therefore, the chicks should be started in the right way and kept within easy reach of the hover for the first day or two, until they learn the source

COLUMBIAN PLYMOUTH ROCKS

History—Breeding and Mating—The Bird for the Egg Man,
the Show Man, the Market Man—The "Royal"
Strain—Demand and Supply.

Written for American Poultry Journal by Dr. E. B. Kaple, Elbridge, N. Y.

THE history of this variety dates back but a comparatively few years. Its origination was the result of a demand for a variety of a breed that should supply eggs for the egg man, meat for the market man, grand specimens of beauty for the show man, and that should possess any one of these qualifications without the sacrifice of either of the others in its attainment.

Egg production, as proven by an abundance of well authenticated records, seemed to be well supplied by that ever-popular breed—the Plymouth Rock. This bird also possessed a size and early growth that would satisfy the demands of the market man. As to the show bird quality, what breed

One of the best Barred Rock females that we have seen for some time was the one shown above. Bred and owned by Tannenbaum Farms, Willoughby, Ohio. Her fine type and snappy barring was noted by nearly every fancier at the Cleveland show.—L. Stahmer.

has ever surpassed the royal old Light Brahma, with his beautiful white body and his well-marked black and white hackle, wings and tail?

The ideal bird that has always stood out before the mental vision of every man who has been instrumental in bringing the Columbian Rock to its present position in the poultry world has been that of one with the perfect type, size and other characteristics of the Plymouth Rock, in combination with the ideal color markings of the Light Brahma, but minus the unsightly feathered shanks and toes, the flat head, pea comb, etc., of the latter bird.

We wish now to briefly review the names of a few breeders to whom great credit is due for the painstaking and intelligent labor they have expended in the developing of this variety to its present form. There seems to have been two classes of breeders, both working along different lines for the development of the same ideal. One has seen fit to utilize Columbian Wyandotte blood in producing this variety,

while the other disclaims any infusion of Wyandotte blood in their birds.

Mr. F. M. Clemans, vice-president of the American Columbian Plymouth Rock Club, who began on this variety about seven years ago, has been quoted in various publications as having used Light Brahmas, Barred Rocks, and single combed "sports" of Columbian Wyandottes in his crosses. It would seem that Mr. Clemans' idea was to obtain his Rock

Cockerel winning first at Minneapolis and pullet first at Chicago in the hottest of Partridge Wyandotte company. Bred and owned by Earl Henry, Albert Lea, Minn., and now in his breeding yards.

type from the Barred Rock and his color markings from the Light Brahma and the Columbian Wyandotte; and so far as we know he has succeeded to his satisfaction.

Mr. E. B. Andrews is another breeder who has been quoted as having used Columbian Wyandotte blood in connection with the blood of Barred and White Rocks in the development of his strain.

Mr. D. M. Green, president of the American Columbian Plymouth Rock Club, has, on the other hand, refrained from the use of any Wyandotte blood in his foundation for this variety, depending on White Rocks and Light Brahmas.

Mr. George H. Sweet, originator of the "Sweet strain,"

Second prize S. C. Buff Leghorn cockerel at Chicago, 1908. Bred and owned by H. Cregar & Sons, Forest Park, Ill.

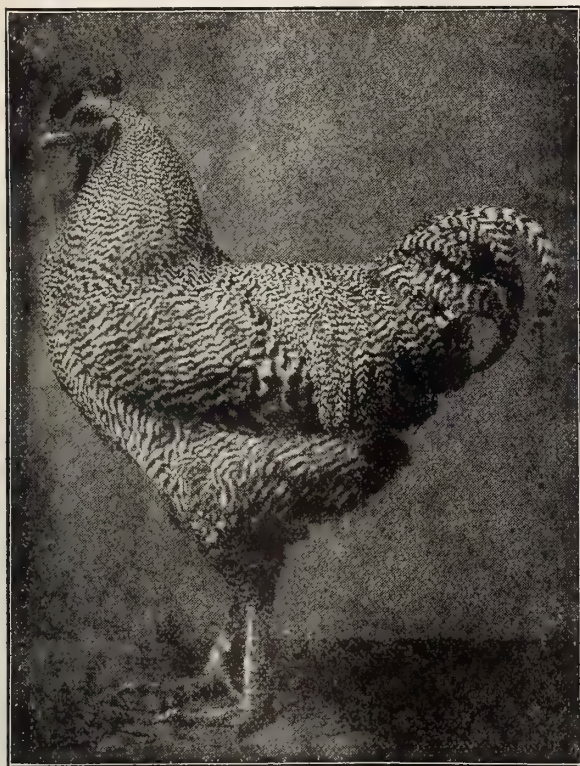

has always been opposed to the Wyandotte admixture, and he has succeeded in developing Columbian Rocks of rare beauty, type and size without the use of any Wyandotte crossing.

We do not wish to enter into the discussion of the relative merits of individual birds bred by any of these gentle-

men. We recognize the fact that each was working toward the same end—the developing of the best Rock type and size with the best Light Brahma coloring—yet it seems to us that there exist certain well-defined reasons why it is undesirable that Wyandotte blood be introduced into the ancestry of Columbian Plymouth Rocks.

In the first place, the Wyandotte type is not the Rock type, and whatever of color may be obtained from the Columbian Wyandotte cross is obtained at the expense of a possible transmission of the Wyandotte type as well. We will admit that it is possible to “breed out” this undesirable type after a time, but there will always exist, in accordance with the law of atavism, a possibility of a reversion in certain birds possessing such ancestry, to more or less of the Wyandotte type. If the desired color markings were best exemplified in the Columbian Wyandotte, or if they could not be elsewhere obtained, then such a cross would be unavoidable and perfectly justifiable; but the fact is that the Light Brahma is the breed from which the Columbian Wyandotte itself obtained its coloring, and is today a much better specimen of the ideal Columbian coloring than is the Columbian Wyandotte. This being true, then why not use the Brahma, to the exclusion of the Wyandotte?

But, says the breeder unacquainted with certain things that have occurred (and, we are sorry to say, do still occur),

World's champion nephew and sire of first cockerel at Ft. Wayne and a score of other winners. Owned by G. Earl Hoover, R. 24, Matthews, Ind.

what difference which blood, so long as the most perfect specimens obtained from either cross are equally good?

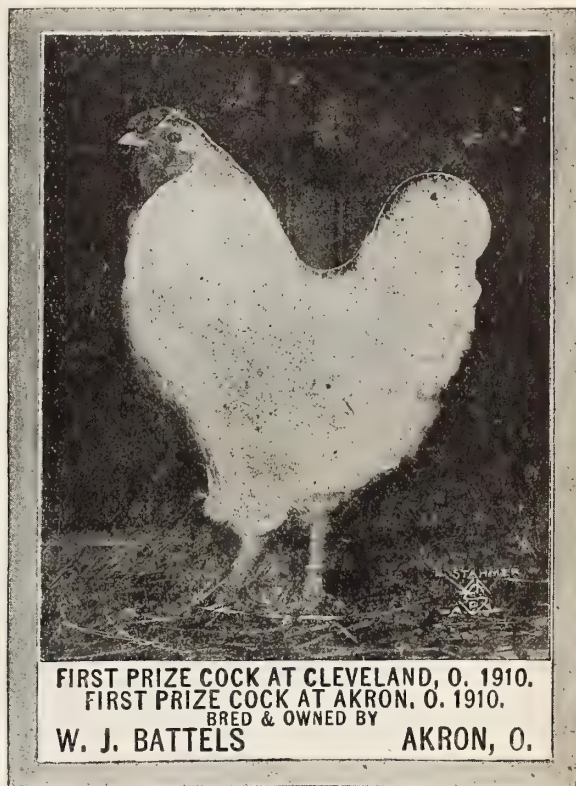

The difference is this, and we stand ready to prove the following assertions if any Wyandotte or other breeder questions them. The color markings of the Columbian Rocks and those of the Columbian Wyandottes are practically the same. The distinguishing features of these two breeds are those of type; size and comb. The Rock type, with its long back and body, is fashioned after the approved egg type, the typical Rock being in marked contrast to the shorter-back, more compactly built Wyandotte, while the single comb of the Rock is still greater contrast to the rose comb of the Wyandotte. As proof of our assertion regarding the egg type, we ask that you look through the pens of any breeder of Wyandottes whose birds are especially noted for their laying qualities, and see if you find the Standard Wyandotte types among the best layers.

Is it not a fact well known to all breeders that all breeds that are short of body and of double comb tend to revert—degenerate will be the term used by breeders of such birds—to the single-comb, longer-back, egg type of bird?

And is it not also a fact that when a Columbian Wyandotte

shows a single comb it is also inclined to be longer of body than a perfect type of Wyandotte permits of?

These so-called “sports” are of no value as Wyandottes, and certain breeders have sold and do sell, and have exhibited and do exhibit, such specimens as Columbian Plymouth Rocks.

The Columbian Wyandotte, having been bred much longer, naturally tends to show better coloring, and it thus has too frequently happened that in their admiration for this superior color the judge has overlooked the size and type features and has awarded honors to such Wyandotte “degenerates” over true Columbian Rocks of the true type and size, but weaker in color.

White Wyandotte cock, headed second prize pen at Cleveland, 1909. Bred and owned by H. C. & C. W. Sixt, Whitecrest Farm, West Park, Ohio

Our opinion of breeders who will thus sink their principle under their desire for false honor, or “filthy lucre,” would perhaps not look well if expressed in print, and we therefore

leave it for the reader to use such language as will best express this opinion—but speak it softly, for it demands strong words.

In the past, Columbian Rock breeders have had no authorized Standard of Perfection; consequently, this variety when exhibited has usually been judged by Columbian Wyandotte

Single Comb Rhode Island Red. One of the prize-winning kind as bred by Simmons & Crittenden, Geneva, Ohio.

judges, and they would naturally be less liable to note the type and size distinctions than would a Plymouth Rock judge, or, if they do note them, they let their eye, trained for color and Wyandotte type, rest too long on these "sport degenerates." (The coming issue of the American Columbian Plymouth Rock Club catalog will contain the Standard of Perfection as adopted by the club.)

In our opinion, the only suitable place for these birds that are neither Rock nor Wyandotte, is on some well spread table and well surrounded by a hungry family. It could then be reasonably supposed that they would not appear as Rocks at any show.

It would seem to us a reasonable assertion, in view of all these facts, that any strain of Columbian Plymouth Rocks that can show freedom from any Wyandotte blood, and at the same time can show birds that breed as true to Columbian type, size and color as do these of the strain possessed of Wyandotte ancestry, is certainly superior to the latter; that such a strain would always tend to produce in its progeny less of Wyandotte size or type and be more certain to produce offspring that would be in such marked contrast to the Wyandotte as would sooner obviate the possibility of such contemptible practice on the part of breeders as above set forth, and by this same contrast would compel even the Columbian Wyandotte judge to properly discriminate.

Now, as to the matter of mating and breeding Columbian Rocks. No breeder has yet bred this variety sufficiently long to justify any positive statements concerning mating and breeding. What we offer, therefore, will be with a due appreciation of this fact, and will be presented as suggestions for the breeder to prove or disprove. Every published error may, through the discussion it may elicit, be the cause of the acquiring of more knowledge than would the publishing of an acknowledged fact. It is this very uncertainty as to the possible results that makes the breeding of a new variety the more fascinating, and incidentally makes the financial returns that follow from careful and intelligent observation, the more sure and satisfactory. The day that any breed becomes ideal will be the day that such breed will cease to be of interest to the breeder, and will consequently cease to be a profitable bird to breed. That the Columbian Plymouth Rock is rapidly improving is certain, but, fortunately, we are a long ways yet from the ideal.

It may be well to consider some of the general principles

that apply to the breeding of any variety before definitely discussing the problem from the Columbian Rock standpoint.

The quality of the female affects the quality of her own progeny only. The quality of the male affects the quality of the progeny of every female with whom he may associate.

These two principles, that are so self-evident, are nevertheless too often neglected by breeders who wish to economize (?) by the purchase of an inferior male simply because its original cost is less. That this is mighty expensive economy, many a breeder has proven, and has charged the expense to his experience account.

Another important principle, or law of heredity, should never be forgotten. We refer to the law of atavism. By this law, any physical characteristic of the parent, good or evil, may fail to appear in the immediate offspring, and yet may again appear of a marked degree after one or more succeeding generations.

As the result of this law it becomes possible for a breeder to occasionally obtain most excellent progeny from a union of inferior individual birds, or, on the other hand, to fail to obtain satisfactory results from the mating of two individually perfect specimens. This illustrates the importance of a knowledge of the remote ancestry of your breeding stock, both male and female; and herein lies the value of certain strains, for it certainly is not true that all birds of a certain strain will breed to their like just in proportion to the care and intelligence that have been used in the selective breeding incident to the development of that strain.

One more factor that not infrequently is too little appreciated by breeders is that of prepotency. By this term is meant that power of a living organism through the possession of which it is enabled to transmit its own peculiarities, to a greater or less degree, to its descendants, and this regardless of the peculiarities of the organism with which it is mated. Prepotency is a power inherent in both the male and female organisms. It is of more importance in the male simply because the male quality influences a so much greater number of progeny than does that of the female.

It is evident that prepotency in a bird may be valuable or otherwise to the breeder in proportion as its possessor is an individual of greater or less degree of perfection. This is well illustrated by a male bird in our possession. This fellow is grand in type, perfect in head points, with fine body color,

Bred and owned by C. L. Patterson, Barberton, Ohio.

and strong in hackle, wing and tail coloring, except that the main sickles contain some white in the web. Now, while this bird has proven a sire of exceptional value, yet it is a fact that 90 per cent of the male progeny of this bird have shown white in the sickles.

Many birds may be perfect individuals, with a long an-

cestral record of perfection, and yet, owing to a lack of the power of prepotency, be of inferior value as breeders.

To illustrate the value of a careful consideration of the factors above enumerated, we wish to describe in detail the manner of collecting and preserving the records of birds as adopted by the originators and breeders of the "Royal" strain of Columbian Plymouth Rocks.

The original crossing that resulted in the production of, we will say, ordinary Columbian Rocks, have by means of the following system been bred to their present nearness to perfection.

1. They have recorded and keep on file the number of every bird in their possession.

2. Opposite every such number is written a detailed and accurate description of such bird, describing each section, with the weight, type, etc.

3. Trap-nest records of every layer, all the year.

4. Every egg immediately marked so as to show the male and female behind it, together with the date.

5. Record of all apparent variations from health, the date observed, with symptoms, and date of apparent return to health. With all these data always available for examination and study, it is possible, if not to "count their chickens before they are hatched," to at least have scientific reasons for estimating the probable characteristics of the chicks that do hatch. They know their eggs as well as they know their birds, and such records have given them a knowledge of the breeding value of every male and female, of their characteristics and peculiarities, and the prepotency, that could not be obtained in any other way. They feel that these are good and sufficient reasons for their being justly proud of their strain.

Now just a few concrete hints as to mating Columbian Rocks, granted that the individuals are right, the ancestry right, and prepotency right.

In color, there is always a tendency for birds to breed lighter. We believe it is especially important that the male be of good color, that his comb be as perfect as possible, and that he possess marked vigor of constitution. On the other hand, we look for size in the female more especially, believing that she has the preponderating influence, other things being equal, on the size of the progeny.

We would advise the mating of a male of fair size at

breeders, with white body surface and not too dark under-color, though this may be slatey; but we are not as yet satisfied as to this latter statement. This is our opinion only, and we fully realize that further experience by ourselves and others may lead us to think differently, yet we are at this time fairly well convinced that too dark or black under-

ROSE COMB WHITE LEGHORN.

A sensational prize winning cockerel. Bred and owned by Rocky River Poultry Co., Deerfield, Ill.

least, with good Rock type, with hackle feathers well striped clear to the end of the feather, the tail strong in color, the wing primaries black as possible, the cape dark, and the body surface color white, with a female of large size, good Rock type, and, contrary to the expressed opinions of some

color in female is not essential for the attaining of well-marked progeny, providing the male bird has good color in hackle, wing and tail sections. We are still looking for the ideal, the pure white bodies with the glossy greenish-black and black and white striping and lacings, and we are working toward that ideal.

Just a few more words as to the qualifications of this variety. Regarding egg production, in our opinion, it is a matter of strain, environment and feeding, and not of variety of breed. Our birds are proving to our satisfaction that they have the egg qualities. Regarding the market qualification, we can only say, and it is only necessary to say, that they are Plymouth Rocks in size, shape and age of maturity, with the clean yellow legs, the yellow, plump bodies, and the fine, tender, "toothsome" flesh peculiar to all Rocks.

The show qualities we can best demonstrate by calling your attention to the full page cut of cock and hen of this variety appearing in this journal.

Our records of inquiries and sales, both of stock and eggs, so far during this our first year of advertising our strain, surely show us that the demand for these birds is far beyond the supply, and any breeder who takes our hint and puts himself or herself in a position to supply this demand during the next year, will be making no mistake.

One word of caution and advice to the prospective breeder of this variety. It is this: Do not buy your stock or eggs of any breeder who advertises both Columbian Wyandottes and Columbian Plymouth Rocks, unless you know such breeder personally and know him or her to be absolutely reliable. The temptation to dispose of single comb Columbian Wyandotte degenerates, worthless as Wyandottes, and really worthless as Rocks, at a good fat price, as Columbian Rocks, is a great one to any other than the honest, reliable breeder.

Beware the Single Comb Columbian Wyandotte "sports."

We lead, others follow.

We guarantee our subscribers against loss due to fraudulent misrepresentation in any display advertisement appearing in the American Poultry Journal, providing the subscriber when ordering the fowls or merchandise states that the advertisement was seen in the American Poultry Journal, and places the order during the month or months in which the ad is inserted in our columns and notifies us of the fraudulent misrepresentation of the advertiser, giving full particulars, as soon as it occurs.

Attention, A. P. A. Members

Columbia, Mo., March 14, 1910.

Member of American Poultry Association:

Dear Fancier: Without any solicitation whatever upon my part enough of my friends voted for me as a member of the executive committee of the American Poultry Association to place my name upon the election ballot. I wish to thank each one for this expression of their confidence and friendship. I will not resort to any tricks or political schemes in order to insure my election, as much as I would appreciate the honor, for, if I am not the honest choice of the members of this association, I do not want the office under any circumstances. I have no axes to grind, and, if elected, I promise to try to represent the members of the association in all that I believe to be for their good, regardless of any particular section of country, party or clique.

I have been secretary of the state poultry board and the Missouri State Poultry Association for four years, and during this period, with the loyal support of Missouri poultry breeders and fanciers, the following has been accomplished in this state:

1st. The membership in the state poultry association has been increased from 64 to nearly 700.

2d. The number of birds exhibited at the state show has increased from 700 to over 5,000.

3d. Number of states represented at state show increased from 3 to 23.

4th. From receiving no appropriation from the state for poultry interests to receiving \$10,000 for each biennial period.

5th. Number of persons in the state raising thoroughbred poultry increased over 500 per cent.

6th. From no instruction in poultry to the establishment of a course in poultry husbandry at the State College of Agriculture, and assurance that we will

Look at the date upon your wrapper. Many subscribers write to ask when their subscription expires and many complain because we discontinue sending the JOURNAL at the expiration of time for which it is paid. The date when your subscription expires is found on the wrapper each month.

AMERICAN POULTRY JOURNAL is the oldest poultry paper in America. It has a national and world-wide circulation. The best writers on poultry matters contribute to its columns. It receives the patronage and endorsement of the foremost representative breeders of standard poultry and manufacturers of poultry appliances in the country.

Advertising rates are sent upon request.

have a down-to-the-minute experiment station in a short time.

7th. From a time when we had but few fanciers who were known outside of the state to a time when we have dozens and dozens who are carrying advertisements in poultry journals and are known throughout the country.

8th. From a time when there was but little demand for poultry and eggs in this state to a time when there are thousands and thousands of dollars invested in that manner each year.

9th. From a time when no institutes were held to a time when we are reaching every corner of the state, educating and interesting the people in better poultry and more of it.

10th. From a time when no bulletins were issued on poultry matters to a time when they are published regularly for the information of those who are not experienced in the business.

11th. When it is a state-issue instead of a side-issue.

12th. We have encouraged other states to attempt to secure an appropriation and give them instruction as to how we secured the same.

13th. We have had inquiries from foreign countries as to our methods and plans.

14th. The number of county poultry associations has been increased from 5 to 33.

15th. The surplus poultry products of the state have been increased until they are now seven and one-half million dollars (\$7,500,000) more a year than they were four years ago.

With the aid of the poultry fanciers in this state this is a statement of what has been accomplished in four years. If elected to this office I promise to give my best thought and energy in behalf of the best interests of the association, and endeavor to honestly and faithfully represent all sections of the country. After consenting to submit my name for election, I, of course, prefer not to be defeated, and would therefore appreciate the support of my friends.

Thanking you in advance for any con-

sideration given my name, I remain, your friend,

T. E. Quisenberry,

Sec.-Treas. Missouri State Poultry Board.

Now, brother members of the American Poultry Association, who in all the history of the poultry world has ever accomplished anything like this?

Well, what are you going to do about it?

Are you going to vote to put this man Quisenberry on as a member of the executive committee?

For our part we vote YES.

Let the "Good Work" go on.

The Buying Season

The egg season is going in full swing. Orders for the best eggs that buyers can afford are being placed with the breeders all over the country and the man who is experiencing the greatest amount of business is the one who has had a faith unshaken and firm in the future of the business and let his light shine. There are dark moments in all businesses. There have been dark ones in the poultry business, though they have not been hovering about lately. The season for stock sales is about over, there being very little left in the country that is for sale after the breeding yards are mated; and until the season for egg setting is over there will be nothing offered.

This winter just past has been a great sale season for stock. Ask any man who is in the breeding business and he will tell you that we are right. Good birds are commanding prices which are entirely within keeping of their value, in spite of the fact that prices are ranging higher somewhat every year. It is an old stock breeders' saying that the time to get into good breeding business is when the prices of good stock are low. This is true in the standard bred poultry line. A few years ago there were a number of breeding enterprises started which today are among the largest in the country. Good foundations were somewhat cheaper then than now and the best stock was secured

and people let to know that the farms were producing the right brand of stuff. Today these farms are among the great ones of the country. They have done much to uplift the dignity of the poultry breeding business and are maintaining standards which we may all follow.

During the next few years there will be a still greater forward movement in the poultry breeding business. The trend of getting back to the land is apparent. We can all see the movement. There is only so much land in the country, while the population is going to drive countryward to lessen the cost of living. There are great opportunities still open. Various sections are ready for the poultry movement. Good fowls will be even in greater demand five years hence than they are today. The breeder who is breeding good ones will ever have a growing source of income and profitable employment. Let the watchword be, "On to better poultry and better breeding methods."

Breeders' Necessity

Right now is the busiest of the incubator season. The breeder or poultryman who is up and doing knows what a boon the incubator is to him. If he is even a crank on hen hatched chicks he may get his eggs started well with the machines and then later put them under hens as they go to setting. Generally speaking, the smaller of us fanciers need a good machine to get out a few dozen early chicks, no matter if we do prefer a use of the setters later. The incubator is right here to stay and all of us who are alive to their possibilities are using them. They are just as much a part of the equipment for the large or small fancier as the breeding stock. We cannot get along without them and this is especially true of the fancier who wants to make his showings of birds early in the fall and winter. Get an incubator.

Hygrometers and Incubation

Not many years ago hygrometers were very little known among the poultry producers, whether they were fanciers or farm poultry growers. The art of incubation is one that has been reduced to a science and is one whereby the person operating hatching machines may secure a good average of results if he or she will but follow a few of the beaten paths that lead to success. There is no secret which a few know when it comes to making good hatches of strong, vigorous chicks. Rather there are a few details that must be carefully attended from the care of the breeding stock to the taking off of the chicks after a good hatch.

We know today that poorly fertilized eggs will not germinate strong enough to carry themselves through to hatching time. We know that if the heat is not kept even and right up on the eggs that they will not hatch quickly and break the shell vigorously. We know that some good hatches have been recorded when it was thought that by the careless chilling of the eggs, the over-heating of the eggs, the non-supplying of moisture when it was thought to be the most needed, as well as other so-called detriments, were not right in line with general practice.

Further, we have come to understand that the moisture problem is no problem at all but just one of the things which must be understood. The wise incubator operator has a good hygrometer in his machine at all times so that he may at least have some control over the amount of moisture his eggs are accustomed to during the period of incubation. We know what degree of moisture is best during the various stages of incubation. That is, we have learned what is good for the best results, and taking the averages, we follow them. Hygrometers are just as important in the equipment of the incubator operator as are good ther-

mometers. We are at a period in the development of the poultry business in all its branches when we must know all there is to know on a subject to get the best results from our own work. The incubator makers are offering instruments to the poultry people which are perfectly reliable when it comes to the telling of the actual degree of humidity there is in the chamber where the eggs are incubating. There is nothing hard about the acquiring of incubation knowledge if we but get down to essentials and know what we are doing and when to do it. Hygrometers have come to stay. They have come to point the way in the process of evaporation which the eggs must be subjected to in order for them to hatch best.

Growing Some of the Feed

Some time ago we saw in some one of the journals that a poultry keeper had experienced a great difficulty in getting good poultry feeds at right prices, and that he was going to experiment this spring by growing some barley, wheat and oats, corn, millet and root crops and not depend upon others to furnish this to him. Between the lines of this greater or lesser declaration of independence of a poultryman we have a good text for an article: That the greatest profit from the work and brains put into poultry breeding would always be found on the farm where the fowls had a chance to get a part of their living from gleaning the fields.

The poultryman on the city lot or the small acreages found near cities must submit to the ruling prices for grain and then at that sometimes have to pay a premium to get good poultry grains and other feeds. In order to grow much feed one would have to have a ten acre patch to put his seed into. Many opportunities for the growing of good chicken feed are overlooked by poultrymen. Last season

YOUNG'S STRAIN S. C. WHITE LEGHORNS

I HAVE NO OTHER BREEDS

Another great victory at Madison Square Garden, New York

Again winning for the eleventh time more prizes than all of my competitors combined

After having 119 of my best young birds stolen, my winnings were as follows: Cocks—1st, 2nd, 4th, 5th. Hens—1st, 5th. Cockerels—1st, 2nd, 3rd, 4th, 6th. Pullets—4th. Pen—2nd. Special for best display, special for best male, special for best color male, special for best shaped male, special for best female, special for best head female, special for best shaped female. Spratt's Gold Special for best Leghorn cockerel, any variety, hatched 1909. State Cup for best display. Elm Trophy for best male. Silver Medal for best male. Bronze Medal for best female.

You cannot win without my strain. It is the greatest laying strain on earth. Why fool away your money purchasing eggs and stock elsewhere, when you can buy from a strain that has been line bred, trap nested and established for 35 years, for the same money or less?

The following are the male birds that are heading my thirty yards this year:

SAVES CHICKS

we saw one poultryman plow up his breeding yards and put them into late potatoes after the first of May and still get a good crop out of the 'taters. He sowed beets in the smaller yards as well as sweet corn and rye and oats and the birds make a lot of growth from these. The beets were used for winter greens and the grains were used to clean the yards and still make them produce some feed.

There is a lot of good poultry feed in a small yard of rye. We know one city man who is a national figure in poultry circles who has but five town lots to work on and he has one of these in rye, which furnishes a great amount of growth to the chicks and gives the old birds a fine forage during the whole season. Wasting good yard room by not putting it into some form of feed is but letting the leak system get into the business. Stop the little leaks and you add to the profits. The prices that poultry feeds have commanded during the last few years but remind one that he should pay some attention to getting them as cheaply as possible.

A Farm Chronicle

Just by way of telling something that happened on a farm that we know of, we are going to give the chicken doings of one good farm wife who wants to raise better poultry than she has before. She had nearly two hundred head of scrub chickens running here, there and yonder. These were introduced to the poultry higgler in one large bunch and the returns from them were first invested in a new poultry house that would shelter the new birds she was going to buy. Let me say that she is a reader of the American Poultry Journal and had been a subscriber but a short time when she decided that the old way of keeping poultry was far wrong and out of date. She found out that the blue canopy of heaven was nice enough for the poets to rave over in their spring sicknesses but that it was not conducive to poultry profits of the best sort.

This good woman heard that scrub hens lay about five eggs per month per year and she kept tab on hers till she was convinced that they had to go. No matter if they were eating the waste things of the field and farm yard, they were not paying for their room on the earth, hence raus mit em. She got up one morning, early, and, hauling her spouse from bed, started things going about the farmstead a little earlier than usual and every one could see that she was going to do something. It was one of the days when a city man would have double locked the door to his private office and said on his shingle: THIS IS MY BUSY DAY.

The chickens were caught about the barn and hog houses, the calf sheds and stock stables, and were carted off to the higgler. The return load was lumber. One might have said cash, for nowadays lumber is that. A pen of twenty pure bred hens was bought and two good males came with them. The price was something fierce (for a farm wife) to pay, but she paid it—fifty dollars. Neighbors for miles around were not going to let her have anything over them, so they bought stuff of a different sort, something that took their fancy, or else went over to the good woman and laid down a three dollar bill and told her they would like a few eggs of this great laying chicken she was raising. These pullets filled a couple of new incubators a few

times that summer and during the past fall the place was certainly a great sight. Hundreds of pure bred chickens were busily developing into grand egg layers and looked ready for their work of a winter.

More buildings were put up. The backbone of this woman was not going to stop at anything done halfway. It was a big thing with her or nothing. This spring she is supplying eggs to a few day old chick producers who are giving her top prices for her eggs and as well has been sending some fine stock out to buyers who have heard of her work. Her work for good has been the one influence of the whole neighborhood which has turned its thoughts to more and better poultry. She is not the only instance we have come across. The process is going on everywhere and the gospel of good chickens is spreading. As a rule the older the country the more attention paid to the fowls that are kept for the good they may do on the farms. So let us all lend a hand in the work and push forward.

Prices of Eggs

It was not so long ago that five dollars was the highest price ever asked for eggs for hatching by the leading breeders. Then some one crept up to six dollars and another man or two offered their best at seven, and then ten dollars was asked, and finally twenty to fifty dollars per setting. The fact that buyers were found at all sorts of prices for eggs just so the eggs came from the very best birds which the breeders had seemed to put some ginger into the eggs for hatching market. It is rather out of the question to ask breeders to dispose of their very best eggs at low figures. The eggs are worth generally what the sellers declare them at, for they are good property right on the poultry establishment that produces them when turned into the salable stock that they can make for the fall and winter trade.

If a man pays ten dollars for a setting of eggs, he has his money's worth out of them if he gets two fair birds. If he gets one that is fit to take into the show room he is more than repaid, for cheap birds are not taken to the shows any more. Birds that are worth a half hundred dollars do not seem to get a look in at the blues. Winners simply have to be screamers and the mass of exhibitors know this. They have found it out from the constantly growing competition.

Good Winter Sales

Stock sales have been very good, so all advertisers report, during the sale season. Thousands of fanciers and breeders are enlarging their operations every year, to say nothing of the countless thousands who are getting into pure bred poultry breeding every year. One thousand enthusiasts made at the show go a long way toward helping the sale season. The journals are boosted, the breeders are encouraged, the demand reached out to the smallest producer and from one to the other of the individuals directly in line with a sale the business is benefited.

To the buyer of experience, the man who must buy because he needs some help toward his breeding pens or show strings, the admonition to buy early does no good. There are others who have not bought the stock they want as yet, because they cannot get it. They are the

This Coop Saves Chicks' Lives

The only one of its kind. Rats, mice, weasels and skunks cannot trouble your chicks, being protected by three different sliding doors in one, and there's no wood about it.

All-Galvanized-Iron

Makes it an everlasting coop by taking apart and storing when not in use. Coop does not "draw damp" nor hold dampness, like wood does. Chicks and mother are always in the dry. The best of all coops for avoiding colds and roup. You will find the all-iron coop more than pays for itself every season in extra chicks raised. Shipped knocked down.

Write for free circular, fully describing this and full line of other sanitary appliances.

DES MOINES INCUBATOR CO.
244 Third Street : Des Moines, Iowa

ones who were told to buy early but who thought it would be a good plan to wait till spring, as then they would not have to pay for a winter's feed. Take your pen in hand at this time and write to a hundred breeders of Rocks, Reds, Orpingtons and Wyandottes, to say nothing of any other variety breeders, and you will find that over 80 per cent of them will answer and tell you they are all sold out of stock, but will take orders for a few more eggs.

As has been predicted by all who were enough on the inside of the fancy to know that the buying season for stock was going to be a good one, the business has more than made good. We are all looking for even better things and cannot help but catch the hum of the fancy as she goes forward still further in the building of the business. Until half the farms of the United States are breeding pure-bred fowls will the business increase, and even then it will still go ahead, for there will be the demand of those who cannot produce the best for something that will still keep their flocks well known. We are optimists and do not care who knows it. The game is bound to increase as long as we keep shows clean and square and the breeders remember that every man who pays even a dollar for a chicken expects to get something better than he has in his own flock.

One Fad Dead

Every fad has its run. This is as true in the poultry fancy as in any game we ever heard of. A few seasons ago we saw scarcely anything but the idealized drawings of pure bred fowls which were said to have been winners at first this show and then that. As Mr. Schwab remarked in the last American Poultry Journal, we are having a revival of good illustrations and we are glad to point out that this journal is having a hand in the work. The fancy is growing. Breeders demand good illustrations in their catalogs and egg mating lists and the artists not having time to draw so many ideal pieces of pen and ink work have been using the camera more and more to get speed into their work so that they could get more of it done. Perhaps unconsciously a few of the artists have been doing more lifelike work since they have come to working more with the camera. For a few years during the founding of the fancy it was to the man who bought the best ideal drawings that the business went, but there came a time when the public grew more educated and today we can all discern a faked picture, the result being that we see but few of them compared to the numbers that once ran rampant.

It might be well to remark in passing that the good illustrations we have seen this winter were not all made during the fall and winter. Our staff artist, L. A. Stahmer, was busy during the whole of the past spring and summer with the work of the up-to-date breeders who were out early with their catalogs. It pays to have neat, artistic work to draw the public eye. The pictures need not be faked in any way. They may be bettered in settings and poses and backgrounds without in any manner giving out the impression that the birds are better than they really are.

When it comes to getting up designs for letter heads and catalog covers Mr. Stahmer has been very fortunate in doing quite original work and the leading breeders who have tried him along this

line all say they are more than pleased. His lettering and designing is something unique along the poultry line. He consults the interests of his clients and in all ways desires to carry out their wishes. We should say that he is one artist who has all along held out for illustrations which depict the birds true to life, never having done anything in the way of ideal work for breeders. There are more artists in the country today calling the camera to aid them than there were five years ago and Mr. Stahmer's fine work along this line was the work that set the pace.

Buying Eggs

The buyer of eggs for hatching builds high hopes of getting his next fall and winter's winners from what he has to purchase at this time of the year. Well, he has a right to build high hopes. There are better breeding birds in the country today than ever before and there are a great many more breeders who understand that if one is to build up a trade that will last he must give his customers a lot of eggs that will hatch winners if they are cared for. The cycle of egg buyers starts in some small village where there is a budding fancier and ends with the breeder who buys eggs higher up. All breeders are egg buyers. It is just as natural for one to buy eggs for hatching as it is to have the hen fever hardest at show time.

The buying of eggs is the easiest way to get the most for your money. It was only last spring that one man bought a setting or two of White Orpington eggs and won the greatest prize this season that could be attained, first prize exhibition pen at the hottest show of Orpingtons of this variety in the world. He was offered a thousand dollars in cold cash for his first prize pen. He received more than his money's worth when he bought that setting of eggs surely! In fact, we do not know of a man who ever paid a good price for a setting of eggs and cared for them well but who received more than his money's worth. Buying eggs is all a matter of what sort of attention you are going to give them after you have purchased and it is as well to remember that price has a lot to do with the quality.

Young Men as Poultrymen

There is no getting around the fact that there is a great future in store for the young men who put time and energy into the poultry business. The field of poultry manager is one that is not overcrowded and as long as the fancy goes ahead in such manner as it has during the past decade there will not be an oversupply of good men to manage poultry farms, both fancy and practical. Young men of no capital can easily acquire a good working knowledge of poultry culture by getting on the best farms of the country. The training on these farms carries with it a prestige that cannot be obtained in any other way.

There are hundreds of opportunities for young men who are willing and energetic to become the partners of good poultrymen if they will but take the time to work into the confidence of those who have the means to work with in business building. Good poultrymen are not easily found. The wages are remunerative and the employment is generally pleasant. Usually the young men who go into the work and decide they do not

40 BREEDING YARDS OF SINGLE COMB BUFF LEGHORNS

The largest Buff breeder in the world. My birds are bred to lay. Ten pullets in 1908 averaged 222½ eggs. Each bird mated in my 40 pens is a show bird and I have over 500 of them that are the pick of over 4,000 raised last year. In 1908 I won most of the ribbons at Hamilton and the great Cincinnati show, and 2 silver cups for best display. In 1909, at Hamilton, 1st cock, 2d and 3d hen, 1st and 2d cockerel, 1st pullet, 1st pen and silver cup for best display. In 1909, Cincinnati, 1st cock, 2d hen, 2d and 3d cockerel, 2d and 4th pullet, 2d pen and special for best colored male in show. The great St. Louis show, 1909, 2d cock, 2d pen, 3d pullet, 5th cockerel. Chicago, 1909, 3d pen; showing at the above three shows at the same time. Dayton, 1910, 1st and 2d hen, 1st and 2d cockerel, 1st and 2d cock, 1st, 2d, 3d and 4th pullet, 1st pen, four club ribbons and silver cup for best display in Mediterranean class. Columbus, 1910, 1st cock, 5th cockerel, 2d pullet, 2d hen, 1st pen. Cleveland, 1910, 3d cock, 5th pullet, 1st pen. Indianapolis, 1910, 2d cockerel, 2d pullet, 4th cock. Toledo, 1910, 1st hen, 2d and 3d cockerel, 1st, 2d and 3d pullet, 1st pen. I have over 900 birds for sale and running 17 250-egg incubators and can furnish day-old chicks at \$20 per 100; eggs, \$2 to \$10 per 15, and \$10 per 100. Write me if you want good stock or eggs.

SPECIAL

STOCK at one-quarter to one-half value to close out surplus quick.

EGGS. We will book two orders in each county at almost half price, as we want to build up new trade.

"A pleased customer is the best advertisement." We have found this to be true and we do everything in our power to please.

We sell a \$1.50 bird for \$1.50, not \$5, like some I have gotten for \$5. We sell a \$3 or \$5 bird for that money and \$10 to \$25.

If not pleased when you deal with us, let us know and we will return money or do something else to please you, so you and your friends will buy of us year after year. Some nice white birds, scoring 94 to 96 points, for sale cheap. Barred Rocks and Buff Orpingtons, nice ones cheap. We have a great bred-to-lay-and-win strain. Individual records above 260 eggs per year. Pen records above 240. Our birds have won at all the leading shows. Catalogue free. Also one W. W. cockerel, score, 95½ at one-quarter value; 2 W. Rock cockerels, 94¼, one-quarter value.

F. Gage Cutler - R. F. D. 13 - Carthage, Ill.

White Wyandottes

NEW YORK AND BOSTON WINNERS—Our birds have won at America's leading shows for the past twelve years and at the late show at Madison Square Garden our birds were again among the winners, capturing fourth and fifth cock, fifth hen and fifth cockerel. We are offering fifty high class breeding cockerels that will put QUALITY into your flock. A few pens and trios at "live and let live" prices.

Our White Rocks

Won at Madison Square Garden in the past, and for 3 consecutive years we have bred first chl. and color special at the Garden, and at Boston, 1910, on three entries we won 1st and 3d chl.; special for best colored male and \$100 challenge cup for champion male. These winnings added to our past record should convince you we have the quality you're looking for. Anyway, you may return them and get your money back if not as represented. Write for prices.

EGGS

From our pens, both varieties, which will contain all of our prize winners, carefully mated to produce more prize winners at \$5 and \$10 per fifteen. We sell you the same eggs we would set ourselves. We satisfied all our customers last year and we will please you. Write us today. Remember, we breed and raise all our winners. Stamp for mating list.

like it are not temperamentally adapted to the work. One must be something of a fancier to make the best out of it.

A poultryman must have some skill with tools. He must have rare good judgment and this must be bettered as he works with his fowls. For instance, in the matter of caring for chicks in brooders there can not be any set and fast rules for the operation of the brooder or in the feeding. One must be able to rely on his skill in detecting what the chicks need in the way of heat and feed without injuring them. About the average poultry farm there are hundreds of small jobs that must be done by the poultryman. He cannot afford to send for a specialist when he needs a pipe joint mended, when a small building must be remodeled or extended.

Inventive faculty must also be possessed by the chicken man. Not that he must try to improve on machines and things that are good enough and answer their purpose well and good, but to the extent that he may be able to cope with unexpected complications. Regularity of habit is another essential. Hit and miss methods are not conducive to best returns in feeding and other poultry work. These as well as hundreds of other minor qualifications must be in the makeup of every poultryman who would prosper in the business. Young men are coming into the fancy in a great army every year. We need them. They are the material from which we sift the stayers and let the others pass on. Today is the day of the young man in poultry culture as well as other lines.

What's Your Experience?

We have heard a deal about the open front house during the last couple of seasons but have not learned a great deal about the experiences of those who have tried to use them in the colder climates. What we need at the present time is a series of articles which will give us some light on the way the fowls in open front and single muslin-fronted houses have come through the present hard and long winter. This is written about the middle of March. In some sections the spring season is not open as yet and the probabilities are that we will all experience another flurry of snow before the warm weather opens up. Well matured pullets will lay all winter in such manner as they are cared for. We know some breeders who have not had any trouble at all in getting winter eggs, but they have had to keep the male birds from the snapping cold of the early part of the day before putting them out into the breeding pens.

Can there be constructed a muslin fronted house which will not let the cold get so severe that it will freeze the cockerel's combs? Is it well to build double walls and yet put muslin openings in them? How large should the openings be and what shape should be the house? We would like to get up a page or two of facts and figures and shall be glad to hear from our readers on any phase of the subject. Tell us the size of your houses, how they are constructed, of what they are built, how located, outside protection, and give any other details of them.

After all that outburst of frenzied feeling on the part of dear brother Rankin, Kansans should line up behind him and put the state show where it was a few years ago and then a notch or two ahead. He wasted a few good gallons of ink, much excellent sleeping time, pages

of copy paper and allowed the subject to shunt him off the main line and onto a siding—not.

They may be able to keep an expelled member of the A. P. A. from advertising in America, but the foreign press devoted to poultry is taking the money. Can you blame them?

In the last issue of the Illustrated Poultry Record, London, is a full page advertisement of the greatest of women fanciers across the wet. Mrs. Wilkinson, breeder of Barred, Buff and White Rocks, Buff, White and Black Orpingtons, states that she has won ninety-five silver cups, and as she shows a photograph of them there is no doubting Thomas to say her nay.

From what the incubator men tell us there is a great lot of business doing this season. The egg trade opened up a little late, owing to the hard winter weather that we all experienced right up to the middle of March.

If one extreme follows another and the weather-prophets are right, then there will be some dry weather this summer which ought to encourage turkey raisers. Snowfall is practically rainfall, and inasmuch as we get only about so much anyhow, we might naturally look for some open weather at turkey time. We are all praying for something that will not raise the prices of turkey meat about the third week in November.

The baby chick industry is so far along in this country now that a man who issues any sort of advertising at all has to protect himself with the sign: "No baby chicks for sale." It is wonderful what a hold this baby chick industry is gaining.

A poultry breeder without an incubator is like a kiss without a mustache or apple pie without cheese. Early chicks are essential to success in the show room, success in the show room is essential to selling stock and eggs, and to keep up the winnings and hold trade you have to have the early chicks, so there you are again right back where you started. The incubator is the solution to the problem.

The untimely death of R. C. Tuttle is mourned by all who knew him. The ranks of poultrymen are losers whenever such as he are taken from them.

If we do not keep a restraining hand upon him, Reese Hicks will soon be having the hands of the powers on his coat collar. Reese is irrepressible in more ways than one.

The run the general purpose fowls are having at this time is something that even worries the Leghorn and other Mediterranean fanciers out on the Coast. But we need have no fear of the Leghorns or other egg machines being displaced. They are with us to stay and probably will for a long time. We need big, white eggs and lots of them and cannot do without the birds that supply them.

Hints for the Month

Written for American Poultry Journal by Percy W. Cook, Scotch Plains, N. J.

During this month quite a few hens get broody, and if one has good breeders and they want to set, and he wants them to lay, it is naturally a loss to him; so it is very essential to know the best way of breaking up a setting hen and get her laying in as short a time as possible. I have tried all ways and find the following by far the best: Make a coop, or, if one does not want to go to this trouble, a box can be transformed into a broody coop by making the bottom with bars one and a half inches wide and two inches apart; also put slats in front so that the birds can get their heads through to eat and drink out of the troughs, which should be hung on the outside. This coop should be on legs about three feet off the ground, so that plenty of air can get underneath. It is also better to place it in a position where the birds cooped up can see the others running around out in their run. This will make them more anxious to get out, and the uncomfortable position gradually makes them more restless and they will forget about their motherly instincts, feed and water as usual, but do not give any corn, as this is too heating. The coop should be put

in the shade. Some people recommend starving, but I do not, as when one stops feeding a bird the eggs stop growing and it takes quite some time for them to lay again. Nearly all breeds are ready to be put in the pens again after three days and will lay in five days from the time they started in to set. Some duck the birds in cold water and some put them in a pen with a lot of roosters having a perch in the house.

Overfeeding is one of the chief causes of a small egg yield. We often see and handle other people's birds that are so fat and heavy that it is impossible for their egg organs to perform their proper functions, as there is no room, the fat taking up all the important parts of the bird. A bird when over-fat is also more likely to die from broken eggs. Birds should always be hungry enough to be glad to see the feed pail coming. Then another cause for not laying is lice. If a hen or pullet is large enough to lay at this time of the year and its comb is not bright red but pale in color, you may be sure your birds have lice; if so, dust them at once, putting plenty of insect

powder on and around the vent. Never nail the perches, or roosts, as they are often called, as this will tend to harbor red mites, which remain in and around the end of the roost in the daytime, and at night take their fill out of your birds. These in time can undermine a bird's constitution so much that they will cause death. Always have the roost rest in a slot and have the ends where they rest kerosened every month.

Do not have your roosts one higher than the other. This is very pre-adamite, and should a bird have a cold sleeping on a low roost, those sleeping above are liable to contract it by morning.

When a bird is noticed to be running a little at the nostrils, these should be squeezed out. The proper way to do this is to insert the index finger inside the mouth, holding it close to the roof of the mouth, and squeeze down on the nostril with the thumb. Do not squeeze with the thumb without putting the finger in the mouth, otherwise you will be pushing the deposit into the bird's mouth. When a bird has a cold in a pen, put a piece of camphor about the size of a walnut in the drinking water and keep it there. It will usually last about a month before all is dissolved. This will prevent the birds from drinking too much water and also prevent the spreading of the cold.

So much is written about the necessity of grit, that everyone knows or should know that it is a necessity. The want of it will usually cause a stoppage internally. They also get distended gizzards and the husks from the grain get bound together in a mass; this causes diarrhea,

An Old Piano Box and a Prairie State

UNIVERSAL HOVER

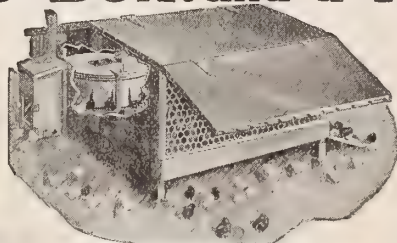

Will Solve Your Rearing Problem

You no doubt consider you are "lucky" if you raise half the chicks you hatch, don't you?

A great many don't do even that well. Hatching chicks is easy—but rearing them is the greatest "draw-back" of poultry raising.

The "10-day-death-loss" is like the thief in the night—it robs you of your profits.

If you could raise practically all the chicks you hatch, think of the jump your profits would take.

Home-Made Piano Box Brooder

We don't claim the **Prairie State Universal Hover** is a 100 per cent brooding device, but we can show you it is 100 per cent and more ahead of any other.

Some of our users even find it a 100 per cent brooder—raising every chick they put into it.

Here's one—read his letter:

Prairie State Incubator Co.

Gentlemen: I have used your Universal Hovers for over four years and have yet to find anything to equal them. I frequently raise every chick.

Yours truly,

Boston, Mass. EDW. N. BARKER

You probably know or have heard of the popular secretary of the American Poultry Association, Mr. S. T. Campbell, of Mansfield, Ohio. This is what he wrote us Jan. 10, 1910:

"I have been using your Universal Hovers for several years with surpassing success. In mid-winter I put 90 chicks in a piano box with a Universal Hover fitted in, and raised 85 of them. I have never been able to equal that with hens or any other brooding device."

And so the good reports come in, indicating from practical experience that you can raise nearly every chick with this ideal hover, even in a dry goods or piano box. Now read this letter from Mr. Edward Corning, of Bound Brook, N. J., who, with his son, made \$12,000 last year.

"After trying your Universal

Hovers we have discarded all others, and intend to use them exclusively, as they give perfect satisfaction."

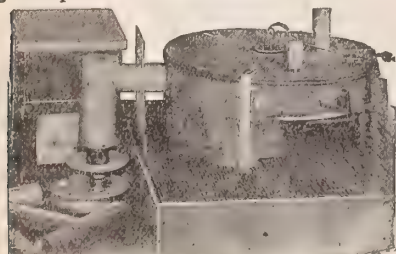

When the man who has made the greatest success ever made in the poultry business "discards all others," and uses Universal Hovers "exclusively," the "proof o' the pudding" is conclusive.

Let us mail you our catalog, fully describing this hover—tells how you can make the best brooder on earth out of an old piano box at very small cost. It also fully describes the **Sand Tray Prairie Incubators**, which hatch more "livable" chicks than any on the market. Find out how and why before you buy any other.

RELIABLE Incubators and Brooders

RHODE ISLAND REDS YIELD BIG PROFITS

Many a farmer has made a big dent in his mortgage by the help of Rhode Island Reds. Walter Sherman's new book tells you all about these wonderful fowls—how easy they are to take care of, how fine they are for table use, what prolific layers they are—even tells you how to take care of them when sick. Every poultryman should have it.

The pictures in the book are true to life—each from a photograph made at Mr. Sherman's place. Two of them, by the new French color photography, show the birds in their natural plumage—so real that you almost expect them to move.

How to Get this Valuable Book Free

Send me 20 cents—to help pay the cost of the book. Fifty cents would be a low price for it. With each book is given a rebate coupon worth 20 cents on your first order for two sittings of eggs. Send for the book today.

WALTER SHERMAN, Citizen's Farm, Newport, R.I.

which can usually be cured with two teaspoonfuls of salad oil or any similar oil.

When a fowl does not digest its food properly it becomes very thirsty, and when it puts its head down to eat, water will run out of its mouth. When this is seen the bird should be caught, held head down and the crop gently squeezed, then all the water will be ejected. Give two teaspoonfuls of sweet oil; this relieves the inflammation which always accompanies stoppage.

At this time of the year a hen sometimes becomes egg-bound, and if one knows the right treatment, it is a simple thing to save the bird. Hold the fowl over some boiling water, so that the steam will reach the vent. This causes the muscles to relax and the bird will usually soon expel the egg. It is also well to insert a little sweet oil up the vent. If this is not successful one must insert the finger and usually the egg can be felt. Sometimes it is lying crossways and is easily turned by one's finger.

When birds are laying, they should be handled carefully, as it is an easy thing to break the eggs inside of the bird. Then there is usually a case of a burial.

When fowls die suddenly, one is sometimes liable to think it is some epidemic. It is well to look at the vent, and if any of the substance of an egg is seen there one may be sure the bird died from broken eggs before death. When caused by this the bird's comb turns a dark purple, almost black.

It is impossible to select your winners at a month old. One must wait until four or five months old before being able to cull properly, as the birds have chick feathers up to this time.

Epsom salts are good, if given about once in three weeks, from now on. This is best given in a hot mash, dissolve them in the water that the mash is mixed with.

When receiving birds from a long trip, do not water first; give feed first, then water. When shipping birds, do not put in a drinking cup, as it is unnecessary, and when the water is put in it will be spilled all over the litter on the floor of the coop, and make it very uncomfortable for the birds and is liable to cause rheumatism. A chicken can be raised successfully without ever touching a drop of water.

THE ONLY HARDWOOD INCUBATOR

WORLD'S BEST HATCHER

**STANDARD MODEL
INCUBATOR**
World's Best Hatcher
(Guaranteed)

THE MODEL INCUBATOR is known throughout the world as the "Incubator of Quality." In addition to being the only incubator that is built of Hardwood—possessing a superior furniture finish (more costly, more lasting, better appearing than any soft-wood machine *could* be), it is also known as the Best Hatcher in all climates. Here are extracts,—one North—one South—selected from the many we get which prove this claim:

NORTH DAKOTA AGRICULTURAL COLLEGE:

"Our hatches from this machine have been uniformly good."

GEORGIA STATE AGRICULTURAL COLLEGE:

"The Model Incubator has given us eminent satisfaction. I heartily recommend it to our students as a reliable machine, with a perfect ventilating system and a splendid regulator. I can easily hold the temperature in the egg chamber within one or two degrees in an unheated room. The chicks hatched with the "Model" are vigorous and healthy."

So Assured are we of the superiority of our Standard Model Incubator that we readily

Undertake To Send Your Money Back

if it does not come up to the description in our catalogue. It stands to reason that a Hardwood furniture-finished machine is as far superior to one made of pine as your parlor table is superior to your kitchen table. One withstands atmospheric changes; the other is liable to swell, and shrink, and warp. Year after year our Hardwood Standard Model has proven itself in advance of all others—thoroughly dependable at all seasons, combining in the highest degree **STRENGTH, DURABILITY, FINISH and HATCHABILITY.**

Write for our **FREE** Catalogue and read our **GUARANTEE.** Let us refer you also to our

MIDDLE-PRICE INCUBATORS AND BROODERS

These are lower in price than our Standard Models because they are made of wood and metal instead of all chestnut. As dependable Hatchers these Incubators are the Leaders among low-priced machines, containing a Hatching principle similar to that of our Standard machines. They hold more eggs than any other high-grade machine made. Your money therefore goes further. We have put Value into the making of these Incubators, our object being to build a machine that would be the best of all low-priced machines. They are made in **Five Sizes** as follows:

50-Egg, \$8.00; 100-Egg, \$11.00; 175-Egg, \$15.00; 250-Egg, \$20.00; 360-Egg, \$27.00.

Write and get our Free Catalogue containing full description and illustrations.

Our **PORTABLE HOVER AND BROODER-HEATER** is sold at \$6.00, and you will find it an economical purchase. For \$7.00 we offer an Enclosed **PORTABLE HOVER AND HEATER**, which forms a complete Brooder. Get one of these and save a dollar or two.

MODEL BROODERS ARE MODEL MONEY SAVERS AND MODEL MOTHERS

Our **OUTDOOR BROODERS** save you a lot of money, being larger and better than any outdoor brooder made for the price. In these Brooders you can get as much space for \$10.00 or \$12.00 as you can get in any other High-Grade Brooder for from \$14.00 to \$18.00. Save a \$5.00 bill!

It will cost you only a cent (a postal card) to find out all about our Model Brooders. There are Five Styles and Sizes. We can't begin to do them justice in this space, but we invite you to send for our Free Catalogue wherein they are fully described and illustrated. Do it now! This Book contains valuable chapters on the Opportunities in the Poultry Business; tells about Houses, Breeds, Foods,

Hatching, Brooding, Symptoms of Diseases, and many other things you would like to be informed on. Please Write Today. Address

MODEL INCUBATOR CO.

(ROBERT H. ESSEX, President)

Terrace and Henry Street,

BUFFALO, N. Y.

ROBERT H. ESSEX

The show held at Pittsburg, also known as the "Smoky City," under auspices of the Pittsburg Fanciers' Club, of which G. W. Moore is president, G. G. Sutch secretary, and J. M. Skiles superintendent, was a grand success in every way. Some 1,500 head of poultry were on exhibition, and the hall was crowded to its utmost capacity, the birds having to be double decked in order to take care of them.

It must be remembered that Pennsylvania is one of the largest poultry states, and it was here that many of the breeders, after competing in the other shows throughout the country, came to compete against each other and try out their birds to decide who were the final champions.

The Pittsburg show is always held the week of Washington's birthday, and is the last show of the season. The people in Pittsburg certainly appreciate a poultry show and the attendance was extremely good. The weather was fine throughout the week and we understand some 1,100 people attended the show during the week.

The White Rock class was largely and

well represented, and at a meeting of the White Rock fanciers during the Pittsburg show it was decided to form a club to be known as the Western Pennsylvania White Plymouth Rock Club, and the following officers were elected: George Hildebrand, Beaver, Pa., president, and L. J. Moss, secretary and treasurer, P. O. Box 1515, Pittsburg, Pa. The object of the club is to place White Plymouth Rocks in the foremost ranks of the poultry world, and for this purpose special inducements will be offered to the breeders at as many shows as possible. The club hopes to secure every White Rock breeder in the United States and Canada as a member. For particulars you should write to the secretary, Mr. Moss, who will be glad to furnish full information.

As usual, the Rhode Island Red class was one of the largest in the show room and was the class which attracted the most attention from the public who attended the show.

The coveted prizes from both the Rose and Single Comb classes were pretty evenly divided between the Oak Nest Poultry Farm, Charles Shields, proprie-

tor, Hookstown, Beaver county, Pennsylvania, and Craig & Mapes, Mt. Lebanon, Pa.

Mr. Shields exhibited one of the finest Rose Comb Rhode Island Red cockerels it has been our pleasure to see this year. The bird was ideal in both type and color, although slightly immature, as he was yet quite young. However, he easily won first, although there were several other good specimens shown. Mr. Shields' exhibit showed fine quality throughout and he succeeded in winning the following premiums in Rose Combs: 1st; 3d cockerel; 2d cock; 4th pullet; 3d and 4th pens; diploma for the best cockerel in the class; silver cup for best display, and six special prizes, including best color and shaped male. In Single Comb Reds he won 1st; 4th and 5th hen, 2d and 4th cock, 2d cockerel, 2d and 4th pullet, 1st and 5th pen, and a silver cup for best display, and three other special prizes.

Craig & Mapes, Mt. Lebanon, Pa., also had a very fine exhibit of Rhode Island Reds, and we must say that we consider the class of Rhode Island Reds shown at Pittsburg to be fully equal to any class shown at any of the largest shows of the season. The quality of birds exhibited by Messrs. Craig & Mapes is certainly a credit to any breeder, and they won second Rose Comb cockerel on a large, even-colored bird that would win first in most any class of Reds. Their first prize pullet was also a fine specimen, being a rich red with a fine ticked hackel. Their winnings in detail are as follows:

In Rose Comb Reds: 5th cock, 3d and 5th hen, 2d cockerel, 1st pullet and 2d pen. In Single Comb Rhode Island they

WHY PAY MORE? Investigate—send your name and address today, the easiest way, by postal or letter. I tell you the prices right here—and how my machines are made. You can have 30 or 60 days' trial on both incubator and brooder—and I'll send all money back if you return the machines to us as unsatisfactory. Be sure to send for my illustrated, free booklet, "Hatching Facts." But, if in a hurry, you are perfectly safe in ordering right now from this ad. Thousands do this way every year. I guarantee to ship all orders sent from this ad on day received—(from warehouse nearest you, freight prepaid.) No disappointments.

Order a Complete 140-Chick Belle City Hatching Outfit. Send only \$11.50

BELLE CITY Incubators and Brooders

I've always given my customers more for their money than any other incubator manufacturer in the world—that's why we do so much business.

Belle City Incubators will hatch more chickens—under the same conditions—than any other incubator made, or your money will be refunded. This I guarantee. Double walls—dead air space all over—copper tank and boiler—hot-water heater—best regulator—deep, roomy nursery—strong egg tray—high legs—double door—and everything that's any good on an incubator—all in the Belle City. High-grade thermometer—egg tester—burner and safety lamp included. The Belle City Brooder is the only one having double walls and dead air spaces. I guarantee it to raise more healthy chicks than any other Brooder made. Hot-water top heat—large, roomy, wire runway yard, with platform—metal safety lamp and burner.

Complete Hatching Outfit Only \$11.50

Over 50,000 machines in use—all doing perfect work. The Belle City should be your choice. Send your order now or send postal for "Hatching Facts" booklet and full particulars. Don't pay more than my price. No machines, at any price, are better hatchers or brooders.

won 3d cock, 2d and 3d hen, 1st cockerel and 3d pen.

In S. C. Reds, Craig & Mapes won 3d cock, 2d and 3d hen, 1st cockerel and 2d pen.

The Silver and Golden Wyandotte classes were both large and a good quality was shown in each class. In the Silver Wyandotte class, J. N. Hazlet, Tarrantum, Pa., won 1st cock, 1st and 2d cockerel and 3d pullet. Another winner in this class was Wm. J. Fox, Cabot, Pa., Rural Route 17, who won 2d cock, 1st hen, 3d cockerel and 4th pullet on some very nice specimens of Silver Wyandottes.

In the Golden Wyandotte class, R. A. Poole, Butler, Pa., was an important winner.

The White Orpington class was large, containing many fine specimens, and in this class Lawrence Jackson, Hayesville, Pa., showed some fine specimens on which he has been winning in all the important shows throughout the country, and at Pittsburg he succeeded in capturing 1st cock, 1st hen, 1st cockerel, 3d pullet and 1st pen. He also won a fine silver spoon as a special prize.

In the Buff Orpington class we also

found birds of specially fine quality, and the premiums went as follows: Craig & Mapes, Mt. Lebanon, Pa., 1st on cock, 1st hen, 3d cockerel and 3d pullet. The Seaman Farm, Unity, Pa., J. L. Seaman, Jr., proprietor, Samuel H. Jeffries, manager, also exhibited some very fine specimens in this class, and won 2d hen, 1st cockerel, 1st and 4th pullet and 1st and 2d pen, winning six prizes on six entries.

In the Rose Comb Black Minorca class, Harry Johnson, East Liverpool, O., won 2d cock, 3d hen and 1st pen; and Repp & Aires, Laurel, Md., won 1st hen and 5th cockerel.

Joseph Hillsdorfer did not enter any Minorcas for competition, but had on exhibition an extremely fine pen of Single Comb Black Minorcas which was artistically decorated, and received much admiration.

In the Houdan class, J. N. Hazlet, Tarrantum, Pa., won two prizes, a second and third. Mr. Hazlet also exhibited a string of the finest Cornish Indian Games it has ever been our pleasure to see, and on sixteen entries in this class, in good competition, he won fourteen prizes, as follows: 1st, 3d and 4th cock; 1st, 3d and 4th hen; 1st, 2d and 4th cockerel; 1st, 2d and 5th pullet; and 1st and 2d pen. The first prize cock was a

The Famous PEERLESS INCUBATORS & BROODERS

More than 30,000 in actual use. Every one of them hatching and raising a larger percentage, with less attention and less expense than any other made. No other machine has so many improvements—so many money savers—so many labor savers as the Peerless. Here are a few of the special features:

Automatic ventilation and moisture; cold-rolled copper tank; heat distributing bars; tandem, double-compound thermostat regulator; automatic lamp; acme trip burner with combined damper and flame regulator—this is the safest burner made. It saves half the time, labor and cost of operation.

My Lampless Brooder—the greatest brooder success of the age. No lamp, no tank, no expense to operate. Raises a larger percentage of healthy, vigorous chicks than any other brooder on the market.

Either Knock-Down or Ready For Operation

I manufacture a complete line of Incubator and Brooder Supplies and fixtures; everything to repair or remodel your old machine or build new ones. I will also make to order anything special you may want in my line.

Send for my combined catalog and book of plans. It is free. It contains more than 100 photographic illustrations, showing step by step how Peerless Incubators and Brooders are constructed and how easily you can build them yourself. Whether you build an incubator or buy one ready made, you will save money by buying from me. Send for my free book today and learn all about the "House of Quality."

make a record at the great Buffalo International Show, 1910, by winning 3d cock, 2d hen, 1st cockerel, 3d and 5th pullets, 2d pen, championship special for best male in class, best colored male, 2 silver cups, etc. Won at Guelph, Dec., 1909, 2d and 5th cocks, 2d, 3d, 6th and 10th hens, 1st, 2d, 4th and 9th cockerels, 2d, 5th, 7th and 8th pullets, the Dawson special and 18 other special prizes. Your wants have my special care. Mention American Poultry Journal when writing.

I. K. MILLARD, DUNDAS, ONT., CAN.**The George W. Mitchell Partridge Cochins**

Having purchased the entire flock of these famous birds, with the good will, from Mr. Mitchell, I am in a position to offer exceptional opportunities to those wishing to buy, as I have a few fine birds that I am willing to dispose of. Also eggs from the prize matings which Mr. Mitchell has made for this season. Those desiring further information address

Robert F. Clark**87 Milk Street****Boston, Massachusetts****S. C. BUFF ORPINGTONS Cleveland
Winners**

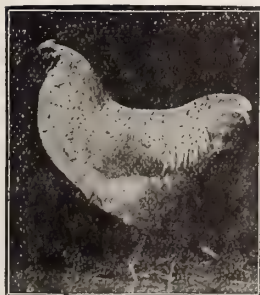

We won again at the great Cleveland Show, 1, 3 cocks; 1, 2, 3, 4, 5 hens; 1 ckl.; 2, 3, 4 pens and 2 silver cups. Our Buffs have won at Cleveland for years, and this last victory, in competition with the best in the country, should convince you we have the highest quality in Buff Orpingtons and know how to reproduce them.

Eggs: From our extra choice pens, \$10 per setting; from other grand matings at \$3 and \$5 per setting. Mating list free. Write today, mention American Poultry Journal.

Roseland Poultry Farm**Chas. W. Switzer, Owner-Manager****South Euclid, Ohio****WOLVERINE STRAIN WHITE PLY. ROCKS**

Have won highest honors at Boston, Chicago, Detroit, Indianapolis, Toledo, etc. They made a **clean sweep** of all first prizes at Sherwood in 1903, Detroit S. Show in 1905, Grand Rapids in 1906, Toledo in 1907, Detroit S. Show in 1909. They are acknowledged to be one of the best strains of White Plymouth Rocks.

My breeding pens never contained such uniformly high grade stock as they do today. My new mating list, originally illustrated, tells all about them. This, and my regular 36-page

illustrated catalogue containing useful information, list of winnings, etc., etc., free, if you send two 2c stamps to cover cost of mailing. If you want to hatch your winners for next season, do not overlook me when placing your orders for eggs. I have the stock, the experience and the desire to do the right thing by my customers, and would appreciate the opportunity to show you.

BOX M :: WHITING, IND.

wonderfully large, strong and vigorous specimen, being a marvel of perfection in both type and color. The first prize hen closely followed him, being nearly, if not quite, his equal in perfection, and the first prize cockerel was also a wonder in his class. Mr. Hazlet was particularly fortunate in this show, entering in all twenty-six birds and winning twenty prizes.

The Ancona exhibit was a large class of birds of good quality, and the Minnehaha Poultry Farm, Bannock, O., W. P. McNary, owner, succeeded in winning 1st and 2d cockerel and 1st and 3d pullet on some very fine birds.

White Wyandottes were also a good class, in which Geo. M. Klein, Downers Grove, Ill., won 1st and 2d on cock, 3d cockerel and first pullet.

Geo. B. Ferris, Grand Rapids, Mich., exhibited a very fine pen of Single Comb White Leghorns, which were easily first-prize winners in this class.

The Bantam class was very large and well filled in all classes. Frederick G. Davis, Ben Avon, Pittsburg, Pa., had on exhibition a fine display, replete with quality throughout, and won as follows: In Buff Cochins Bantams, 1st cock, 2d hen and 1st cockerel; in Black Cochins Bantams, 1st cock, 1st hen, 1st cockerel and 1st pullet; in Silver Seabrights, 1st cock and 1st hen; in Golden Seabrights, 3d cock and 5th hen; in Black Rose Comb Bantams, 1st cock, 3d hen, 4th cockerel and 2d pullet. This is a fine record for Mr. Davis.

The exhibit of the Weldon Fireless Poultry Fountain and Feeder, manufactured by the Andrew Iron & Wire Works, Rockford, Ill., was in charge of John C. Plain, and ably demonstrated by him. Many were the complimentary remarks passed concerning this fountain and feeder, and a large number of poultry men placed their orders for them during the show.

WATERFORD, WIS., FIRST ANNUAL SHOW.

Mr. Halbach, the well known White Rock breeder, was one of the chief promoters of the Waterford Poultry & Pet Stock Association, and through the efforts of this pioneer in the poultry business, supplemented by the loyal support of his neighbors, friends and old customers, it promises to be a permanent organization, one that will redound to the immediate benefit of every farmer and poultry raiser in this section. The business men contributed generously to the support of the exhibition to the end that admission was free and the affair in a sense a local holiday.

The show was held two days and each day the aisles were crowded to capacity with an eager, interested throng. Following is a detailed description of the exhibit according to classes:

Barred Plymouth Rocks.—The largest class in the show and the quality was above the average. The first cockerel was an easy winner, had the ideal Rock shape and excellent color, and would be an easy winner in many of the larger shows. The second was close to first. The third was a trifle off on shape but color good. First pullet was an easy winner and possessed both good shape and color. Second and third well placed. First hen was a typical Rock, second a crackerjack, while third was close to second.

White Plymouth Rocks.—These were extra good birds, but Mr. Halbach, with his usual fairness and magnanimity, en-

Norwich Automatic Exerciser and Feeder

THIS is a real Automatic Poultry Exerciser and Feeder. It is simple in construction, will never get out of repair and will last a lifetime. It will feed any kind of grain or mixed grain. Used outside in summer, indoors in winter.

Rain, Rat and Sparrow Proof. Chickens five weeks' old and older can feed themselves just enough, and not a grain will be wasted. Saves feed and increases eggs and growth of chicks. The old-fashioned, wasteful way of throwing high-priced grain on the ground or in the litter, to be soaked with sudden rain or eaten by sparrows or rats, is now obsolete with all modern poultry people. Saves its cost in feed and labor six times a year. You cannot afford to waste feed another day.

It Stops the Leak that is Preventing You From Making a Fair Profit

To save time, send us the price of the size you want and we will ship on 30 days' trial. If not entirely satisfied return and we will promptly refund your money and charges both ways. We take all the chances of satisfying you.

8-quart, suitable for about 12 chickens, \$2.50
14-quart, suitable for about 20 chickens, 3.25
20-quart, suitable for about 30 chickens, 4.10
32-quart, suitable for about 50 chickens, 5.00

Free circular if desired, but better order a feeder at once, and if not fully satisfied return it within 30 days and get your money back. Thousands in use, and every user delighted. We will also mail either our Barred Plymouth Rock catalogue or our Light Brahma catalogue for ten cents each. State which variety you want and enclose ten cents in silver or stamps. Send for a feeder today. Do not waste your time and money with untried, so-called automatic feeders, but order one of ours at once. More than 10,000 now in actual use in all parts of the United States.

Write us for free circular showing our Chicago winners from life. Eggs from best matings only \$5 per 13, \$9 per 26.

Standard Rock Farm
TRUCKENBROD BROS., MENDOTA, ILL.

tered none in competition, but had a fine exhibit showing several coops, including the prize winners at Chicago. The crowds were continually admiring this splendid display.

Buff Plymouth Rocks.—Quality very good, especially the first cock, a bird which would be entitled to a place in any prize show.

White Wyandottes.—Next to the Barred Rocks this was the largest class and the quality was real good throughout. First and second cockerels were gems, while the third was an easy winner. First cock was considered the best bird in the Wyandotte class and would have graced a much larger show. He was pronounced excellent.

Buff Wyandottes.—Not many birds shown but quality excellent.

Silver Laced Wyandottes.—A small class and quality of the same order.

Rose Comb Rhode Island Reds.—These were represented by a small class, but the quality was good throughout.

Buff Leghorns.—These were simply grand and one seldom sees better or even as good quality at the larger shows.

White Faced Black Spanish.—These were represented by a small class, but the judge pronounced them as good as he had seen at the shows this winter.

Bantams.—In these classes there was a good entry with many splendid specimens. A coop of African Geese attracted much attention, as many had never seen this particular breed before.

BIOGRAPHY OF P. A. COOK, OF THE WELL KNOWN FIRM OF WM. COOK & SONS, ORIGINATORS OF ALL ORPINGTONS; SCOTCH PLAINS, N. J.

P. A. Cook was born at Orpington, Kent, England, in 1882. Joined the English navy at the age of thirteen as a naval cadet, later being made midshipman and sub-lieutenant. He later served fourteen months in the Boer war in South Africa, being engaged in some seventeen battles, in one of which he was wounded in the head, and was on an armed transport which caught fire and was wrecked off the coast of Africa. After his return from Africa he resigned from the services with a good record. He tendered his resignation because he could not get sent to China to fight in the Boxer trouble.

Mr. Cook enjoys all kinds of sport and was captain of the football eleven on board his ship. He is also a great hunter, and at one time spent over three months in Central Africa, bagging large game, where he had many exciting experiences and a unique trip in that he only took one Zulu, and no provisions, depending entirely on his spoils for his sustenance. He had only one chart, which was not much good. The compass was his main guide, which was used all the time on this trip. Mr. Cook bagged two lions, fourteen leopards, thirteen hyenas, about the same number of jackals, eighty-four bucks of many different species, numerous wild-cats, and many other animals.

In one experience which he had with a leopard, which came near costing him his life, Mr. Cook says he was walking in the dry bed of a stream about 10 p. m. when he saw a leopard's head at the top of the bank. He quickly fired at him with a shotgun loaded with buckshot, but fired too low. Before he had time for another shot the leopard had sprung upon him, and he was thrown to the ground; pulling his revolver, he put

two bullets through him while the leopard was doing his best to kill him. With the second shot the leopard stretched out dead on top of Mr. Cook. Upon examination he found that he was bitten and torn in several places. The most serious damage was done to his right knee, on which he still carries the scars of this encounter. Mr. Cook cared for his own wounds, using for the purpose permanganate of potash and water out of his water bottle. While he was thus wounded he managed to skin the leopard and make his way back to camp. His clothes were all torn and covered with blood, and upon his arrival at camp his Zulu boy was much alarmed, as he thought Mr. Cook would surely die from his wounds. This leopard skin is valued very highly by Mr. Cook and now adorns his dining room at Scotch Plains. Among some of the instances of Mr. Cook's life has been the shooting of snakes, some of which measured up to twenty feet in length. One of these which was shot on one of his farms in South Africa had succeeded in swallow-

PERCY A. COOK

ing four full-grown ducks. Mr. Cook informs us that he no longer has the desire to kill; that he now prefers to see these animals alive, which the reader can readily believe, as he is going to so much trouble and expense in order to stock his private zoo.

Mr. Cook is also an expert yachtsman and has participated in a large number of yacht races, being three times in the New York-Bermuda yacht races. He has owned several yachts and fifteen automobiles. Three years ago he participated in many automobile races, being very successful at this sport. Mr. Cook never participates in any sport for gain or a money consideration. He has had to give up automobile racing, as it took up too much of his time.

Mr. Cook is also interested in flying machines, and as far back as 1901 he built a glider of his own make, which he flew from the top of a building some sixty feet high, in a strong wind, which lifted the machine still higher for a time and then assisted it to go down much faster—the result being a broken arm for Mr. Cook and a smashed machine. The next experience with a flying machine was in 1909, when he built another one, having a thirty-horsepower engine.

J. S. HAUPT, FAIRVIEW FARM, Box 110, EASTON, PA.

In the trial flight with this machine a bank was struck by one of the wings, with the result that the entire machine was smashed, the largest pieces being some two feet in length and now adorn Mr. Cook's veranda. Mr. Cook succeeded in escaping from this smash-up without any broken bones. At the present time Mr. Cook has a new flying machine, which we understand is one of the most powerful machines ever constructed, and from which Mr. Cook is deriving a great deal of pleasure. In a recent letter he has reported having made thirty flights in this machine. We presume that next he will be meeting visitors at the station and taking them out to his farm in his airship. However, for the present we should prefer the trip to be made on terra firma. Mr. Shields made one entry in Rose Comb Reds at the late Madison Square Garden show and succeeded in winning 3d cock.

Mr. Cook says that his education in the fancy poultry began as soon as he could talk, and when he was seven years old his father would get him to take visitors around the plant, and at the age of ten he had a good sales record to his credit. He has traveled in nearly every

A. L. Glessman, Mars, Pa., breeder of White Orpingtons.

civilized part of the world and in some parts that were not civilized.

During the year of 1901 and up to 1904 he established five poultry farms for the firm of Wm. Cook & Sons, originators of all Orpingtons. Two of these are in South Africa and one in Australia, one at Scotch Plains, N. J., and one in England called the St. Leonard's Poultry Farm, which has since sold at a good profit. All of these farms were put on a good paying basis by Mr. Cook. He started the American farm in the year of 1904, says he likes this country better than any country where he has ever lived. In 1908 he purchased the American business from the other members of his family, and he intends to remain here altogether.

During his life Mr. Cook has bred fifty varieties of poultry. He now breeds only Orpingtons, as he finds them so much more hardy and better birds than all the others, at the same time more profitable. Mr. Cook says so many people ask him how he made so much money out of chickens. His answer is: Keep Orpingtons; advertise well; treat your customers right; give your birds your own personal attention, and you can make as much money as he has, and you know what Mr. Cook has he has made himself—and made it all out of the fancy poultry business—as he was unfortunate enough

to lose what was left him. Mr. Cook is thoroughly posted in all varieties of poultry and has officiated as judge at many of the largest poultry shows in the world. He says he works real hard for six months of the year, usually about eighteen hours a day, and the other six months is spent in enjoyment—yachting, motoring, and other outdoor sports.

Mr. Cook has many fads and fancies which the poultry business permits him to enjoy. He is very fond of pets and flowers as well as chickens. He has many things to interest the visitor at Scotch Plains, among which are two African lions that are very docile with Mr. Cook, but not with anyone else. In one cage Mr. Cook has a lion, a monkey, a dog, and a cat, all of which sleep together. He also has some twelve monkeys of many different species, some of which are so tame they are allowed to run loose around the farm. Among other animals to be found are fourteen dogs. At present Mr. Cook is completing a small deer park, in which he will have a lake and a small flock of deer. He expects to get a bear and some other wild animals, which will give him great pleasure in taming. He is now building an aviary 150 feet square and 30 feet high, which he will fill with birds of every known variety from all parts of the world.

Among other things Mr. Cook is particularly fond of marine paintings, and has quite a large and valuable collection, among which are a number of paintings by Warren Shepherd, whom Mr. Cook thinks cannot be beaten for marine work.

Certainly Mr. Cook's home at Scotch Plains would be an interesting place to visit, with all the above to be seen, not forgetting the flowers, for Mr. Cook has them in such profusion that the place looks like Paradise. Visitors are made welcome and if notified in advance will be met by Mr. Cook with his auto.

Not the least interesting sight the visitor will see is the large flocks of Orpingtons, consisting of many thousands of birds. Eight of the ten varieties of Orpingtons are bred here. It will be remembered that Mr. Cook owned and edited the Orpington Journal for about five years, up to the time it was purchased and sold to another paper. He has written articles for nearly all the poultry papers and magazines in all parts of the country, some of his articles being translated into several different languages. He now has a book about ready to publish on poultry diseases and general poultry keeping, which, coming from a man with such wide experience in the successful production of fancy poultry, will be a very valuable book, and no doubt will meet with public approval as soon as offered for sale. We consider ourselves fortunate in securing the services of Mr. Cook as a contributor to American Poultry Journal. He will furnish us with "Hints for the Month" for each issue of American Poultry Journal. You will find much valuable information in this department from month to month; in fact, this department will anticipate the needs of your flock, and by closely following instructions herein given by one who has himself been so successful you also will succeed. We trust you will look up Mr. Cook's department in this issue.

Rose Comb Brown Leghorns

The kind that have a record behind them. Exhibition stock and eggs a specialty. Write for mating list and show record.

H. C. FRANKLIN

TOWNSHEND, VERMONT

S. C. WHITE LEGHORNS

The quality kind, bred exclusively for ten years. Unparalleled wins in some of the best competition. Don't fail to write for circular. Both stock and eggs for sale.

--

Otisville, New York

At the Indianapolis Show February, 1910

With less than two weeks conditioning, we won second cock, fourth hen and third pen with only thirteen entries out of over one hundred. Quality White Wyandottes. Exhibition and utility stock. Eggs at reasonable prices

Pangalow Farm, R. F. D. 12 Indianapolis, Indiana

Andrews' Wh. Wyandottes

At Boston, 1910, won First, Second and Sixth Cockerels, First Pen, Fifth Hen. This was the hottest class of cockerels that without doubt was ever shown in America. My first pen was called by expert judges the grandest ever shown. Won first pen at Boston for four successive years and have had first cockerels 1907, 1908 and 1910. Have won at Boston for 13 consecutive years. The above record was never equaled by any breeder, and I breed my winners. At Chicago, 1909, on four entries, won four prizes and color special. They have also won for my customers at largest shows in United States and Canada. Buy your eggs from a strain that has a winning line of blood back of them and can win now. Send stamp for 1910 mating list. Book your orders early.

J. W. Andrews, Box J, Dighton, Mass.

BIG REVIVAL IN POULTRY BUSINESS

A BIG REVIVAL in the poultry business is at hand; everybody knows it—everybody in the business should reap the benefits. The way to do this is to start right—and then go right.

STARTING RIGHT doesn't mean buying cheap and worthless tools with which to work. To do that is to invite defeat. Do not be half-hearted! Half-hearted is another name for *half-licked*.

NOTHING SUCCEEDS LIKE SUCCESS. It is Right and *Sensible* to imitate the successful, to follow their lead—and it pays! If you do this in the poultry business you will **HATCH YOUR CHICKENS IN CYPHERS INCUBATORS, BROOD THEM IN CYPHERS BROODERS AND RAISE THEM ON CYPHERS CHICK FOOD.**

THAT IS THE ROYAL ROAD TO SUCCESS in raising poultry for profit *by artificial means.* It is open to you, reader, broad and straight. *Did you ever know* of a big poultry plant using \$5.00 or \$7.50 or \$10.00 tin-tank, cracker-box incubators, and succeeding in the business? **YOU NEVER DID.** *Have you ever read* the report of a foremost poultry fancier publicly endorsing one of these here-today and gone-tomorrow cheap "fake" machines? **YOU NEVER HAVE.**

THEN WHY SHOULD YOU make the mistake, *the serious and costly mistake,* of buying a big-promise, little-do cheap affair, that is an incubator in name only! *To do this is to defeat the main object of your entire poultry investment.* And the only excuse for such a mistake is the faint hope of saving a few dollars at the start. **OUR WORD FOR IT,** every dollar you save in this way will be offset very soon by the loss of ten or a hundred dollars. Thousands have found this to be true. Many letters are received by us every year to that effect! We are asking you to avoid this common pitfall. If life thus far has taught you to *profit by the experience of others,* then this single advertisement will mean success for you in your poultry work.

THE POULTRY BUSINESS is now *increasing rapidly* in all branches. Those of us who ought to know are certain that the next five to ten years will be *the most prosperous* in the history of the poultry industry. There might have been a financial reason one or two years ago for you to "try your luck" with a cheap incubator or a make-shift brooder, but now if you are going to take up poultry raising at all, or are going to extend your operations, you ought to give yourself a fair chance to *equal the success of other men and women* by owning and using *the best equipment to be had.*

BEGIN RIGHT if you are going to raise chickens *by artificial means,* or do not start at all! This is frank and honest advice from *men who know*—from a company that during the last ten years has manufactured and sold more incubators, brooders and poultry supplies to poultry raisers **THAN THE NEXT FIVE LARGEST MANUFACTURERS AND DEALERS COMBINED.** It is honest advice from a company whose incubators today are in successful use on *more government experiment stations,* on *more big practical chicken and duck plants* and that are used and *publicly endorsed by more foremost American poultrymen* than all other makes combined.

THESE BIG FACTS mean something! They should mean something to you! **THERE IS A REASON** for this company's *unequalled success,* for the *world-wide trade it enjoys,* for the many *satisfied customers* it has in every civilized country on the globe. Cyphers Company customers know what that reason is! They have found out *and are profiting by it.*

DO NOT ACCEPT OUR UNSUPPORTED WORD for the highly important claims we make—important to you! But we do ask you to be guided by the personal testimony of America's *best known and most successful poultrymen.* Our 160-page 1910 catalogue tells the whole story, tells it straight from the shoulder—tells the truth. The men here briefly quoted stand high in the poultry world for their integrity. They are well-known—successful! See our big Annual Catalogue and Poultryman's Guide for their full reports—and many others. Contains five instructive chapters on successful incubating, brooding, feeding, heavy egg-yields, etc. **IT IS FREE** and we pay the postage. Address our branch house nearest you.

CYPHERS INCUBATOR COMPANY

BUFFALO, N. Y. NEW YORK CITY. CHICAGO, ILL. BOSTON, MASS. KANSAS CITY, MO. OAKLAND, CAL.

WM. McNEIL, Canada.—"I won 28 first prizes at Boston last winter on birds, all hatched in your machines."

G. W. MITCHELL, Connecticut.—"Obtained two 100 per cent. hatches, one 97½ per cent, one 95 per cent. All my winners at New York show were hatched in Cyphers Incubators."

A. G. DUSTON, Massachusetts.—"It is my belief, after ten years of experience, that any one can get good hatches from Cyphers Incubators."

D. W. YOUNG, New York.—"Used five Cyphers Incubators. Contributed largely to my winnings, New York and Boston."

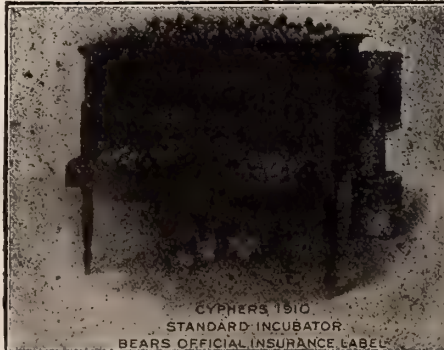

ERNEST KELLERSTRASS, Missouri.—"All Crystal White Orpington fowls on Kellerstrass Farms are hatched in Cyphers Incubators."

C. H. WELLES, Connecticut.—"Used Cyphers Incubators several years. This year had two 95 per cent hatches; average between 80 and 90 per cent."

AUG. D. ARNOLD, Pennsylvania.—"Tried several other makes, but the Cyphers leads them all. Never hatched more vigorous chicks."

F. C. SHEPHERD, Ohio.—"Used Cyphers Incubators exclusively since 1899. Never had a poor hatch. Repeatedly obtained 90 to 92½ per cent. hatches."

J. C. FISHEL, Indiana.—"Hatched 1,835 chicks, being 90½ per cent. Raised in your brooders 1,140, or 81.71 per cent. Recommend them to friends and customers."

TIME TO START RIGHT - AND TO GO RIGHT

A. C. HAWKINS, Massachusetts.—"Put 50 Barred Rock chicks in Cyphers Brooder, raised 48 to maturity. Out of 50 Buff Plymouth Rock chicks raised 47."

THOS. F. RIGG, Iowa.—"All our single and choice mating eggs go into the Cyphers machines and we are never disappointed. Your brooders are perfect rearers."

E. B. THOMPSON, New York.—"Your incubator runs to perfection and is practically a perfect hatcher. Put 54 chicks in Cyphers Brooder, raised 53."

U. R. FISHEL, Indiana.—"Reared on home farm this year over 3,000 White Plymouth Rocks, every one of them hatched in Cyphers machines."

HENRY STEINMESCH, Missouri.—"Seven years ago gave you report on Cyphers Incubator. Same machine still at work, as reliable as ever."

VICTOR BRADLEY, Massachusetts.—"We are very free in our recommendation of Standard Cyphers Incubators and Brooders, honestly believing them the best made."

W. S. RUSSELL, Iowa.—"Used Standard Cyphers Incubator the past six years. Recommend it to any one, expert or novice; first-class incubator."

CHAS. V. KEELER, Indiana.—"Have about 2,000 chicks, all hatched in Cyphers machines. Raising them on Cyphers Chick Food; growing like weeds."

J. M. WILLIAMS, Michigan.—"Personally use your incubators on our special matings. If were to buy dozen more all would be Standard Cyphers."

THERE IS A CYPHERS COMPANY WAY of starting right in the poultry business—any branch of it—and of *going right!* It is this "right way" that we want you to know about. It is told of in our *Complete Free Catalogue for 1910* and other poultry literature. It is the pathway that thousands of pleased Cyphers Company customers are now traveling—and with uniform success! We are devoting a life work to the problem of the *greatest possible success* for our customers and we want you, **READER**, to profit by what we have learned in *twelve years of careful study and costly experimenting.*

THE FIRST ESSENTIAL to success in the poultry business is to make sure you have fresh and fertile eggs produced by healthy and vigorous breeding stock. The next *important step* is to hatch these eggs in **STANDARD CYPHERS INCUBATORS.** This means large hatches and *strong, lively chicks.* The third step is to brood your chicks in Cyphers Self-Regulating, Self-Ventilated, Fire-Proofed Insurable Brooders. This means *safety, comfort and low mortality.*

THE LAST ESSENTIAL, if you accept our best advice, *based on twelve years' experience*—is to feed dry-grain, granulated chick food, omitting all wet mashers and *guess-work mixtures.* We were pioneers in the manufacture of granulated, dry-grain chick food and have done our share to stop the *wholesale chick murder* that results *every season* from the use of sour food and from irregular feeding. Cyphers Chick Food is a *properly balanced, scientific ration* for young chicks. It has been in successful use ten years! This food is composed entirely of *sound and wholesome grains*—no weed seeds, no by-products, no waste materials—and is granulated and *mixed by machinery.* It is always the same—*always reliable.* Cyphers Chick Food—the genuine article—is *put up in sealed bags* to prevent substitution and to protect the interests of *thousands of earnest men and women* who are raising chickens year after year "the Cyphers Company way." It is a *complete food* for young chicks—positively no other food being required or advisable.

MAYBE YOU HAVE BEEN TOLD that the road to *hoped-for success* in the "chicken business" is strewn with wrecks! And so it is—the poultry plant wrecks of men and women *whose intentions were of the best,* but who did not receive or did not heed *sound advice,* who ignored their own *every-day commonsense,* who were faint-hearted at the start or were beguiled into buying incubators and brooders *mainly because they were cheap.*

The scrap heaps are piled high with "fake" incubators and fire-trap brooders! *This is the gospel truth.* But you have never heard of a Standard Cyphers Incubator being thrown on the scrap heap, not one! Why is this so? *Because the real honest value is there.* Because a Standard Cyphers Incubator will last ten to twenty years and *do the same high class work,* first to last. We leave it to your own good judgment that this is the kind of an incubator you can safely make *the permanent foundation of your poultry enterprise.*

IF YOU NOW OWN A CHEAP, unsatisfactory incubator or a brooder that is proving a death-trap for chicks, IT IS NOT TOO LATE to buy a Cyphers Incubator or a Cyphers Brooder **FOR PROFITABLE USE THIS SEASON.** We guarantee to fill your order from our nearest branch house within forty-eight hours.

We submit that you, reader, *cannot do better than* to profit by the example of thousands of Cyphers Company customers. What they are doing, you can do! We ask you, *in your own best interests,* to follow the *well-considered advice* given in our 1910 free catalogue and other Cyphers Company poultry literature.

If you mean business—and we assume that you do—we can supply exactly what you want—*exactly what you require* to enable you to obtain the *most profitable results* in any branch of poultry keeping, *and can tell you*—and will gladly tell you—*how best to succeed* in the poultry business.

WRITE US FREELY AT ANY TIME FOR INFORMATION AND SUGGESTIONS. Our Bureau of Information was established to *answer your questions* and serve your interests. Many, many successful poultrymen and poultry women of the present day *obtained their start by this means,* and we are ready and willing to help you in the same way. Write today for our 160-page 1910 free catalogue which illustrates and describes our \$40,000 poultry farm, *the largest in the world* owned and conducted by an incubator, brooder and poultry supply company. Address our branch store nearest you.

CRITICAL COMMENTS; WISE AND OTHERWISE.

IS a chicken ever worth \$10,000, or \$15,000, or even \$500? If a man has the best in the world of any variety, or sells specimens at the largest price ever paid in history, and then goes to a show and gets beaten out of every first prize but one, by two or three different breeders, what does it prove? To my mind, it proves that no one man, no matter how much money he has, can always "hog down the patch."

For the writer, one of the easiest things

one wants to fire back a dose occasionally, he will try to take the medicine with as few grimaces as possible.

It is truly wonderful what can be done in mating and procuring some of the new varieties of poultry. The writer saw at the Illinois state fair and at the Bloomington (Ill.) poultry show some of the finest marked Partridge Wyandottes and Partridge Plymouth Rocks, and with the pure penciling in females, black breasts and striped hackles and saddles that the best Partridge Cochin breeders could not rival. When we remember that the

Look out for the coming boom in Polish Fowls! Men of wealth and ability are taking them up and future shows are going to have many of these beautiful fanciers' favorites on exhibition. Eggs and a peculiar beauty are the strong points in the Polish, and the great variety of color in the different varieties is going to make them prominent, especially in the big shows.

One of the best articles I have seen on the comparison—score-card controversy appears in the American Poultry World and written by D. J. Lambert. Among other things he says: "Comparison judging is often where the judge comes in and gives the bird a look and a tag, marks the winners on the award card and goes on his way rejoicing that he got off so easily."

And they call that judging! I for one fail to see where a judge earns his pay for such work. I wrote a Partridge Cochin breeder a short time ago for prices on a cockerel. Every bird he priced me was disqualified on weight, and he distinctly said in his letter that these birds could not enter a score-card show. I wrote him they would be of no use to me, as I would not try a bird that could not enter a score-card show. I can buy all the disqualified birds I want for \$1 each, or could if I wanted any.

Whenever a bird can win in a comparison show that would be disqualified in a score-card show, it proves plainly that comparison is a humbug. Every section of a bird should be carefully examined in every show, no matter what method of judging is used. That is what our entry fees are paid for, and that is what we have a right to demand. From what I have heard about comparison shows, I would not give a dollar for a prize winner at one of them until I could see and examine the bird myself. When you buy a winner in a score-card show, you will get what you pay for, provided the seller does not change the leg band to some other fowl, and that kind of a seller would beat you anyhow. I sent for the first prize Partridge Cochin cock at Du Quoin this winter and received a bird that only weighed eight pounds. I sent him back and now the seller has the money, the express company has the bird and I am out \$5.95.

I believe that half the thoroughbred poultry in this country is sold at a loss.

A. P. J. Cartoon. Scene Four—Farmer John: What! only twenty eggs from 100 hens in three days. I tell you, Martha, this won't do. Let's sell off half of these har mongrels and send to J. G. Budde & Co., Oak Park, Ill., for some of his Red Raven Strain Rhode Island Reds. You know we been readin' what good birds the Reds are, and Budde & Co. seem to have the best, so let's send our order to them. All right, Martha, seeing you are willing, we will use the Potter System and cull out about fifty of your hens that don't lay and take them to market and buy some eggs of Budde & Co., and get some good thoroughbred Red Raven Reds.

in the world is to tell the other fellow just what he ought to do. Advice, like medicine, is easy to give, but not always so easy to take.

Therefore, he is anticipating an enjoyable time telling what he thinks about the ideas of others as they shall appear in this and other journals. And if some

Partridge Cochin has had to furnish the coloring for all these varieties it simply shows the staying qualities of the Partridge Cochin fowl. And the beauty of it all is, that these varieties can be bred and not injure the Cochin as a pure breed one iota. They are as good or better than they ever were and just as popular.

CRUSADER III, a Boston Winner

REGALS AT BOSTON, 1910

Without a doubt Boston is the quality White Wyandotte show of America. The White Wyandotte originated in New England, and to make an exhibit at Boston means that you are competing with the best White Wyandottes bred in the United States. I knew I would be greatly handicapped by condition, as it is simply impossible to take a string of birds 600 miles and show them in the same condition as breeders who live near by and can rush them into the show room on a few hours' notice. However, in spite of this handicap, and, thanks to the superiority of Regal type, I made a grand showing, winning more prizes and more points on cockerels and pullets than any of my competitors, which gave me the gold special offered for

Best Cockerel and Four Pullets

In addition to this I won

Three out of Six Cock Prizes

Which was just three times as many as any of my competitors. Remember, I was competing with the best that money could buy, and in what was easily the hottest class of the season.

MATING LIST FOR 1910

For the season of 1910 I have mated up fifteen exhibition pens, all headed by winners and containing all my exhibition females. Price of eggs from these pens (as they run)

\$5 per 15; \$9 per 30; \$12 per 45; \$24 per 100

Send for free mating list. It gives complete description of the best lot of matings in America today.

John S. Martin, Box 51, Port Dover, Canada

The average age at which birds for breeding purposes is sold is one year. To keep a bird one year at the present high prices of grain will cost \$1. The advertising and showing and getting the birds sold will cost 50 cents. Housing; cooping and labor will cost at least 25c, making a total of \$1.75 for each bird sold; and I believe the average price at which

expenses incidental to it are the only ones who will dispute it.

A writer in Poultry Tribune says: "Opposites should never be mated, as the offspring will rarely be intermediate between the two in quality, but will usually resemble the most positive parent."

That is probably true in regard to

a male with heavy feathering; or vulture hocked hens mated with a round hocked male will be improved at least 50 per cent with the very first mating. The same may be said in eye coloring, if not in coloring of feathers; the trouble with color is that in all out-crossing of different strains, we destroy the penciling in Cochins and all the Partridge-colored

SCENE ON THE POULTRY FARM OF MALTBIE & SHELLEY, GENEVA, OHIO.

all birds are sold will not reach this figure. After making all due allowances, every bird sold under \$1.50 is sold at a loss. And the proof of this general statement is that the breeders who have been longest in the business are the ones who will agree with it. The cheap Johns and amateurs who keep no track of all the

color, but in shape much can be done. A pen of hens with poor combs when mated to a male with a good comb will result in much improvement in combs in the chicks; shape of back and tail can be helped in the same way; and in foot feathering of all Asiatics good results will come at the first mating by using

varieties; the same is true in barred and laced varieties. In-breeding, or line breeding, is very necessary in all parti-colored varieties.

A series of articles on Brahmas in the American Poultry World contain some long-winded arguments on type, shape and symmetry. To me those three are

The Peerless "Ringlets"

True to Their Tradition, Are Again Great Winners at New York

At the Imperial Madison Square Garden Show, 1909
E. B. Thompson's Barred Plymouth Rocks

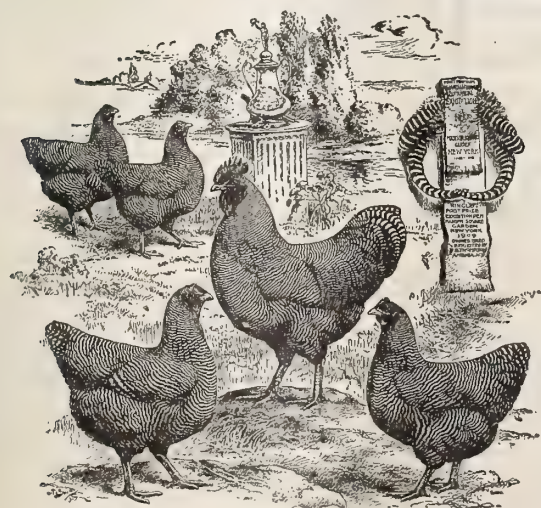

win First, Third and Special Prizes on Exhibition Pens; special prize Cock; special prize Cockerel; numerous specials on hens and pullets, and the Harding \$50 Challenge Silver Cup offered for best exhibition pen. The race at this 1909 New York Show was a Marathon for speed and quality, and my First Prize Silver Cup Exhibition Pen was declared by expert opinion to be the finest ever exhibited—a paragon of perfection—and created a sensation as the finished achievement in modern Barred Rock breeding.

The "Ringlets" are always imitated—but never equalled. They are first in record, first in quality and first in popularity
Their record at New York for 22 years is **GOLD LINED**

—it is a calendar of successive victories demonstrating step by step their irresistible advance towards the world's absolute leadership

The Enormous Prestige of the "Ringlets" Created by Superlative Quality Has Made Them the Standard by Which All Other Barred Rocks are Judged

I now have on my farm the largest and finest lot of superior exhibition and breeding birds I ever owned; they show the "Ringlet" barring and the sharp contrasting colors that win under all judges.

"Ringlet" First Prize Exhibition Pen and Winners of Sweepstakes Silver Cup at Madison Square Garden, New York, 1909.

Richly illustrated 58-page catalogue mailed upon request; it is full of original pictures of New York winners from life. 1000 grand breeding and exhibition cockerels for sale. Elegant hens and pullets in any number. Show birds fit to win in any competition. Eggs from the world's finest exhibition matings: One setting, \$6; two settings, \$11; three settings, \$15; four settings, \$18. You may have the product of my skill reaped by 30 years' experience, at reasonable prices. Your wants will have my very best and personal attention.

Harvester Strains

S. C. W. Leghorns & Columbian Wyandottes

Always layers of large eggs. Twenty eggs from five hens in five days during Feb. 7-12. Always winners of blue. Three firsts, 1 second and 18 specials at A. P. A. show. Send for mating list. Satisfaction guaranteed. Eggs, \$3 and \$1.50 per 15.

Address

H. A. D. Leggett, 21 Rowley Street, Gouverneur, N. Y.

VanAlstyne's Columbian and Silver Wyandottes

During the season of 1909 to 1910 on 4 entries at the Big New York Fair, winning 3 firsts and 1 second. On 4 entries at Madison Square, New York, winning second, third and fifth. On 2 entries at Boston, winning first and fifth. Truly this must show quality and if such is what you want, write to the party who truly has the goods.

J. F. VanAlstyne - Niverville, New York

S. C. R. I. REDS

Again victorious at Anderson. It proves my quality. First cockerel; first, third and fourth pullet, first pen, shape special on cockerel, shape special on pullet. Ninety entries in single class. I did not show any old stock. Just a few good cockerels left. Get my 1910 mating list. It is a hummer.

R. A. Slaughter : R. R. 3 : Greentown, Indiana

HALBACH'S WHITE PLYMOUTH ROCKS

Established a BIG RECORD by winning:

Best Display at Chicago, January, 1907
Best Display at Chicago, December, 1908
Best Display at Chicago, December, 1909

You would be surprised to know that in addition to winning year after year, birds purchased from me or hatched from eggs I sold, have won at the best and largest shows in the country. I could mention show after show where my birds have won the BEST prizes, but I honestly believe this honor belongs to the purchaser. For the season of 1910 I have mated fifteen grand pens. Write for mating list which describes my pens and contains pictures of "LEADER," my first CHICAGO COCKEREL and other famous birds.

H. W. Halbach Box A Waterford, Wis.

BARRED P. ROCKS

THE RECORD BREAKERS

At Chicago in the strongest competition west of New York City, on one entry I won third pen, one of the three most coveted prizes.

At Milwaukee, 1910. On pullets, 1, 2, 4, 6, 7, 9, 10; hens, 2, 3, 4; cockerels, 3, 4, 7; pens, 1, 3; special for best display Barred Rocks; special for best cockerel and pullet; special for best pen; in fact, all specials but one.

At Kenosha, Wisconsin. One of Southern Wisconsin's best shows. I won 1, 2, 3 and 4 pullet, 1, 3 and 4 cockerel and 1 pen.

At Waukesha, Wisconsin. Entered six birds and won 1 cockerel; 1, 2, 4 pullet; 3 hen, 1 pen.

Still have a few of those choice pullet-bred cockerels that I will close out at less than half their value. Satisfaction or money back.

EGGS

\$5 per setting; two settings, \$9; three settings, \$12. From special mating, \$3 per setting. If you want something extra good, write me and mention American Poultry Journal.

Geo. H. Bie, Racine, Wisconsin

synonymous terms. I fail to see how you can make anything out of the word type but shape; nor the term symmetry either. A typical Cochin is a Cochin with the proper shape. A symmetrical Brahma, whether light or dark, is a bird Brahma shaped. Either term may be used and they all mean the same identical thing; a hundred pages of argument would not change it.

Chenon, Ill.

BLACK ORPINGTON BREEDERS, ATTENTION!

The Australian two-year government laying contest, now nearly closed, shows Black Orpingtons lead with a record of 2,082 eggs for the 21 months, leading Leghorns and all-summer layers. Think this over and send at once for the club catalog that tells still more about the Blacks.

The new catalog mailed for 10c or for 4c if you mention this paper. Why not join the club? It guarantees you against fraud in dealing with fellow members.

Dues are only \$1 a year. Send your application at once to the national secretary, Milton W. Brown, Station L, Cincinnati, O.

QUESTIONS AND ANSWERS

Questions will be answered in this department only when full name and address is signed by the writer.

Mena, Ark., March 10, 1910.
Editor American Poultry Journal.

Dear Sir: Seeing question from J. E. H., Westboro, Ohio, I think if he will examine his hen's ears he will find the trouble inside of them. It is caused by a louse or small gnat or fly hiding itself in the upper part of the ear tube and when it moves it causes the hen to turn her head to relieve the buzzing or pain in her head. You can stop this by using 3 or 4 drops of sweet oil in the ear. We had a fine Orpington hen that was the same way and we used this and she is all right now.

Nema, Ark. E. R. Biser & Sons.

Editor American Poultry Journal.

Dear Sir: I notice in your March number of the Poultry Journal that a party described trouble with Buff Orpington fowls, and you request some one to answer, as you are unable to do so. In September, 1909, I wrote you stating the same trouble I had then had with two of my Orpingtons, and that I then had a Light Brahma hen that was also in that condition. You stated at the time that you knew of no remedy and also that you could not give the cause of it. After receiving your reply I studied the case and I finally made up my mind from the way that

the hen was handled that it was a form of the roup. I commenced using Conkey's Roup Cure, and she got over it and I have the hen at the present time and she seems in all respects as healthy as ever and eats as much as any of the rest of my fowls. Trusting this may give A. W. of Ridgeville, Ind., a clue to his trouble.

Addison, N. Y. W. W. Boileau.

Question—(1) Under ordinary care about how long after a hen stops laying at molting time will she begin laying again? (2) Do you think it a good plan to house and feed molting hens separate from the layers? (3) Will sunflower seed aid the growth of the feathers? (4) As a rule do pullets hatched the first of February begin molting sooner than those hatched in April? (5) Do you think Carbon Oil will keep away lice? Or is kerosene better for that purpose and should it be sprinkled on the roosts about once every week or two? R. B. F.

Homestead, Pa.

Answer—(1) From four to six weeks. (2) Yes. (3) Yes. (4) Yes. (5) We prefer kerosene, with which paint the roosts and dropping boards about every two weeks.

Question—(1) Is ground green bone

injurious and even fatal to young chicks if fed in right quantity? If not, how much should be fed? (2) Would beef scrap be better for them? Is granulated milk as good as beef scrap or green bone? (3) What was the trouble with a cockerel that was first discovered moping on the perch one morning with a full crop of corn? This bird was at once placed in a box by himself and given water and in about 36 hours his crop was empty, but would not eat until about 24 hours later and then only a very little bread. For a day he seemed to be getting better, but the fourth and fifth days he got worse again and finally got to throwing himself around in sort of a fit, when I decided to put him out of misery with an ax. W. A. B.

Clarence, N. Y.

Answer—(1) Ground green bone is not considered good for young chicks. They may, however, be fed a little fresh meat, chopped fine, but care should be taken to feed only a small quantity. (2) Beef scraps we consider better than ground bone and this can be given to them in hoppers at all times. Granulated milk is very highly recommended by some breeders. We do not believe it superior to beef scraps. (3) This bird was suffering from congestion of the liver. This disease is not usually observable until it is so far advanced that medicine is of no avail. It is generally caused by the fowls having access to moldy food or being fed on too concentrated a feed. When the disease is noticeable a change of diet is necessary and plenty of green food should be given together with soft food, such as stale

Concerning Chickens

CONSULT US

Why Consult the Newtown Producing Company?

REASONS are good, logical and many.—A few are:

EGG S of our White Leghorns are fertile, large and uniform, pure white in color. Our experimenting and experience give you perfected results to start with.

AMARCH hatch ran 93 per cent fertile eggs. Parent stock is the best and full of vitality, making splendid layers and beautiful exhibition birds.

SIXTEEN prizes out of a possible twenty-five at GREAT PHILADELPHIA SHOW, January, 1910. This gives you an idea of the high exhibition qualities.

ORDER S for Eggs and Baby Chicks, whether large or small, will be given immediate and careful attention. Free Illustrated Booklet sent on request, and questions cheerfully answered.

NEWTOWN is easy of access on the Newtown branch of the Reading Railroad, and the Poultry Farm is but a one minute walk from station. We will be glad to see you any day but Sunday. Facilities and methods of filling and shipping orders unexcelled.

SUCCESS for you will be sure, steady and satisfying if you are wise and practical. The White Leghorn will bring you profitable success.

bread soaked in milk, but no hard grains should be given for a week or ten days.

Question—(1) How can I distinguish a White Orpington from a White Plymouth Rock? (2) Will White Orpington hens cluck in spring? (3) What is the cause of roup? R. W.

Homestead, Pa.

Answer—(1) The White Orpington is an entirely different shaped bird, and if you will read the American Standard of Perfection you will soon learn how to distinguish the different breeds. (2) Yes. (3) Roup usually develops from a severe cold.

Question—I have a White Wyandotte hen that is very lame. I washed her in January to show and since that time she has not been able to walk. I bathed her hip and leg good and she seemed to get along real good. Then we would get a cold spell and it would get worse. At times she would lay on her side with it stretched out straight. She is an extra fine hen and I would not like to kill her. Kindly tell me what is the trouble and what I can do for her.

Phillipsburg, N. J.

W. B.

Answer—This is rheumatism. Give a tablespoonful of common baking soda to each quart of drinking water. Allow no other drink. Rub the legs and joints with carbolio ointment.

Question—I have 20 Barred Rock pullets, April hatched, to which I am feeding a quart and half of scratch feed in the morning and at night, and a mash of bran cornmeal and meat scrap at noon. The eggs, of which I am getting 8 or 10 a day, have a very pale yolk. It has always been my understanding that a Barred Rock had a very deep yellow yolk, and I would appreciate it if you would advise me in your next issue as to what I am doing that should not be done, or leaving undone. I use cabbage for green feed, and the chickens have a range 50 by 75 feet.

Danville, Va.

J. I. P. Jr.

Answer—The color of the yolk varies in shade, and is not always a deep yellow. As the spring advances and the fowls get more natural green food the color will become darker.

Question—(1) What are the true colors of a R. I. Red? (2) Are there supposed to be any different colors to tail feathers? (3) What do you think of this breed to start with?

Answer—(1) See American Standard of Perfection for full description of this variety. (2) Yes. (3) Excellent.

Question—(1) What is an S. C. Brown Leghorn hen worth with a score of 93¾? (2) What is the matter with my neighbor's male bird? His comb is a dark blue or purple, otherwise he appears to be healthy.

Lincoln, Ill.

Answer—(1) 93¾ is not an exceptionally high score for S. C. Brown Leghorn hen, and the price that such a bird would demand would depend greatly on the breeding back of her. Ten dollars would probably be a good price for this bird. (2) This bird is probably suffering from liver trouble. Change of diet is necessary. Feed plenty of green stuff, stale bread soaked in milk and a little cooked meat chopped fine. Also give one of Car-

ter's Little Liver Pills every other day for a week.

Question—(1) Will the feeding of millet hay cause the molting of hens in February? (2) Does marking baby chicks by punching between the toes remain permanent? Or does the mark disappear as the chicks mature? (3) Is it practical to raise chicks in a building where the temperature goes considerably below freezing when I use plenty of litter and a warm brooder, letting the chicks out on the floor to scratch? C. P. T.

Benison, Minn.

Answer—(1) Do not know of any reason why it should. (2) Yes. (3) Yes.

Question—My Langshan pullets became helpless in their legs and have no control over them, and when they try to walk, their legs go out from under them. J. G.

Archbold, Ohio.

Answer—Your fowls have rheumatism, which is usually caused by the fowls being exposed to damp weather or by being confined in damp quarters. Give to each quart of their drinking water one tablespoonful of common baking soda. Allow them nothing else to drink. Rub their legs and knee joints thoroughly with carbolio ointment. A few days' treatment should cure them. Dr. Salmon's book, "Diseases of Poultry," will give you full information about this and all other diseases of poultry. Price of this book is only 50 cents; for sale by us.

Question—(1) When will the new Standard of Perfection be for sale? (2) Which is the best utility ducks, the Indian Runner, White Call or the Rouen? (3) Which is the easiest raised in the city? (4) Do they require being at large or will they do equally well in a large pen? T. P. S.

Omaha, Neb.

Answer—(1) The new Standard will not be ready for distribution until the latter part of this year or the first of next. (2) The Indian Runner. (3) Ducks are rather a difficult fowl to raise in the city. The Rouen will probably do better for this purpose. (4) It is not necessary for ducks to be at large for best results.

Question—(1) Are 20 hens too many for one cockerel where they have free range? (2) Is Kaffir corn a good chicken feed? (3) Is it advisable to use a cockerel in my yards that is under weight? (4) What makes the best litter for chickens to scratch in? (5) What temperature does it take to freeze chickens' combs? (6) How many times a days should chickens be fed when they are confined to the hen house and scratching shed in winter? D. L. D.

Columbia, Mo.

Answer—(1) Yes. (2) Kaffir corn is all right when mixed with other feeds. (3) No. (4) Cut clover hay or oats straw. (5) The fowls' combs are liable to become frozen at any time the thermometer goes 10 below the freezing point or 21 above zero. (6) Three times.

Question—(1) Does the book "Origin and History of All Breeds of Poultry" contain information for a beginner on how to line-breed and out-cross? (2) How many chickens can be kept on a lot 15 feet square with a house 3x6

STATE SHOW WINNERS : : BARRED PLYMOUTH ROCKS

At Springfield Jan. 3-8, 1910. At the last triumph of my Rocks at the Ill. State Show in the strongest line of Barred Rocks ever shown in the state, won the leading prizes and achieved the highest honor that could come to any breed. 1st prize cock, 1st prize display pullet mating, 1st prize for best shape female, special best shape male, special for best colored male, silver cup for best cock, cockerel, hen and pullet, cup for best exhibit of Barred Rocks, 2d cockerel 2d and 3d pullet, 3d on display yard cockerel mating, 4th hen. Eggs, \$5 per 15; \$9 per 30.

Have the grandest pens mated to produce winners. Eggs, \$3, \$5, \$8 and \$10 per 15. Illustrated and descriptive mating list and catalog free.

Covert's Barred Rock Farm .. Willoughby, Ohio

feet? (3) If I keep Houdans and Cochins Bantams together will the Houdan eggs hatch straight Houdan chicks or will they be part Houdan and part Bantam? (4) What book gives information on fancy pigeons, especially Tumblers? R. G.

Baltimore, Md.

Answer—(1) No. (2) About half a dozen. (3) The chances are that the breeds would not become mixed. However, would not advise keeping them together. (4) See page 485 of our March issue for list of poultry and pigeon books.

Question—(1) Have some good chickens, S. C. R. I. Reds, and some S. C. Brown Leghorns. Will it be best to separate them? (2) How long can eggs be kept and hatch good? Should they be turned every day? (3) Will eggs chill in a well ceiled dining room in South Mississippi? B. S.

Battlefield, Miss.

Answer—(1) Yes. (2) Ten days to two weeks. Should be turned half over every day. (3) No.

Question—(1) Which is the best way to feed hens in the summer, hopper feed or by hand? (2) Which is the best way in the winter? (3) How can I make my hens molt early? (4) How long should it be before chickens hatched the first of May will lay? (5) Of what use is charcoal? R. A. R.

Belmont, Iowa.

Answer—(1) This is a question that we are unable to answer, as those using hoppers claim their system is the best and those who do not use hopper claim that hand feeding is best. They are both good. (2) The same answer applies to this as to question one. (3) Fowls can be assisted to an early molt by getting them quite fat and then starving them for about a week or 10 days, at which time the feathers will fall out very rapidly. Then heavy feeding is necessary to put on a new coat of feathers, quickly. Sunflower seed is good to feed during the molting period. (4) Five or six months. (5) Charcoal is an absorbent of gases and will aid digestion and sweeten the crop.

Question—(1) When incubating duck eggs should they be sprinkled to supply extra moisture needed? If so, when begin and how often? (2) What condition causes ducklings to become ruptured and die when leaving the shell?

Toledo, Ohio.

I. G.

Answer—(1) Moisture can be supplied during incubation of duck eggs by wetting a cloth in warm water and spreading over the eggs in the machine. This can be done about five days before hatching time. It is not always necessary to supply moisture. A moisture gage should be used to tell you when moisture is needed. (2) This condition is usually caused by the ducklings breaking the shell too soon, or before the yolk is entirely taken into the intestines.

Question—Which is the best incubator, hot water or hot air, and what is the best to raise chicks, on the ground or on the floor? G. A. H.

Wrightsville, Pa.

Answer—This is a matter of opinion. Some of the breeders claim hot air is the best, others hot water. They are both good. The bare ground is generally too cold for the chicks, therefore a floor is considered best.

Don't This Prove My Statement?

"I've Got the Goods"

trouble, it seems that the strongest claimants for honors should be able to produce a few for the fall shows or winter showing. Now you know what I have done, as well as furnished winners for sixteen years all over the country. Don't this prove

When I state my birds won at Philadelphia, Chicago, Washington, Scranton, Illinois State Fair, Memphis, Portland, Me., and at Vancouver (beating A. Y. P. and Toronto Industrial winners), as well as hundreds of other shows this season North, South, East and West? But, again, no distance is too great. The big Dairy and Crystal shows, England, were also gathered in by Duston's stock. I was physically unable to make an exhibit this season, but my record for three years at the hottest

White Wyandotte

show in the world, Madison Square Garden, where I won First Collection two years out of three, is a final proof. The best in the country shows up there if it can be bought. Just ask the boys what about the shows of '08 and '09, when practically all of the Boston winners of a week later never got a "look-in." Don't that tell of quality? The best judges say "it was the best judged class there has been at New York in years." Now, here is the prettiest part of the whole thing to me, and to my customers as well. I did not have to go out and put a small fortune into buying a whole flock or part of one. I just "toddled" up to my own houses, picked out my birds, washed them, and sent them to the show, winning first, fourth and fifth cockerel, first and third pullet, second hen (considered by many the most typical female in the show), fifth cock and second pen (only for the tail of the cock being injured in washing, the pen would have been an easy first), and first collection for the second time in three years. Never been equaled by any White Wyandotte breeder. Now, who dares stand up and say they won at New York on birds of their own breeding? It's interesting, this story of showing and winnings. It is expected that one may buy winners at times and perhaps for some years, but barring accidents and

Duston's White Wyandottes

are a winning strain and that "I've got the goods"? I can furnish the highest class breeding birds in cocks, cockerels, hens and pullets, also stock of medium and average quality; write me your wants today. Eggs ready to ship now from the choicest matings I ever sold from. You get the benefit of it this season. There is going to be a big rush. Order early. Price \$5.00 a set; two sets, \$8.00; three sets, \$10.00; five sets, \$15.00, or \$20.00 in hundred lots. Send 10c for illustrated catalog to the breeder that has made possible the World's Best Flocks.

Arthur G. Duston, Box 1020, South Framingham, Mass.

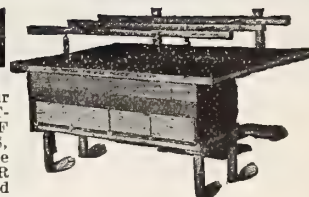

henery outfit shown above is but one of three styles and twelve different sizes which we make, so no matter how your house or pens are arranged, they can be completely and cheaply fitted up with POTTER SANITARY FIXTURES.

A \$40 Hen House

THE POTTER PORTABLE SANITARY HEN-HOUSE shown above is but one of several styles and sizes which we make. This house is 8x10 ft. in size, completely equipped with two Potter Outfits; two pens, room for 15 hens in each. Can you beat this house for \$40? We now make the complete line of Portable (K. D.) Poultry Houses, Brood Coops, Pigeon Lofts, etc., formerly made by the Sanitary House Co., of Lemont, Ill. Any poultry keeper wanting complete, up-to-date and cheap houses and coops of any kind should not fail to get our catalog fully describing these goods.

Don't Build

that new hen-house or think of fixing up the old one until you get our large 100-page catalogue (over 100 illustrations) telling all about POTTER SANITARY POULTRY HOUSE FIXTURES, VERMIN PROOF ROOSTS, PERFECTION FEED-HOPPERS, SIMPLEX TRAP NESTS, feeds and supplies of all kinds—just what the progressive, up-to-date poultry keeper wants to more profitably carry on his work. POTTER FIXTURES have been on the market over eight years and are used and recommended by thousands of poultry raisers. They are complete, convenient and sanitary and great savers of time and labor. The

Winter Layers

are what every poultryman wants, so that when eggs are high every hen more than pays for her keep. A full egg-basket means a full pocketbook. Why not take time by the forelock and get in line to have a flock of all laying hens, not half layers and half drones and barren hens that keep you just even because of expensive feed. It's easy to have a flock of all laying hens if you will only do the same as thousands of other poultry keepers are doing and use

THE POTTER SYSTEM

of selecting laying and non-laying hens and increasing egg-production. This is the original system which tells you how to keep a flock of only laying hens and thus get more egg-money. Right now is the time to lay your plans for a flock of winter layers by using the Potter System and picking out the layers from the non-layers, so that you keep only laying hens. You should not kill or sell a single hen until you know whether she is a layer or not. The Potter System teaches you this. Our 100-page book entitled, "DON'T KILL THE LAYING HEN," contains the complete POTTER SYSTEM and all the secrets of selecting laying and non-laying hens and increasing egg-production. Below we give a list of some of the subjects covered.

The Potter System Teaches You

How the Egg Grows; Nature Controls the Laying Organs; The Secret of the Potter System; How to Pick Out the Non-Laying Hen; How to Determine the First Stage of Egg Development; To Know How Far the Hen is Toward the Laying Point; How to Pick Out the Hen That is Laying; To Know the Hens That are the Most Prolific Layers; To Know How and When to Cull the Non and Poor Layers Out of the Flock; To Know the Ones to Sell and the Ones to Keep; Why Early Spring is the Best and Most Practical Time to Cull the Poor and Non-Layers Out of the Flock; How to Tell the Hen That Has Laid Out a Batch of Eggs and Other Information Regarding Setting Hens; The Best Way to Break Up the Broody State; How Eggs Can be Produced in Winter, and Some of Nature's

Laws Regarding Egg Development Explained; How the Laying Organs are Affected when the Hens are Infested with Vermin; How to Avoid Wintering Hens That are Likely to be Poor Winter Layers; How overfeeding Before Egg Development Starts May Reduce the Egg Production; The Laying Hen Should be Educated—When, How and Where; How to Separate the Poor Layers from the Good Without Handling, or How They will Separate Themselves; How to Buy Hens in the Fore Part of Winter, That would Make Good Winter Layers, and Sell Them again at a Good Profit in the Spring; How Roup and Similar Diseases Affect the Laying Organs of Hens; also How the Laying Organs Become Disabled by Other Causes; Ten Ways to Suspect Hens That are not Laying.

If you want your hens to make you more egg money this winter than ever before, you will not delay in writing for our large catalogs and circulars telling all about our fixtures, houses, etc., and the Potter System. Send two red stamps to cover postage on our catalogs and your request will have prompt attention. Potter Poultry Products are for Particular Poultry People, and if you are particular, you will write us today.

T. F. POTTER & COMPANY, BOX A, DOWNERS GROVE, ILLINOIS

Question—(1) What is best to feed young turkeys when first hatched? (2) Are the Buff Turkeys of as wandering a nature as the Bronze?

Answer—(1) In feeding young turkeys care should be taken and avoid feeding soft or sloppy food. Stale bread soaked in sweet milk or curd,

Mrs. E. M.

that they may be sold as market eggs if necessary? (2) Are hen or pullet eggs good for hatching strong chicks in late spring after they have been laying all winter, with a cockerel with them? (3) Under same conditions would their eggs prove good for hatching if not with a cockerel until spring? (4) Would fertility run high with 30

on the vigor of the male bird. If he is a good vigorous bird the eggs will hatch strong chicks. (3) Eggs would no doubt prove good for hatching within 10 days or two weeks after cockerel was put with them. (4) No.

Question—I have a poultry yard 150 feet by 150 feet and have divided this

FIRST PRIZE COCK - MADISON SQ. GARDEN, N.Y. BRED AND OWNED BY KELLERSTRASS FARM, KANSAS CITY, MO.

HIGHLAND QUEEN.

Second hen at Chicago; fourth at Buffalo, N. Y. Bred and owned by Covert's Barred Rock Farm, Willoughby, Ohio.

but never feed all they will eat. Chick food can be given as they get older. (2) All varieties of turkeys will roam more or less, Buff Turkeys are no exception.

Question—What is the best way to prevent fertile eggs from hatching so

hens where one cock is with them one day and another the next day?

Homestead, Pa.

R. B. F.

Answer—(1) We do not advocate any method of spoiling eggs for hatching, or killing the fertility. There are several methods of doing this, but we do not advocate them. (2) This depends

lot into five parts, making each pen 30x150 feet. I have built one house each on four of these pens with ground floor 6x6 feet, front of houses 8 feet high and back about 6½ feet, all houses covered with 3-ply tar paper. How many birds should I house in each house and keep in each yard and have

Champion Intruder, 1st cock and champion male, N. Y., 1908-9, both cocks and chks. competing. 3 of the last 4 champion males at N. Y. have been bred at Grove Hill.

MORE FIRSTS

OWNERS

a very good location except a little low and roly. I expect to have the nests in the house in each yard. I have not moved my poultry in this yard yet. Before or soon after they are moved in I expect to paint the inside of each house with coal tar. Do you think this a good idea? I have found it to be one of the best remedies

in the front of the house on the east side. Whitewashing the interior of the houses is better than coal tar. To the whitewash add a little crude carbolic acid. Coal tar can be used on the roosts, but would not advocate its use on the walls.

Question—(1) I have a Buff Rock

can produce fowls with a record of 200 eggs or more it would pay you to advertise that fact.

Question—Will you please tell me what to do to eggs to keep them from hatching and not injure them for food? Nolensville, Tenn. Mrs. M. S.

Answer—Take the male birds out of the pen.

VICTORY---Not Merely a VICTORY BUT A MADISON SQUARE, NEW YORK, VICTORY For BRIGHT'S BROWN LEGHORNS

Three firsts out of five or three times as many as any other competitor. First and second cocks on two entries; first and third cockerels on three entries; first pen on one entry. Don't forget that this line of birds has won the most notable victories in all Leghorn history. Pan-American, St. Louis and Jamestown Exhibitions, New York, 1906-7-8-9-10. Boston, 1903-1909. Some splendid males of both Cockerel and Pullet lines for sale. Some breeders of Sure Winners. Reasonable.

GOOD TO KNOW

by C.W. Zimmer

This department is open to all readers and advertisers in the central territory and they are invited to send in all poultry news items that come to their attention. Address C. W. Zimmer, central representative, Ft. Wayne, Ind.

Notice—My friends and advertisers will kindly address all communications to American Poultry Journal, Chicago, Ill., and if you desire the matter to have my attention mark it, For Zimmer. Personal matter should be enclosed in a second envelope and marked "Personal."

The C-U-R-A Chemical Co., Dept. A, Akron, Ohio, have a remedy for roup, canker, gapes, throat and head trouble which is giving satisfaction. They send a sample free. Send for one.

If you breed Barred Rocks and want to make money out of the poultry business you should read the ad. of the Pittsfield Poultry Farm Co., 102 Main street, Pittsfield, Maine, on page 515. They breed a strain of Barred Rocks that are bred to lay first and afterwards they have produced the color and type necessary to win. They are prepared to supply you "baby chicks" or eggs for hatching; also offer to ship you breeding stock on approval. What more can you ask?

If you have anything "good" let the public know it. Good things, no matter what, always elevate, and that

is what we should all try to do in this world. Good things are scarce and always in demand.

The only way to know is to try an ad. in American Poultry Journal. We lead, others follow as a business bring-er as well as in other things.

Chas. Shields, proprietor Oak Nest Farm, Hookstown, Pa., was a prominent winner in both S. C. and R. C. Reds at the Pittsburg show.

Ben W. Wilhite, Crawfordsville, Ind., breeds some fine S. C. Black Minorcas and Buff Orpingtons.

The Connecticut Agricultural College is doing good work in educating students upon all phases of poultry raising. The course consists largely of lectures and demonstrations, but each student must do some practical work. Course begins July 5 and closes July 29 and the cost is very small. An illustrated prospectus may be had by addressing Prof. F. E. Stoneburn, Connecticut Agricultural College, Storrs, Conn.

Change of copy for your ad. MUST

reach us by the 15th of the preceding month.

Mr. Geo. Schmidt, breeder of the "Crown Prince Strain" of White Wyandottes, has won on his birds in the hottest kind of competition at Indianapolis for several years past. Send for mating list. Address Box Z, Martinsville, Ind.

C. C. Heron breeds Pekin ducks that are truly mammoth, and he has won many blues on them. He also breeds Black Orpingtons and S. C. White Leghorns, in which variety he sells baby chicks. His address is Box 22L, Hope, Ind.

Have the prices of eggs the past winter convinced you there is money in poultry? Better send for a setting of thoroughbred eggs and raise some birds to lay for you next winter, for eggs will be still higher another year.

It's easy enough to look pleasant and smile when everything goes your way. But the man that's worth while is the man with a smile when everything goes dead wrong.

Of course an ad. in the American Poultry Journal costs a little more. The best always does. But it's the cheapest in the long run.

Mr. Lawrence Jackson, who breeds White Orpingtons, reports winning four silver cups as special prizes at the Cleveland show.

Odenheimer & Odenheimer, Lumber-

Easter Offering

Beautiful Flowers : Choice Varieties

Our Easter Offering to you is this choice collection of ten most popular varieties, including all colors and lovely variations of color, which are easily grown, directions for growing accompanying each packet. With this select collection you will have a profusion of beautiful flowers all summer. If you love flowers, you should have this collection.

How You Can Get It Absolutely Free

Send us two new subscribers to American Poultry Journal at 50c and for your trouble we will send you one complete collection—10 full packets—including all colors in Sweet Peas, Cosmos, Pansy, Nasturtiums, Verbena, Poppy, Phlox, Aster, Alyssum and Mignonette.

We will also send a complete set to each of the people who subscribe. You should be able to secure two subscriptions in ten minutes. Your next door neighbor will want this beautiful collection and will also enjoy reading A. P. J., which is filled with valuable information on the successful rearing of poultry.

These 10 packets, if purchased at retail, would cost you at least one dollar, perhaps more, and we give them FREE.

HOW CAN WE DO IT—We wanted to make you an Easter Present, and early last fall we contracted for several thousand of these collections, getting an extremely low wholesale price; therefore, we can do it, otherwise we could give you about one package.

TAKE ADVANTAGE OF THIS OPPORTUNITY and secure your flower garden FREE. If you can't secure two subscriptions, we will extend your own subscription 1 year for 50c and send you one collection.

YOU MUST ACT QUICKLY or our supply may be exhausted. Address

American Poultry Journal Pub Co., 358 Dearborn St., Chicago, Ill.

World's Best Orpingtons

White, Buff, Black, Rose and Single Comb

Have won over 1,200 prizes, cups, medals, diplomas, etc., at such shows, as Madison Square, N. Y., Jamestown Exposition, Chicago, Ill., Philadelphia, Pa., Boston, Mass., Washington, D. C., Allentown, Pa., Easton, Pa., etc., etc. Over 60 acres devoted exclusively to poultry; several thousand breeders. Undoubtedly the largest Orpington farm in America. Please bear in mind that the Orpington is the most beautiful, popular and profitable fowl in America today. Lay more eggs than the Leghorn, grow faster than any breed in existence. No need of selling surplus stock to market when you start with **Haupt's Chicks, Eggs or stock.**

EGGS—Buff, Rose or Single Comb, \$2.00, \$5.00, \$7.00 per 15; \$12.00 per 100. White, Black, Rose or Single Comb, \$3.00, \$5.00, \$7.00 per 15; \$20.00 per 100.

CHICKS—Buff, Rose or Single Comb, \$3.75, \$5.00, \$10.00 per dozen; \$25.00 per 100. White, Black, Rose or Single Comb, \$5.00, \$10.00 per dozen; \$35.00 per 100.

"QUALITY" BARRED ROCKS

BREEDERS FOR SALE NOW

I have hatched a great number of chicks from my superb pens, hence all of my **CHAMPIONS OF THE BREED** are offered at low prices. There is time now for you to get some fine chicks from these excellent breeding birds. I have cockerel and pullet breeders in plenty and they will go at right prices. If you want some of the stuff that I have reserved for my own breeding get your orders in now. Before the egg season started I was sold out of stock and returned many orders. Now if you want the quality you could not get before let me know. Correspondence is a pleasure if you mean business. I have one thousand chicks growing and invite you to come and pick out what you want or will take great pains to tell you exactly what it is.

J. M. Kline, Downers Grove, has been breeding White Wyandottes for eighteen years and for many years has been producing birds that have won gold medals, silver cups and blue ribbons galore. See his ad. elsewhere.

—o—

WHY HE BREEDS BUFF LEGHORNS.

During a recent conversation with Mr. F. A. Tecktonius, Racine, Wis., we asked him to tell our readers how he came to

that it seemed evident that I must again 'begin at the beginning' and determine by actual test the most profitable breed, and the most practical way of handling them.

"This decision resulted in the purchase from noted breeders of seven popular breeds, viz., S. C. White Leghorns, P. C. Brown Leghorns, S. C. Buff Leghorns, Barred Plymouth Rocks, White Wyandottes, Black Langshans and Buff Cochins.

"These different pens received an entirely impartial test, supplying the same kind of quarters, the same systematic feeding, and keeping close record of the feed, production of eggs and condition of the fowls. There was no marked advantage in a five months' record—not until the moulting season began (commencing July 1 and ending in November.)

FIRST PRIZE COCKEREL, NEW YORK, DEC 27 1909 JAN 1910
BRED & OWNED BY DWY YOUNG, MONROE, NEW YORK, U.S.A.

The S. C. White Leghorns produced by Mr. Young have grand size and wonderful shape; these, with excellent head points, combine to make an ideal type of Leghorn, the equal of which are hard to find. The cockerel shown above possesses this combination and furnishes the reason why the Young strain of White Leghorns win.

start in the fancy poultry business and why he took up the breeding of Buff Leghorns. Following is what he says:

"As to the business of poultry raising, I was first impressed by the good profits being quietly made by a number of persons within range of my observation. I began to investigate—became interested—and like most of my fellow workers in this line, am now an enthusiast on poultry raising and breeding in general, as a business, and the raising and breeding of Buff Leghorns in particular.

"I lost much valuable time in the beginning through my efforts to create a practical and profitable working basis by culling a general knowledge of poultry raising from poultry journals and the literature of the best authorities, only to find such a general diversity of opinion

"A severe test as to the hardness of the different birds was shown with the development of rouse among the Rocks, occupying a pen with the Wyandottes next on the right, to which the disease was soon communicated, while the Buff Leghorns (immediately to the left) showed no indications of being affected by the disease.

"After these tests, favoring the S. C. Buff Leghorns to the extent of resisting the most common and dreaded poultry disease, I had to appreciate their worth and felt entirely satisfied as to the choice of breed I must make, although I'll admit that my knowledge was gained at considerable expense.

After disposing of all other breeds and increasing my stock to the number of 400 of the finest single comb Buff Leg-

horns that it was possible to purchase, I found a great amount of work in systematizing and perfecting, which I did by adding to my breeding pens many of the leading prize winners of the country. However, not until I felt that I had completed my stock and had added my own winnings from the principal city exhibits of the country, did I begin to advertise, and I am now able to fulfill any promise made and to stand back of every advertisement with a guarantee of satisfaction to every purchaser of my birds.

"My advertising consists almost entirely of as interesting, concise and attractive copy as (in my opinion) it is possible to produce, carried in the leading poultry journals. Although a thorough test has not been made of the 'general' publications in which poultry advertisements are sometimes carried, I am very well assured that I am using the best mediums for the poultry business.

"Coupled closely with the Journal advertising, however, I endeavor at all times to give entire satisfaction, which always proves to 'win out' as the best 'advertising medium' for actual case results and repeat orders.

"The Buff Leghorn is the result of scientific breeding by English breeders, who became interested in a yellow bird with Leghorn form shown in Denmark in 1885. After many years of conscientious and careful work, the Single Comb 'Buff' Leghorn was introduced and established as a distinct breed.

"The first Buff Leghorns brought to America was by Mr. A. D. Arnold, of Dillsbury, Pa., in 1892, who purchased the first prize cockerel and pullet of Buff Leghorn breed, paying \$325 for the pair. From these prize birds came the stock from which I purchased from breeders.

"The Buff Leghorn has great advantage as a product of Denmark and England in being able to successfully resist cold and disease in our own climate. Because of this hardiness, breeders of these birds assure that not more than 2 per cent are lost in breeding.

"Buff Leghorns develop quickly and are thus able to protect themselves early by getting up and out of reach of vermin when roosting. This is a feature that greatly lessens the per cent of loss in brooding.

"The Buff Leghorn is not only one of the most hardy, but most active of all domestic fowls. This activity enables them to resist or readily throw off disease, as it assures their exercising, even when cooped up in small space. Many times they have seemed immune to contracting disease, when other breeds were easily infected.

"The activity of the bird also makes them excel as self-providers, which is a quality not to be overlooked, as this natural disposition to forage their own living is another mark of hardiness. Because of their activity they keep warmer and require less heat during the cold season than almost any other fowl, and in an item of expense, when a large number of birds are kept, this is a quality worthy of mention.

"The above named attributes can only add to the general healthiness of the fowl at all times, and with reasonable protection and care the common chicken diseases will not pervade the pens of Buff Leghorns. They readily adapt themselves to their quarters, and if not treated harshly are not wild.

"As the Buff Leghorn is the popular weight for market purposes, they are always an easy seller, and ready buying

125 Egg Incubator and Brooder Both For \$10

Why pay more than our price? If ordered together we send both machines for \$10.00, -freight paid east of Rockies. Hot water, double walls, dead-air space between, double glass doors, copper tanks and boilers, self-regulating. Nursery underneath the egg-tray. Both Incubator and Brooder shipped complete, with thermometers, lamps, egg testers—all ready to use when you receive them. All machines guaranteed. Incubators are finished in natural colors showing the high grade lumber used—no paint to cover inferior material. If you will compare our machines with others offered at anywhere near our price, we will feel sure of your order. Don't buy until you do this—you'll save money. It pays to investigate the "Wisconsin" before you buy. Send for the free catalog today, or send in your order and save time.

BARRED PLYMOUTH ROCKS**

E. B. Thompson Pure Ringlet strain. All of my pens are scored. Eggs from \$2 to \$3 per setting of fifteen. : : : : : : :

G. A. Barnett - R. R. 1 - Clinton, Illinois

means that the top of the market price can always be had.

"There has been much discussion regarding the producing of the uniform Buff color from Buff birds, some claiming after some failures in breeding (resulting mostly from their own errors) that Buff chickens will not be produced from mating Buff birds.

"Because of the higher coloring in the male birds (as is usually the rule) and the proclivity of the males to show this high color, I will admit that it is a very difficult matter to entirely eliminate this tendency, and this is a matter which should indeed receive serious attention from all fancy breeders.

"It is a fact that it requires careful and persistent effort to obtain entirely satisfactory results. There are many points that demand special treatment, regarding the proper method of eradicating hereditary tendencies, but space prohibits giving details in this article.

"But if the mating of birds is carefully graded until there is no foreign color of any kind, there will be no further inclination toward white or light color in the results of the mating. It requires, as a rule, three generations to firmly establish any pure feature.

"We breeders have all experimented more or less with the housing of chickens, and I presume I have gone in for my share of experimenting. But I also believe, in my case, that this has not been in vain, as I have reaped some valuable experience, the results of which can only be given briefly in this short article.

"My experience has taught that the first and most essential requisite to the raising of strong, healthy poultry is plenty of fresh air, at all times. Consequently my poultry buildings are all of the fresh air type.

"Second, there must be thorough cleanliness and sanitation; therefore I put concrete floors in my buildings as an assurance of these conditions.

"As to arrangement of buildings: At the front, back and end of buildings are air spaces of four inches, with tar felt on outside of studs, as also on the inside, to insure absence of drafts. Sheeting and drop siding are the only means employed for maintaining a suitable temperature in the roosting quarters—these all being located at the north wall, directly below a run of series of exhibiting (or hospital) coops, which serve the purpose of a roof for the roosting quarters.

"At a distance of two feet and four inches below the hospital or exhibition coop floors are the dropping boards. Hinged to the bottom of these are a series of nests twelve inches square, these being supported by hangers from the joists of dropping boards above referred to, and which still allows 1 foot 6 inches between bottom of nests and the main floor. With this plan of construction the birds, when at roost, are confined to a space of 2 feet 4 inches by 3 feet 6 inches, the latter being the depth of the dropping boards. And for use during the severe winter weather (when the mercury is below zero) there is a canvas curtain which hinges to the hospital floor joist, dropping directly in front of the roosting place, thus confining and making use of the natural heat generated by the fowls while roosting. Each pen is provided with a skylight, this supplying light to all sections of the pen, when used in connection with the correct shed roof construction. To be more definite, my buildings measure on the north side 8 feet high and on the

**Ideal Poultry Land
5 Acres \$125**

\$5 Down, \$5 Monthly

Only 19 miles from Atlantic City, N. J., the greatest summer and winter health and pleasure resort in the world. Handy to other coast resorts and New York, Philadelphia, Baltimore and Washington, the best markets in the country.

Location and other natural advantages are not excelled anywhere. Climate is mild and healthful. Plowing was done in this locality during every month last winter. Winter eggs and early broilers bring highest prices in the markets.

Berries, fruits and vegetables can be produced with good success, insuring an income from the land during practically the entire year.

Large manufacturing town nearby. Title insured. White people only. Booklet free. Write today.

FRAZIER COMPANY,

691 Bailey Bldg., Philadelphia, Pa.

front 5 feet, the roof in all cases having a covering of rubberoid.

"With further reference to the pens, each has an opening of 2½x4 feet, with an outside covering of a good grade of muslin cloth. On the inside of the opening there is a canvas frame swinging on hinges; this, during mild weather, being kept hooked up to the ceiling joist, being lowered, of course, during severe weather.

"Directly west of my main breeding pens and joining to same is my granary and shipping room, 22x14 feet in size. To the west again of this building is the corral for the free range flock, this being arranged in the same manner as the breeding pens above referred to. Here the birds have free range of the entire grounds at will, thus getting plenty of exercise and a variety of natural food which they work for themselves, thus insuring their strong and healthy condition at all times.

"The outside runs of the breeding pens are 10x80 feet, and at the farther end is a watering trough, 7 inches wide by 4½ inches deep, this being connected by pipe to the overflow from the farm well. All pens and colony houses are equipped with automatic feeders, which I find very convenient and practical. A dust bath 2½ feet square is also placed in each pen.

"Much discussion is given to the feeding and care of the young chicks, and it is indeed a subject demanding careful consideration, as much unnecessary loss is often realized from lack of knowledge regarding first feeding.

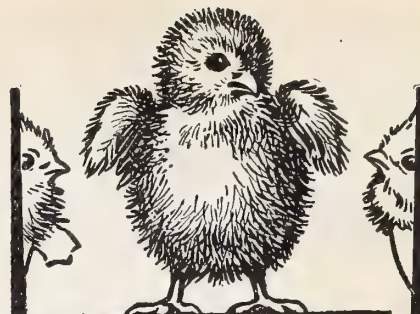

"After following the best methods suggested by others, coupling the while with my own extensive experimenting, I believe I can now assert that the method I have used with reference to the feeding and care of Single and Rose Comb Buff Leghorns, for the past seven years, is a success."

BABY CHICKS OF HIGH QUALITY.

We wish to call particular attention to the fact that the Pittsfield Poultry Farm Co., 102 Main street, Pittsfield, Me., are offering baby chicks for sale from their high grade Barred Plymouth Rocks. This firm is one of the most extensive producers of Barred Rocks in the country, and when you buy eggs or baby chicks from them you can depend on getting just what you pay for. They mail free their large illustrated catalogue and we ask our readers to send for it and place their order now. To insure prompt reply be sure and address 102 Main street, Pittsfield, Me.

Naumburg & Booth, 1532 West Bancroft street, Toledo, Ohio, are breeders of the White Quill White Wyandottes and S. C. White Leghorns, and make a specialty of supplying winners in this variety to those who are unable to produce them. Birds of their breeding have been winners at Detroit, Toledo, Ithaca, Marion, Wapakoneta, Elmore and Sylvania. They have mated up a number of extra choice pens of both varieties this season and are now prepared to fill all orders promptly and satisfactorily. Write them for prices and particulars and mention American Poultry Journal.

Who said American Poultry Journal doesn't lead?—188 pages for March; 164 is as close as the follow—the others, I mean.

**Is It Worth \$1.00?**

You can make every chick you can raise worth a dollar to you. Other poultrymen are doing it. You can't afford to lose a single chick. Insure their lives by using

GERMOZONE

The poultry medicine with a *quarter century's* actual experience to back it up. Not only *cures* but *prevents* all chick diseases. It builds them up; enables them to successfully withstand the ravages of

Bowel Trouble, Diarrhoea, Roup, Canker, Bronchitis, Inflamed Throat, Swelled Eyes or Head, Watery Eyes or Nostrils, Sleepy Disease, etc.

Germozone is easy to give and almost certain in results—simply place in drinking water—chicks take their own medicine. Also excellent for applying outwardly to cure Bumble Foot, Chicken Pox, Frosted Comb or Wattles. Ask your dealer. Don't forget the name and don't take a substitute. If he does not have it send us 50c and we will send to you *prepaid* and with it one of the most practical books ever published, "Lee's Chicken Talk," written by Mr. Lee himself. Address

LETTERS from our SUBSCRIBERS

American Poultry Journal.

Dear Sir: Replying to enclosed letter regarding the formation of an S. C. Black Leghorn Club, would say that we should be more than pleased to have you assist us as far as you can in the formation of it. Milton W. Brown.

Editor American Poultry Journal.

Dear Sir: I wish in the interest of

Single Comb Black Orpington pullet, weight 9 pounds, never exhibited. A bird wonderful in type and color. Bred and owned by Will H. Schadt, Goshen, Ind.

you can do, and hoping at some future time to repay, I remain, yours respectfully,

E. C. Babson,
Danielson, P. O. Box 329, Conn.

Editor American Poultry Journal.

I would be very glad if you would note in your paper that a testimonial that appears in my catalog from Mr. C. A. Moxley, of Taylorville, Ill., was published in my catalog through a misapprehension. Mr. Moxley advises me that the bird referred to was not hatched from eggs bought of me, as I had supposed from his letter, and so the credit does not belong to me. This notice in justice to Mr. Moxley was

that grand breed, the Buff Plymouth Rock, you would allow me a small place in your valuable journal. Last month I inserted a small classified ad. and have been busy since the 2d of the month. It certainly pays to advertise in American Poultry Journal. One fancier I heard from, however, has got me guessing, so I thought perhaps some of the thousands of American Poultry Journal readers could help me out. He wanted a cockerel and this is his description as I copy from his letter before me: "I want one 6 or 7 lbs., heavy legs, not over 1 year old, golden buff to skin, bay eyes, yellow wattles and ear lobes! Cinnamon tail, no black

feathers.' Now if anyone has a cockerel of this description I would be pleased to hear from them, as I certainly have a desire to see one of that kind. I have some beauties, but mine have red wattles and ear lobes, so you may readily see I failed to make a sale there. The gentleman did not state what he thought would be a suitable price, and poor me, ignorant of such a creature with "yellow wattles and ear lobes," must confess I'm stumped. Centralia, Ill. H. L. Ragsdale.

Editor American Poultry Journal.

We showed some S. L. Wyandottes this season at East Liverpool Dec. 26-31, 1909, and at Masillon Jan. 5-9 1910. At East Liverpool under Judge Emmel we won first and second cock, first and second hen, third pullet and second pen. At Masillon under Judge Gault we won first hen, second and third cock, third pullet and second pen. We showed at Wheeling, W. Va., Jan. 17-22, and our birds did not win any firsts. At Liverpool Emmel gave us the following scores: First cock, 92¼; first hen, 92¼; second hen, 92; third pullet, 92¼, and the pen, 182.25. At Masillon Gault gave us: First hen, 93¼; second cock, 90¼; third pullet, 90¼; second pen, 182.18. Now as we understand the rules of shows a bird is not eligible to first unless a score of 90. Any one at a glance can see all our birds beat this mark, but still Mr. Miles, the Wheeling judge, did not give them any firsts, although nothing beat us but cock bird. If our birds were not in condition we would not say a word, but I know they were as good if not better than either of the other places. Now what should one expect from a judge? When we asked Mr. Miles his reason he did not seem to have any except that they were not good enough. If a hen scoring 92¼ and 93¼ is not good enough we want Mr. Miles to tell us through your paper what he considers a first prize hen. Smithfield, Ohio. Linn & Bargar.

Editor American Poultry Journal.

Dear Sir: We are frequently asked through our daily mail our reasons for breeding the Single Comb Buff Leghorns and invited to state the favorable points in them that have contributed to our success. In reply to the first question, there is but one answer: We consider the Single Comb Buff Leghorn the most profitable domestic fowl in existence. In the acknowledgment of the second interrogative, we wish to call your attention to the following merits of this variety as factors of success which are conclusive proofs of their true sterling worth.

Single Comb Buff Leghorns are very hardy, showing wonderful vigor and vitality both as chicks and mature fowls, whether kept in yards or on free range. We have never seen a fowl that would reach 1½ to 2 pounds as quickly as these. Repeated tests have proven that they will dress out a larger per cent of edible meat of superior delicacy than any of the five or six larger fowls that we have tested. As layers of large white eggs they can not be excelled. They are larger than the other varieties of Leghorns, do not show dirt like the Whites and breed truer than the Browns. There is not a Buff bird in the American Standard of Perfection that will compare with them in the perfection of color, and as mated by us one hundred per cent of exhibi-

LET CHAS. A. CYPHERS SAVE YOU 50% ON AN INCUBATOR

I Can Do It, Just As I Promised I Would

MY new incubator—The Buffalo—has made good in every direction. Every practical poultryman who sees it wants one at once. It is no experiment, but a demonstrated, proven success. It has all the quality of the best high-priced incubators at *Just Half the Price*. In spite of the urgent requests from my many poultry friends for a cheaper incubator, I always said I'd never make a low-priced incubator unless I could make one as good as the high-priced kind my name has always been associated with. *I Have Made Good*. My principle is sustained and the demand of my friends gratified. I am proud of my new creation. The Buffalo is simply a wonder. There is nothing cheap about it but the price. I offer you an article that is second to none in durability, reliability, or quality. You can't get a better incubator than The Buffalo, no matter how much you pay. I guarantee to actually save you one-half.

THE BUFFALO MADE BY CHAS. A. CYPHERS IS BEST OF ALL

for I have retained and developed the same correct principles of internal construction used in my former designs. My new creation has all the good features of the incubators I have made in the past, without the high price. The materials are the best money can buy. Where I make the big saving is in the method of manufacture. I simply cut loose from the old stereotyped ideas and worked out a new system of machinery, tried out different materials that cost less, but are just as good as others use, and are far more practical. This enables me to save you just half.

The Buffalo Is a Marvel!—Weather-proof, fireproof, easy to care for, economical to operate, sure to give a high percentage hatch, and guaranteed to do all or more than any other incubator on earth will do, no matter what the price. If there ever was a perfect incubator, it is The Buffalo.

Compare these prices with what you formerly paid for my Incubators and Brooders. The prices are a third or half less, while the quality is just as good. Without fear of contradiction, I can say the quality is better.

ROBERT H. ESSEX.

The host of friends of Robert H. Essex will no doubt be surprised and at the same time pleased to learn that he is now at the head of the Model Incubator Co., of Buffalo, N. Y. Mr. Essex became well known to the poultry fraternity some ten years ago when he became managing editor of Reliable Poultry Journal, and it was mainly through his untiring efforts that this magazine became one of the leading poultry publications. After serving five years in this capacity he gave up his position on Reliable Poultry Journal and identified himself with the Cyphers Incubator Co., at Buffalo, N. Y., where at different times he has been office manager, financial manager, advertising manager and assistant general manager, and at one time was the second largest stockholder in this company.

Having filled the above mentioned positions with credit, he is well qualified for the duties he now takes up as president of the Model Incubator Co. We predict for him nothing but suc-

cess, as his motto is: "Be on the square and make no promises you cannot keep." His thousands of friends know that he has lived up to this in the past and will continue to do so in the future.

It is Mr. Essex's intention to place the Model Incubator Company's line of incubators and brooders before the poultry world in the proper light and make them second to none.

We are satisfied that Mr. Essex is the right man in the right place to accomplish this, therefore it is a foregone conclusion that he will succeed. Their literature is before us and we note the handsome appearance of the machine, also the very reasonable prices for which they are sold, and we suggest that any one interested in the purchase of an incubator will do well before placing their order to send to the Model Incubator Company, Buffalo, N. Y., for their catalogue.

Mr. Harry M. Lamon, Adams Center, N. Y., our special representative, visited Sunny Slope Farm, Bound Brook, N. J., the Corning egg farm, from which the celebrated Corning egg book was written. Mr. Lamon will tell our readers about what he saw while there in the near future.

We lead, others follow.

A TRIP THROUGH THE NORTH-WEST.

If you are one of those that allow beautiful sceneries to appeal to you, a trip to the Great Northwest will certainly be delightful for you. Our trip from Indiana through Illinois, Missouri, Kansas and Colorado to the Pacific North-

west, judging poultry shows, was one of the most sensational trips I ever experienced. The broad prairies, the unlimited acres of harvested grains, picturesque valleys, hot lakes boiling with a tremendous heat, rugged mountains, whose lofty peaks extend high up into the cold area of eternal snow and ice. It is such scenic view as these that make a trip to

the Historic Northwest all the more interesting. Passing through the noted Blue Mountains, which are a portion of the Rockies, I found high rocky peaks with very fertile valleys affording the very richest of farm lands in these valleys, which are from one-half to five miles in width simply groaning beneath the numerous rocks of the finest of alfalfa and

Lady Aristocrat, Mother of my International Champion Pullet.

CROWTHER'S S. C. REDS

Heavy winners at Chicago, Cleveland, Buffalo, Youngstown, Indianapolis, Cincinnati, McKeesport, Toronto, etc., etc. There is absolutely **NOTHING BETTER IN THE WORLD**. Ringy

thousand. Sheep and cattle to feed upon them during the winter weather. I observed from the car windows more than 3,000 head of cattle in one herd and possibly twice this number of sheep in one single flock, all the property of one man. The finest of homesteads are to be found in those mountain pockets. These people are not the wild half civilized class as one might suppose, but the very best cultured people living. I met quite a number of those rugged people coming in and out of the train and I soon found that they were well informed, well dressed and abreast of the times. Many of them own large poultry "ranches."

Egg farming is the chief industry in this mountainous country among the poultrymen, while stock raising and mining is in the main with the majority of mountaineers.

Within a very brief interview with one of those mountaineers I learned the majority of poultry keepers fed their fowls largely on wild animal meats, such as Jack rabbits, wolves and fish heads, revealing the fact that animal foods are par-excellent for eggs, as they were getting eggs by the thousands. Another important feature I observed with those mountaineers and a feature that I have long been an advocate of, was in limiting the number of laying hens to not over 25 hens to a building. Consequently 85 per cent of all the hens are laying continually except during molt. In Kansas I met a live nest of poultry fanciers. At the Saline show I found fanciers of the deepest water. They are producing some of the finest specimens the world has ever seen. Any of those "swell"

Eastern breeders that have the impression that they produce the only fancy fowl on earth only need to exhibit once with some of those "Western Rangers" just to find out that the world was not made for one man. I was surprised to find quality in most all the Western shows that was a credit to any country. In the Barred Rock class in some of the shows were females showing up some of the finest wings to be seen anywhere. I doubt if Hawkins, Thompson, Latham, Bradley Bros. or any of those well-known Barred Rock breeders could duplicate the quality in this section. Possibly they could, but I am sure they could not go beyond that. A finer lot of boys never lived, unless it was before the floods, than those "out in Kansas." In making the stretch across country of a Sunday's and night's journey from Kansas to Portland, Ore., I observed quite a number of promising poultry plants under construction. While the mountains afford great possibilities in poultry culture, the coast and Puget Sound country is superior to anything yet observed. In landing aboard the Union Pacific train in Portland, Ore., I found the climate most delightful, warm and mild, fowls of every kind singing and the birds of the air filling the air with that charming music that fills the traveler's heart with delight, causing him to allow his mind to wander back over the long ago, "when you and I were boys." In fact every appearance and every breath you breathed of that pure balmy air gave one more and more the effect of midspring—an April day.

Many live poultrymen operate profitable poultry plants in this great coast

city, principally egg farming, yet quite a few are giving their time and money to the fancy. From Portland I steamed over land limited to Tacoma, the principal seaport of Puget Sound. Here I found a well regulated, well cooped show of the highest quality. This show was handled under the very best system. I am safe in saying the coast people are 50 years in advance of the Middle West in almost every avenue of profession. Tacoma puts up some of the very best in Rocks, Leghorns, Minorcas and Rhode Island Reds. At Tacoma you will always find a whole show in Minorcas. Possibly Tacoma holds within her limits the grandest Single Combed Black Minorca cock in all the world. He has been shown in a number of leading shows, including the A. Y. P. at Seattle, and has always easily walked away with first honors with many attractions from the exhibitors and visitors for his perfection in beauty. Out of Tacoma we boarded the cars for Spokane, Wash., the Inland Empire, where great and wonderful things are always done in fruit and poultry shows. Here I found a New York of the Northwest. Every exhibitor fighting a great "battle royal" with over 1,200 birds, with sufficient gate receipts to pay all bills and leave a nice bank account for next season. There were so many pleasant events took place at the Spokane show I cannot find half enough space to even give them a brief mentioning; however, anyone should be proud to have the honor of mixing with such men as Secretary Fuller, Superintendent Bolton, Banken and many others of equal merit. An exhibitor that even

BUFF, BLACK AND WHITE ORPINGTONS

It has been announced by many experts that the keenest competition and the highest quality ever seen in Orpingtons was found at the great Chicago Show, December 7 to 11, 1909. On seven entries I won thirteen Regular and Special Premiums, including two firsts, four thirds, one fourth; medal for best pen Blacks, medal for two best pens Blacks, special for best pen Whites, silver cup for best Orpington male, silver cup for best Orpington female, silver cup for best Orpington pen. My stock of sale birds in Buffs, Blacks and Whites is complete. Can furnish you breeding birds at as low a figure as any breeder can supply, quality considered. If you want to win or produce winners for the largest shows of the United States or Canada, write me; I have the birds. Make clear your requirements when writing. Eggs: \$5, \$10 and \$15 per 15 from Special Matings, including my winners.

gets fifth prize at Spokane certainly has honors to crown his efforts. Long will the memories of this great event live with the writer. J. C. Clipp, Sattilo, Ind.

THE RED ROOSTER.

New York State Branch of the Rhode Island Red Club of America issues a very neat and artistic booklet which they call the "Red Rooster." On the cover page is illustrated a group of three Rhode Island Red feathers in colors which represent the true Rhode Island Red color. This is a very nice and expensive piece of color work and the catalogue as a whole is a credit to the club and will no doubt stimulate an interest in and be beneficial to the breed throughout the country. The book also contains ideal illustrations of both a typical Rhode Island Red male and female. Every breeder of Reds throughout the country should have a copy of this book and by studying these illustrations he can easily grasp what the Rhode Island Red type should be, and with the assistance of the colored feathers he can get an idea of the correct shade of red, which all Red breeders know is so hard to describe. Here this is illustrated and you can see the correct color. Short chapters in the book give the reason for the organization, what they have accomplished, what their aim is and the duty of every Rhode Island breeder. The booklet further gives the Club standard description of the Rhode Island Red for both color and shape, together with considerable poetry and other good reading matter on the breed as a whole, which is very entertaining and instructive to any one who is a Rhode Island Red crank. As we have said before, this book is a very handsome one and from it any one can gain

a very accurate idea of both the color and type of the Club standard for Rhode Island Reds. This book will be sent you for the small price of 25 cents by addressing the Secretary. Much credit is due the officers of the Club who have succeeded in accomplishing so much, and a complete roster is given below.

Robert Seaman, president; I. L. Whitmyre, vice-president; H. L. Greene, secretary and treasurer. Executive committee: Robert Seaman, Jericho, L. I., N. Y.; I. L. Whitmyre, Schenectady, N. Y.; H. L. Greene, Sherburne, N. Y.; George Tracey, Kinderhook, N. Y.; Charles Trafford, Binghamton, N. Y.; Charles McCall, Sherburne, N. Y.; H. F. Wells,

WHAT ARE WHITE ROCKS?

Is It a Fact They Are One of America's
Greatest Poultry Achievements in
the Art of Producing a Fowl of
Both Unsurpassed Beauty
and Utility Value.

MUCH has been written, much has been said as to which was the "Best Breed," or the "Best Fowl" to breed. My answer is, there really is no best fowl, generally

erly feed, rear, house, yard and mate his birds will surpass all other known kinds not only in quick maturity at a small cost for feed, but also in beauty. The White Plymouth Rocks are today one of the greatest utility fowls on earth. They mature quick and plump. April and May cockerels reach eight to nine pounds by November 15 and do it naturally. The pullets begin laying early and remain good year around layers. They are good mothers and make the very best of setters if allowed to set. A White Rock setter

days. Then if kept away from a male for two or three more days will begin to lay almost at once when put back in the breeding pen. When dressed for market, a White Rock presents a beautiful long, plump, broad body, rich yellow skin and legs. Having white plumage they show no pin feathers at all. This is one reason why the White Rocks always bring from 2 to 3 cents more per pound upon the market of the larger cities than any dark or parti-colored fowl. Why are the White Rocks perfected to a greater de-

swered. It took only a short term of years after the White Rocks were first known for the best breeders to find they could produce a large majority of birds that were almost positively white. This being a fact they were able to devote their time and ability toward perfecting the shape or type of the breed. This has been where the Buff or parti-colored breeders of any breed have had to devote their efforts toward producing fair color till today they have not kept abreast of the white breeders in the improvements made in the shape.

Even today we do not find all White Rocks the superior of the Barred or Buff in shape, but in most cases we do. These causes are sufficient to show us the possible. Five or six years ago a certain well-known breeder won on a grand white male bird at a large eastern show. This bird was a great improvement in shape over any Rock of any variety ever exhibited before. He was sort of an enlargement on what we had. More symmetrical, more massive, more beautiful and showed greater utility possibilities. The length of the back was greater and the entire bird was broader through the body, and had a thicker, deeper chest. The tail was carried slightly lower and continued out from the back line with only a slight graceful rise. From that day on a few of us have striven to perfect a line to compare in both male and female with that great bird of a few years ago. This object has been so successfully reached that the Revision Committee of the American Poultry Association, when it met at Chicago last summer to revise the standard by which we must judge our birds, made certain changes that makes the new ideal, which we must go by after the beginning of next show season, the same ideal we have been breeding for the past five years. Great as the advance in type has been there is still room for much improvement in hundreds of breeders' yards. We should all strive toward better type—neat trim, clean-cut bodies—small firm combs, extra broad breasts and back. Breadth of feathers, tails that are carried well spread out in a fan-like fashion. I show here an illustration, to show the length of body and the angle of back and tail or just how each should be carried one to the other. My experience during the past years has taught me that one will be amply rewarded for his efforts in trying to perfect his White Rocks along the above lines. I have found it so, not only in the blue ribbons won in America's largest shows, but in the egg basket and on the market. When bred right they are the best fowl.

Clarence, Mo. J. C. RICKEY.

SUBSCRIPTION DEPARTMENT

THE winter is gradually losing its grip and the south winds will soon take the chill out of the air, thus spring will make its bow, much to the gratification of millions who have had their fill of a long, hard winter.

Gentle reader, possibly you are watching the advance of spring with eager eye. You may have fields to plow or other duties which you could not perform during the winter months when the snow and frost were masters of the earth.

Did it ever occur to you that others rely upon these cold months for their existence. The poultry business is in its prime during these months, not only because the chickens are in their prime but also because the average fancier has no time to devote to poultry shows or give his flock the best attention during the summer months.

The poultry publications also must rely upon these months to increase the poultry interests by circulating their publication among as many people as possible who are interested in poultry. The United States report shows that the poultry industry is the largest in this country; it greatly outweighs the entire wheat crop, which at one time

was considered the greatest industry of the United States.

The greater part of credit for making the poultry business what it is today belongs to the poultry press. There are a great many poultry journals published in this country who have tried and are still trying to materially increase the poultry industry, and American Poultry Journal heads this list.

It is true, we have not been able to accomplish our object single handed. We could not go out and see each and every person ourself and induce them to subscribe to American Poultry Journal. We had to rely upon our friends who were readers of our publication and who knew the good things that were in it to tell their friends and neighbors about us and get them to subscribe.

In order to thank these friends in a substantial manner for their kindly interest in our welfare we rewarded them with useful premiums besides allowing them a liberal commission. This offer, as liberal as it is, does not express our gratitude for the services rendered, as every subscriber they send us is adding just that much to the assets of Uncle Sam's greatest industry.

It is at this time, while the winter is breaking up and you are waiting for

spring to advance, that you could render us as well as the poultry fraternity valuable assistance by telling your friends about American Poultry Journal and we assure you that you will not regret the trouble you have taken.

In the first place if you send us two or more subscriptions we request you to send us only 25 cents for each subscription and keep everything above that amount as your commission. If you send us six subscriptions at 25 cents each we will send you free a copy of our great \$1 book, "Origin and History of All Breeds of Poultry." This is the only book which contains the illustrations of 198 birds in their natural colors and we give this book free to every fancier for the first six subscriptions at half price.

Furthermore, besides this book you have a chance to win one of three prizes which will be given away to the agents sending us the most subscriptions during the month of April. The first is a \$20 incubator, brooder or pen of fowls, your choice. The second a \$15 incubator, brooder or pen of fowls, your choice. The third a \$10 incubator, brooder or pen of fowls, your choice.

Besides these prizes which we offer for this month you can also win one

B. M. BILLINGS,
OBERLIN, OHIO.

Fourth Rose Comb Rhode Island Red cock at the late Cleveland show. A bird of exceptional merit. Bred and owned by B. M. Billings, Oberlin, O.

W. E. PHILLIPS,
WELLINGTON, OHIO.

S. C. Rhode Island Red cock; score 95, by McClave. Tied for first at Elyria, O., January, 1910. Bred and owned by E. W. Phillips, Wellington Red Poultry Farm, Wellington, O.

of the ten grand prizes which will be given the agents sending us the most subscriptions before June 10, 1910. The first of these prizes is a \$600 piano manufactured by Wing & Son, New York City, N. Y. The second is \$100 cash; the third a \$50 incubator, brooder or pen of fowls; fourth, \$35; fifth, \$30; sixth, \$20; seventh, \$20; eighth, \$15; ninth, \$15; tenth, \$15 incubator, brooder or pen of birds, your choice, selected from any advertiser in American Poultry Journal.

Now is the time to start. Get in before the rush and win an April special prize and one of these grand prizes. Remember, ten grand prizes, a \$600 piano being first prize and given the agent who sends us the most subscrip-

and correspondence departments are of special interest.

As a breeder of fancy fowls, the Rose Comb Rhode Island Reds being my specialty, I have been quite successful in capturing the best prizes in the largest shows in the South for three years. My flocks are line bred and for this reason I have at all times a good line of show birds. Whenever and wherever I can I slip in a good word for the American Poultry Journal, and hoping it will maintain the high standard which it has reached, also at all times be the "Leader," I am

The Simplest, Strongest And Most Convincing of Cream Separator Arguments

We cannot believe that there is a sensible man living who would put his own money into the purchase of any other than a DE LAVAL cream separator, for his own use, if he would but first avail of the opportunity open to everyone to SEE and TRY an improved DE LAVAL machine before buying any other.

It is hardly possible to say more than this. It is hardly possible to put the simple truth in plainer words. It would hardly seem possible to say it more convincingly.

The TRIAL of a DE LAVAL machine is free to every responsible man thinking of buying a cream separator. We have agents in every locality for this purpose. If you don't know the agent in your neighborhood send to us for his name and address and it will be a pleasure to give your inquiry prompt and courteous attention.

AMERICAN COLUMBIAN PLYM-
OUTH ROCK CLUB.

At the annual meeting of the American Columbian Plymouth Rock Club, held at Buffalo during the week of the international show, the officers and executive committee as here printed were elected: President, D. M. Green, Syracuse, N. Y.; vice president, F. M. Clemans, Mechanicsburg, O.; secretary and treasurer, Dr. E. B. Kaple, Elbridge, N. Y.; executive committee, D. M. Green, Syracuse, N. Y.; George H. Sweet, East Aurora, N. Y.; Clyde Patterson, Sedalia, Mo.; E. J. Barney, Syracuse, N. Y.; Dr. E. B. Kaple, Elbridge, N. Y.

In addition to these, two committees were appointed, one to draft a club standard and one to draft a constitution and by-laws, both to be published in the new Club Catalogue.

The committee to draft the standard

AMERICAN LEGHORN CLUB
MEETING.

At the annual meeting of the American Leghorn Club held in Baltimore, Md., January 4 to 10, the following officers were elected: President, W. F. Brace, Victor, N. Y.; vice presidents, G. L. Wheeler, Penn Yan, N. Y.; W. R. Bowers, Baltimore, Md.; Frank McGrann, Lancaster, Pa.; W. L. Bright, Waltham, Mass.; secretary-treasurer, Norman L. Kising, Bel-Air, Md.

The club is to have a state vice president in each state and will offer handsome ribbons at all shows and ask show secretaries to get in touch with the secretary at once, so arrangements can be made to supply all who want ribbons offered at their show. The club is one of the strongest in the United States and embraces breeders of all breeds of the Leghorn family. Address all correspond-

AN "ARISTOCRAT."

First prize S. C. R. I. Red cock and shape special at the meet of the Ohio State Branch of R. I. Red Club, Youngstown, 1910. Tompkins, judge. Bred and owned by Ira M. Crowther, Box A, Willoughby, Ohio.

consists of D. M. Green, Syracuse, N. Y.; George H. Sweet, East Aurora, N. Y., and H. W. Partlo, Ingersoll, Ont., Canada.

The committee on drafting constitution and by-laws are Dr. E. B. Kaple, Elbridge, N. Y.; F. W. Clemens, Mechanicsburg, O., and S. M. Clemo, Wexford, Ont., Canada.

The club is in a most flourishing condition, but a vigorous campaign to double the present membership is to be waged during the year. The Club Catalogue will be a model of its kind, containing not only information of value to any breeder but indispensable to the breeder of Columbian Rocks. Interested breeders desiring a copy should address the secretary to that effect, and their request will be placed on file and a copy mailed them as soon as issued.

Vermin Worse than "Varmints"

If a skunk or a mink got after your chickens you'd be after him in a minute with a club or a shot-gun. You can't kill chicken lice that way, and yet they are worse than skunks or weasels. There are thousands of lice to every varmint. There may be a thousand on your every hen. They prey on *all your chickens all the time*. Day and night they worry them and steal away your profits. Your fowls *must* have help—go after the lice in earnest with

Lee's Lice Killer

It is an absolutely dead shot on lice, yet harmless to fowls. There is not a failure in a thousand trials. Here is the great difference between *Lee's* and *all other* lice killers—

Lee's Lice Killer is distilled specially for lice killing, not a by-product. It kills lice by its fumes. Not necessary for liquid to come in contact with vermin.

Get the genuine—don't be caught with substitutes that "smell like Lee's" or "look like Lee's," but which are *never* as good as Lee's. Look for the name "Lee" on the can. Convenient sizes—quarts, half-gallons, gallons, at 35c., 60c., \$1.00. For sale in almost every town in the U. S. If your dealer don't happen to have it send us \$1.25 for a gallon *express prepaid*. Write for free books, "Lee's Chicken Talk" (by Geo. H. Lee himself), or Mandy's Poultry School.

IF YOU OWNED A FACTORY.

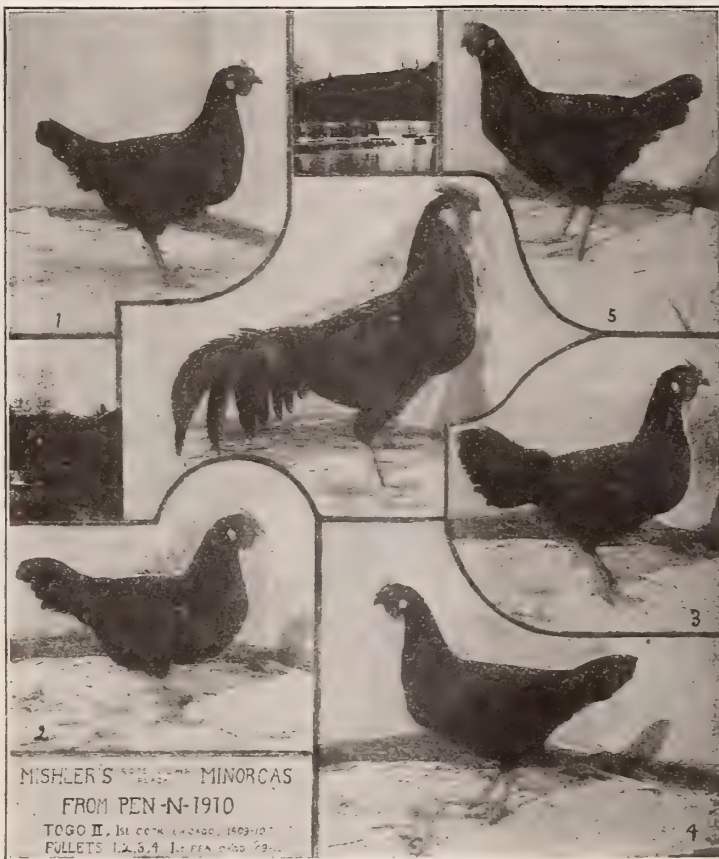

When you buy from the factory direct you really don't pay any more for the article than it would cost you if the factory was your own.

Take an example all are familiar with—an incubator. The Mankato Incubator Company, at Mankato, Minn., sells direct to the individual. Only one profit is added to the actual cost of the incubator. That profit pays the makers for their time, which is entirely devoted to the business, and also includes the interest on the capital they have invested. Unless a person can buy material at the same low price the Mankato Incubator Company pays by buying immense quantities, and is as expert as they in planning a scientific modern incubator, he cannot begin to make for himself an incubator that will do the work of the Mankato Hot Water Incubator, at anywhere near the price he pays for having it built for him.

By writing to the Mankato Incubator Company anyone may get all the specifications and illustrations of the most

ties competing. At several of the other shows this winter he has won all firsts, including sweepstake prizes. His illustrated circular gives you not only his winnings, but his matings and prices on eggs. You will do well to send for it. His address is George Barkdoll, Box 62, West Unity, Ohio.

In the White Rock world Guy Daily, of Jeffersonville, Ind., is building up a strain that will be heard from at some of our leading shows next season. Mr. Daily demonstrated that he has the goods, by his winnings in strong classes at the late Louisville, Ky., and New Albany, Ind., shows. He is a life member of the American Poultry Association and state secretary of the White Rock Club, and is a man with sterling qualities. He writes us that he has five grand pens mated for his egg trade this season, that should produce show birds of the highest type. Mr. Daily is a very ardent worker with his birds and has for some time made a study of mating his favorites to produce the highest quality of standard type White

Bred and owned by Lloyd C. Mishler, North Manchester, Ind.

modern incubators, without expense, and see just how it is built and operated.

In our report of the Indianapolis show in our March issue we failed to mention one of the prominent winners. This was Chas. C. Coulter, proprietor of Maywood Farm, Frankfort, Ind., breeder of Rose Comb Rhode Island Reds, who won second and fifth pullet and third and fifth hen. His birds were also winners at Chicago, Cincinnati and Frankfort. He has seven choice pens mated for the season's trade and has just issued a very neat circular which tells all about them. Write him and mention American Poultry Journal.

George Barkdoll, White Wyandotte specialist, West Unity, Ohio, is a breeder of high class specimens and is not afraid to exhibit his birds in strong competition, where he always succeeds in winning the cream of the prizes. At the late Toledo show, 1910, he won more regular and special premiums in this class than all other exhibitors combined, including the much coveted first prize pen, also first for best display and the silver cup for best ten birds in American class, also silver cup for best ten birds all varie-

ties, and at the same time giving heed to their laying qualities. All breeders are kept in open front colony houses, with yards 50x175 feet, well sodded. This, with proper feed and care, insures fertility and strong chicks. Anyone who contemplates the purchase of eggs for hatching should send for a copy of his mating list.

I want to make a number of plain school dresses for my girls, ages 5 to 12. The calicos I buy all fade and have such very large designs. Is there any other sort? If so, where can I get them?

MRS. MEREDITH.

Simpson-Eddystone Prints are particularly adapted for the use you speak of. You needn't be afraid of fading. They stand repeated washing and hold their bright colors as long as the dress lasts. They are of fine quality and the neat and artistic designs will suit the most exacting taste.

If your dealer hasn't them insist on his getting them and you will be amply repaid for your trouble.

Wholesale prices on fence—14½ cents a rod up. Write today for Kitzelman Bros.' free catalogue. See their ad in this paper.

THE WISE FARMER'S WIFE CHOOSSES A RANGE WITH A REPUTATION.

These prosperous times warrant the best of everything in the farm. The best stock, the best implements, the best automobiles are none too good for the prosperous twentieth century farmer, and for the farmer's wife the best range her money can buy is none too good. The average farmer's wife has her own ideas on the subject of cooking and ranging. To her the perfect range is that one that meets her every requirement; whatever other good points it may have, she insists that it be a perfect baker 365 days in the year. It must also be a good cooker and economical in its consumption of fuel. After she has satisfied herself that the range she is looking at meets these requirements, she wants to make sure that it is durable. A range isn't bought every day in the year, nor every year in one's life, and if she is a wise woman she will insist that the range for which she invests her husband's hard earned money will be a range with a reputation—a reputation for durability—a reputation as a perfect baker year in and year out. Before deciding upon the purchase of a range the wise woman will examine closely into the merits of the Great Majestic. It is, indeed, a range with a reputation. It is a perfect baker at all times.

The Great Majestic has a 15-gallon all-copper reservoir which touches the fire, giving boiling hot water in a very few minutes. The body of the Great Majestic is made of charcoal iron, which gives it wearing quality that will outlast three ordinary ranges. All top doors and frames are made of malleable iron; they won't break, crack or rust. Malleable iron is absolutely necessary for perfectly airtight joints, and on the Majestic range all joints are riveted perfectly airtight—no heat escapes or no cold air can enter—it is also completely lined with pure asbestos, thus the oven can be heated quickly with about half the fuel used in the ordinary range.

The Great Majestic is justly called, "the range with the reputation," because it has a reputation of a reliable manufacturer behind it and because there are hundreds of thousands of Majestic ranges in use all over the country, each one of which is giving perfect satisfaction, some have been in constant use for more than twenty-five years and still give excellent results.

Majestic ranges are for sale in nearly every county in forty states. If your dealer doesn't handle them you will do well to write the Majestic Manufacturing Company, of St. Louis, Mo., for their interesting booklet, "The Story of Majestic Glory"; it is well worth reading. At the same time they will tell you where you can see and examine the Majestic and settle the range question.

Odenheimer & Odenheimer, Lumberton, N. J., breeders of S. C. Single Comb Reds, breed only high class exhibition Single Comb Reds and have been producing high class quality for the past seven years, always retaining their best specimens to be again mated, that better quality may be produced from year to year. It will be remembered that their recent exhibit at the Philadelphia show received favorable comment and their birds accredited themselves well when the blue ribbons were placed. They have again mated their choicest specimens for the egg trade and are prepared to supply you with eggs for hatching at reasonable prices. They also report having some fine breeding males, as well as a few pens, for sale.

Oscar Holtzapfel, Elida, Ohio, is a breeder of Single Comb Rhode Island Reds and has about 200 head of stock in his plant, has four nice pens mated for the egg trade, besides a large flock of utility stock for free range. He showed at three shows this winter and won thirteen firsts, nine seconds, three thirds and four fourths. He is making a specialty of day-old chicks and has an incubator capacity of 1,000 chicks per month. Parties desiring to secure Rhode Island Red chicks will do well to place their orders at an early date.

Grass Hill Farm poultry yards, Chas. Parson & Son, Conway, Mass., breeders of Barred Rocks, issues a descriptive folder describing three fine pens of cockerel mated and thirteen pens of pullet mated birds.

POULTRY IN VIRGINIA

Good Land \$10 and Up PER ACRE

A steady market and good prices place Virginia FIRST as a poultry-raising State.

The Diseases of Cold Climates are Unknown

Virginia's soil, roads, schools and churches are excellent—her hospitality is unsurpassed.

Send to-day for booklet and additional information about Virginia.

Address F. H. LABAUME, Agricultural and Industrial Agent Norfolk and Western Railway, Dept. B 51, Roanoke, Virginia.

YOU NEED A GOOD BROODER.

The greatest prosperity ever known is now enjoyed by the poultry raisers of this country. Prices are good and the demand for eggs and stock was never so great. In some of the largest cities market eggs brought 65 to 70 cents per dozen all winter. The time to prepare for big business next season is to get ready now. To be in readiness you must have a stock of good, healthy fowls. Stock fit to sell at the best market prices, or if for show purposes, you are doubly called upon to grow only the kind of stock which is full of life and vigor. The prize ribbons go to the best birds.

Weaklings and unhealthy birds win few of the ribbons. This is where the good brooder comes in, gets in its best work. Your birds must be given the proper conditions for growth from the shell to the showroom. They must not be stunted or injured in health by poor brooding. The brooder can undo all a breeder's best work, in a very few weeks. The Champion brooders have been on the market so long they are now almost a household name among poultry rais-

QUALITY WHITE PLYMOUTH ROCKS.

W. R. Abbott, Fort Atkinson, Wis., breeds White Plymouth Rocks of quality, which is shown by his winnings in strong competition the past season at Milwaukee, Wis. He entered four birds and won first pullet, third cock, fourth cockerel and seventh hen. At Fort Atkinson he won most of the prizes on White Rocks, including all first and gold special for best display in American class.

His yards are located on Rock river. The bank is covered with trees and bushes, which give the birds plenty of shade and running water in summer and forms a windbreak in winter. The bugs, worms, etc., found here keep the birds in good condition and insure fertility to the eggs. It is an ideal place to raise the youngsters.

He has mated only two pens for the egg trade, as he believes in quality, not quantity, and has mated his pens with this in view. He will give you your money's worth every time. Write him for further information and mention American Poultry Journal.

INTERNATIONAL CHAMPION PULLET.

This pullet won first, both color and shape special and championship over all Red winners at the International Show, Buffalo, January, 1910, meeting of the New York State Branch of R. I. Red Club. Bred and owned by Ira M. Crowther, Willoughby, Ohio.

ers. Probably never in the history of poultry breeding has any one brooder given such universal satisfaction as the Champion.

The manufacturers have been in the business almost twenty years and their brooders are known around the world. The Champion brooder is an outdoor brooder, which will actually raise every chick right outdoors without shelter of any kind. This saves the expense of brooder houses and gives the small poultry breeder an equal chance with the large, extensive broiler plants. Bennett & Sons have advertised continuously in the American Poultry Journal for nearly twenty years and they will take pleasure in sending their new catalogue to anyone sending a postal to them at their address, J. A. Bennett & Sons Co., Gouverneur, N. Y., 929 Main street. Their new model Champion brooder has many points to commend it. The illustrations show the complete brooder and also how easy it is to clean and sun it. The top half is raised on hinges and then the floor is easily swept clean.

Elmer V. Schultz, Webster Grove, Mo., breeder of S. C. Brown Leghorns, informs us that his 1910 mating list is now ready for mailing, and gives his winnings and description of his pens for this season. Send for it and mention American Poultry Journal.

H. N. Hanchett, Jackson, Mich., the well and favorably known Buff Cochins breeder, informs us that he recently received an order from Kasan, Russia, for a pen of his famous Buff. This makes the second order he has received from this far-off land.

The catalogue of Covert's Barred Rock Farm, Willoughby, Ohio, R. R., is handsomely illustrated with half-tones, showing the grand quality to be found in his "Highland Strain" Barred Plymouth Rocks and giving description of his ten fine pens, which he has mated for the egg trade. He breeds both the cockerel and the pullet line, close to standard requirements, and his birds have been important winners wherever shown.

PLANET JR. AND PROSPERITY.

The farmer, by virtue of his vocation, is admittedly one of the most independent of the world's producers. In fact, most every line of trade is dependent directly or indirectly on the farmer. This has come to be truer than ever since the dawn of the new kind of farm implements which have worked such a revolution in farming methods toward increased production. These wonderful new implements, such as the Planet Jr. farm and garden tools, have enabled the progressive market gardener to treble his output and then double it again.

For instance, the No. 6 Planet Jr.—the newest combination hill and drill seeder, wheel hoe, cultivator and plow—does the work of six men. That means where a crop of certain size was formerly cultivated, six times the crop can now be taken care of with the same amount of labor in the same time, for this handy garden tool opens the furrow, sows any kind of garden seed accurately in drills or hills, covers, rolls down, and marks out the next row—all at one operation. In addition to this it is also a perfect wheel-hoe, cultivator and plow.

This is only one example of the increased efficiency the fifty-five kinds of Planet Jr. tools have given to this class of the world's workers. So that when the depression of 1907 "depressed" almost every man of affairs, the Planet Jr. user was "there with the goods" just the same as usual, gathering in his profits and adding to his "rainy day" pile instead of drawing upon it. This ought to be an object lesson to ever tiller of the soil, and prompt him to write to S. L. Allen & Co., Box 1107T, Philadelphia, Pa., for their new illustrated catalogue of 1910 Planet Jr. implements, which they send free upon request.

ECONOMY IN POULTRY RAISING.

A bone cutter is as much a part of a poultry farm as the chickens themselves. Green cut bone is the best cut food that can be given them. It is better than the commercial products and cheaper. With a bone cutter of his own the poultry farmer is not paying the jobbers' profits, nor is he spending money in freight and expense bills for prepared foods that are not at hand.

Cut bone is easily prepared if the poultryman has a Crown bone cutter. He can secure his cut bone fresh every day. No poultry farm should be without a Crown bone cutter, for, besides the fact of it being a necessity, it is amply low in price. Write to Wilson Bros., Box 801, Easton, Pa., for their catalogue and scale of prices.

COVERT'S BARRED ROCK FARM, WILLOUGHBY, OHIO.

Mr. Covert, proprietor of the Covert Barred Rock Farm, is a breeder of high class exhibition quality in Barred Plymouth Rocks, and has won more than his share of the prizes in some of the hottest classes of Barred Rocks ever gotten together.

At the late Chicago show, in competition with 239 birds, he won second hen, third cockerel, third pullet and second pen. He also has won in the past at many other of our large and important shows. He is and has been breeding high class exhibition Barred Rocks for many years. His matings this year are just a little bit superior to anything he has had heretofore and many winners are sure to be hatched from these yards. His ad will be found elsewhere in the American Poultry Journal.

A. Didriksen, Whitewater, Wis., breeder of Single and Rose Comb Black Minorcas, is what you might call one of the old breeders of the country, as he has been breeding, exhibiting and advertising this variety for a number of years. He is also one of the careful breeders, as he always aims to mate his birds each season so that they will produce stock just a little better than the previous year. By keeping this plan always in view he has succeeded in building up a strain of Minorcas that is second to none. This is demonstrated by his winnings at such shows as Chicago and Buffalo, where he won the very cream of the prizes. This season he has mated a number of very choice pens of both varieties and is prepared to supply the wants of those who desire something extra good. Write him for full particulars.

A 50 Egg BUCKEYE INCUBATOR

\$5

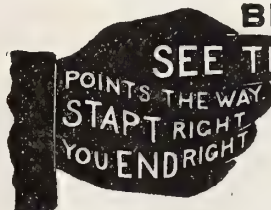

with lamp and complete outfit ready for hatching—guaranteed to hatch every hatchable egg. Our 50-Egg Buckeye is a simple, self-regulating, latest-improved machine. Hatching quality backed by a 40-day free trial or money back without dispute. 10,000 sold last season, on this guaranty, and not one returned. Larger sizes on same guaranty and at correspondingly low prices.

"Anybody can hatch Chickens with a Buckeye"

Twenty years on the market. 100,000 in successful operation. Every reader of this paper, who keeps chickens, should send for our poultry books telling how 51 chicks were hatched from 50 eggs, and "Making Money the Buckeye Way."

White Oak Poultry Farm : R. H. GAMBLE, SUCCESSOR TO F. J. BANTA : Box 63, Lima, Ohio

NAME YOUR OWN TERMS ON WHICH YOU WILL TRY

A "QUEEN"

FIRST—I outstripped all others in the expert manufacturing of incubators.

THEN—I sold incubators on the fairest trial plan ever offered.

NEXT—I displaced my competitors in number of sales.

NOW—I propose further advances.

The Queen Incubator, in its present form, is perfect. It utterly defies improvement. Hatches every hatchable egg into a healthy chick; runs itself; gives you the limit of long, useful service.

BUT—I may be able to improve my sale plan so as to get more good poultry men and women to try my incubator and thus learn its sure, big money-making value.

I am anxious to know, reader, what you consider would be a fair inducement on my part to get you to try out a "Queen." Please write me briefly the basis on which you would accept one for trial. I give you my word that I will go the limit on this proposition to do anything that's fair to both of us.

My present trial plan is this:

90 days free trial—more time if you ask for it. 5 year guaranty—worded to suit yourself, if my regular guaranty doesn't suit YOU.

Direct factory prices—every penny you pay you get back in incubator value—no "rake off" for jobbers and dealers.

Freight prepaid—all Queens are shipped by fast prepaid freight—no trouble, no bother to you. You know the total cost of your incubator before you buy it.

You will find the "Queen" to be the only incubator whose Vital Parts—the Heating, Cir-

Regulator Detached, Lid Raised

culating and Regulation system—stand up under severest tests. The life and good service of any incubator depend upon these parts. They are the very Heart and Lungs of the machine. That is why the Heating Apparatus of every "Queen" is made of pure Lake Superior cold-rolled copper and why I have worked and studied for many years, until finally I invented a system of circulation and automatic control so perfect that thermometers placed at each corner of the radiator register within $\frac{1}{4}$ of a degree of each other.

Put a "Queen" any place—in your barn, woodshed, smoke-house, cellar, kitchen, dining-room, or parlor—I care not where—it will hatch more chicks and stronger chicks than any other machine under the sun. This is a sweeping statement, but I have the proof at hand.

Write me to-day for my New Incubator Book and arrange to try a "Queen" on my plan—or yours if you know a fairer one. Remember a good incubator is the biggest asset in Intensified Chicken Farming and Intensified Chicken Farming is the biggest paying business now known.

My Incubator is perfectly good as long as it lasts and it lasts longer than any other. Make me prove that assertion by my trial plan—or yours. If you write me now there will be no possibility of this paper being mislaid before you lose my address, which is

"WICKSTRUM, QUEEN INCUBATOR MAN,"
Box 4 Lincoln, Neb.

Pratts' LICE KILLER

in powdered form is sure death to lice. Dust your fowls, the nests and the houses thoroughly. Repeat as often as the lice show signs of returning. Economical and easy to apply, and harmless to the very smallest chicks. From your own dealer or by mail for 25c.

Pratts' Poultry Regulator

will keep your flock free from spring ailments. It's an egg producer and it makes fine healthy fowls. But insist on Pratts'. Write for Poultry Wrinkles—Pratts' new book. It's free.

PRATT FOOD COMPANY
Department P Philadelphia

HOW A CAREFUL FARMER PROFITED BY THE MISTAKES OF HIS CARELESS NEIGHBORS.

Constant and consistent carefulness is the secret of success in farming. A man who wants to make his farm pay must be on the watch all the time. The old rule of work all summer, sleep all winter, is out of date. The wise farmer has no loafing time. Every season and every day bring their special work. And any duty neglected at any season has a damaging effect on the general condition of the farm and curtails the profits.

The good results of carefulness are well illustrated by a comparison of the methods of three farmers along one of the railroads in Kansas. One farmer came from the East and took up the first homestead. At once he built a large barn and, as his father in Pennsylvania had always done, he roofed it with shingles without considering any other roofing. The shingles were expensive, and in the beginning of the second fall, just after harvest, some sparks from a

without attention, if laid according to the directions, which any man can follow. The secret of the durability of Genasco ready roofing consists in the double layers of felt dipped in asphalt, which gives firmness to the roofing, acting as a body to support the outer layer of natural asphalt, which, unlike coal tar roofings, does not crack or run. In other words, it is weatherproof and fire-resisting.

The carefulness of this one farmer should be a lesson to others. He found Genasco the cheapest in the long run, the most durable, and the easiest to lay.

Charles C. Coulter, Frankfort, Ind., is the proprietor of Maywood Farm, where prize-winning Rose Comb Rhode Island Reds are bred in all their splendor. Only high class exhibition birds are permitted on this farm and Mr. Coulter's birds always give a good account of themselves in the show room when the blue ribbons are hung up. Mr. Coulter succeeded in winning first on pullet at the Chicago show, and this pullet, with three of her sisters, will be line bred in one of his

Single Comb Buff Orpington hen, weight 10 pounds, never exhibited, but wonderful in color and shape. Bred and owned by Will H. Schadt, Goshen, Ind.

passing locomotive fell on his roof, the shingles caught fire, and the farmer lost all his crop.

The second farmer took the adjacent homestead about the time of this fire, and when he came to build a barn he roofed it with tin as a precaution against fire. But he was penny wise and pound foolish. The tin soon needed a coat of paint, but he thought it could wait till spring. When spring came the roof wasn't worth painting; it had rusted through and leaked with every rain.

The third man was poorer at the start than the others. So he built a rough shaft for his crops, roofing it with the cheapest material—tar paper. But this soon became brittle and cracked. Worried by this, he began a systematic investigation to find the best roofing. And when he built his larger barn he covered it with Genasco ready roofing, made by the Barber Asphalt Paving Company, of natural asphalt from Lake Trinidad. That was five years ago, and the roof is still solid.

Since then most of the farmers in his vicinity have used it for all their new buildings. It is guaranteed for five years

pens this year. These pullets are the fifth generation bred from birds winning shape and color specials. Naturally you would expect stock bred from this high quality of breeders would be good ones. Mr. Coulter's birds were among the winners at the recent Indianapolis show. We would suggest you look up his ad, which appears elsewhere in American Poultry Journal.

Homer Slagel, Poland, Ohio, R. F. D. 3, is a Single Comb R. I. specialist, breeding high class specimens of this variety, which fact is proven, as at the recent Youngstown show, in the big R. I. Red meet under Lester Thompkins, he won first and third old pen, silver cup on best old pen, also silver cup on best young pen. These winnings are but a repetition of what Mr. Slagel has been doing at many of the shows since 1905, and is simply additional proof of the high class quality of his breeding. He has mated five grand pens for the egg trade, his prices are right and he guarantees satisfaction in every way. You will find his ad appearing regularly in the American Poultry Journal.

CHICKEN RAISING MORE PROFITABLE THAN EVER BEFORE.

No one should attempt to raise chickens for profit without thoroughly posting themselves on the fine points of the business.

The average poultry raiser could triple or even quadruple his profits if he would only follow the methods which others have found so successful and so profitable.

Raising chickens is no child's play, and if you are determined to obtain the best results—and by that I mean get the most money from the least labor—you should read carefully some good book on the question.

Poultry raising is being conducted on very scientific principles nowadays, and those who do know these principles and how to carry them out are reaping tremendously big profits.

In answer to the demand for a good poultry book the Reliable Incubator & Brooder Co., Box C1, Quincy, Ill., have recently published for the benefit of the poultry raisers of the country a handsomely illustrated book which is free to poultry raisers upon request.

This book has been prepared by a great poultry expert known the country over for his prize-winning fowls and his general success in the business, by a man who has surprised the poultrymen of the country by his large profits per hen.

This book explains in every detail all the branches of the poultry business. It tells how to raise the healthiest fowls at the least expense—how to increase the egg yield and how to market to the best advantage.

There are many more interesting features, among which are how to get fertile eggs and how to secure the largest hatch. The process of incubation is also described and a few simple rules are given by which to properly judge an incubator.

If you think of going into the poultry business or are already engaged in it and you are determined to get the best possible results, don't fail to send for this book; it doesn't cost anything and it might show you the way to bigger profits than you ever thought possible in the poultry business.

AN IMPORTANT SALE.

After having been a breeder of Cochins for a period of thirty-six years and for the past several years recognized and hailed as America's greatest Partridge Cochin specialist, George W. Mitchell, of Bristol, Conn., has sold his chickens, valued at some thousands of dollars, together with the good will and everything pertaining to the breed he has brought to such a high degree of perfection.

The announcement of this fact will be received as a surprising piece of news by many and will rank as one of the most important changes noted among the poultry fraternity for some time. By a deal consummated a few days since, Mr. Mitchell has sold his entire stock of world prize winners to Robert F. Clark, of Milton, Mass. Mr. Clark is connected with the brokerage firm of Hayden Stone & Co., of Milk street, Boston. He has an estate of fifteen acres in that delightful suburb of Boston. He has just had completed some of the finest poultry houses in the country and his henery is very finely equipped. He has been a breeder of poultry for years and has been a great admirer of and has acquaintance with some of the old New England fanciers. He is very well known to the management of the big Boston poultry show, which ranks with the New York poultry show in this country. He is a man of fine character and will spare no expense in keeping the Mitchell birds up to their present standard of perfection.

Mr. Clark has a display ad in this issue and as he comes to us very highly recommended, we do not hesitate to recommend him to our readers. His stock does not need any praise from us, as the Mitchell strain of Partridge Cochins is well and favorably known from Maine to California.

CLOSE TO NATURE.

Getting close to nature in chick brooding means more chick lives saved. If it were possible to actually duplicate nature's requirements for the perpetuation of life and to be able also to eliminate the accidental influences, it would then be possible to raise to maturity every healthy chick hatched. The old hen could

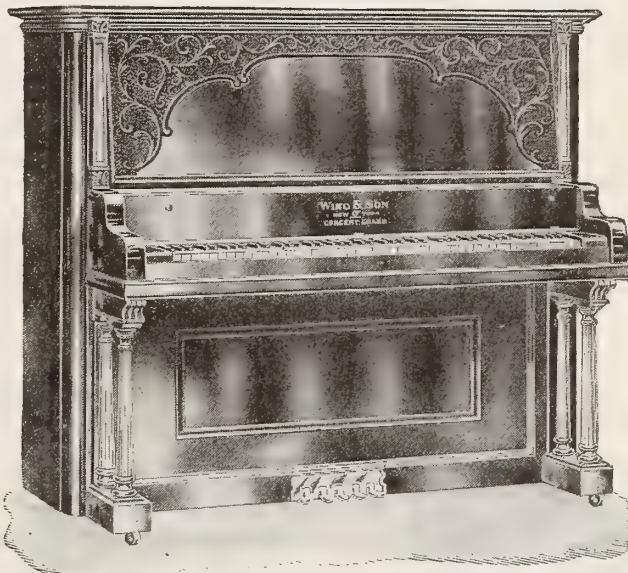

do it with her instinct to select food, brood, and care for them were it not for the accidents over which the hen has no control and which beset chick life on every hand. If man can do all that the hen can do and in addition can eliminate very largely the accidental forces he can then bring to maturity more chicks than can the hen. Too many brooders, while attempting to eliminate the accidental, have failed in imitating the natural. To stay close to nature is the principle on which the Close to Nature brooder is constructed. It is an exact duplicate of the hen in her instinctive way of brooding. This brooder warms the chick by contact warmth as does the hen. It goes farther than the hen, as it gives fresh, temperately warm air to every chick, it matters not how many may be in the hover, and it absolutely prevents chicks either piling up or overcrowding. This brooder has made a wonderful impression on scientific poultrymen all over the country. It is not a novelty or a play-

thing, but an expensively built, big brooder. The brooders are for use in orchard and field, while the hovers may be used in any form of shelter. You can get a catalogue by addressing the Close To Nature Company, at Colfax, Iowa.

The Hoosier Strain Barred Rocks, originated by G. Earl Hoover, Matthews, Ind., won at the great Fort Wayne show in January, first cock, first and second hen, first and second cockerel, first, second and third pullet, first pen and cash special for second best display in the American class. This great record was made with only eight entries and in a very strong class. Under letter of recent date Mr. Hoover writes that his matings this year are the best he ever owned and they can be counted on to produce their share of winners, as usual, and that he would be pleased if everyone interested in this variety could see and personally inspect the very high quality of each and every pen. For further information write him.

Rock-Bottom!

Yes, Rock-Bottom Prices and on a Piano of the HIGHEST Quality

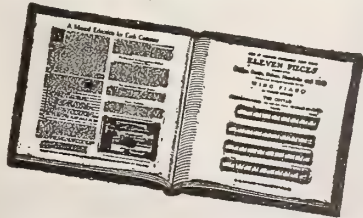

Let us quote you the most astounding prices ever offered on pianos of unexcelled quality. The very rock-bottom prices—prices that would mean ruin to the local dealer or the mail-order houses that buy their pianos from the manufacturer. You will be amazed at the direct-from-the-factory prices on the well-known Wing Piano. We will positively save you from \$150 to \$250 on the purchase of a piano of highest quality, recognized merit. We offer to convince the purchaser by shipping your choice of a piano on approval, all freight prepaid, no money down—absolutely free trial—a four weeks' free trial. Remember: all freight charges prepaid, no matter whether you keep the piano or not.

Send for the best, safest, most instructive book of piano-buying information ever compiled; the

Book of Information FREE!

Would you like to know all about pianos, how they are made, how to judge the fine points of quality and price in buying a piano? Then send the coupon for the piano book which we are sending out FREE for the present—the book is free.

The Coupon Brings this 156-Page Book Free

formation that may mean hundreds of dollars to you, whether you buy a piano now or later. Put your name on the coupon and mail it to us AT ONCE.

WING & SON, Est. 1868, 373-386 W. Thirteenth Street, New York

So many of the new style Wing Pianos are getting into homes where the people buy for all cash, that dealers are trying to tell it around that Wing & Son REFUSES to sell on time. This is not true. We sell for cash OR on VERY, VERY EASY PAYMENTS just as YOU choose after your four weeks' free trial. And many of our wealthy men are buying Wing Pianos right now on our easiest monthly payment plan.

Every discount goes direct to you

The Wing Piano stands alone—sold direct from the factory—the only one sold direct from an exclusive piano factory without going through the hands of a single middleman.

When you buy a Wing Piano you pay no salesmen's, dealers' or middlemen's profits. You pay no commission to music teachers and supposedly disinterested friends. We cut out all middlemen and you put the discounts in your own pocket. The piano book tells how to save from \$150 to \$250.

This book (156 pages) tells all about material, manufacture, assembling, patented devices and what they do, all about soundboard, action, case, in fact every detail connected with the production of a fine, high grade piano. You will be astonished at the amount of information about piano quality and piano prices, and how to avoid the deceptions of piano salesmen. The New York World says, "A book of educational interest everyone should own." With this book we send our direct-from-the-factory prices on Wing Pianos.

Altorf Bros. :- 15 Main Street :- Roanoke, Illinois

MR. WILLIAM H. GOETZ, BUFF AND WHITE ROCK SPECIALIST.

Mr. Goetz breeds only fancy poultry, preferring to breed quality to quantity, and he is located on the outskirts of the beautiful city of Detroit, Mich., at 1150 Cadillac avenue, and while land in this section is quite valuable, Mr. Goetz has some fifteen acres which is devoted to raising fancy poultry and gardening. Mr. Goetz has been making a specialty in these varieties since 1905, and during this time has exhibited at many different shows where, in hot competition, he has always won a large share of the coveted prizes.

Mr. Goetz has his houses arranged on the colony plan and has the open front type house, which he contends is best, as it produces strong, healthy, vigorous birds and he has no trouble in securing fertile eggs from his breeding stock, and his chicks thrive and grow to vigorous specimens. Mr. Goetz always retains his choicest show specimens to be mated again in producing his prize winners, and certainly has a fine lot of breeders mated for the trade in both varieties. We will only mention that his first-prize pen of Buff Rocks is headed by the first prize cock at St. Louis, Mo., December, 1909, and among the females are found hens that were first and second pullet at Detroit, 1909, also the third hen at New

KIOWA CHIEF.

Sire of many prize-winners at leading shows. Bred and owned by Frank J. Overstreet, Kiowa, Kans.

York, 1910. His White Rock pens contain winners at Buffalo, New York, Detroit and numerous other shows, and the male birds are all up to and over weight. You will readily agree with us that Mr. Goetz has and is breeding for quality, not quantity, and you will find his prices are very reasonable.

If in need of stock or eggs in either of these varieties you will do well to look up Mr. Goetz's ad elsewhere in this issue. D. T. Jenkins.

S. T. Divinia, St. Joseph, Mo., is a well known breeder of Barred Plymouth Rocks and he has recently issued a very neat and attractive booklet which contains a great deal of information about his stock and as he is anxious for all our readers to have one, we ask those who are interested in this variety to write him, and mention American Poultry Journal.

L. D. Howell, Mineola, N. Y., the well known Buff Wyandotte breeder, has a display ad in this issue and as he is a breeder of experience, you will not miss it if you favor him with your order. In writing him please mention American Poultry Journal.

OWEN FARMS LIST OF SPECIALS WON AT BOSTON AND NEW YORK, 1910.

Boston.

White Rocks.—Best collection, best cock and four hens, best shaped male, best cock, best hen, best pen.

White Wyandottes.—Specials for best pen, several other specials.

Orpingtons.—Club specials for best pens in each variety, president's cup for best pen of Orpingtons, specials for best shaped white male, best shaped female, best colored male, best colored female.

BABY CHICKS.

The plan of doing away with the fuss and bother of hatching eggs, not to mention the expense of poor hatches, is becoming very popular among poultrymen. It is much more satisfactory for a poultryman to start with baby chicks and confine his attention to raising them. Worry, work and risk are thus reduced and there is a corresponding increase in the profits. Mr. Elden E. Cooley, of Frenchtown, N. J., is supplying poultrymen with high class Barred Plymouth Rock and White Leghorn baby chicks. Every poultryman should write for his booklet, which fully describes his plans, mentioning this paper.

The attention of our readers is called to the page ad of U. R. Fishel, Hope, Ind., in this issue. Mr. Fishel advertises the "Best in the World" White Plymouth Rocks. He has mated up the best collection of breeding pens that he ever owned and is now prepared to fill all orders promptly and with satisfaction to every buyer. He also has some choice cockerels to spare that will improve your flock. Write him now and mention American Poultry Journal.

"Fernlea" is the title of an artistic little booklet issued by Fred Harris, Elmsford, N. Y., who, it will be remembered, captured first pen of White Orpingtons at the recent Madison Square Garden show and exhibited a sensational White Orpington pullet, which won first at Philadelphia, also silver cup for the whitest female and silver cup for the best Orpington on the show. Breeders of White Orpingtons will be interested in receiving this booklet.

C. C. Foster, R. F. D. 1, Quincy, Mich., is a breeder of S. C. White Leghorns who is rapidly forging to the front as a producer of up-to-date birds of this variety. He has mated up five grand pens for the season's trade and is now prepared to fill orders for eggs promptly. He is also advertising day-old chicks. Send for his mating list, and mention American Poultry Journal.

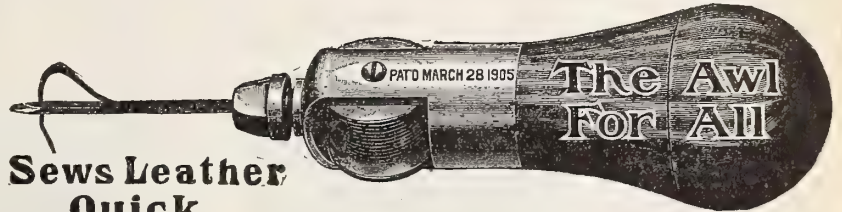

J. Le Roy Cunningham, Indiana, Pa., breeder of White Wyandottes exclusively, starts a display ad with us this month, and reports that his birds were winners at Apollo, Greenburg and Pittsburg, Pa. He uses trap nests and has succeeded in developing a wonderfully good laying strain. Write him for prices and particulars, and mention American Poultry Journal.

Lock Stitch Sewing Awl

**Sews Leather
Quick**

This Awl is designed particularly for farmers' use, but it will be found a time saver and money saver in nearly every household. It is not a novelty, but a practical hand sewing machine for repairing shoes, harness, belts, carpets, rugs, tents, awnings, canvas of all kinds, gloves, mittens, saddles, etc.; you can also tie comforts. The awl proper is grooved to contain the thread or waxed end and the point being diamond shape will go through the thickest of leather, green or dry, any thickness. It can be used with either straight or curved needle, both of which come with the outfit, and veterinarians will find it indispensable for sewing up wire cuts in stock. The Lock Stitch Sewing Awl is a necessity for the people; can be carried in pocket or tool chest; nothing to lose, always ready to mend a rip or tear. Better than rivets because it is portable. Can be carried in mower or harvester tool box, threshing kit or anywhere. If you save one trip to town for mending you are money ahead. Every farmer needs one, every man who teams needs one. It is the most practical hand sewing machine for actual use ever devised. They are put up with straight and curved needles, waxed thread, illustrated book of directions and everything ready for use.

WM. KLUG, ROSE AND SINGLE COMBED RED SPECIALIST.

Mr. Klug is certainly a Red enthusiast and has been making a specialty of Reds for a number of years past, during which time he has exhibited his birds at many shows, always winning a large share of the prizes. Mr. Klug not only breeds prize-winning stock, but has a grand laying strain as well.

His pullet which won first prize at Detroit, 1909, further covered herself with honor by laying 247 eggs during the year, and today she has that rich red color so much desired in a Rhode Island Red hen, being nearly equal to any pullet in richness of color.

Mr. Klug has been carefully mating his

A CORRECTION.

In the advertisement of R. D. Sly, in our March issue, we located him at West Clarksville, Ohio. His correct address is West Clarkfield, Ohio, where he breeds "Ringlet" Barred Rocks and S. S. Hamburgs of prize-winning fame. Send for his price list of eggs and stock and mention American Poultry Journal. He will treat you right.

F. S. Smith, Hamilton, Ohio, breeder of S. C. Buff Leghorns, has made a remarkable record with his stock during the past two years, and reports the following winnings: In 1908 won most of the ribbons at Hamilton and the great Cincinnati show, and two silver cups for best

pullet, first pen, four club ribbons and silver cup for best display in Mediterranean class. Columbus, 1910, first cock, fifth cockerel, second pullet, second hen, first pen. Cleveland, 1910, third cock, fifth pullet, first pen. Indianapolis, 1910, second cockerel, second pullet, fourth cock. Toledo, 1910, first hen, second and third cockerel, first, second and third pullet, first pen. If you are looking for something that will improve your stock, write him for prices and particulars and mention American Poultry Journal.

Those interested in R. C. Rhode Island Reds and particularly those who are breeding the Tuttle line of stock, should read the ad of A. W. Blanchard, of Beloit, Wis., who offers eggs from his best pens of Tuttle Reds at very reasonable prices,

PARTRIDGE COCHIN HEN.

Winner of first at New York, 1908-1909. Owned by Robert F. Clark, 87 Milk St., Boston, Mass., who recently purchased the entire stock of Geo. W. Mitchell.

First prize Buff P. Rock pullet, Chicago, January, 1908. Owned by S. D. Lapham, Dearborn, Mich.

birds from year to year and has these desirable qualities well stamped in his flock throughout, and this season his matings in both Rose and Single Comb are considerable in advance of other years when it comes to quality. He is in the business to please his customers and should you desire eggs or stock of either variety you will do well to correspond with Mr. Wm. H. Klug, proprietor of Seyburn Poultry Yards, 895 Seyburn avenue, Detroit, Mich. His ad will be found elsewhere in the columns of American Poultry Journal.

D. T. JENKINS.

display. In 1909, at Hamilton, first cock, second and third hen, first and second cockerel, first pullet, first pen and silver cup for best display. In 1909, Cincinnati, first cock, second hen, second and third cockerel, second and fourth pullet, second pen and special for best colored male in show. The great St. Louis show, 1909, second cock, second pen, third pullet, fifth cockerel. Chicago, 1909, third pen; showing at the above three shows at the same time. Dayton, 1910, first and second hen, first and second cockerel, first and second cock, first, second, third and fourth

considering quality. Send for his circular. It's free.

H. C. Franklin, Townshend, Vt., the Rose Comb Brown Leghorn specialist, has just issued his 1910 mating list. Better send for one; it will interest you.

Pleasant View Poultry Farm, Griswold, Iowa, has just issued a very neat circular about their Rose Comb Rhode Island Reds. Send for one and mention American Poultry Journal.

Why Poultry Pays
and
How to Make It Pay.

WHY POULTRY PAYS AND HOW TO MAKE IT PAY

A book for the beginner in poultry raising and for those engaged in it who are interested in securing from the business the greatest profit obtainable. This book tells you how to start right, how to succeed with poultry, how to line breed, how to win at the shows, how to breed and prepare fowls for market, how to feed for the production of eggs. Also contains a chapter on Poultry Diseases and simple remedies for same. Gives instructions on incubators and brooders and much other valuable information, and is profusely illustrated with ideal drawings of Standard fowls.

We are selling this book at the popular price of **50 cents**. This book and one year's subscription to American Poultry Journal for only **75 cents**. Send all orders to

A Trip Through the East

By Harry M Lamon, Special Representative A. P. J., Adams Center, N. Y.

PINE GROVE POULTRY FARM, NORTH MIDDLEBORO, MASS.

As I have always been anxious to see who is who in Columbian Wyandottes here in the East, I made a trip to North Middleboro, Mass., as I knew that Wm. Hunt was a leader in this variety. Mr. Hunt's farm consists of about twenty acres, located on the street car line, which gives him the best of shipping facilities, and is easy of access. It will be remembered that Mr. Hunt bought the entire stock and good will of C. A. Wheeler, Brighton, Mass., in July, 1909, in this variety, and the many grand birds seen at Pine Grove is evidence that Mr. Hunt is maintaining the high standard set by Mr. Wheeler. The main breeding building is 100 feet long, divided into ten pens, and in this house I saw some of the finest Columbians in the land, among them was the first pullet at Boston, for which Mr. Hunt has refused \$100 on four different occasions; also the fourth and sixth cock, third and fourth hen, third cockerel and second pullet at Boston, 1909. Then there was the first cock and first hen at Providence, 1908, looking fit to do the trick again. In one pen were the females in the second pen at the Brocton, Mass., fair, and it would be hard to find better and more evenly matched birds. In Wyandotte shape they are what all want to see and exceptionally fine in hackle, stripping and tail; in fact, right through Mr. Hunt's block can be seen uniform good quality. The other buildings on the place consist of a cockerel house, incubator cellar and brooder exhibition fitting house and numerous colony houses in the orchard. Pine Grove poultry farm

is certainly in splendid shape to please its customers, both in quality and utility stock. At the time of my visit, February 21, his egg yield was extra good for that time of the year. Mr. Hunt is one of the men that guarantees everything just as represented that he sends out, or your money back. Look up his ad.

ROYAL FARMS, LITTLE SILVER, NEW JERSEY.

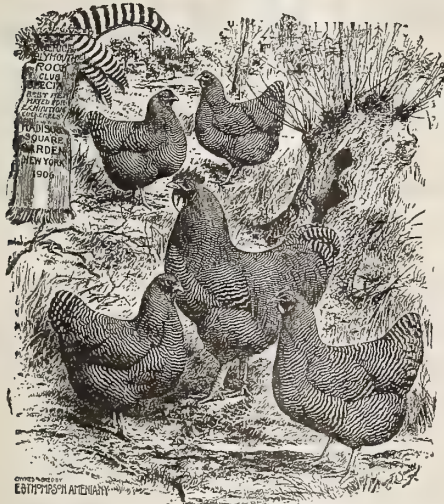

A few days after the Red Bank, N. J., show I visited Royal Farms, which are about one and one-half miles from Red Bank on the famous Rumson road, one of the most celebrated drives on this continent. Here I found some of the best Single Comb Buff Leghorns, Indian Runner Ducks and White Holland Turkeys that it has been my good fortune to see. Mr. Evans was busy superintending the construction of his new brooder and incubator house, which is to have a Hall incubator of 3,000 egg capacity. The brooder house is 140 feet long and contains forty hovers. All buildings at Royal Farms are on concrete foundations and the yards have splendid drainage and lots of shade. In looking over the Buff Leghorns the writer saw and handled the best male in shape and color that he has seen in years. He was of that bright, even, golden color from head to end of tail and his tail had that low carriage Leghorn breeders of all varieties strive so hard to get. The males of this male were all that could be desired in head points, color and shape, and I predict some great birds from this mating at Royal Farms. The balance of the pens of Leghorns were of strictly high class

quality; but of course there is always one best, and I think our readers like to know about them. Nevertheless, some idea of the quality of the other hens can be gleaned, as they are headed by such males as the third pen cock at New York, 1909, third pen cockerel New York, 1910, first cockerel New York state fair, 1909, first cockerel Red Bank, 1909, and the first prize cockerel New Jersey state fair, 1908. That Royal Farms are leaders in Indian Runner ducks I need only to say the yards are made up of their Chicago, Jamestown and Madison Square Garden winners. They are of the proper shade, fawn and white, with correct markings. I noted especially their grand drake which won first at Madison Square, 1910, and special for best Indian Runner in the show. The White Holland turkeys at Royal Farms are most decidedly a grand flock, and maintain the quality of the Leghorns and ducks. They are extra large in size and pure white in plumage. Mr. Evans was very proud of his win at Madison Square Garden last winter on four entries, taking third Tom, first and second hen and first cockerel. His motto is not how many but how good, and I feel perfectly justified in saying to our readers, you will get quality form Royal Farms.

WATERVIEW POULTRY YARDS, HEMSTEAD, L. I., N. Y.

On the outskirts of the beautiful village of Hemstead, Long Island, N. Y., are located the Waterview poultry yards, H. J. Dietz, proprietor, where Single Comb White Leghorns, Single Comb Rhode Island Reds, Light Brahmas and Barred Rocks are bred for market and utility purposes, under the supervision of Mr. A. Johns, the manager. At the time of our visit, February 5, they were carrying 400 Leghorns, 100 Reds, 75 Barred Rocks and 50 Brahmas for breeders. I found the stock in grand condition, not a cold to be seen, and they were certainly shelling out eggs. Pen after pen with six females

Fashion's Proudest Birds are "Ringlets"

Winners of Special Prize for Best Pen mated to produce Exhibition Cockerels, at Madison Square Garden, New York.

E. B. Thompson's Barred Rocks

are identical to success in Barred Rock breeding; they combine all the great qualities of size, style, shape, heads, barring and color which have made the "Ringlets" America's leading strain.

Their conquest of Madison Square Garden, New York, for more than 20 years is familiar to every Barred Rock fancier throughout the civilized world. The record stands alone and puts all others in eclipse---it is the most remarkable in the annals of poultry shows.

My producing the beautiful "Ringlet" feathers on Barred Rocks is recognized as having passed far beyond the realm of experimental theory. I never had so many superior exhibition and breeding birds---both male and female---with which to supply my customers all over the world as now, and all fanciers who visit my farm declare the stock is a revelation in the science of Barred Rock breeding. I can furnish you any birds you may want at reasonable prices and will assure exceptional value. Will mate to produce winners if desired.

The "Ringlets" are known in every land and play their part in the commerce of the world

"Ringlet" Eggs Are The Best That Money Can Buy; They Produce Prize Winners

Mr. E. B. Thompson

Dear Sir:—Thinking it would be of some pleasure to you to know of my winnings on your "Ringlets" at our show, I will state that I won first prize on cock, hen, cockerel and pullet, and special for best cock, any variety, and special prize for best hen, any variety, in the show. The "Ringlets" win wherever shown. This was my first exhibit and my birds were the sensation of the show. Yours truly, W. J. Brown, M. D.

Dover, Ark., October 18, 1909.

My matings for eggs are the world's finest, and prices are as usual: One setting, \$6; two settings, \$11; three settings, \$15; four settings, \$18; 100 eggs, \$30. New 58-page catalogue, full of pictures of New York winners from life, will be mailed upon application.

ADS IN THIS PAPER

Address E. B. Thompson, Lock Box 510, Amenia, N. Y.

in had five and six eggs in the nests, which speaks volumes for them as egg producers. The quality of the birds at Waterview is of the best. The owner, when starting, bought the finest stock to be had and maintains the quality to date. The main breeding house is 300 feet long, divided into pens of ample size for the exhibition breeding stock, with large runs for each pen. The utility stock is kept in four other large houses, 60x30, divided in half, fifty birds being allotted to a pen, with free range giving them most ideal conditions. The hatching and brooding is all done with incubators and a pipe brooder system. Mr. Dietz has never cared to show his stock to any great extent, but last year made an entry of a pen of his Leghorns at the Mineola fair, winning first, and this in strong competition, as we can assure our readers that Mineola is one of the quality shows of the East. The prices on stock and eggs quoted by Waterview I considered very reasonable for the quality of their stock, and advise our readers to write them if in need of anything in their line. Look up their ad.

ELMER G. DEAN, MORGANVILLE, N. J.

While at Morganville, N. J., I met Mr. Elmer G. Dean, the Single Comb Rhode Island Red breeder, who starts a yearly ad with us in this month's issue of the American Poultry Journal. In looking over his birds I noticed they were exceptionally strong in black points and black tails among the females. They are of the deep red color, even color on the body and when you come to the tail the red stops and the back is finished with a coal black tail. The males in Mr. Dean's flock are all that could be desired in many respects, size and evenness of color being strong characteristics. Mr. Dean showed me the eggs he had on hand and I must say I never before saw such an even colored lot and of such large size. In color they are a deep brown. His first exhibit was at Red Bank, 1909, where his birds began to attract considerable attention among the Red breeders, winning first pullet and second cock on two entries. At Monmouth county fair, 1909, on four entries he was awarded second and third

cockerel, second pen and fifth pullet. Trenton, 1909, third cockerel on one entry, and at Red Bank, 1910, fourth and fifth pullet on two entries. Quite a record when you stop to think about it and the competition. A win on every bird he ever exhibited. It stamps them of the best of quality and I recommend Mr. Dean and his birds to our readers. He guarantees satisfaction, and at the prices asked for his eggs—\$2 per setting—should be overwhelmed with orders. Look up his ad.

PINE TOP POULTRY FARM.

Pine Top Poultry Farm, Hartwood, Sullivan county, N. Y., J. H. Hallock, proprietor, breeder of Barred Rocks and Single Comb White Leghorns, located on the hills of Sullivan county, 1,500 feet above sea level and 100 miles from New York City, on the N. Y. Ontario and Western railroad. If high quality, strong constitutional birds cannot be bred there they cannot be bred anywhere. The equipment at Pine Top is most complete. The different buildings being nicely located in a forty-acre clearing of a 150-acre tract of pine, spruce and hemlock. It was quite evident to me that Mr. Hallock is looking years ahead in building up his farm, as he has the yards and runs set out with apple, peach, pear and plum trees. The receipts from this source alone in a few years will amount to a nice, snug sum. The buildings, like everything else at Pine Top, are of the best and consist of the office, feed house, incubator cellar, large and small brooder houses, White Leghorn house, Barred Rock house and fifty colony houses. The incubator capacity has been increased to 3,500 eggs and the chicks are leaving the brooder houses have the entire run of the farm. Manager Winchell is on the job every minute at Pine Top and the entire plant is kept absolutely clean. It was February 17 that I made my visit and they were then starting to ship day-old chicks and I was informed by the office manager, Miss Weldon, that they were simply snowed under with orders.

On the first floor of the feed room is installed a 9-horsepower gasoline engine, which runs the machinery for grinding, cracking and mixing all the feed used; also the buzz saw to get out the shipping

coops and other lumber used about the plant. A most complete carrying system can be found here. As the feed leaves the grinder, cracker or mixer it is carried to the second floor, where it is distributed in the large feed bins, which are opened by chutes to the smaller bins on the ground floor. This building and the system installed are worth carefully noting by anyone visiting this plant. What interested me the most was the birds, and I wish to lay particular stress on the uniformly good quality throughout. There is not a poor pen to be seen at Pine Top. I first looked over the Leghorns, of which there were eight grand pens, mated for the egg trade, and they had quality teeming all over them. The first pen visited was headed by that great male that won first pen, New York, 1907, first Chicago, 1908, and first Philadelphia, 1909. The next by a son of their first Chicago, 1908, and first Philadelphia, 1909, cock. The third pen, headed by the first Philadelphia cockerel, 1909, now a cock, looked every bit as good as he was a year ago, and so it was right down through the balance of the yards, all headed by strictly high quality birds, fit to show and win in the strongest competition. That the females in these pens are of Pine Top quality goes without saying, and I believe the results from these matings will be some of the finest Single Comb White Leghorns that ever faced a judge.

After looking over and handling so many good Leghorns I was not at all surprised to find the same quality in the Barred Rocks. I like very much the male and female lines shown here, both being strong in combs, eyes, color, narrow barring, shape and size. The uniform shape was exceptionally noticeable. They have no room for high tailed Barred Rocks at Pine Top. Twenty-three pens were mated, eight for cockerels, eight for pullets and seven for the utility trade. I want to say right here that they get eggs in the winter at Pine Top and a lot of them. The cockerel breeding pens were headed by the champion male at Philadelphia, 1909. The second cock, same place and date, the first Tri-State winner at Memphis, Tenn., September, 1909, third cockerel, Philadelphia, 1909, the first cockerel Tri-State fair, September, 1909, and others just as good, a rare lot of males, exceptionally strong in narrow and clear-

Owen Farms' Eggs For Hatching

White Plymouth Rocks
Eggs for Hatching

This is the important matter before all of us from this time until the whole hatching season is over. Owen Farms has taken a departure this year and we feel that it should be explained fully, so that every one who runs may read and thoroughly understand what we are doing and why we are doing it.

In the first place, the writer has a large interest in the success of the poultry business in the United States, an uncommon desire to see it grow and prosper. Each one who writes Owen Farms, either for information, advice, price on stock or eggs, becomes to a certain extent an acquaintance of both Mr. Owen, the Proprietor, and Mr. Delano, the Manager, and we feel a personal interest in them. I have carefully gone over our business of the last few years and I have come to the following conclusion, that nineteen people out of twenty cannot afford to pay \$20 a sitting for the best eggs that Owen Farms can produce. Having \$20 pens, which we would allow the customers who could afford this price to en-

tirely monopolize to the entire exclusion of the other nineteen out of the twenty, seemed to us not to reflect and express that intimate, close interest which we have in each and every enthusiastic fancier.

No One Excluded From the Possibility of Growing the Best Birds of the Year

We therefore decided that we would list our pens just as we always have, describing the matings carefully and mating only our very best birds, limiting our mating considerably, and that we would have one uniform price, giving everybody a square deal and taking eggs from the pens in such a manner that every one who bought eggs of us should have the undoubted possibility and probability of raising some of the finest chicks of the year. To the man who could pay \$20 for a sitting this method does not work to his disadvantage as he might at first suppose. If, for instance, he was buying two sittings at \$20 a sitting he would pay us \$40 and get thirty eggs, according to our methods of last year. This year he may purchase of us for \$50 one hundred eggs and among that hundred eggs he would receive probably as many as thirty eggs from the matings that we have heretofore listed at \$20 per sitting. He gets, therefore, in addition to what he would have received last year great possibilities in the balance of the eggs, for I can assure each and every customer that we will not have a single mating that will not produce birds of remarkable quality.

We do not pose as philanthropists in this matter, but so long as the writer, Mr. Owen, lives and continues in the poultry business, the fair interest of our customers shall be our first consideration.

To state it clearly just what you can do with Owen Farms this year in eggs for hatching I would say that you may receive from any of our varieties:

Owen Farms Wm. Barry Owen, Prop.
Maurice F. Delano, Mgr. Box A, Vineyard Haven, Mass.

ness of barring, and other points that go to make up our winning Barred Rock males at New York, Philadelphia and Boston. In the pullet breeding pens were to be seen all of their New York, Philadelphia, Boston and Chicago winners, headed by sons of the very best from among them. I was much interested in the cockerel that is a son of their famous Chicago winner, "Queen of the Pines." He is a beautiful bird all over, and with several of his feather, should be able to produce the very highest specimens to be found in Barred Rock females.

OWEN FARMS, VINEYARD HAVEN, MASS.

Arriving at Vineyard Haven Friday afternoon, February 18, after a delightful ride by boat from New Bedford, Mass., I walked to the Owen Farms office, which is but a short distance from the wharf, and was made welcome by Manager Morris F. Delano. To the average poultryman the office generally means one room with possibly a typewriter. At Owen Farms the office is on the same scale as to be found at any other large business establishment. It was a revelation to me. Four stenographers as busy as they could be, taking care of the tremendous amount of mail received. This room also contained the letter files, card index system and other fixtures that go to make up the well regulated office. At the far end is Manager Delano's private office, and when I called his desk looked as though he had not seen the bottom of it for several weeks. It is work at Owen Farms office from morning until night, and to give the reader a more exact idea of the amount of mail handled, one morning that I was there the mail contained 125 letters, and, mark you, that was only one mail. Then, again, I want to remind you that instead of one stenographer, there are four. I am not writing this article to let what a great amount of good Mr. Owen is doing for the poultry business in general; I made mention of that fact in my report of the Boston show; but am writing to let the readers of the American Poultry Journal know what Mr. Owen, Manager Delano and their able assistants are actually doing at Owen Farms, and to impress upon the reader's

mind what can be done in the poultry business, what is being done and the exceptional opportunities awaiting those who are willing to dig in and work. I have always felt that poultry people as a rule do not care to read about fine buildings as much as they do fine birds. In other words, most people visit a poultry farm to see the fine birds and don't give a rap whether the bird is in a mansion or a drygoods box, if it only has the quality and the health. So I will pass

gers directly in charge. In regard to the numbers and magnitude of the buildings, it is sufficient to say that they are in position to mate up 350 breeding pens and have incubator capacity and brooder houses and equipment to take care of such an enormous output. And the floor space in these pens could easily accommodate from thirty to forty birds instead of from six to eight as I saw them.

That Owen Farms are specialty breeders of the varieties they handle is very

A flock of White Wyandottes on Frogdale Poultry Farm, French Lick, Ind.

over the buildings at Owens Farms by saying that they are as good as I have ever seen and thoroughly practical.

All the stock is housed on the open front order, which insures strong, healthy birds. Right here I will make mention of the fact of the hundreds of birds I saw not one was out of condition, which speaks volumes for the assistant mana-

evident to anyone who visits their farms, as each breed is handled separately, is housed by itself, and is distinctly apart from the others and is cared for by its own set of men. Each breed has an assistant manager in direct charge, who in turn is held responsible by Manager Delano for the welfare of his flock, or perhaps I should say, is assisted and advised by General Manager Delano.

Owen Farms' Eggs For Hatching

10 Eggs for.....	\$ 7.50	14 Eggs for.....	10.50
11 Eggs for.....	8.25	15 Eggs for.....	11.25
12 Eggs for.....	9.00	50 Eggs for 60c each, or.	30.00
13 Eggs for.....	9.75	100 Eggs for 50c each, or.	50.00

Every egg will be marked with the number of the pen and the variety from which it is taken, and by comparing it carefully with our mating list you will see just what you are getting, and that we shall give the same satisfaction in results that we have heretofore we are positive, for already we are hatching from our eggs with great satisfaction as to fertility and hatch.

We guarantee three eggs out of four to be fertile, and where the number is an odd number and cannot be divided by four we shall give our customers the benefit of the extra egg.

We advise early booking of orders, for this allows shipment to be made at the time you wish them, and in some of our varieties particularly the number of the pens to be mated is somewhat limited and you are likely to be disappointed if you put off your orders too long.

We shall continue to pack them with the extreme care that we have used heretofore and can assure our customers that they can order eggs fearlessly from any point in this country or Canada, as our reports have been extremely favorable from eggs shipped to the extreme North and South and to the extreme West.

Express Charges on All Original Orders for Eggs for Hatching Prepaid to Points in the United States or Canada

This is not the first time that Owen Farms has proposed something which is an innovation. Among other things they were the first to introduce to the poultry world stock guaranteed to win at any show in America.

In adopting this very broad proposition for the benefit of their

customers they are acting with care and a knowledge of just what it means, both to themselves and to their customers, and they have no hesitation in doing it. As almost every one well knows, express rates can be made better if made at the point of shipment, and particularly when paid in advance. We know how much the express will cost us; you do not know how much the express will cost you. We believe that this step that we are taking is the greatest step that was ever taken in the poultry world for the protection and benefit of the customers of any one particular farm.

Mating List

Our mating list for 1910 is all ready and is yours for the asking. Our matings are as carefully described as in years gone by, and that you ought to receive one whether you purchase eggs of us or not I confidently believe. A postal card naming the variety you are interested in will bring it with the least possible delay. Do you not owe it to yourself to carefully read our mating list before you buy eggs this year?

Breeding Stock

We can now give you a wonderfully good lot of young birds that have come on and developed since our showing at New York and Boston. Just at this time we are in a splendid position to furnish our customers with really wonderful quality in males and mated trios and pens for breeding purposes. Our matings are made and we will sell any bird on our place not included in these matings. This year we are selling eggs for hatching only at one price, those from our best pens; which have been reduced in numbers. Consequently, we have more first-class birds to sell than ever before at this time of year. If you need a grand male bird to head your finest pen or if you wish to start in one of our varieties with a trio or pen mated for the best possible results and having the best blood lines in the world, write and ask us what we can do for you. We cannot tell you what we have unless we hear from you and know that you want to hear from us.

Owen Farms

Wm. Barry Owen, Prop.
Maurice F. Delano, Mgr.

Box A, Vineyard Haven, Mass.

I first visited Tashmoo Farm, where the Barred Rocks are kept, and there found Assistant Manager Newton Cosh in charge. The pens were all mated up and had been for some time. The females were just merely starting to lay the eggs that many of the winners at our largest shows next winter will come from. It is not my idea to tell about all of the grand birds seen and handled while there, as their catalogue tells about them. But I thoroughly inspected every pen and handled many of them and am willing to go on record as saying that I never before saw so many good pens of Barred Rocks as there were at Owen Farms. There was

turned me over to Assistant Manager Nickerson, in charge of the Orpingtons. Owen Farms are to be congratulated on securing the service of Newton Cosh. The same can be said in regard to Mr. Nickerson. No one need worry about the position Owen Farms will occupy as Orpington breeders as long as he is in charge. We just looked over the Buffs and they certainly were a grand sight. Great large, low down, massive birds, with that bright, even golden shade demanded by the standard, good combs and bright red eyes were other strong features noted. I was quite interested to see how the male birds ran in under

made the Owen Farms Black Orpingtons famous.

The White Orpingtons at Owen Farms were a surprise to me. I had seen their grand Whites at Boston, where they won every first with a different lot of birds exhibited than they had at New York that won three out of the five firsts competed for, and rather imagined I had seen about all the good ones they owned. I hadn't seen half of them. The place was simply alive with White Orpingtons that were just as good as their winners and almost the equal of the Blacks in shape. I believe the results from the Orpington matings at Owen Farms will be

Photo showing a few birds taken from the yards of Will H. Schadt, Goshen, Ind. Average weight of the birds, including S. C. Buff, Black and White Orpingtons, 9¼ pounds. Mating list with full information will be mailed free upon request.

an even distribution of quality right through them all; not one or two pens containing all the good birds. It looked as though all the pens contained all the good ones. It is the high average quality in the breeding pens that produces the winners and I believe Owen Farms are stronger today in Barred Rocks than they were a year ago. After giving me every opportunity to thoroughly inspect and handle any of the birds I desired to, so that I would know exactly what Owen Farms had in Barred Rocks, Mr. Cosh

color of hackle and saddle and was happily disappointed to find every one I handled (and I handled a lot of them) were buff right down to the skin. Next came the Blacks. The first I came to were first, second and third cockerels at Boston, followed by three of the finest Black Orpington cocks I have ever happened to see in one breeder's yards. The luster on these birds is simply beyond description. Not a trace of purple was to be seen in any of them and their mates are of that deep, blocky type that has

highly satisfactory and very gratifying to Owen Farms. The breeding pens show that a master hand has done the mating.

The next day I visited what is known as the Red Farm. On one side of this farm the White Rocks are kept, on the other the White Wyandottes. We first looked over the Wyandottes, in charge of Assistant Manager Manchester. Manager Delano took me in tow and we inspected every pen and I handled bird after bird that fairly teemed with quality. I want to make especial mention of the size of

BUFF PLYMOUTH ROCKS

The Nuggets lead the world—always did and will, and are recognized as champions of America. Our cockerel NUGGET, JR. and pullet MISS NUGGET, easily ran away with the BLUE RIBBONS at the late Madison Square Garden Show, N. Y., 1910. Is this not sufficient proof that the NUGGETS are superior to all others?

If you want EGGS from the proven best come to headquarters. We have furnished Madison Square Garden winners for years. Our business is raising Buff Rocks for the BIG shows, helping others to win, and if you want eggs from PROVEN BREEDERS—from the strain that has a record with them from start to finish. Give us a trial and be convinced that we can sell you EGGS or BIRDS that will do you good. EGGS \$2.50, \$3, \$5, \$7, \$10 per 15. Eggs from NUGGET, JR. mating, containing first, second and third prize Madison Square Garden females, \$10 per 15.

The Nugget Poultry Farm, C. L. Pensyl, Prop. :: Box A, Bloomsburg, Pennsylvania

the Owen Farms White Wyandottes; they are large and they are white, with fiery red eyes, fine combs and the correct Wyandotte shape; they have that nice curve to the back that separates the Wyandotte from the Rock in that section. I don't mean in just a few of the pens, but in all. There were enough good White Wyandottes on that farm so that all of the pens could be composed of high class individuals. In my report of the Boston show I spoke of the first prize White Wyandotte pullet as a gem and an easy winner in her class, and when I saw her at the farm she was still holding her own and I predict she will be a hard hen to beat next winter. After carefully noting for the last time the many grand Wyandotte matings we went back to the other side of the farm, where the White Rocks are housed. Here we found the same high quality maintained as in the other breeds from the first to the last pen.

The White Rocks are looked after by Mr. Daniel Green, and they showed that they were well cared for. Here could be seen the descendants of that grand bird "Old Champion," twice a winner of the blue at Madison Square, once at the head of the first pen there and first as cock at Boston, a record I believe never attained by any other White Rock male. It is not the high quality of just a few of the pens that impressed me, as I have said before. But the high quality of them all, and what I could say of one of the White Rock pens will hold good all through. Nothing brings out a breeder's ability as the mating of the breeding

fourth hen, third pullet and first pen. I also wish to mention that Mr. Howells was awarded the \$5 gold special at New York for best display, also special for best pen. He will mate up but three pens the coming season. In one will be the cock and four females that composed the winning pen at Madison Square and the third and fourth prize pullets, the second pen is headed by the sire of most of the winners in the first pen, mated to a grand lot of hens. The third prize cockerel at

Richmond will head the third pen, and mated to him are eight hens of known quality as breeders. Mr. Howells has a record that rarely falls to the lot of an exhibitor, a win on every bird he has showed. That his eggs were running exceptionally high in fertility for this time of the year is shown from reports of some of his customers. One reported from ten eggs set February 9 nine strong, healthy chicks. Another, twenty-one out of twenty-nine, and one customer wrote that he

Fighting Water

Every month in the year your buildings—from dwelling to hen houses—have a fight to keep the water out. One drop of water working through the roof or siding opens the way for more to follow.

Protect your buildings by roofing and siding them with PAROID. Then that drop of water can never work through. Your buildings will be water-tight and stay water-tight.

PAROID is one of the well-known BIRD NEPONSET PRODUCTS, tested and tried for many years in all climates. In almost any section of the country you can see PAROID ROOFS, which have been on from 8 to 12 years and are just as good as the day they were nailed down.

PAROID is bought in immense quantities by the U. S. Government and by all our leading railroads.

PAROID gives lasting service because it is MADE RIGHT—from the felt, which is the base, to the fixtures which hold it on.

PAROID presents a smooth pliable surface which cold will not crack nor heat cause to run. It requires no superficial coating of sand or gravel; which suggest strength only because of thickness. In PAROID there is nothing to crumble away or work loose and no depressions where water or snow can lodge.

PROSLATE, another NEPONSET PRODUCT, is the result of a demand for a roofing, similar to PAROID, suitable for dwellings. PROSLATE is provided with an additional coating of a rich dark brown color. It is cut with a straight or tooth edge and is most effective in appearance. Looks like shingles, wears like slate.

NEPONSET RED ROPE ROOFING is extensively used for smaller buildings. It costs about the same as ordinary tar roofing but lasts 3 or 4 times as long.

BARRED P. ROCK.

Bred and owned by W. H. Shaw, Canton, Ill.

pens. A mistake made in mating means the loss of the pen for the entire season. But I don't believe that mistake has been made in one instance at Owen Farms. To me there lies the secret of their success and tells the story of how they can show a different lot of birds at the New York and Boston shows and win on both of them.

LEON D. HOWELL, MINEOLA, N. Y.

It was after dark when I arrived at Mineola, N. Y., to inspect the Buff Wyandottes owned by Mr. Leon D. Howells, and I was unable to see the birds, as Mr. Howells had an engagement to meet that evening. Later I hope to be able to inspect his birds and tell the readers of the American Poultry Journal more about them. But the record he has made with them since he started to show will be of interest to our Buff Wyandotte enthusiasts. His first prize pen at Madison Square Garden this last winter was one of the sensations of the show and pronounced by many the peer of any pen of Buff Wyandottes yet shown at New York. He also captured third and fourth pullets on two entires. At Richmond Hill show, 1909, he was awarded third and fourth hens, third and fifth cockerel, first, second and fourth pullet and fourth pen, the first pullet being awarded the special ribbon for best shape, best color and for best female in the class. At Mineola, 1909, he made but four entries, winning third and

Look for this Mark

For a quarter of a century the "Little Girl" and the name "NEPONSET" have stood for roofing, siding, and similar waterproof products that give lasting satisfactory service.

NEPONSET WATERPROOF PRODUCTS are made by a firm which has been in one line of business since 1817—a firm which introduced the complete ready roofing and many of the modern methods of waterproofing as applied to all classes of buildings. A firm which manufactures its product from start to finish, and who makes the broadest offer that could be framed. Read it.

Our Offer: When you see PAROID on your building, if you are not satisfied tell us and we will send you a check for the full cost of the roofing and the cost of laying it. Back of it all if any BIRD NEPONSET PRODUCT ever fails because of defective manufacture we will replace it. If a broader guarantee than this could be made we would make it.

Are You Building or Repairing?

Make use of our Building Counsel Department. Our experience extends over all classes of buildings from the smallest poultry house to the largest factory. We will gladly give you any assistance we are able, free of charge and without any obligation on your part.

I have seen samples of Mr. Hudson's printing. It is very nice; he is perfectly honest.—EDITOR

hatched fourteen chicks from fifteen eggs, which speaks volumes for the vigor of his stock. Mr. Howells' stock has free range and I believe anyone placing an order with him will get extra value for their money. Look up his ad.

MOUNTAIN VIEW FARM.

Mountain View Farm, R. F. D., South Kent, Conn., E. A. Harring, owner, is composed of a sandy loam soil, situated at the foot of the beautiful Berkshire hills at South Kent, Conn., about as well adapted for poultry farming as one could

over the place in brooders and was taking off a hatch from three incubators the day I was there, February 23. The percent of fertility ran exceptionally high and I find it the same most everywhere where the birds are given plenty of fresh air. Mr. Harring was at one time manager of Willow Brook Farm and secured his foundation stock from them and he is probably as well equipped in both stock and experience to produce the best in Orpingtons as any of the admirers of this popular breed. His record at Madison Square Garden, New York, 1907, in Blacks was first cock, second hen, fifth pullet and silver cup for best display.

A typical White Plymouth Rock. Owned by R. C. Caldwell, Lyndon, Ohio.

wish for. It lays so that the cold winds of winter cannot chill the birds and is always cool in summer, which means a whole lot in the fast growing of young stock. I found that Mr. Harring had twenty-one pens mated for the season, seven of each in White, Black and Buff Orpingtons, and all were strictly of the best quality and their birds have been known for years to be of the best. Mr. Harring is a stickler for strong constitutions in the breeding stock and keeps everything in open front houses. He claims he gets more eggs in the winter by letting his birds out if they want to go than to keep them in, and he must get a large egg yield, as he had chicks out all

He was offered a long price and refused it for the first cock, as he felt he wanted the best in his own yards, a policy he has pursued ever since, and the flock at Mountain View show the good judgment used at that time. This cock was considered by many the best bird of the breed ever shown in the Garden. Single Comb Whites, on two entries, fourth cockerel, fourth pullet, 1908 and 1909. Blacks, third hen, second pullet; Whites, fifth hen, third pullet, third pen. 1910. Blacks, fourth cock, fourth hen, first pullet, on three entries. It will not be out of place for me to mention here that the first prize pen of White Orpingtons at the Garden this year were hatched from

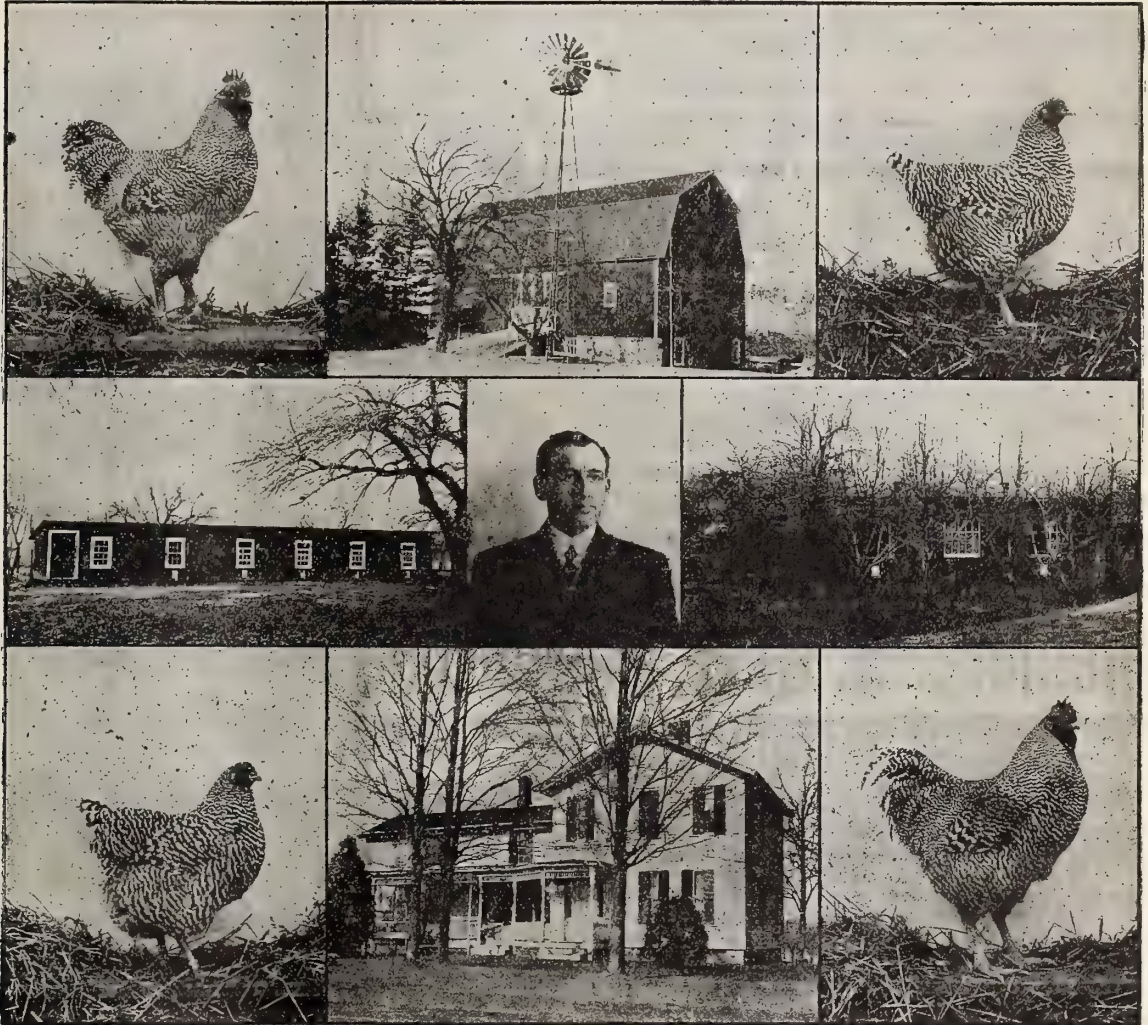

a setting of eggs sold by Mr. Harring to one of his customers, and he later sold the first White Orpington pullet at the Philadelphia show. In Buff, year after year the demand has been so great for his exhibition specimens that Mr. Harring has stepped aside, so to speak, for his customers' benefit. I can assure our

\$750 For This 120-Egg Ideal
FREIGHT PREPAID Write for Low Prices On Larger Sizes, DELIVERED

I am quoting the only real cut prices of the year. Let me prove it. I am quoting on quality machines and I am paying the freight. Don't buy a "cheap" machine when you can get this big Ideal for \$7.50, freight paid. And don't pay more, because you can't get better value at any price. Ideals are better than ever this year, and this is why:—They are covered all around—front, back, sides, top and bottom, with 22-gauge galvanized iron. They are safe hatches, and the metal cover holds the heat better—saves oil. The Ideal regulator is a marvel of accuracy; ventilation automatic; walls of triple thickness and dead air space; double door; most improved copper heating system; large, safe, smokeless lamp. Write today, for low, freight-paid prices on incubators and brooders of all sizes, and a free copy of my big poultry book. Everybody says—

Miller's Book Beats Them All
Anyhow, I've put my 30 years of "know how" into it, and that ought to help any poultry-raiser to larger profits. It contains full-page cuts of Standard-bred poultry—finest you ever saw; also my guarantee and prices that will save you big money. \$7.50 for 120-egg is a hint of other things. This is my delivered price to all points east of Missouri River and north of Northern boundary of Tennessee. If you live beyond, write for price delivered to your R. R. Station. Send name and address for books and get all the facts. Address, J. W. Miller,

CARTER'S BARRED ROCKS

Excelsior Strain

Carter's Excelsior Barred Rocks lead in the combination of show-room qualities and practical results. The males and females in my breeding pens this season will score 91-93½. They are mated to produce high-class exhibition birds. In selecting my breeders have chosen vigorous stock whose chicks will live and grow rapidly. For the egg trade I have four pens mated to produce Exhibition Pullets of the right color, shape and size. Also three pens mated to produce high-class Exhibition Cockerels. When desired, will divide and fill egg orders part from each mating. One sitting, \$4; two, \$7; three, \$9. A few choice cockerels for sale. Extra values at \$6 to \$15 each. Some cracker-jacks pullet bred.

T. J. Carter Box Z Jonesdale, Wisconsin

PINE RIDGE FARM, DERRY VILLAGE, N. H.

This farm is the home of Buff, Black, White and Diamond Jubilee Orpingtons, and is located on a hill on the outskirts of Derry Village, N. H., and is about as well located for a poultry farm as one could wish for. The farm proper consists of 150 acres of well drained land, with plenty of shade, making an ideal place for the production of fine poultry. It will be remembered that a few years ago Mr. Prescott bought the good will and entire stock of grand Orpingtons owned by Willow Brook Farm, Berlin, Conn. The writer at one time was manager at Willow Brook, and I was intensely interested to see this famous stock again and note if they were still being kept up to that

First Buff Orpington cock, New York, 1904. Owned by H. B. Prescott, Derry, N. H.

high standard that Willow Brook maintained, and I am glad to be able to tell our readers that Mr. Prescott has made good in every way. He has not only held the high quality he purchased but has gone on and improved over what we ever owned at Willow Brook. The buildings at Pine Ridge Farm are of the best and consist of four long breeding houses with large runs attached. About the best incubator cellar I ever saw, brooder house, feed house and shipping room. There were twenty-four pens mated all told and twenty-four pens of just as good Orpingtons as anyone could wish for. The Buff predominates at Pine Ridge, numbering sixteen pens, all full of extra quality birds. Not a poor bird among them, and they showed a lot of care in mating. It could be seen that the mating here had been done in a most thorough manner, with one object in view. Mr.

First Buff Orpington pullet at New York, 1904. Owned by H. B. Prescott, Derry, N. H.

Prescott felt very sanguine of the results to be obtained and said to the writer that he believed his matings would produce their share of the New York and Boston winners next year, as they had done for years back, and after I had handled a few of the matings I sincerely believed he will not be disappointed. Bright red eyes, low combs, deep, massive bodies, and even golden buff were strong features noted. Many also were absolutely clear buff in tail, and the under color was buff to the skin. When you

place a buff bird hackle on his wing bows, back and saddle, and are unable to tell where the hackle leaves off and the other sections begin, you have a prize article in buff, and that is the quality I saw in the male birds that head the pens at Pine Ridge. Mr. Prescott feels proud of his great aggregation of birds and well he may. A few of the winners we noted were the first pullet at Boston, 1909, the pullets in first pen at New York, 1909 and 1910, first Hartford pullet, third Boston hen, and other winners that we do not recall at this time. Among the males were the head of the fourth pen, Boston 1910, fifth cock, Boston, 1909, cock in second pen Boston, 1909, and several others of the same good quality. Another point I noted among the Pine Ridge Buff Orpingtons worthy of every breeder's attention was the color of legs; they are white, not red on the sides. The Blacks, though few in number, were as good as can be found anywhere. Only two pens mated and every bird a crackerjack. Mr. Prescott's circular tell all about them. I had my eyes opened some when we came to look over the Whites. Here, again, in this variety there are only a few. But they are good and will be heard from later. An imported pen of the rarest quality occupied one yard, and a pen headed by first pen cockerel at Boston, 1909, another, and I believe they are two as good pens as anyone owns. In Diamond Jubilees Mr. Prescott has won about everything competed for and has been considered a leader in this variety, as well as the others, for years back. It is well worth the trip to Derry, N. H., to any lover of Orpingtons, for you won't be disappointed in the quality of the birds to be seen there. We can highly recommend Mr. Prescott as a gentleman and a breeder who's word is as good as his bond. Look up his ad and write him for prices. He does business on your money back if not satisfied plan.

GREENWOOD & YEOMANS, PATERSON, N. J.

In calling the attention of our readers to the ad of Greenwood & Yeomans, the Light Brahma breeders, I wish to say at the start that I can highly recommend them and their stock. The beautiful Light Brahmas in their breeding pens are indeed worth going miles to see. Such perfection in hackle, stripping and lacing on tail is rare indeed, but seems to be a general characteristic of this flock. Bright red eyes, immense feathering and clean colored backs are much in evidence, and the flock in general is strictly of the highest quality. They have been extensive exhibitors and a summary of their recent winning will not be out of place at this time: Paterson, N. J., 1909, second and third cock, first and second hen, first and third cockerel, first and third pullet, first and fourth pen; the first pullet won the shape and color special. They also won the silver cup and \$10 gold special for the second best pullets in the show. Rutherford, N. J., 1910, second, third and fourth cock, first, second and third hen, first, second and third cockerel, first, second, third and fourth pullet, first and second pen; also the special for second best bird in the show, 700 birds in competition. Red Bank, N. J., 1910, first, second and third cock, first, second, third fourth and fifth hen, first, second, and third cockerel, first, second, third, fourth and fifth pullet, first and second pen. I handled most of the birds that made up their exhibit at Red Bank while at the show. They certainly were a grand collection of birds to be shown by one breeder and were pronounced by many to be the finest exhibit ever made at this high quality exhibition. For two years, 1909 and 1910, they have won the silver cup at Rutherford, N. J., for best display of Brahmas and the same at Red Bank. Write them and learn more about their stock.

HILL CREST POULTRY FARM.

Hill Crest Poultry Farm, Eugene Luttinger, proprietor, Totawa Borough, N. J., breeder of Single Comb White Leghorns and White Plymouth Rocks, is located on a hill on the outskirts of Paterson, N. J., overlooking and commanding a fine view of Paterson and its many industries. Here we found many grand utility birds, birds that had been bred for years for heavy egg production, and the enormous amount of eggs gathered the day we were there showed me plainly what could be done in this line alone if a person will apply himself strictly to this branch of the poultry business. Mr. Luttinger sup-

Amatite ROOFING

Will End Your Roofing Troubles

If you will write to-day for a free sample of "Amatite" the end of your roofing troubles is in sight. After you have submitted it to every test that you can think of, you will be prepared to order it not only for your new buildings, but for your old roofs as well. You will find that it is cheaper to cover them with Amatite than to continue painting and repairing them.

We make a strong point of our "Free Sample" offer because the smallest sample of Amatite speaks for itself. It

is more convincing than yards of talk.

There are all kinds of ready roofings on the market—so-called "rubber roofings," so-called "guarantee roofings," so-called "sand surface roofings."

The "rubber" roofings are no more made of rubber than a cow is made of saw-dust. The "guarantees" that are promiscuously handed out with many brands are hedged around with so many provisos that it will take three

lawyers to dissect them and find out what they are all about. The "sand surface" has little or no protective value.

The point to remember is that all of these roofings have to be painted every year or two to keep them tight. In other words, it is the paint that protects, and not the roofing. If a man will sit down and figure out exactly what this paint costs, he will find that it is more than the roofing itself. Amatite, on the other hand, has a surface of real mineral matter and we sell the goods on the broad statement that you need never coat or paint this roofing.

You can lay Amatite on a roof and then forget all about your roofing troubles. No painting, no coating, no worry. The man who puts Amatite on his buildings is insured against leaks and trouble for many years.

Free Sample

If you have any doubts about the matter and want to investigate our claims, send for sample and booklet to-day. The sample tells its own story; the booklet is written for practical men. It hits straight from the shoulder.

H. W. Buckbee, ROCKFORD SEED FARMS, FARM 51 ROCKFORD, ILL.

plies a fancy egg trade in Paterson and does a large business in this line, and has a fine demand for eggs for hatching from the large type and are grown from the time they leave the egg for early maturity. The quality of the stock is not overlooked at Hill Crest Poultry Farm, as might be supposed on a strictly business plant, as Mr. Luttinger believes in maintaining standard. His birds were winners in the Paterson, N. J., show this last year, which shows he believes in high quality stock for utility purposes. The stock here receives the best of care and feed, are all housed on the open front plan, with large runs set to fruit trees and in a few years Mr. Luttinger expects to derive a considerable income from this source alone. I consider his prices very reasonable for the quality of stock he handles and believe he will treat any of our readers favoring him with an order with prompt and careful attention.

BAY VIEW FARM.

This farm is owned by Edwin W. Bogert, breeder of Rose Comb Rhode Island Reds, and is located at Port Washington, Long Island, N. Y. In introducing to our readers Mr. Edwin W. Bogert, the Rose Comb Rhode Island Red breeder, of Port Washington, N. Y., I want to say although his name may be new to some of our readers, he certainly is not new in the art of mating and producing crack Reds. Better get acquainted with Mr. Bogert, you Rose Comb Red breeders. It will pay you. He has bred Reds for the past five years and has certainly got in his yard one of the highest quality flocks the writer has yet seen. In fact, the best colored cock I have come across in my travels is in his yards, and Mr. Bogert is certainly fortunate in owning such a grand specimen. At Bay View everything is done in a systematic manner and the buildings and stock showed they were receiving the best of care. Mr. Bogert has just nicely completed a new incubator cellar and brooder house, which was about one-half filled with little chicks which means he will be ready for the early fall trade. There were eight pens, all but two headed by his winners at Orange, N. J., Paterson, N. J., Mineola, and Riverhead, N. Y., and Springfield, Mass. Mr. Bogert feels very proud of the fact that the first Rose Comb Red he ever sold won third at the Jamestown Exposition, and this last year he bred and sold the first prize cock at Madison Square Garden, N. Y., which is all that need be said as to the quality in his pens. I also saw and handled the mother and several sisters of the first New York cock, and they are indeed grand specimens of the breed; low combs, red eyes, long backs, with nice black tails are characteristics of this flock, with quality to burn in wing color. There are runs on each side of the long breeding house at Bay View Farm, insuring fresh ground for the feeders to run on, and ample green food. The chicks have a sixty-acre farm to roam over which accounts for the extra large size of the old stock. Now a word as to the man and his business methods. Copy upon copy of letters from his satisfied customers were shown me, several stating that the fertility of the eggs sent them was running from 90 to 100 per cent. Mr. Bogert wished me to tell the readers of American Poultry Journal that he had no utility eggs for sale, as he had contracted for every egg over two months ago, and had nothing left now but eggs from his grand prize matings, from which he guaranteed every one sent out to be just as represented. His mating sheet tells all about them. Send for one. It is worth reading carefully.

R. C. R. I. RED SPECIALIST.

On the outskirts of Watertown, N. Y., is located the fifty-acre farm of Dr. M. Lee Smith, where some of the best Single Comb Reds of the country are bred. I had an opportunity of going over the breeding pens the doctor has mated for the breeding season and believe the chicks from these pens will contain many high quality birds. At the heads of his pens are the third and fourth cockerels at Utica, N. Y., 1908. The father of the above birds heads another, the third Madison Square Garden bird of 1910 another. The first Orange, N. J., cockerel, 1909, heads a pen of the very highest quality. The brother of the third and fourth cockerel at Utica, 1908, and several other grand good males all head pens of exceptional merit. The doctor breeds all of his winners and takes a whole lot

of pleasure in being a breeder, and we fully recommend him to our readers. Look up his ad.

Look up the ad of Philip Hanlon, Jr., Watertown, N. Y., Single Comb Buff Leghorn and Black Orpington breeder. Mr. Hanlon's Buff Leghorns are known to all our readers as the best of quality and he is in shape to handle his large egg trade better than ever before. In Orpingtons his pens contain such noted winners as the first hen at the Jamestown Exposition and other noted winners.

**FROGDALE POULTRY FARM, GEO.
C. THAYER, PROP., FRENCH
LICK, IND.**

It was on a beautiful sunny morning on Sunday, February 13, 1910, when we left French Lick hotel to drive three miles to Frogdale Poultry Farm. Could the reader but transport himself to see the beauties of the natural scenery as we saw it he would have exclaimed, "Oh, how beautiful!" The ground was carpeted with some two inches of snow and the air was cool and bracing. The road was over hill and through dale, by the side of brooks and through the woods, until finally we arrived at Frogdale, which is beautifully located on a hillside, with abundant trees for shade. At the bottom of the hill flows a brook, furnishing abundance of fresh water, which Mr. Thayer intends to use in growing frogs. He intends building a number of ponds to be used for breeding, hatching, rearing and wintering them.

We were very much interested in the production of this toothsome delicacy and had an interesting conversation with Mr. Thayer, who is well posted and gave us many of the details on how it was done. He has already placed his order for a large number of fine specimens to be used as breeders and expects to raise at least 5,000 frogs this coming year.

The breeders are placed in a large pond and the pond has to be watched every day and the spawn gathered and removed to the hatching pond. This is a very delicate proposition, for if the egg sack is broken the eggs will settle to the bottom of the pond and will not hatch. The length of time required to hatch these frog eggs is from five to seven weeks, when the little frogs make their appearance in the shape of pollywogs. It requires some time before they develop their legs, and in five months time they shed their tails and really become frogs. It requires three years for them to develop into a frog large enough for the market, at which time they will measure from sixteen to eighteen inches from tip to tip. These frogs are wintered in specially prepared wintering ponds, which are to be 20x40 feet and 3 feet deep, in the bottom of which there is six to eight

inches of mud, where the frogs will bury themselves and hibernate during the winter.

As we said before, the poultry plant is located on the hillside, and Mr. Thayer is putting a large amount of money into equipping his place into an up-to-

Geo. C. Thayer, proprietor Frogdale Poultry Farm, French Lick, Ind.

date poultry plant, having a large incubator cellar of 3,500-egg capacity, and on the day of our visit had just removed fifty-five chickens which had hatched from eighty-five eggs. A gasoline engine is used for the purpose of pumping water

throughout the place, also for grinding bone and all feed used.

Mr. Thayer is breeding with the utility end of the poultry business in view, and while he has many good birds on his place, particular attention is paid to their utility qualities.

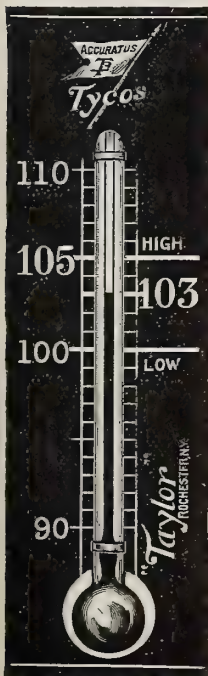

The plant is equipped with numerous houses, as Mr. Thayer believes in the colony house plan, and among the varieties to be found here are White Wyandottes, White and Barred Rocks, Single and Rose Comb R. I. Reds, Single Comb White Leghorns, Indian Runner and Pekin ducks, and mammoth Bronze turkeys.

Mr. Thayer has one of the largest flocks of Indian Runner ducks it has been our pleasure to see—about 200 head in all—and he intends to make a specialty of furnishing baby chicks and ducklings to the trade. Thousands of these little balls of down will be incubated here and shipped throughout the country this coming spring. Baby chicks in all of the above varieties are to be had from Mr. Thayer at a reasonable price, as well as Indian Runner and Pekin ducklings.

Mr. Thayer calls his strain of birds the "Pluto" strain, and is a good and unique advertiser, illustrating the above name of his strain with a small cut of "Old Nick" himself, which is always run in red ink. He issues a very complete little booklet giving descriptions of his various breeds, which is free for the asking and can be had by addressing Frogdale Poultry Farm, French Lick, Ind.

On our return trip from Frogdale we also had many pleasant as well as several rather exciting experiences. We thought on a number of occasions we were going to be dumped out of the buggy; however, we were saved from this undesirable experience, and after traversing a very rough and rocky road for some mile or two we stopped to inspect the famous Outlaw Cave, which is now the property of John Royer.

It was here that a band of outlaws in early days secreted themselves after having committed some depredation, until things had quieted down concerning the affair. We understand that the principle offense was robbery. However, a number of murders were committed and credited to them. The last offense, which finally resulted in the capture and breaking up

"Thank You"

A Lying Thermometer Will Kill Chicks.

To hatch a chick is no blacksmith's job.

Everything must be carefully and accurately adjusted. The eggs may be fresh and fertile, and from strong, healthy stock, but if the thermometer is not accurate then **all is lost**—eggs, money and time. The thermometer is the test—accuracy is absolutely necessary.

"Tycos"

THERMOMETERS

Are Absolutely Accurate

We make all kinds and sizes of thermometers. We make them for physicians—the most exacting of all professions—and the "Tycos" Thermometers are their accepted standard. With physicians the thermometer *must* be accurate—no guess-work when a human life is at stake. The same skill and the same care that we use in making thermometers for doctors, we use in making thermometers for incubators and brooders.

"Tycos." Thermometers are made right—are carefully and thoroughly tested, and must come up to our standard of quality and accuracy before leaving the factory.

When you buy an incubator tell the manufacturer you want a "Tycos" Thermometer with your machine. Insist upon having the "Tycos." There is no substitute. When you buy a new Thermometer for that old incubator buy a "Tycos."—Let us send you our FREE Booklet, "Thermometer Facts Worth Knowing." The information it contains will enable you to guard against temperature difficulties. You'll say "Thank You," and so will your chicks.

BARRED ROCK EGGS

Have mated up ten grand pens for the season's trade, eight pens for cockerels and two for pullets. The birds in these pens are the **Very Cream of the Country**. Most of them are tried and true breeders that have produced my prize winners. If you want eggs

That Will Hatch

Prize winners I can supply you, and at prices that you can afford to pay for good stock. I guarantee satisfaction in every particular. Send for my new up-to-date catalogue.

Wm. H. Hoover, Barred Rock Specialist, R. 2, Box 4, Polo, Ill.

of the band, was the murder of a farmer who lived near by, and after having robbed and beaten him they took him to this cave and murdered him.

The cave is a very wonderful sight and we would think has been the course of an underground stream; in fact, there are still two springs, which have flowing water the year round, that come from seemingly nowhere and again disappear equally as mysteriously. We traversed one of the recesses of this cave for about 500 feet and were told it extends into the hill for about one-half mile or more. In some places it is quite narrow and in other places it becomes wider.

Along this passage, in the solid stone, is a very good representation of a human face, the forehead, nose, eyes, mouth, chin, in fact all the features, including the hair and ears, were quite plainly discernable. The cave has quite a reputation locally and is one of the places of interest which all visitors to French Lick should go to see.

Naturally, after so many pleasant experiences and the memories which we carry away with us, we are anxious to again visit French Lick and Frogdale.

EDGEMONT POULTRY FARM, HILLSBORO, ILL.

In speaking of Edgemont Poultry Farm, consisting of 145 acres, where high scoring and prize winning Black Minorcas and Brown Leghorns are raised each year in very large numbers, we wish to call the attention of our readers to the fact that this is one of the shining examples of what can be accomplished by a young man fresh from the city, who made up his mind to raise poultry, who stuck to his text and has succeeded far beyond his own expectations.

Edgemont farm is located at the western edge of Hillsboro, Ill., on the Big Four and Chicago & Eastern Illinois railroads. The Illinois Traction system extends along the south side of this farm and brings many visitors to the farm from St. Louis throughout each year, that city being only fifty miles distant from Hillsboro, Ill.

Mr. Chase turned his attention to the egg laying varieties and became a Minorca and Leghorn enthusiast. He talks Minorcas, swears by Leghorns, and he does a tremendous business in furnishing fancy eggs for setting as well as selling hundreds of day-old chicks.

Mr. Chase follows no new-fangled system, but insists that the system that pays best is systematic cleanliness, feeding and pure water. No one can expect to make the success out of the poultry business which Mr. Chase has made unless he or she be willing to use both their muscles and their brains.

Mr. Chase takes all of the leading poultry papers and by reading them he keeps in close touch with his business. Experience has taught him that there is only one way to sell high grade poultry and that is by using plenty of printer's ink. He has used a great deal of space in this paper and thinks it the greatest advertising medium for poultry he can find.

Every few months he culls his flock, for experience has taught him that the sooner he eliminates a poor chicken from his flocks the better. By this systematic and thorough "weeding out" process he has brought his Minorcas and Leghorns to a high state of perfection.

The result of Mr. Chase's efforts are to be seen at every show where his "string" of birds is shown. He never enters such large numbers as some other breeders, but when the prizes are awarded Mr. Chase's name is always one of the top liners. He entered only a comparatively few shows during the past season and in every one he had the strongest kind of competition, and yet he won over 200 premiums. He has demonstrated the fact that the poultry business can pay big dividends.

Mr. Chase is now a member of many of the prominent poultry associations and is one of the executive board of the Illinois Poultry Association. He devotes his entire attention to the poultry business and has no time to spare, and he insists that the three essentials in successful poultry raising are: Hard work, choice stock and good advertising.

Maple Lawn poultry yards and Barred Rock specialists, Wm. H. Hoover, owner, Polo, Ill., issue a circular giving complete description of the Hoover Strain Barred Plymouth Rocks and the many prizes won by them. Also describes their many fine matings for the season of 1910.

J. G. BUDDE & CO., OAK PARK, ILL.

Messrs. Budde & Co., who have recently purchased the entire flock of Red Raven Strain Single Comb Reds formerly owned by C. W. Zimmer, the Rhode Island Red specialist and judge, who has spent some thirteen years in perfecting this strain and has certainly succeeded in producing Reds that breed exceptionally true to color and type. It is the intention of these gentlemen to engage extensively in the production of Reds and they are issuing a very handsome and artistic circular in two colors describing their four grand pens, which Mr. Zimmer has mated along the lines on which he has been breeding in the past, and the quality that will be produced from these matings is not to be questioned. Breeders desiring show specimens or to introduce new blood of superior quality into their flocks will do well to secure a setting of eggs from this firm.

Their catalogue is now ready and free for the asking and you will do well to send for it. Their ad appears elsewhere in this issue.

**MALTBIE & SHELLEY, GENEVA,
OHIO, BREEDERS OF R. C.
R. I. REDS.**

At the time of our visit to this poultry plant they had just received the flock of Reds purchased from the estate of the late Robert C. Tuttle. The sale consisted of 117 birds and is the most important sale ever made in the history of R. I. Reds. In this sale were included all of Mr. Tuttle's prize winning birds at this winter's shows, including Chicago, New York and Boston. We were not able to learn the exact price paid for these birds, but we know it took a very large amount of money to secure them, as birds of this quality in R. I. Reds are now commanding top-notch prices. These birds consisted of the cream of Mr. Tuttle's flock, which he had saved for his own use and were already mated by him.

Messrs. Maltbie & Shelley will only retain about fifty of these birds, which will be mated just as Mr. Tuttle had them. This is your opportunity to secure some of the Tuttle strains and you should take

advantage of it. Messrs. Maltbie & Shelley, it will be remembered, were winners at the Youngstown show, where the big meeting of the Rhode Island Red Club took place. Before the purchase of Mr. Tuttle's stock they already had a large stock of high-class specimens of their own breeding, and with the addition of Mr. Tuttle's birds they certainly own one of the largest and best flocks of Rose Comb Reds in the country today.

We handled many of their birds and

ing illustrations of their birds, of the prizes won, descriptions of their matings and details, which they will send you free for the asking. Their ad appears regularly in the columns of the American Poultry Journal.

A visit to Sheffield Farm, Glendale, Hamilton county, Ohio, by C. W. Zimmer, Representing the American Poultry Journal.

The Sheffield Farm is owned by Wm.

A flock of Single Comb White Leghorns on Frogdale Poultry Farm, French Lick, Ind.

were much pleased with the grand color and type to be found in many of their choice specimens. They have twelve grand yards mated for the egg trade and their pens, headed by the winners at Chicago, New York and Boston, were exceptionally fine.

They issue a neat little catalogue giv-

K. Schoeff, is beautifully located, directly on the interurban, some nine miles out from Cincinnati, on somewhat rolling ground. Mr. Schoeff intends to make this a large poultry and stock farm, having engaged the services of Adolph Kampe, a landscape gardener, to lay out the farm, and a large and handsome residence will

IF EVERY POULTRY RAISER USED MEDICATED CHARCOAL, 150,000,000 MORE CHICKS WOULD BE RAISED TO MATURITY EVERY YEAR.

THIS letter from the President of the National Poultry Association will interest every poultry raiser in the country. Money could not buy a letter like this; it comes to us entirely unsolicited.

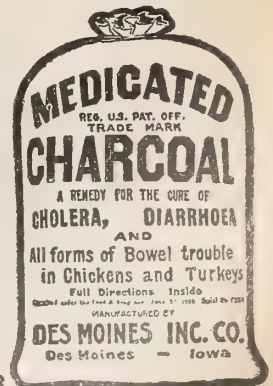

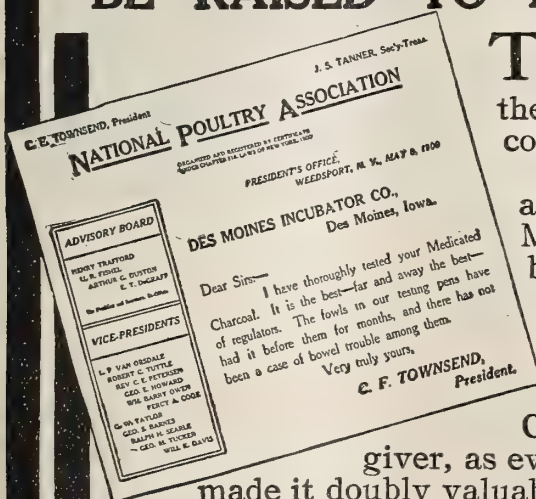

We have the greatest remedy for common chick ailments that ever went into the poultry-yard. Our Medicated Charcoal not only prevents but cures all bowel troubles. It positively

Saves Your Chicks From White Diarrhoea and Cholera

Charcoal alone is a wonderful health giver, as every poultryman knows. We have made it doubly valuable by giving it just the right medical properties. It purges, cleanses, purifies the blood, kills germs. It gives health, vigor and life to both fowls and chicks, renders them immune to disease. Carefully prepared under a scientific formula and guaranteed under the Pure Food Law. Its cost is nothing compared to the good it does in saving Chicks' lives. Don't fail to try it. In bags of convenient size; 10-lb. bag, \$1.00; 25-lb. bag, \$2.25; 50 lbs. \$4.25. Write today for Free Book.

NOTE:—Send 10c for booklet on Proper Feeding and Care of Chicks, Ducks and Turkeys. It will enable you to raise almost every chick hatched. Best Poultry Paper, 1 year 25c.

WHITE WYANDOTTES

"Crown Prince Strain." At Indianapolis, February, 1910, I won first and second pen and four other prizes. Also silver cup for best display. All stock sold. Some grand pens mated for the egg trade. Send for my mating list. It will interest you.

Geo. F. Schmidt - Box Z, Martinsville, Indiana

COLUMBIAN WYANDOTTES

True in type and color. On exhibits at three large shows this season, my birds have won ten first prizes, including first hen at Madison Square Garden, in the hottest kind of competition. I shall breed ten matings of high class birds this year, from which I offer eggs for hatching same as I use for myself. Mating list cheerfully mailed for the asking.

Dr. C. J. Andruss, Canandaigua, New York

**Hartman Stock Farm Poul. Yards
COLUMBUS, OHIO**

Eggs for hatching from our noted prize-winning Buff, White and Part. Wyandottes, Barred Ply. Rocks and S. C. W. Leghorns. Our birds have won the lion's share of 1st and 2nd prizes wherever shown. Eggs, \$3 and \$5 per 15. Choice stock always for sale.

Day old chicks from our best stock for sale from March 15 to June 1.

Buff Rocks

At the big Missouri State Show held in St. Louis, December 11 to 16, won cash special for best display, State Club cup given for best cock, cockerel, hen and pullet, 2d and 5th cock, 3d, 4th and 5th hens, 2d pullet, 4th pen. Winners in our largest shows for the past fifteen years. Show birds and breeders for sale. Send for booklet.

E. L. Delventhal Buff Rock Specialist Box A, Warrenton, Mo.

be built, in which Mr. Schoeff will reside. A private park of some sixty acres will be laid out by Mr. Kampe and made as beautiful as it is possible for a landscape gardener to make it.

Mr. H. B. Hark, who is well and favorably known as a Partridge Wyandotte specialist, has been engaged to take charge of the poultry plant. Mr. Hark, it will be remembered, was for many years manager of the poultry department of the Hartman stock farm and he has succeeded in producing many high class specimens in Partridge Wyandottes. On the 10th of February he purchased the entire stock of W. P. & M. H. Coffin, Whitnerville, Mass., including all of his late Boston, Worcester, Providence and New York winners. Among the flock is the famous cock bird "The Dude," who has never been beaten; also "Mrs. Dooley," one of the first prize bred hens at Chicago, Mr. Coffin having refused \$200 for this hen from three different breeders since the Chicago show. This is the most important sale that has taken place in the poultry world in recent years in this variety, as this flock of birds is without doubt the best flock of Partridge Wyandottes in the country.

We had the pleasure of examining these

RED PYLE GAME COCK.

Winner of first prize at Madison Square Garden, New York. Bred and owned by Harry Bennett, Brown, W. Va.

birds at the time of our visit and they certainly are marvels of beauty and perfection, and in the hands of Mr. Hark, who has been a Partridge Wyandotte specialist for the last ten years, we look for some sensational birds to be produced. It is their intention to set every egg this year and to raise a large flock of other stock. They intend to come out with a fine string of birds for the fall and winter shows, at which time they will commence to advertise and offer stock for sale.

It is also Mr. Schoeff's intention to breed fine imported Jersey cattle and Berkshire hogs. We understand he has recently purchased an adjoining farm, which, added to the original one, will give them a very large tract of land, and the improvements which were under construction and under contemplation at the time of our visit will certainly make this farm a model one.

The poultry houses, which are arranged in the colony plan, are well and substantially built of the best material—and nothing but the best is permitted here—and we predict that the poultry department will lead all others on this farm. The best wishes of the American Poultry Journal go with Mr. Hark and the Sheffield Farm.

WHITE OAK POULTRY FARM, LIMA, OHIO.

This farm, formerly owned by Frank J. Banta, has been sold to R. H. Gamble. White Oak Poultry Farm, breeders of Black and White Orpingtons and Single Comb White Leghorns, has been owned for several years by Frank J. Banta, who has been carefully breeding up a quality of this stock, but finding his increasing poultry business was interfering with his other business, Mr. Banta, although somewhat reluctantly, decided to dispose of his poultry plant. Mr. Gamble has been breeding poultry for a number of years and is a very close student and well prepared to take charge of this plant and continue the good work started by Mr. Banta.

The plant consists of fourteen acres, having seventy-five colony houses and a long brooder house, 18x100 feet, heated by the Candee hot water system, and an incubator cellar located in one end of the brooder house which has a capacity of 4,000 chicks per month. There are ten large pens of White Orpingtons, six pens of Black Orpingtons, six pens of Single Comb White Leghorns, all carefully mated and yarded in yards 75x125 feet.

Mr. Gamble intends to make a specialty of producing day-old chicks from all of the above varieties, and is offering chicks from high class stock, which are carefully mated and yarded, and if you desire chicks or eggs from any of the above varieties you will do well to correspond with Mr. Gamble for his mating list, which is free for the asking. His ad will be found in the columns of the American Poultry Journal.

W. S. KNOX, YOUNGSTOWN, OHIO.

Mr. Knox, while a breeder of thirty-two varieties of poultry, is certainly breeding birds of high quality and makes a specialty of Black Langshans. At the recent Youngstown show, in this variety he won first and second cock, first and second hen, first and second pullet and first pen. Silver cup for best display in Asiatics and silver cup for best display of all breeds A. P. A. silver medal for best cockerel.

In Buff Cochins he won first and second cockerel, first, second and third pullets, A. P. A. silver medal for the best cockerel.

In Partridge Cochins he won first cock and first, second and third hen.

In Light Brahmas he won first cockerel, second pullet, A. P. A. silver medal for best cockerel and Light Brahma Club Championship ribbon for best colored male and best shaped male.

In Dark Brahmas he won first cockerel, first, second and third hen, and A. P. A. medal for best cockerel.

In American Dominiques, first, second and third cock, first, second and third hen, first and second pullet, and at the late Cleveland, Ohio, show he won in Black Langshans fifth cock, fourth cockerel, first hen, first pullet and first pen.

Mr. Knox also has won many other prizes at many other shows this winter. We consider the above sufficient to convince the reader that he has high class quality in his breeding yards, and he is offering you eggs from these prize winners. Look up his ad elsewhere in the American Poultry Journal.

B. M. BILLINGS, OBERLIN, OHIO.

Mr. Billings, who makes a specialty of Rose and Single Comb Reds, having bred these varieties for the past five years, and exhibited them in many of our largest shows, has the enviable reputation of having won 150 prizes during this time.

At the recent Cleveland, Ohio, show, in a hot class of Reds, he succeeded in having four birds inside the money on five entries.

He reports a plenty of breeding stock yet on hand, which he will dispose of at reasonable prices. He issues an illustrated circular giving his winnings in full and testimonials from pleased customers. If you are interested in Rose or Single Comb Reds you should write Mr. Billings, whose ad appears elsewhere in this issue.

Miss Alice M. Hedges, 506 W. Fifth street, Pana, Ill., who has been breeding and exhibiting White Rocks for many years, issues a mating list giving full descriptions of her matings for this season, which she confidently expects will produce some of the prize winners at some of the coming shows. Her prices are reasonable and within the reach of all.

BABY CHICKS! The greatest risks, the most work, the least pleasure, and the most skill required in profitable poultry raising is in hatching the eggs. That's the rock on which many poultrymen wreck their successes. Eliminate this trouble and loss of time, money, and eggs, by buying day-old chicks—Cooley Chicks. I can supply you with strong, sturdy, healthy, growing chicks. **WHITE LEGHORN and BARRED ROCK CHICKS** ready to start you on the road to real, sure profits. The best baby chicks—Cooley Chicks—you can find. Exhibited at Madison Square Garden Poultry Show, 1908-09 and 1909-10. Prompt shipments, safe arrival assured. Lowest prices. Best stock. Write me today about your wants and let me quote you prices. Eggs for hatching. Booklet free. Write today. **ELDEN E. COOLEY.** Box A **FRENCHTOWN, N. J.**

The Show at Port Huron, Mich.

A winner at one of the largest and certainly the hottest class of **White Wyandottes** ever seen in the state and as usual my birds get their share of the money; my winning cock and cockerel, a sensation. Eggs, \$3 per 15; \$5 per 30; from my best pens.

J. B. Greenan

Deckerville, Michigan

Barred Rocks

I breed Rocks that have that bright snappy color and even barring that is so hard to get; I also have large size and correct type. I can supply you with exhibition birds or breeders to improve your flock. Both cockerel and pullet line. Eggs from choice matings.

Geo. W. Bachman

North Baltimore, Ohio

Urban Farms' Black Langshans and White Rocks

Our breeding pens for 1910 will contain some of the greatest prize winners of the past show season, including: **BLACK LANGSHANS** 1st Prize Cock, New York, 1909-1910; 1st Prize Cock, Chicago, December, 1909; 1st Prize Cock, Buffalo, January, 1910. **WHITE ROCKS**, **BUFFALO CHAMPION**, 1st Prize Cock and Gold Medal winner for best bird in show, Buffalo, 1910. **GENESEE CHIEF**, 1st Prize Cockerel, and special award for best Plymouth Rock at Rochester Show, 1910. Will spare a limited number of eggs from pens containing above winners mated to prize winning females at this season's New York, Chicago, and Buffalo shows. At the **Big International Buffalo Show, 1910**, with 102 birds exhibited by us, 69 were under the ribbons. Our special awards included **The Grand Prize** for the largest number of first prizes won in competition with two other exhibitors. We also breed high-class prize winning strains of **Anconas**, **Lakenfelders**, **Phoenix Fowls** and **Black Tailed Japanese Bantams**. Handsome mating and price list furnished on application.

LAUREL LEGHORN YARDS

E. J. Stuckmeyer, Prop., 1401 Prospect St., Indianapolis, Ind

GOOD PARTRIDGE WYANDOTTES.

No matter how fancies may go, there will always be a great lot of fanciers who admire good Partridge Wyandottes. This variety once in the yards of a fancier, will not be displaced by any. This has been true with Mr. Earl Henry, of Albert Lea, Minn., who has tried many but breeds nothing but the best Partridge Wyandottes and has not had others on his place for years. Mr. Henry is one of the fanciers who claims to be a specialist and is a specialist. On his beautiful little farm on the outskirts of the town we name he is breeding some of the best Partridges in the Northwest, or the whole country, for that matter. His winnings at Chicago and St. Paul and Minneapolis and other shows are proof that I am right in the assertion. We have not seen anything that this breeder has sent out but good stuff. His females are especially good, with fine eyes and the yellowest legs we ever saw on any black red birds. Their color is great. We have judged them in the showroom and handled them in Mr. Henry's yards and have always found his strain of birds to be typical of the variety and strong in shape and real Wyandotte character. Look up his ad in this issue and remember that he has the best breeding pens he ever owned and

Second Buff Orpington pullet, New York. 1906. Owned by H. B. Prescott, Derry, N. H.

prices eggs, for the quality of breeders they come from, far too cheap.

W. P. Smalley, Shawnee, Okla., White Wyandotte specialist, has been breeding White Wyandottes of high class quality for some ten or eleven years, during which time he has made a wonderful record, in many cases practically making a clean sweep in this class for the past two years in succession, and has the A. P. A. gold medal. In extra strong competition, where it took two pens, one of old and one of young, to win, he succeeded in capturing the city official's cup, valued at \$100. All varieties were in competition for this cup and this winning should convince our readers that Mr. Smalley breeds the best White Wyandottes in the Southwest. At the recent Muskogee show, in very hot competition, his birds were successful in carrying off the \$25 cash special for the ten highest scoring birds in the entire show. Mr. Smalley is closely identified with the fancy poultry industry and holds several offices in the A. P. A. and White Wyandotte Club. His ad appears elsewhere in the columns of the American Poultry Journal.

The Eureka Trap Nest, manufactured by the Eureka Trap Nest Company, Wiloughby, Ohio, is a new device recently patented and offered for sale in our columns to the poultry public and is receiving very favorable comment from those who are familiar with the construction of this nest. They issue a neat little booklet giving full descriptions, which is free for the asking.

**FOLLOWING CATALOGUES OF
PROMINENT BREEDERS AND
ADVERTISERS IN AMERICAN
POULTRY JOURNAL HAVE
REACHED OUR DESK.**

It is a noticeable fact this year that the most of the breeders are trying to excel in neatness and quality the catalogues which they have been getting out heretofore. Many of these are printed on elegant quality of paper, are really works of art and are a credit, not alone to the breeder, but to the whole poultry world. This proves that the breeding of fancy poultry refines the taste, elevates the mind of the breeder by instilling in him the desire for something better, and the class of people who are now our foremost breeders in the poultry world surely are a credit to any industry.

In many of these catalogues all of the artist's skill has been called for, and as we said before, they are really works of art. Our artist, Mr. Louis A. Stahmer, has furnished cover designs for a large number of our prominent breeders. This shows that many of our poultry breeders are now beginning to realize the additional advertising value which a cover design or letter-head adds to their business.

The neatest catalogue that has come to our desk for some time is the one of R. C. Caldwell, of Lyndon, Ohio, which has a striking cover design printed in lavender, brown and black. The information regarding the baby chick industry contained in this book is well worth having by any poultry man.

The catalogue of F. A. Tecktonius, a well known breeder of Rose and Single Comb Buff Leghorns, ranks with the best that has ever been produced in a poultry catalogue. It has a handsome color insert of a pair of Buff Leghorns. This picture has been made by an entirely new engraving process, which differs in this manner from birds heretofore shown in colors, that the picture has been made from living specimens of fowls and from an ordinary black and white photo. The catalogue is well worth 25 cents, which he asks for it. Address him, Route 7, Racine, Wis., and get his catalogue.

Another fine catalogue is the one C. E. Spaugb, Rugby, Ind., is sending out. A handsome cover design by L. A. Stahmer adorns the cover and it contains many fine illustrations showing the snappy barring type of the bird. Send 10 cents in stamps for same to Box T, Rugby, Ind.

W. O. Chase, of Hillsboro, Ill., certainly has issued a big catalogue this season. The size, 9½x12, will give the reader an idea of how big the book really is. A fine cover design adorns the outside, and the text is printed on the best quality of paper that can be bought.

Budde & Co., Oak Park, Ill., have issued a handsomely printed catalogue, with a handsome cover design printed in two colors and is a work of art. They have recently purchased the well known "Red Raven Strain" of Single Comb Rhode Island Reds which has been brought to such a high degree of perfection by C. W. Zimmer, of Ft. Wayne, Ind. They have mated up a number of pens and their catalogue gives illustrations of the birds, also the mating list.

Another gem of catalogue is the one N. P. Eastling, of Pekin, Ill., is sending out this season. It contains by far the best illustration of White Leghorns produced to date. It also contains a lot of information regarding the mating and breeding of this popular variety. Mr. Eastling is the largest breeder of White Leghorns in the West and his birds are noted winners at the big shows. 10 cents in stamps addressed to Box 40, Pekin, Ill., will bring the book, and it is well worth the price.

J. A. Bickerdike, of Millersville, Ill., is sending out a handsome illustrated mating list showing a number of his prize winners at the late St. Louis show.

Lloyd C. Mishler, Rose Comb Black Minorca breeder, of North Manchester, Ind. A feature of this catalogue is that it contains a number of his pens showing illustrations of all the birds contained therein. The catalogue is printed on extra good quality of paper and the cover

what Joseph Tolman says about the Hall Mammoth Incubator

TWENTIETH CENTURY FRESH AIR POULTRY PLANT

P. O. ADDRESS: ROCKLAND, R. F. D.

NORWELL, Mass., March 5, 1910.

THE HALL MAMMOTH INCUBATOR CO.,
Utica, N. Y.

Dear Sirs:—

Have just taken off my second hatch from the 6000-egg Mammoth Incubator which you installed at my plant, and must say that I am more than pleased with the way it hatches out the chicks and also the quality of the chicks after they are hatched. It has far exceeded anything in the line of incubation with which I have had to do in my past 12 years' experience, and it is my opinion that with the Hall Mammoth Incubator the problem of incubation is solved.

The heat regulation of this Incubator is simply perfect; it requires but very little attention, and burns but very little coal. I am so well satisfied with my machine that I am already laying plans to install another 6000-egg Mammoth another season.

In closing let me congratulate The Hall Mammoth Incubator Co. in placing before the poultry world a machine that gives such grand results as the Hall does. Wishing you the best of success, I remain,

Yours truly,

(Signed) JOSEPH TOLMAN.

MAMMOTH Equipments
are the product of *The Hall Mammoth Incubator Co.*—their *invention*—their *improvement*—their *manufacture*. The high efficiency of the Hall equipments will be maintained and increased.

KITSELMAN BROTHERS,
BOX 295
MUNCIE, INDIANA.

design is printed in two colors. Addressing him at R. R. 1, North Manchester, Ind., will bring the book.

E. B. Thompson, of Amenia, N. Y., has issued a 52-page catalogue printed on excellent paper, containing as usual a number of fine illustrations and many testimonials from pleased customers. A handsome color plate adorns the front of the book and from every point of view it is indeed a handsome piece of work.

Tannenbaum Farms, Willoughby, Ohio, well known breeders of Barred Plymouth Rocks and Columbian Wyandottes, mating list for 1910 handsomely illustrated, shows a number of their winners as well as views of their splendid place. Their birds have won at Madison Square Garden, and also at the late Cleveland show, where they won first prize and color special on Barred Rock hen and a number of other prizes. Their birds are noted for their excellent type and snappy barring. Their Columbian Wyandottes are as good as any in the country. Their catalogue is free for the asking, and a postal will bring it.

S. A. Nofztger, North Manchester, Ind., the originator of Partridge Plymouth Rocks, is sending out a fine catalogue of his birds. A handsome cover design by L. A. Stahmer adorns the outside. Mr. Nofztger has been winning at nearly all of the big shows and a number of illustrations of his prize winners are shown.

C. C. Shoemaker & Co., Freeport, Ill., have issued a large and profusely illustrated catalogue of their incubators and a full list of poultry supplies. It is illustrated in colors and contains many testimonials from pleased customers, as well as other valuable information for the poultry breeder.

The catalogue of the Sunswick Poultry Farm, of South Plainfield, N. J., gives a complete record of the prizes won by their birds and shows a number of illustrations of their winners at late shows.

Geo. H. Rudy, Mattoon, Ill., the originator of the "Perfection Strain" of White Wyandottes, has issued a handsome catalogue containing a number of illustrations from life and which show that wonderful type for which his birds are noted. His winnings at the recent show at Kansas City, in January, where he won every first prize offered for this variety, as well as a number of specials, following his remarkable winnings at Chicago, December, 1908, stamps Mr. Rudy as one of the leading breeders of high class White Wyandottes. Send a postal today for this catalogue if you contemplate starting with this variety of fowls.

C. L. Buschmann, Indianapolis, Ind., is sending out one of the finest little books on the origin and history of Rhode Island Reds, that has come to our notice. It is written in nice style and gives the history of Rhode Island Reds, with complete instructions how to judge and mate them. This handsomely printed book is

in two colors and shows a number of his winners and is well worth the 20 cents which he asks for it. A postal will bring his mating list, containing descriptions of all the different pens. The handsome manner in which this mating list is gotten up leads us to believe that a feminine hand was on the editing committee of this little booklet, and we strongly suspect it was Mrs. Buschmann.

Walter G. Fenton, Mt. Clemens, Mich.,

LAWN FENCE

Many designs. Cheap as wood. 32 page Catalogue free. Special Prices to Churches and Cemeteries. Coiled Spring Fence Co., Box 408 Winchester, Ind.

BROWN POULTRY FENCE

Does Not Cost One-Half as Much as Common Chicken Netting, Yet Will Last Five Times as Long

Size of Wires. The top wires are No. 9½ gauge—same as nearly all stock fences. Intermediate and stay wires in same proportion—all double strength high carbon spring steel wire.

One Inch Spacings. More closely woven by far than other poultry fences, because bottom wires are only one inch apart, balance in same proportion—absolutely chick tight and rabbit proof.

Stock Strong. Built of material heavy and strong enough for hogs, horses and cattle. Wires cannot possibly slip, sag or bag down.

Rust Proof. The double galvanizing of every pound of wire in Brown Poultry Fence insures the fence against rust for many years.

Saving in Cost. With No. 9½ top wires, you can save at least one-half the posts, and besides you require no top railing or bottom boards. These items alone usually cost more than the fence.

Price. Our prices are less than common netting costs. Before buying any poultry fence, get our catalog and prices. We have 160 styles of fences to select from.

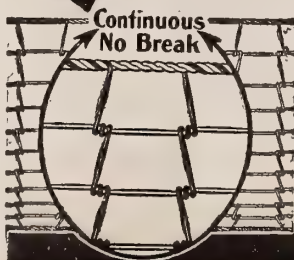

For a poultry proof fence woven close enough to confine small chicks yet strong enough for cattle, this fence cannot be equalled anywhere or at any price.

The Great and Grand MAJESTIC Malleable and Charcoal Iron RANGE

It should be in your Kitchen

Movable Reservoir Flush With Top

Hundreds of Thousands of them in Use, Each One Giving Complete Satisfaction

putty used) are airtight, and stay that way. The Majestic isn't lined with asbestos paper covered with steel, but is lined with guaranteed pure asbestos board one quarter inch thick, covered with an iron grate, put there to stay—you can see it.

The reservoir is all copper, heated like a tea kettle through copper pocket (stamped from one piece of copper) setting against left hand lining of fire box. It boils 15 gallons of water, and, by turning lever, the frame and reservoir moves away from fire. This feature is patented and used only on the Majestic.

Remember these 3 important features: The material the Majestic is made of—the way it is put together—the reservoir—then glance at a few of the other features possessed by the Majestic that follows:

All doors drop down and form perfect and rigid shelves. Malleable oven racks slide out, automatically holding anything they contain. Open end ash pan prevents shoveling ashes out of ash pit. Ventilated ash pit prevents floor from burning. Ash cup catches ashes that would otherwise fall on the floor.

No springs anywhere to weaken or get out of fix. It's the best range at any price, and should be in YOUR kitchen. It is for sale by the best dealers in nearly every county in 40 states. If you don't know who sells them in your vicinity, write us and we will tell you, and send you our booklet "The Story of Majestic Glory." Every farmer's wife should read this booklet.

Five grand pens mated including the cream of our Buffalo, Youngstown and Cleveland winners. If you want shape and size to go along with color, write us for our illustrated mating list containing cuts of some of the best shaped Reds in the world. It is free. A few fine breeding cockerels left at half price. Always address

Simmons & Crittenden

Geneva, Ohio

GREYSTONE WHITE ROCKS

win by a mile at Madison Square Garden, at five shows 1905-1910, won 12 out of 25 first (more than double nearest competitor), 3 out of 5 best displays, 3 out of 5 best cock, hen, cockerel, pullet and pen, 5 out of 8 champions (five times as many as any other exhibitor), 5 out of 8 shape specials. Eggs, \$5, \$10 and \$15 per 15.

Greystone Poultry Farm, F. H. Davey, Mgr., Yonkers, N. Y.

PRACTICAL REDS

RIDGE VIEW FARM

THAT'S it—Practical Reds. The kind that lay eggs like a Leghorn and make a roast like a Rock.

We have the best strain of Practical Reds in the U. S. We sell eggs that hatch. Send \$6.00 for 100 eggs from utility pens or \$10.00 for 100 eggs from selected pens. Get your order in now—don't wait until the last minute.

After years of careful breeding we are giving the fancier an opportunity to buy from our best stock at an exceptionally low price.

A. G. CLARK, WILLOUGHBY, OHIO

and other good shows, gives a very complete description of his matings and would prove very interesting reading to any lover of this very beautiful breed of fowls.

Catalogue and mating list of John O. Willard, Linton, Mich., breeder of Single Comb Buff Orpingtons, is a very complete little booklet, covering the ground thoroughly as to why they think the Buff Orpington is the best breed for pleasure and profit, either for the beginner, fancier or farmer. They have thirteen prize-winning males at the head of their pens and have in all some fifteen pens mated for the egg trade. Their stock has been prominent winners at a number of our important shows during the past season.

Wellington Red Poultry Farm, W. E. Phillips, proprietor, Wellington, Ohio. Mr. Phillips makes a specialty of Rhode Island Reds, breeding both Rose and Single Combs. He is in position to supply you with high class eggs from two fine pens of prize-winning specimens who have been winners this past season at many of our prominent shows. He is also prepared to supply you with eggs of a cheaper quality, including incubator eggs, and he is also selling day-old R. I. Red chicks and if you are not in position to hatch them yourself you will do well to secure a start of Reds in this way.

A pretty, neat little booklet of the Frogdale Poultry Farm, Geo. C. Thayer,

MAJOR.

First prize S. C. Black Minorca cockerel at Cleveland, 1910. Bred and owned by H. J. Shann, Painesville, Ohio.

proprietor, French Lick, Ind., breeder of White Wyandottes, Barred and White Rocks, Single Comb White Leghorns, Indian Runner and Pekin ducks, White Holland and Bronze turkeys, has a cover printed in two colors. Mr. Thayer calls his strain of fowls the Pluto Strain and his trade-mark is a picture of Old Nick himself. Mr. Thayer's poultry farm, which is called Frogdale, is located in a very scenic part of the country, three miles out from French Lick, and the natural conditions are ideal for poultry raising. Mr. Thayer has a large incubator cellar and is prepared to furnish you day-old chicks and ducklings. Mr. Thayer is the only party we know of who is furnishing day-old Indian Runner ducklings.

White Oak Poultry Farm, R. H. Gamble, proprietor, Lima, Ohio. Mr. Gamble has recently bought out Frank J. Banta, who was the former owner of White Oak Poultry Farm. Here we find a large flock of Single Comb Black and White Orpingtons, of which they make a specialty. They are prepared to furnish day-old chicks of either White or Black Orpingtons, also Single Comb White Leghorns. Parties desiring chicks of any of these varieties will do well to correspond with Mr. Gamble.

Lyman H. Hill, Jackson, Mich., breeder of Wolverine Strain White Plymouth Rocks, shows a very handsome catalogue, beautifully illustrated with half-tones, and he is making a special offer to all who

purchase \$10 worth of stock or eggs from him during the year of 1910. Of course, you will want to know about this and should send for this catalogue.

Geo. M. Hill, Jackson, Mich., breeder of Buff and White Cochins bantams, issues a neat little mating list of his pets that will be interesting to all lovers of bantams.

Craig & Mapes, Clearview, Mt. Leba-

breeder of Buff, White and Black Orpingtons, issues a very complete little booklet giving full descriptions of his many great matings of these varieties.

Ferris Poultry Farm, Grand Rapids, Mich., Geo. B. Ferris, proprietor, breeder of high class Single Comb White Leghorns, issues a neat little booklet giving in detail the winnings and descriptions of ten pens mated for the egg trade. Mr. Ferris is also prepared to furnish day-

home, as well as their poultry yards and prize winning specimens of Rhode Island Reds.

Maltbie & Shelley, Geneva, Ohio, issue a neat little booklet of their Rose Comb Rhode Island Reds. It will be remembered that Messrs. Maltbie & Shelley purchased the entire flock of Reds formerly owned by Robert C. Tuttle, including his Chicago and Boston winners. Mr. Tuttle had the birds mated for the season

A PARTIAL BIRD'S-EYE VIEW OF EDMONT POULTRY FARM, HILLSBORO, ILL.

non. Pa., breeders of Buff and Black Orpingtons, Rose and Single Comb Rhode Island Reds, have illustrations giving reproductions of many of their prize-winning specimens at the largest shows during the past season.

Chas. A. Keefer, Muskegon, Mich.,

old chicks of Single Comb White Leghorns.

Kaufmann & Windheim, Nutley, N. J., breeders of the famous American Beauty Strain Rose Comb Rhode Island Reds, issues a large sized catalogue with many full-page illustrations of their beautiful

of 1910 and these gentlemen have kept these pens mated just as Mr. Tuttle had them and they are offering you eggs from them at very moderate prices. Twelve yards in all are mated for the egg trade and it is safe to say they have one of the best flocks of R. C. Rhode Island Reds in the country today.

STEP UP TO IT— The magnificent winnings at the late big Chicago and Hagerstown shows by McDanell's Golden and Columbian Wyandottes. Eggs from this stock will do it. Special exhibition matings, \$5 per 15, \$8 per 30. Regular pens, \$3 per 15, \$5 per 30. Order from this; I'll do the rest. Modern plant. 50 per cent egg yield, Jan. and Feb. 8 yrs. reliability. Catalog. **Old Homestead Farms** J. H. McDanell, Proprietor R. 2, Warsaw, Kentucky

INCUBATORS 	CLOSE-TO-NATURE BROODER <p>A Brooder built on the Most Exact Scientific Laws. Three life-saving Principles not found in any other brooder invention: Warmth by Conduction and Contactation; Ventilation by Induction and Percolation; Prevention of Piling and Crowding by Mechanical Construction. Has met with a most remarkable reception the past three years, being used and endorsed by many, scientific and successful poultrymen. Not a novelty, a hot air bake oven, a lampless cold storage box, nor a dollar "system", nor a quick-get-rich-forty-foot-lot plan, but it is an expensively constructed, common sense, close-to-nature chick nurse, blending the instincts of the mother hen with the reason of man and satisfying every natural impulse of the chick. Brooders are double, metal lamp box outside, hovers adjustable, double tops, triple hover floors, withstanding wind and weather. Brooders for orchard and field, and Independent Hovers ready for instant use in box or shed. Need little attention. Eminently the brooder for the business man and the farmer.</p> <p>Incubators of same high merit and equal successful experience of the brooders. Catalog free.</p> <p>CLOSE-TO-NATURE COMPANY, 38 Front Street, COOLFAX, IOWA.</p>	 HOVER

NONE JUST AS GOOD

A 168-Page Book That Tells All About Concrete

FREE After reading this instructive book any farmer can make and use concrete in many useful ways. It contains 168 pages, and is filled with plans and specifications and photographs of farm structures that may be built of concrete. This book—"Concrete Construction About the Home and on the Farm"—is free to farmers. Write for it today.

ATLAS PORTLAND CEMENT

Makes The Best Concrete

ATLAS is the standard American brand of cement. It is made of genuine Portland Cement rock. It contains no furnace slag. There is only one quality of Atlas manufactured—the best that can be made and the same for everybody. 4,500,000 barrels of Atlas were ordered by the U. S. Government for the Panama Canal.

Ask your dealer for ATLAS. If he cannot supply you, write to

The ATLAS Portland CEMENT Co.
Dept. 157 30 Broad St., New York
Daily Productive Capacity, over 50,000
Barrels. The largest in the world.

ESSO

RE-CARBONIZED
CHICKEN
CHARCOAL

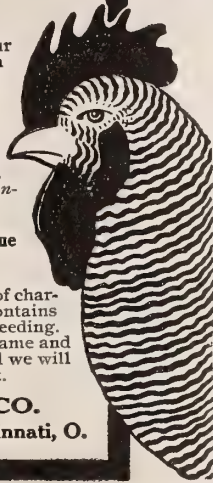

Healthy Chickens mean Healthy Profits

There is no profit in a sick chicken. Your chickens need charcoal to keep them in good condition. But do you know there are *two kinds* of chicken charcoal? One is once-burnt; the other is *re-carbonized*—twice-burnt. Esso Chicken Charcoal is the best and purest you can buy—because it is the only chicken charcoal that is *re-carbonized*—twice-burnt. The only charcoal in which no gritty uncharred pieces are to be found.

Write for our Free Booklet "The Value of Charcoal in Poultry Raising."

This book tells the facts about both kinds of charcoal. It is well worth your reading and contains some excellent suggestions for proper feeding. Send us your name and address with the name and address of your poultry supply dealer and we will mail you a copy of this booklet free of cost.

The S. OBERMAYER CO.
641 Evans Street. Cincinnati, O.

S. M. Dickinson, Granville, Ohio, issues a very nice catalogue on a fine quality of paper, printed in two colors, and nicely illustrated, which of itself speaks well for the quality of Mr. Dickinson's White Rocks.

Mating list of Chas. G. Pape, breeder of Single Comb Black Minorcas, Ft. Wayne, Ind., gives a detailed description of Mr. Pape's winnings and matings and prices on same.

Dr. J. C. Andruss, Canandaigua, N. Y., 326 Gibson street, breeder of Columbian Wyandottes, has some ten pens of this variety mated for the egg trade. His catalogue gives prices of same and detailed information concerning his stock.

John M. Poley, Royersford, Pa., breeder of Buff Rocks exclusively, issues a neat catalogue with many illustrations of his prize-winning specimens at Madison Square Garden and other shows, and describing his eight pens of this variety, with prices, etc. Mr. Poley is president of the American Buff Rock Club.

D. W. Young, Monroe, N. Y., issues a very complete catalogue of his Single Comb White Leghorns, which have been winning at Madison Square Garden for a number of years past. He has thirty yards mated for the egg trade.

Simmon & Crittendon, Geneva, Ohio, issue a circular describing their Redskin Strain of Rose Comb Rhode Island Reds, of which they have five pens mated for the egg trade, including their many prize winners at Youngstown, Buffalo, Cleveland and other shows.

The Livingston Poultry Yards, Jonas Haynor, manager, Livingston, Col. Co., N. Y., presents a booklet giving a detailed list of their winnings and descriptions of their thirteen pens of Barred Plymouth Rocks from which they are offering you eggs for hatching.

A. E. Blaker, Parsons, Kan., Box 56, Route 2, breeder of Barred Plymouth Rocks and White Holland turkeys, issues a very complete catalogue showing many illustrations of his prize-winning Barred Rocks and White Holland turkeys.

E. L. Delventhal, Warrentown, Mo., who makes a specialty of Buff Rocks, has seven pens of this variety mated for the egg trade, from which he is offering eggs for sale.

R. C. Stewart, Route 11, Big Rapids, Mich., breeder of Rose Comb Black Minorcas, has four fine pens of this variety mated for the egg trade and is also prepared to furnish day-old chicks of this variety at reasonable prices.

Reliable Incubator & Brooder Co., Quincy, Ill., issue a very large and profusely illustrated catalogue of their Reliable incubator and a full list of poultry supplies. This is the twenty-eighth annual catalogue issued by the Reliable Incubator & Brooder Co.

Carver & Avery, Columbia City, Ind., issue their twelfth annual mating list of their Partridge and Silver Wyandottes. Messrs. Carver & Avery have a very long list of prizes to their credit during the past, as the winnings they have made on these varieties include all of our prominent shows, as well as the St. Louis World's Fair. At the late Missouri state show, held at St. Louis December, 1909, they again demonstrated their ability to win. They have in all some ten grand pens mated for the egg trade.

Pleasant View Poultry Yards, Anna M. Lembke, manager, Box 9, Griswold, Iowa, issue a booklet in two colors describing their work and win strain of Rose Comb Rhode Island Reds. They have in all some nine fine pens mated for the egg trade, from which they are prepared to supply you eggs for matching at reasonable prices.

Harold Purvis, Butler, Pa., breeder of White Orpingtons exclusively, won at Cleveland, Ohio, third cock, second and fifth hen and second pullet. And at Madison Square Garden last year he won second cock, third cockerel and second hen. He has five pens mated for the egg trade, besides a flock of birds on free range. He also reports having several fine cockerels yet on hand which he can spare. His ad appears elsewhere in the American Poultry Journal.

Cut Your Operating Expenses in Half.

operates both flame controller and damper. The result is a saving of half the oil.

My new Tandem Thermostat and Acme Trip Burner with combined damper and flame regulation will do it.

Fits any Incubator or Brooder. My Acme Trip Burner has automatic flame controller connected with regulator. My Tandem Thermostat operates both flame controller and damper. The result is a saving of half the oil.

Acme Burners Fit any Lamp

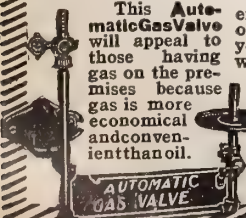

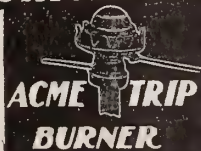

Tandem Thermostat Fits any Regulator

I furnish all attachments for connecting to both damper and flame controller. I make complete regulators to fit any Incubator, also complete lamps. My Acme Automatic Lamp has large oil reservoir, automatic valve keeps oil always same height on wick, insuring even heat. Acme wicks need no trimming, no smoke, no soot, no overheating, no danger from fire.

This Automatic Gas Valve will appeal to those having gas on the premises because gas is more economical and convenient than oil.

I manufacture regulators, lamps, burners, tanks, heaters, etc., to fit any incubator, everything to remodel your old incubator and make it better than new. I will send you Free my catalog and big book of plans by which you can build your own Incubators and Brooders. 25,000 have already built their own machines from these plans. My new Lampless Brooder will cost you less than \$4.00 to build. No lamp, no tank, no expense to operate. Greatest Brooder on earth. Write today and let me know what you need.

H. M. SHEER, 45 Hampshire St., Quincy, Ill.

**RIVER HOME POULTRY YARDS
BRANCHING OUT.**

The River Home Poultry Yards, of Perrysburg, Ohio, have just opened a new office at 319 St. Clair street, Toledo, Ohio, so that they may better handle the growing business in the sale of the famous Norwich Automatic Feeder and Exerciser in the central West. The immense demand for these machines has called for this move, and the River Home people are now ordering the feeders by the carload and are handling them through a large warehouse, admirably situated on the Toledo Terminal Belt railroad, which gives them unexcelled shipping facilities.

These machines have been gaining in favor with the poultry raisers from their first appearance on the market a little less than a year ago, until at the present time the sales have passed the 10,000 mark. There is a reason for this success.

KEMIFORM, THE CHICK SAVER.

Millions of little chicks die each year of bowel trouble and cholera, but no loss occurs where Kemiform is used in time as a preventive or cure. It is claimed to be the safest and best remedy for ailments of this nature in existence. To prevent loss from these troubles is an important problem in successful poultry raising. A big hatch really does not mean much unless you are able to care for the youngsters through this dangerous period. Kemiform acts as a general corrective and also aids digestion. It should be given regularly to all little chicks in their drinking water. Everyone who appreciates healthy, bright-eyed poultry would do well by keeping this splendid article always on hand.

CORRECTION.

We would like to call the attention of our readers to a mistake in our March issue. The name of David O. Bootz, who recently took up his work as manager of the poultry plant of F. Gage Cutler, Carthage, Ill., was printed Booty. No one will know him by this name of course. He is very well known in Illinois, and especially in the vicinity of Peoria, Ill.,

where his home has been, as an expert poultryman of exceptional ability. He has had a good many years' experience

dotted, together with my good will for one year, to the Sheffield Farm, Glendale, Ohio, and shall have no stock or eggs for

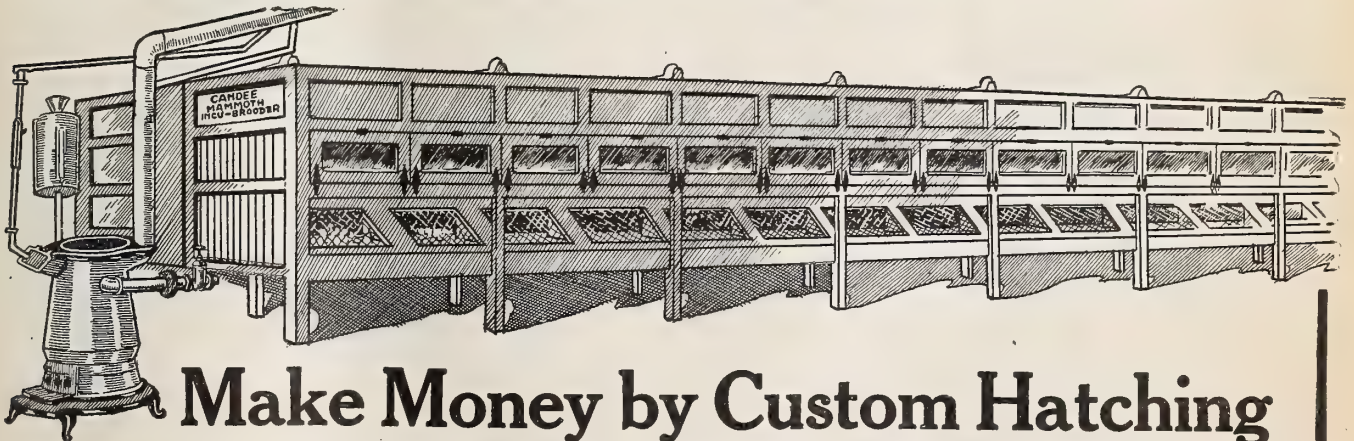

First prize Single Comb White Leghorn pen at the late Cleveland show. Bred and owned by White Feather Poultry Farm, Rocky River, Ohio.

in mating and rearing birds to produce fine show specimens.

I have sold all my Partridge Wy-

sale during that time. I heartily recommend all of my customers to purchase their stock and eggs from this farm.

M. H. COFFIN.

Make Money by Custom Hatching

INCUBATOR For Settings of 2,400 Eggs and Upward will Soon Pay For Itself. It is the Sensation of 1910 Among Poultry Dealers.

Read Its Patented Features

Perfect heat control of each compartment besides a separate control of the heater.

Each unit for 600 eggs independent, permitting shutting off or enlarging.

No expansion tank or float or chance to leak.

Perfect insulation and ventilation and easily cleaned.

Simplicity of operation—nothing to get out of order or to wear out. Economy in fuel because of the perfected hot water heater, which is safe, sure and automatic.

Hot Water Brooders and Hovers

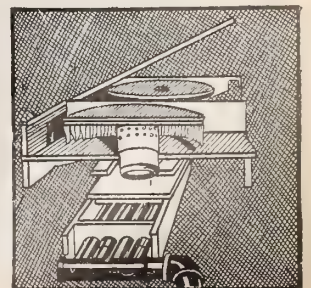

The Candee System is daily used by hundreds. It is economical to install and the very cheapest to operate. Chicks are raised in them under ideal conditions.

CHAMPION BROODERS

Our 1910 model is the best and finest brooding device ever put on the market. Outdoor, indoor and lampless brooder, weaning coop and small colony house, all combined in one machine for less money than you pay for just "brooder" in other makes. The Champion is the standard Brooder of the world. We have customers using as many as 50 on their farms. No other brooder like it.

Champion Patents

Many manufacturers are using some of our patented features in their brooders. Beware of these infringements as we intend to prosecute all such manufacturers and users of infringing brooders. Our patents cover all two compartment brooders, others are infringements, and if you buy them you are liable to heavy damages.

How They Work

"I have used two other kinds, but yours beats them all."—Jos. McCloskey, Watseka, Ill. "My Champion raised 145 chicks for me without the loss of one."—E. U. Harris, Hagerstown, Md. "Never had a chick sick with weak legs or bowel trouble in the Champion."—Nick Morris, Goshen, Ind. "I raised 600 chicks in two Champions last year and lost only three chicks."—R. Robetts, Boston, Mass. "My Champion chicks grow like weeds. Keep the brooders outdoors all winter."—Jas. Shinsler, Augusta, Me. We have hundreds of others on file.

The Champion is the only brooder which will work outdoors in winter without shelter. The powerful heater does it. Uses one-half the oil of others use. Don't buy until you get our catalog; it's free.

J. A. Bennett & Sons Company

929 Main Street : Gouverneur, N. Y.

DOWN-TO-THE-MINUTE BROODING APPARATUS.

Herewith are two pictures which illustrate what the manufacturers claim to be the latest and best brooding devices thus far invented and offered to poultry raisers. One is the World's Challenge Fire-Proofed Adaptable Hover, for use in brooders; the other is the One-Lamp Sectional Paradise Brooder, for indoor use in residences, poultry houses, etc. Both are manufactured, sold and guaranteed by Cyphers Incubator Company, Buffalo, I. Y. They are carried in stock at the factory, also at the branch stores of this company, 23 Barclay street, New York; 12-14 Canal street, Boston, Mass.; 340-344 N. Clark street, Chicago, Ill.; 2325 Broadway, Kansas City, Mo., and 1569 Broadway, Oakland, Cal., whence shipment is promised by the Cyphers Company within forty-eight hours after orders are received.

The Adaptable Hover (Fig. 1) is used in each of the four sizes of Cyphers Company Standard Self-Regulating Brooders, and is also sold separately for use in brooders of other makes, also in home-made brooders built of goods boxes, piano and organ cases, etc., also in colony roosting coops, colony houses or other poultry buildings. As its name indicates, it is "adaptable" for use in any form of enclosure in which little chicks can be confined or housed with safety.

The Cyphers Company Adaptable Hover is self-regulating and self-ventilating. It will not overheat and the ventilation is automatic-infallible. Fresh, warm air is supplied the chicks constantly in moderate amount, day and night. This adaptable hover has been approved by the representatives of the National Board of Fire Underwriters and bears the official insurance label—a feature that is found in no other oil-heated brooding device on the market. The manufacturers claim that this adaptable hover can be used in or near any building with absolute safety. The complete hover, safely boxed for shipment, f. o. b. Kansas City, Mo., and other eastern points, sells at the low price of \$8.50.

Many of our readers who wish to save the expense of special poultry buildings, or of a large number of outdoor brooders, should send for Cyphers Incubator Company's separate booklet, which describes and fully illustrates the Paradise Brooder, a one-lamp sectional indoor brooding device that, in complete form, as shown in the picture herewith, will accommodate 400 chicks at one time, 50 chicks in each lot, and all heated by a single blue-flame stove or lamp. This brooder has been on the market four years and is giving uniform satisfaction. The booklet here mentioned contains convincing reports from poultrymen of well-known integrity. By the use of this economical and thoroughly practical brooding device 1,200 to 1,600 chicks can be raised to broiler age—eight to ten weeks old—in an ordinary living room in a dwelling house and the chicks at all times will be under perfect control.

Write today to Cyphers Incubator Company for their 160-page 1910 Catalogue and Poultryman's Guide, also separate booklet describing the Paradise Brooder. Both are free, postpaid, if you will kindly mention this paper. Address branch house nearest you.

L. H. Eldridge, Bradford, Ill., breeder of Buff Orpingtons, issues a neat little catalogue giving full information as to his winnings during the last couple of years and full description of his six fine pens from which he is offering eggs for sale. One page contains an illustration of "Grandma," an eight-year-old hen which has never been defeated in the showroom.

J. H. CROSLLEY, BOX 177, MAGNOLIA, N. J.

Mr. Crosley, who makes a specialty of breeding Single Comb Rhode Island Reds, showed three birds at the late Philadelphia show in a good class of Reds, where he won three prizes on the three entries as follows: Second cockerel, second and

Fig. II—Sectional One-Lamp Paradise Brooder for Indoor Use. Capacity 400 Chicks in Eight Lots of 50 Chicks Each.

third pullets. At the Norristown, Pa., show in December Mr. Crosley won first prize hen and special on cockerel. These prizes were won in competition with birds which had a long list of prizes to their credit at many of the large shows. Mr. Crosley has been a successful breeder of Rhode Island Reds for many years past and has fine quality, having both good shape and color, as well as laying strain.

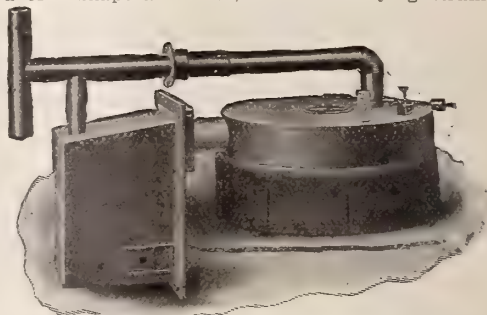

Fig. I—Cyphers Company Self-Regulating Fire-proof Adaptable Hover.

He is prepared to supply you with baby chicks at very reasonable prices. Look up his ad elsewhere in the American Poultry Journal.

Mr. Ben W. Wilhite, Crawfordsville, Ind., breeder of S. C. Black Minorcas, reports that at the late Crawfordsville show he won first cockerel, first and second hen, first and second pullet, first pen and sweepstake special. This bird was pronounced by Judge S. P. Lane as being the best Black Minorca pullet he had handled this season. Mr. Wilhite has recently purchased some fine Buff Orpingtons, which were also winners at the Crawfordsville show, and is offering eggs from both of these varieties for sale at very reasonable prices. Satisfaction is guaranteed to all by Mr. Wilhite. His ad appears elsewhere in this issue.

Dr. Wilbur Dace, Rushville, Ill., breeder of Single Comb Rhode Island Reds, sends us circular describing his matings, which consist of three fine pens all headed by high scoring males and containing females of equal quality. He also has several utility matings and is prepared to furnish you day-old chicks from any of these pens at reasonable prices.

CLASSIFIED ADS

UNDER this heading ads will be inserted for six cents per word each month for less than three months, and four cents per word each insertion for three months or longer. Changes in copy allowed every three months. Numbers and initials count as words. All ads will be inserted under classified headings. No ads accepted at less than an average of fifty cents per insertion. Terms, cash with each ad. Count the words carefully to avoid delay in publishing. Write your copy plainly, as upon this the correctness of your ad largely depends. When placing your ads remember that advertisers of Classified Ads get better returns from AMERICAN POULTRY JOURNAL than from any other poultry journal—none excepted. On writing any of these advertisers mention A. P. J.

ALL COPY FOR CLASSIFIED ADS MUST REACH US BY THE 19th OF THE MONTH PRECEDING DATE OF ISSUE

BLACK ORPINGTON EGGS from hens that score 95. "Orpington," Delavan, Wis. 4-1

BUFF ORPINGTONS.—We have an abundance of health, vigor and laying qualities in our Buff Orpingtons. They have made a wonderful laying record this winter, the coldest here in 10 years. We have won many prizes with them, as you may learn from our Mating List. Our breeding stock is housed in fresh-air houses, which results in a high percentage of fertility in eggs, as well as great vigor in chicks. Our young stock is reared on free range on our 140-acre farm giving the youngsters a fine start in life. Before placing your order for eggs, write for Mating List, containing show record, as well as other particulars, which make our proposition on Buff Orpington eggs one of the very best in the country. A few fine cockerels for sale. Grannis Brothers, R. F. D. 12, La-Grangeville, Dutchess Co., N. Y. 1-10-1yr

Eggs from the grandest matings at \$3 per setting. We still have a few choice cockerels in Silver and White Wyandottes at \$3 and \$5 each. Wertzberger Brothers - Care Merchants Hotel - Altoona, Pennsylvania

Victory For Bleakley's Buff Rocks

At Missouri State Show, December 6th to 11th, the largest show ever held in America, my Buffs, in competition with birds from all parts of the U. S., made the following unequalled record: First, third, fourth cockerel; first pullet; fourth cock and third pen. Southwest District cup (comprised of ten states) for best cock, hen, cockerel and pullet; silver cup, gold medal and diploma for best cockerel; silver cup for best pullet. Tied for \$100.00 silver cup for best cockerel in show; two club specials for best colored male and female. This, with my record of the past six years, makes my Buff Rocks the greatest winning strain in America.

J. J. Bleakley Life Member American Poultry Association State Vice-President Buff Rock Club R. 3, Box B, Abilene, Kansas
